HIGH POINT PHASE III, BLOCK 34

MASTER USE PERMIT

A 54 Unit Residential Development-Seattle, Washington

Polygon WLH, LLC.

SITE INFORMATION

Site Address: 6921 31st Ave S.W.
Seattle, WA 98126

Legal Description: LOTS 34-2, 34-3, 34-4, 34-5, 34-6, AND 34-7, OF BLOCK 34, PLAT OF HIGH POINT COMMUNITY, ACCORDING TO THE PLAT THEREOF RECORDED IN VOLUME 221 OF PLATS, PAGE 4-35, RECORDS OF KING COUNTY WASHINGTON.

Parcel Numbers: Block 34:
- Lot 34-2:
  3278614750, -4760, -4770, -4780, -4790, -4800, -4810, -4820, -4830, -4840, -4850, -4860, -4870, -4880, -4890, -4900, -4910, -4920, -4930, -4940, -4950, -4960
- Lot 34-3:
  3278614970, -4980, -4990, -5000, -5010, -5020, -5030, -5040, -5050, -5060, -5070, -5080, -5090, -5100, -5110
- Lot 34-4:
  3278615120, -5130, -5140, -5150, -5160, -5170, -5180, -5190, -5200, -5210, -5220, -5230
- Lot 34-5:
  3278615240, -5250, -5260, -5270, -5280, -5290, -5300, -5310, -5320, -5330, -5340, -5350, -5360, -5370, -5380, -5390
- Lot 34-6:
  3278615400, -5410, -5420, -5430, -5440, -5450, -5460, -5470, -5480, -5490, -5500, -5510, -5520, -5530, -5540, -5550, -5560, -5570, -5580, -5590, -5600, -5610, -5620, -5630, -5640, -5650, -5660, -5670, -5680, -5690
- Lot 34-7:
  3278615700, -5710, -5720, -5730, -5740, -5750, -5760, -5770, -5780, -5790, -5800, -5810, -5820, -5830

Land Use Zone: L4 & L2 (meet the intent of standards for LR-2)

Site Area: Block 34 = 188,653 s.f. (verify with civil plans)

Site Coverage: 152,627 s.f.

Impervious Area: 98,783 s.f.

Unit Count:

E16 Townhome	21
E20 Townhome	16
2503 Single Family	8
2406 Single Family	9
Total	**54 Units**

Parking: Required Stalls 54 per section 23.54.015 (1 per unit) 2
Proposed Stalls
- Attached Garage Stalls (at townhomes) - 53
- Driveway Apron Stalls (at single family homes) -17
- Open Parking Stalls -15
- (including 9 regular and 6 paralel parking stalls)

Total: 85 Stalls
Average/Unit: 1.57 Stalls/Unit

Open Space: Per 23.45.016 Open Space Requirements for Lowrise zones

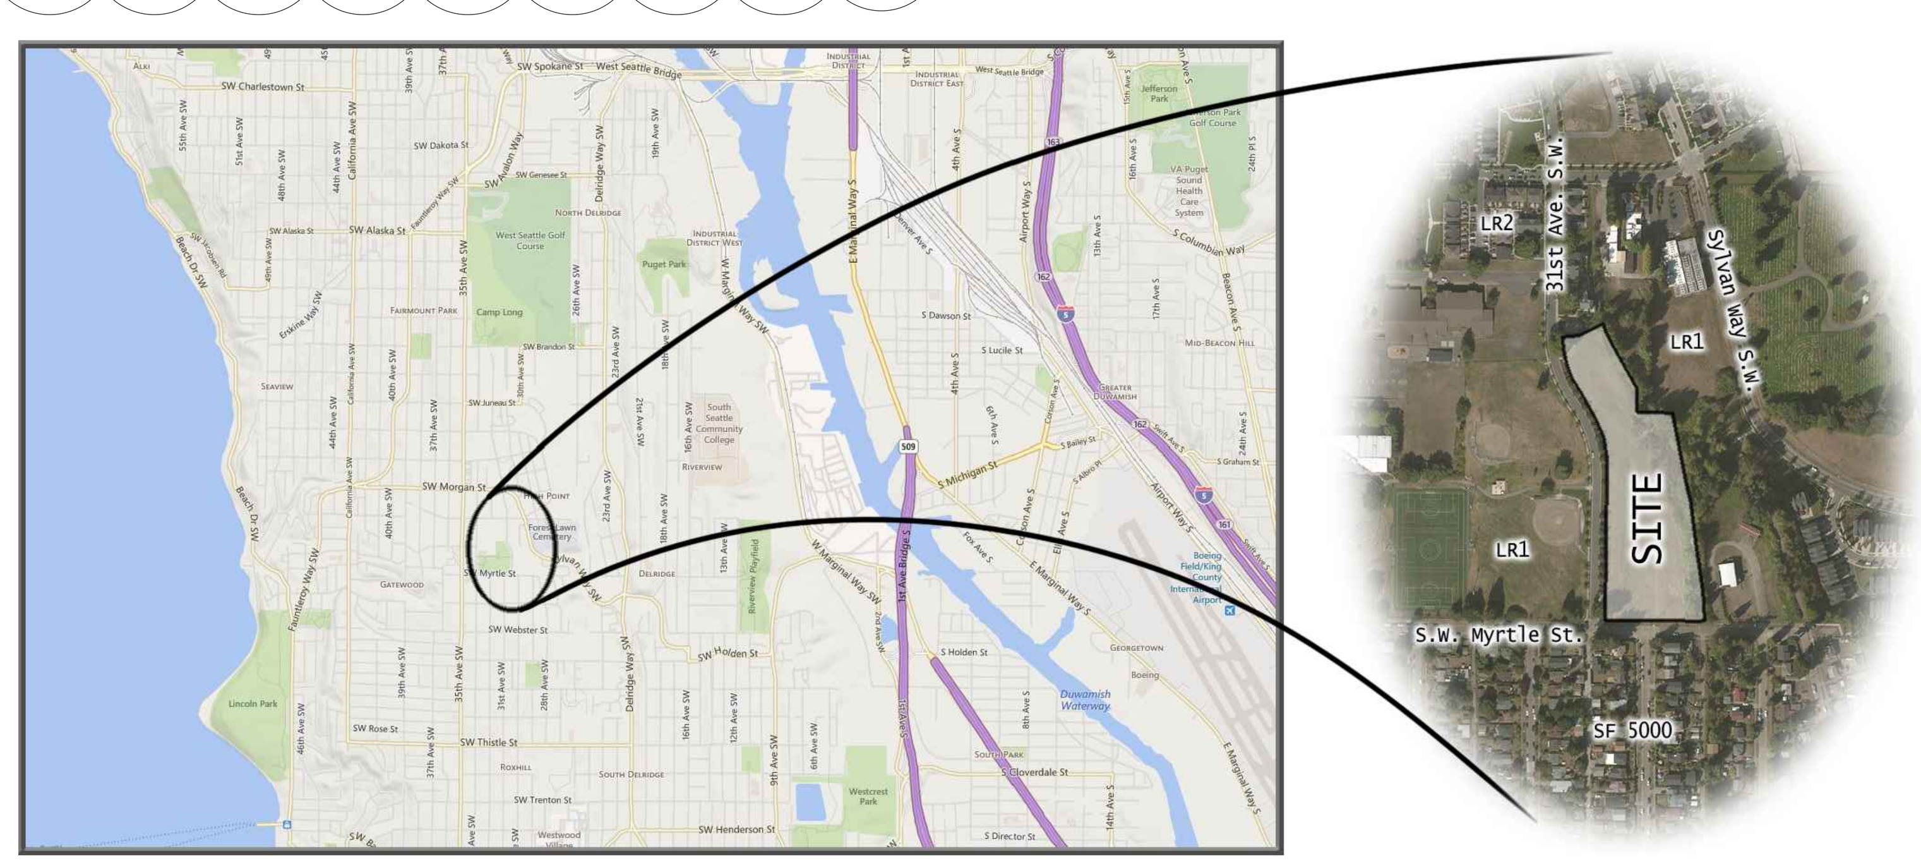
L2 Zone = Average 300 square feet per unit with no unit having less than 200 square feet of private usable open space.

Units 9-16 single family and 6-8 townhouse all have 300+ S.F. of private usable open space via front yards, porches and rear decks.
19 units x300 = 5,700 s.f. required usable open space.
Provided 24,929 s.f.

L4 Zone = Minimum of 15% of lot area + 200 square feet per unit of private usable open space.

Site Area L4 Zone = 119,309 s.f.
(119,309 X .15) = 17,896 S.F
35 units X 200 = 7,000.
17,896 + 7,000 = 24,896 S.F. required usable open space.
Provided 35,789 s.f.

Total: 60,718 s.f. usable open space.



VICINITY MAP
N.T.S.

PROJECT INFORMATION

Project Name: Highpoint Phase III, Block 34

DPD Project Number: 301859

Scope: New construction of fifty four (54) Townhome units within six (8) separate buildings and seventeen (17) Single Family homes.There will be (1) 3 plex townhome, (3) 4 plex townhomes, (2) 5 plex towenhomes and (2) six plex townhomes. There will be (2) different single family homes with (3) elevation types for each home.

The site is situated on Blocks 34 of the High Point master planned development. The layout of the site generally follows the layout proposed in the High Point Design Manual. Three access points are being provided. One for single family home 9 located on S.W. Myrtly Street and two access points for the rest of units on Block 34. The two access points form a loop through the site. Parking is provided by garages at each unit. In addition apron parking in front of the garages has is being provided.

The majority of the site has slopes dropping from west to east. The slope drops more sharply as it gets closer to the northern property line. There are a number of existing trees on site which will be protected during construction.

PROJECT TEAM

Owner: Seattle Housing Authority
120 6th Avenue North
Seattlet, WA 98109

Applicant: Polygon WLH, LLC
11624 SE 5th Street
Bellevue, WA 98005

Architect: Milbrandt Architects, Inc., P.S.
11715 SE 5th St. Suite100
Bellevue, Wa. 98005
(425) 454-7130

Civil Engineer: Core Design, Inc.
14711 NE 29th Place
Bellevue, WA 98007

Landscape Architect: Core Design, Inc.
14711 NE 29th Place
Bellevue, WA 98007

ACCESSIBILITY

No accessible dwelling units are required for this specific development. The approved SHA High Point master plan has allocated specific blocks that will contribute to the overall required 5% accessible unit requirement. This Block is not one of these designated sites, therefore accessible units are not required.

Part II –Site and Development Info

Block 34 (34-1, 34-2, 34-3, 34-4, 34-5, 34-6, 34-7)

1. *Please describe the existing site, including location, existing uses and/or structures topographical or other physical features.*

The site proposed for our project is in West Seattle located in the southeast corner of the Plat of High Point Community directly across 31st Ave. SW from High Point Park. This site is being proposed for development within High Point through our partnership with the Seattle Housing Authority.

With regard to the site conditions, the existing topography on the site has fairly steep grades and falls between 40 to 60 feet from 31st Ave. SW to the east. Also, there are several trees on the site. The original plans for the Plat of High Point Community show two trees to be saved (numbered 786, and 799). Both trees appear healthy and we do not anticipate encroaching into the root zone with the improvements proposed by this project.

As for infrastructure, the road improvements and utilities on the west side of the site along 31st Ave. SW, and on the south along SW Myrtle St. have been completed as part of the original SIP plan for the High Point Community. There is a large area on the eastern portion of the site designated as a ECA Boundary with a 15' critical area buffer. All of the 15' setbacks impact buildable area on the eastern portion of the subject site.

2. *Please indicate the site's zoning and any other overlay designations, including applicable Neighborhood Specific Guidelines*

The zoning designation for the site is L4 for the northern portion and L2 for the southern portion and there are currently 209 platted lots over an area of 188,653 square feet. The property to the immediate north of this site is zoned L4, and to the south are single family plats zoned SF5000. The Montrepose Cemetary is to the east of the site and the Walt Hundley Playfield is directly to the west. While there are no Neighborhood Specific Guidelines for the project, the site is part of the High Point Community and the Seattle Housing Authority has created the High Point Design Book in a cooperative effort with the City of Seattle. These guidelines augment the City of Seattle's design guidelines and support the overall goals of the High Point redevelopment project. We have designed this project to conform to the intent of these guidelines within the framework of the City of Seattle's zoning code.

3. *Please describe neighboring development and uses, including adjacent zoning, physical features, existing architectural and siting, views, community landmarks, etc…*

All of the neighboring uses and development fall under the Plat of High Point Community which is a redevelopment project by the Seattle Housing Authority intended to re-integrate the High Point community by reorganizing roads, uses, and housing types in a manner consistent with other neighborhoods within the area.

With respect to our specific project within the High Point Community, the area to the north is in the LR-4 zone and has "for sale" single family detached residential housing either already completed. The area to the south is an existing residential community zoned as SF5000. To the east is a cemetery and to the west is a community park.

Several examples of the types of housing that are typical to the High Point Community lie to the northwest of our proposed project and reflect an architectural style and siting pattern that is typical of West Seattle. These existing homes are two story single family houses or three story townhomes with varying types of entries, siting, and access.

The area to the east is a steep slope and designated as an environmentally critical area with a 15' critical area buffer. There are views looking east out toward the ECA. The proposed site has been designed to maximize view corridors toward the east.

4. *Please describe the applicant's development objective, indicating the types of desired uses, the number of residential units, amount of commercial square footage, and number of parking stalls. Please also include potential requests for departure from development standards.*

The proposed residential housing project has been designed to reflect the redevelopment goals of the High Point Community, as stated in the High Point Design, through a collaborative effort with the Seattle Housing Authority. This process has been ongoing over the last several months with design meetings taking place regularly with the Seattle Housing Authority to discuss alternatives and to review design adjustments made in order to reflect the guidance cues found in the City of Seattle Design Guidelines, The High Point Design Book, and comments received from the Seattle Housing Authority.

From this process we completed our preliminary design which illustrates 17 single-family residences with attached garages, and 37 townhome residences composed of 1 three-plex buildings, 3 four-plex buildings, 2 five-plex buildings and 2 six-plex buildings all with private garages. All of the townhome units will be along 31st Ave. SW. and will have tuck-under garages accessed via a private internal road to the east to take advantage of the sloped site. The single family residences will all incorporate a daylight basement to work with the slope and maximize the available views to the east. The proposed residences will range from 1,600-2,866 square feet and will be around 30'- 40' from average grade to the roof peak. All the single family residences will have their own attached one car garage, while each of the townhome units will have either an attached one or two car garage. All of the residential plans have several varying elevation styles to provide a variety of different appearances to units with similar plans.

Due to the varying lot widths of 15'-34' needed to accommodate the different residential housing types, a boundary line adjustment will need to be completed in order to reorganize the platted lots into the configuration currently planned and our research into the SMC indicates that we will need a departure from the modulation requirements for the townhomes and the single family homes in order to have the project approved.

Design Guidelines

In an effort to create a desirable living environment for the future residents of the High Point, Block 34 project the design team worked closely with the Seattle Housing Authority. The team used the High Point Design Book developed specifically for the High Point Redevelopment Project as the basis for all aspects of the design. Building location, building massing, facade articulation, neighborhood context, color, pedestrian orientation were all issues considered and discussed with Seattle Housing Authority as it relates to the High Point Design Book as well as the City of Seattle's Design Review Guidelines. Several previous design options from other developers were discussed and through collaboration with the City the current proposal was developed to provide an option that provided the most site amenities while minimizing road surface and circulation that would impact the open feel of the site. The following is an outline of those issues most pertinent to the design of the project.

Parking and Vehicle Access & Human Activity
Block 34 sits in the Southeast Corner of the High Point Redevelopment Project directly across 31st Ave. SW from High Point Park. The property is long with most of the frontage along 31st Ave. SW. The site consists of a mix of three-plex to six-plex townhome buildings along 31st Ave. SW and 17 single family homes behind to the east. All homes except one will gain vehicular access off of a new internal private drive running north-south down the center of the site with connection to 31st Ave. SW and SW Myrtle St. The one remaining single family house is accessed directly off of SW Myrtle St. Parking consists of attached garages at the townhomes as well as the single family homes.
Pedestrian access is designed in separate corridors. There are several pedestrian corridors that provide access between the townhome buildings to the houses beyond. This layout provides a diverse community and at the same time a pedestrian friendly streetscape along 31st Ave. SW. while allowing easy pedestrian access from all residences to the public pedestrian corridor and the neighboring parks. By locating the parking off the private drive separated from the pedestrian walks interaction between automobiles and pedestrians is minimized.

Respect for Adjacent Sites
Care has been taken on this project to provide privacy for all the residences. The living spaces and bedrooms have been oriented toward the front and rear of the units, thus minimizing the need for windows on the sides where buildings face each other. The various groupings of houses are separated by pedestrian or vehicular corridors providing greater separation between facades with windows. The back yards of all single family houses will have fenced back yards providing additional privacy for the residence.

Transition Between Residence and Street
All homes facing 31st Ave. SW will be separated from the street by a landscaping strip planted with trees, a public sidewalk, and then private green open space. All of the townhome units along this street will incorporate a private entry porch elevated from the street level providing a space for private recreation that is separate from the public pedestrian corridor. Homes not facing 31st Ave. SW will access the unit by pedestrian corridors oriented perpendicular to the sidewalk. All of these homes will also incorporate a private elevated entry porch. As mentioned above these pedestrian access corridors are separated from the vehicular corridors.

Bulk and Scale Compatibility
The single family homes will be 2 stories with a daylight basement and the townhomes 3 stories. All buildings will be traditional residential in nature, wood framed with hip and gable roofs. The size and character of the buildings will be very similar to other residential buildings in the High Point Redevelopment Project as well as similar to houses and townhomes throughout West Seattle neighborhoods. Great care has been taken to provide both vertical and horizontal articulation on the facades of the buildings. Covered porches and pop-outs of various sizes and variation of the roof elements all contribute to interesting facades that will blend in well with existing neighborhoods.

Architectural Context & Human Scale
As with the bulk and mass of the building design, great care has been taken on the facades of all buildings to provide architectural elements consistent with other homes throughout the West Seattle neighborhoods. Porch columns, architectural details, windows and roof forms are all typical of housing in the surrounding area. All houses have porches in the front which face toward the street or the pedestrian corridor. The porches along with the pedestrian circulation will provide the home passer-bys as well as the home a residential character of a human scale.

PROJECT DEPARTURES

23.45.012 Modulation Requirements - Low Rise Zones

- **Townhomes:**

All the townhome buildings are facing 31st Ave. SW with their west side and these are being considered front facades. All of these facades are 2 stories along the 31st Ave. street front and are more than 40' with a principle entrance and so require modulation.

The front facades of these buildings vary from 57' to 104'-3" wide depending on the number of units in the building. At the street level a 6'-0" deep minimum offset (Entry Porch) is provided varying from 10'-0" to 18'-0" wide. There is also a 1'-4" deep offset is provided through an architectural pop-out extending from the ground to the roof. These features are provided for every unit in varying forms to provide individual character to each building and reduce repetition. These offsets do not meet the 4' deep modulation requirement. We request a departure for the depth of modulation for these bays. The combination of the horizontal and vertical articulation along the front townhome facade and the introduction of the prominent individual entry porches add a considerable amount of variety and interest to the facade. We ask that you consider this variation from the minimum modulation requirements met with the offset articulation.

Interior facades for all the townhome buildings are wider than 40' and require modulation. The side elevations show a 2'-0" offset on both sides of the elevation extending from the middle floor up to the roof. There is also a 12'-2" wide 1'-0" pop-out bay in the center of the façade that extends from the middle floor up through the roof line adding to the modulation and interest of the roofs. The rear elevations reflect the same modulation and style as the front elevation. Every unit has a 6'-0" deep minimum deck on the middle floor with only a portion of it being covered. Depending on how it connects to the adjoining unit it creates a variety of different sized architectural elements across the rear façade. There is also a 1'-4" deep offset provided through an architectural pop-out at every unit extending from the middle floor to the roof. Again this pop-out varies in form and material to reflect the character and variety of the front façade. The offsets do not meet the 4' deep modulation requirement. We request a departure for the depth of modulation. The combination of the horizontal and vertical articulation across the townhome facade adds a considerable amount of variety and interest to the facade along with the provided decks that provide a garage entry appearance set back from the perceived face of the elevation. We ask that you consider this variation from the minimum modulation requirements met with the offset articulation.

- **Single family units:**

All but one of the single family lots have front facades that are not longer than 30' and so do not require modulation. One of the single family lots (Lot 10) has a facade longer than 30' without a primary entrance that faces SW Myrtle St. and therefore requires modulation. Due to their location on the site the longest facade on the house will face SW Myrtle St. and become what is considered the "front facade" even though the actual entry for this house is off of the internal private drive. The 2604 house has a facade length at the middle floor of 61' and a facade length at the top floor of 48'-6". The single family units were developed as a team effort between Polygon Northwest and Seattle Housing Authority. For this house we have developed an "Enhanced" elevation for this lot which are shown on sheet A11. The enhanced elevation will have a 6' wide wrap around porch along with having the additional siding types that would provide a great deal of variation in texture and color and a gable pop-out on the middle and upper floor. In addition a decorative fence and landscaping will be added between the sidewalk and facade to help avoid the blank wall look which is the intent of the modulation requirement. We would like to request a departure for front modulation at the single family home located on lot 10. The added wrap around deck along with variation in siding, color, gable pop-out and landscaping contribute to meet the intent of the modulation requirement.

The interior facades of all single family buildings on the site require modulation if over 40' in length. The side facades of the 2503 and 2604 plans are both over 40' and are affected by this requirement.

The 2503 has a side facade length at the middle floor of 60'-5" and a facade length at the second floor of 45'-6". Modulation has been provided at both sides of the house, but the maximum length of exceeds the 30' maximum length allowed.

The 2604 has a side facade length at the middle floor of 61' and a facade length at the top floor of 48'-6". Modulation has been provided at both sides of the house, but the maximum length of exceeds the 30' maximum length allowed.

Both of these units were developed as a team effort between Polygon Northwest and Seattle Housing Authority. They have been sited on block 34 in essentially the same location and with the same spacing as outlined in the High Point Design Manual. The close spacing of the houses as outlined in the Seattle Design Manuel does not provide significant visual opportunity for pedestrians to view the sides of the houses with the exception of lots 9, 10 and 25. We have oriented these 3 houses so that the side with the most modulation faces the open areas where pedestrians and neighbors could view the interior side. In addition variation in siding type and color has been introduced into the facades divided by a horizontal belly band at the middle floor. The combination of color and siding variation, windows and the introduction of some modulation all contribute to help break up the facades and avoid the blank wall look which is the intent of the modulation requirement. We would like to request a departure for the interior modulation at the single family homes. The combination of the close proximity of the houses to one another, the variation in siding, color and the provided modulation contribute to meet the intent of the interior modulation requirement.

Departure Summary Table				
STANDARD	REQUIREMENT	REQUEST	JUSTIFICATION	RECOMMENDATION
1. Structure width and depth in low-rise zones. Table 23.45.011A (Building 8 Townhome)	Maximum building width with modulation for Townhomes is 90 feet in Low-rise 2 Zone	Allow a building width of 104'-3" for this building.	Building 8 is located in the L2 zone portion of a site that contains both L2 and L4 zones. The townhomes located within the L4 portion of the site are allowed a width of 150 feet with modulation. The widest of all buildings in both L2 and L4 zones is 104'-3" which is well under the allowed 150' and slightly over the allowed 90' in the L2 Zone. We have provided a 6' deep shift at the center of this particular building to give the appearance that it is two smaller buildings and have provided a good deal of modulation at the lower level porches, roofs and upper level deck roofs.	
2. Side Façade Modulation Standards 23.45.012.B (Building 8 Townhome)	Side Facades. On corner lots, side facades which face the street shall be modulated if greater than forty (40) feet in width for ground-related housing, and thirty (30) feet in width for apartments. Modulation shall not be required for the side facades of terraced housing.	Allow upper floors measuring greater than 40' but less than 50' at the side façade to not meet modulation standards.	Combination of the horizontal and vertical articulation across the façade has been provided in the form of a wrapped entry porch approximately 6 feet in width and vertical bay provided at the upper two levels. This vertical bay also modulates the roofline creating interest. siding and material break up also provides greater interest.	
3. Interior Modulation Standards 23.45.012.C (Townhome Buildings 1-8)	Interior Facades. Within a cluster development all interior facades wider than forty (40) feet shall be modulated according to the standards of subsection D of Section 23.45.012, provided that the maximum modulation width shall be forty (40) feet.	Allow upper floors at the sides of all buildings measuring greater than 40' but less than 50' at the interior facades to not meet modulation standards.	Combination of the horizontal and vertical articulation across the townhome façades has been used to create variation to the façade.	
4. Interior Modulation Standards 23.45.012.C (Townhome Buildings 1-8)	Interior Facades. Within a cluster development all interior facades wider than forty (40) feet shall be modulated according to the standards of subsection D of Section 23.45.012, provided that the maximum modulation width shall be forty (40) feet.	Allow rear facades that face the private drive to not meet modulation requirements of 4' deep.	All rear elevations have a combination of rear decks that are a minimum of 6' deep and have widths that range from 16 to 18 feet. Garages to all townhomes are recessed from the fronts of all decks and a combination of horizontal and vertical articulation across the townhome façades has been used to create variation to the façade along with varying deck roofs that help break up the mass and reinforse a sense of verticality and individualism.	
5. Side Façade Modulation Standards 23.45.012.B (Buildings 1 & 2 Townhomes)	Side Facades. On corner lots, side facades which face the street shall be modulated if greater than forty (40) feet in width for ground-related housing, and thirty (30) feet in width for apartments. Modulation shall not be required for the side facades of terraced housing.	Allow upper floors measuring 48'-6" at side façade to not meet modulation standards.	Combination of the horizontal and vertical articulation across the townhome façade used to create variation to the façade.	
6. Side Façade Modulation Standards 23.45.012.B (Building 10 Single Family Residence	Side Facades. On corner lots, side facades which face the street shall be modulated if greater than forty (40) feet in width for ground-related housing, and thirty (30) feet in width for apartments. Modulation shall not be required for the side facades of terraced housing.	Allow upper floors measuring greater than 40' but less than 50' at the side façade to not meet modulation standards.	Combination of the horizontal and vertical articulation across the façade in the form of a wrapped entry porch approximately 6 feet in width and vertical bay provided at the upper two levels. This vertical bay also modulates the roofline creating interest. siding and material break up also provides greater interest.	
7. Interior Modulation Standards 23.45.012.C (Single Family Residential buildings 9-25)	Interior Facades. Within a cluster development all interior facades wider than forty (40) feet shall be modulated according to the standards of subsection D of Section 23.45.012, provided that the maximum modulation width shall be forty (40) feet.	Allow upper floors at the sides of all buildings measuring greater than 40' but less than 50' at the interior facades to not meet modulation standards.	Combination of the horizontal and vertical articulation across the townhome façades has been used to create variation to the façade.

1" = 20'

NORTH

OPEN SPACE:
Required:
L2 Zone
300 sf with 200 sf min.
19 units X 300 = 5,700 S.F. required usable open space.
Provided 24,929 S.F.

L4 Zone
Site Area L4 Zone = 119,309 s.f.
(119,309 X .15) = 17,896 S.F
35 units X 200 = 7,000.
17,896 + 7,000 = 24,896 S.F. required usable open space.
Provided 35,789 S.F.

Total: Provided 60,718 S.F usable open space.

UNIT SUMMARY

2503 Single-Family	8
2604 Single-Family	9
Townhomes E1	21
Townhomes E20	16
TOTAL	54

PARKING SPACE :
Required: - 54
Provided:
Attached Garage Stalls (townhomes) - 53
Driveway Apron Stalls (single family homes) - 17
Open Parking Stalls - 15
Total Provided - 85

TOTAL LOT AREA = 188,663 s.f.
NUMBER OF UNITS ALLOWED = 188,663 / 1,600 s.f. /unit = 118 units
NUMBER OF UNITS PROVIDED = 54 units

LEGEND
- Required Open Space
- Significant Tree to be saved per High Point Community
- 9' X 18' Automobile Space

ENLARGED SITE PLANS

1" = 10'

NORTH

Building Code:	2009 Seattle Municipal Code Director's Rule 4-2012
23.86.006	The height shall be measured at the exterior walls of the structure. Measurement shall be taken at each exterior wall from the existing or finished grade, whichever is lower, up to a plane essentially parallel to the existing or finished grade. **(All existing grades are lower than finished grades).**
23.45.009 Structure Height	Lowrise 2 = Twenty five (25) Feet Lowrise 4 = Thirty Seven (37) Feet
C. Pitched roofs:	1. Except for cottage housing developments, in Lowrise Duplex/Triplex, Lowrise 1 and Lowrise 2 zones the ridge of pitched roofs on principal structures with a minimum slope of six to twelve (6:12) may extend up to thirty-five (35) feet. The ridge of pitched roofs on principal structures with a minimum slope of four to twelve (4:12) may extend up to thirty (30) feet. All parts of the roof above twenty-five (25) feet shall be pitched. 3. In Lowrise 3 and Lowrise 4 zones the ridge of pitched roofs on principal structures may extend up to five (5) feet above the maximum height limit. All parts of the roof above thirty (30) feet in Lowrise 3 zones and thirty-seven (37) feet in Lowrise 4 zones shall be pitched at a rate of not less than four to twelve (4:12).
Director's Rule 4-2012 General rule:	Formula 2 uses the average elevations at the midpoints of the sides of the smallest rectangle that can be drawn to enclose the structure. Exterior walls for height measurement purposes shall be those walls that form the footprint of the structure that include cantilevered portions of the structure. **(We have used this formula for all structures).** **Formula 2: Enclosing Rectangle.** Under this formula, the average grade level is calculated by first drawing the smallest rectangle that encloses the entire structure, including all occupied floor area. The average grade level is calculated as the average of the elevation of **existing** lot grades at the midpoints, measured horizontally, of each side of this rectangle. For irregular lots, if the rectangle enclosing the proposed structure would extend beyond the lot property lines, the Director will determine how to treat the irregularity to most closely approximate the smallest enclosing rectangle.

BUILDING 1 IS LOCATED IN LOWRISE 4 WITH A HEIGHT LIMIT OF 37' AND AN ADDITIONAL 5' IF ROOF IS 4:12 OR GREATER

SHEET ADDED FOR BUILDING HEIGHT CALCULATIONS (1)

SITE PLAN REVISED TO SHOW STEEP SLOPE INFORMATION AS SHOWN IN CIVIL DRAWINGS. (3)

ENLARGED SITE PLANS

1" = 10'

NORTH

Building Code: 2009 Seattle Municipal Code
Director's Rule 4-2012

23.86.006 The height shall be measured at the exterior walls of the structure. Measurement shall be taken at each exterior wall from the existing or finished grade, whichever is lower, up to a plane essentially parallel to the existing or finished grade.
(All existing grades are lower than finished grades).

23.45.009 Structure Height Lowrise 2 = Twenty five (25) Feet
Lowrise 4 = Thirty Seven (37) Feet

C. Pitched roofs: 1. Except for cottage housing developments, in Lowrise Duplex/Triplex, Lowrise 1 and Lowrise 2 zones the ridge of pitched roofs on principal structures with a minimum slope of six to twelve (6:12) may extend up to thirty-five (35) feet. The ridge of pitched roofs on principal structures with a minimum slope of four to twelve (4:12) may extend up to thirty (30) feet. All parts of the roof above twenty-five (25) feet shall be pitched.

3. In Lowrise 3 and Lowrise 4 zones the ridge of pitched roofs on principal structures may extend up to five (5) feet above the maximum height limit. All parts of the roof above thirty (30) feet in Lowrise 3 zones and thirty-seven (37) feet in Lowrise 4 zones shall be pitched at a rate of not less than four to twelve (4:12).

Director's Rule 4-2012 General rule:

Formula 2 uses the average elevations at the midpoints of the sides of the smallest rectangle that can be drawn to enclose the structure. Exterior walls for height measurement purposes shall be those walls that form the footprint of the structure that include cantilevered portions of the structure. **(We have used this formula for all structures).**

Formula 2: Enclosing Rectangle. Under this formula, the average grade level is calculated by first drawing the smallest rectangle that encloses the entire structure, including all occupied floor area. The average grade level is calculated as the average of the elevation of **existing** lot grades at the midpoints, measured horizontally, of each side of this rectangle. For irregular lots, if the rectangle enclosing the proposed structure would extend beyond the lot property lines, the Director will determine how to treat the irregularity to most closely approximate the smallest enclosing rectangle.

Building Code:	2009 Seattle Municipal Code Director's Rule 4-2012 (1)
23.86.006	The height shall be measured at the exterior walls of the structure. Measurement shall be taken at each exterior wall from the existing or finished grade, whichever is lower, up to a plane essentially parallel to the existing or finished grade. **(All existing grades are lower than finished grades).**
23.45.009 Structure Height	Lowrise 2 = Twenty five (25) Feet Lowrise 4 = Thirty Seven (37) Feet
C. Pitched roofs:	1. Except for cottage housing developments, in Lowrise Duplex/Triplex, Lowrise 1 and Lowrise 2 zones the ridge of pitched roofs on principal structures with a minimum slope of six to twelve (6:12) may extend up to thirty-five (35) feet. The ridge of pitched roofs on principal structures with a minimum slope of four to twelve (4:12) may extend up to thirty (30) feet. All parts of the roof above twenty-five (25) feet shall be pitched. 3. In Lowrise 3 and Lowrise 4 zones the ridge of pitched roofs on principal structures may extend up to five (5) feet above the maximum height limit. All parts of the roof above thirty (30) feet in Lowrise 3 zones and thirty-seven (37) feet in Lowrise 4 zones shall be pitched at a rate of not less than four to twelve (4:12).
Director's Rule 4-2012 General rule:	Formula 2 uses the average elevations at the midpoints of the sides of the smallest rectangle that can be drawn to enclose the structure. Exterior walls for height measurement purposes shall be those walls that form the footprint of the structure that include cantilevered portions of the structure. **(We have used this formula for all structures).** **Formula 2: Enclosing Rectangle.** Under this formula, the average grade level is calculated by first drawing the smallest rectangle that encloses the entire structure, including all occupied floor area. The average grade level is calculated as the average of the elevation of **existing** lot grades at the midpoints, measured horizontally, of each side of this rectangle. For irregular lots, if the rectangle enclosing the proposed structure would extend beyond the lot property lines, the Director will determine how to treat the irregularity to most closely approximate the smallest enclosing rectangle.

Measurement shall be taken at each exterior wall from the existing or finished grade, whichever is lower, up to a plane essentially parallel to the existing or finished grade. **(All existing grades are lower than finished grades).**

23.45.009 Structure Height Lowrise 2 = Twenty five (25) Feet
Lowrise 4 = Thirty Seven (37) Feet

C. Pitched roofs: 1. Except for cottage housing developments, in Lowrise Duplex/Triplex, Lowrise 1 and Lowrise 2 zones the ridge of pitched roofs on principal structures with a minimum slope of six to twelve (6:12) may extend up to thirty-five (35) feet. The ridge of pitched roofs on principal structures with a minimum slope of four to twelve (4:12) may extend up to thirty (30) feet. All parts of the roof above twenty-five (25) feet shall be pitched.

3. In Lowrise 3 and Lowrise 4 zones the ridge of pitched roofs on principal structures may extend up to five (5) feet above the maximum height limit. All parts of the roof above thirty (30) feet in Lowrise 3 zones and thirty-seven (37) feet in Lowrise 4 zones shall be pitched at a rate of not less than four to twelve (4:12).

Director's Rule 4-2012 General rule: Formula 2 uses the average elevations at the midpoints of the sides of the smallest rectangle that can be drawn to enclose the structure. Exterior walls for height measurement purposes shall be those walls that form the footprint of the structure that include cantilevered portions of the structure. **(We have used this formula for all structures).**

Formula 2: Enclosing Rectangle. Under this formula, the average grade level is calculated by first drawing the smallest rectangle that encloses the entire structure, including all occupied floor area. The average grade level is calculated as the average of the elevation of **existing** lot grades at the midpoints, measured horizontally, of each side of this rectangle. For irregular lots, if the rectangle enclosing the proposed structure would extend beyond the lot property lines, the Director will determine how to treat the irregularity to most closely approximate the smallest enclosing rectangle.

Building Code: 2009 Seattle Municipal Code
Director's Rule 4-2012

23.86.006

The height shall be measured at the exterior walls of the structure. Measurement shall be taken at each exterior wall from the existing or finished grade, whichever is lower, up to a plane essentially parallel to the existing or finished grade.
(All existing grades are lower than finished grades).

23.45.009 Structure Height

Lowrise 2 = Twenty five (25) Feet
Lowrise 4 = Thirty Seven (37) Feet

C. Pitched roofs:

1. Except for cottage housing developments, in Lowrise Duplex/Triplex, Lowrise 1 and Lowrise 2 zones the ridge of pitched roofs on principal structures with a minimum slope of six to twelve (6:12) may extend up to thirty-five (35) feet. The ridge of pitched roofs on principal structures with a minimum slope of four to twelve (4:12) may extend up to thirty (30) feet. All parts of the roof above twenty-five (25) feet shall be pitched.

2

3. In Lowrise 3 and Lowrise 4 zones the ridge of pitched roofs on principal structures may extend up to five (5) feet above the maximum height limit. All parts of the roof above thirty (30) feet in Lowrise 3 zones and thirty-seven (37) feet in Lowrise 4 zones shall be pitched at a rate of not less than four to twelve (4:12).

Director's Rule 4-2012 General rule:

Formula 2 uses the average elevations at the midpoints of the sides of the smallest rectangle that can be drawn to enclose the structure. Exterior walls for height measurement purposes shall be those walls that form the footprint of the structure that include cantilevered portions of the structure. **(We have used this formula for all structures).**

Formula 2: Enclosing Rectangle. Under this formula, the average grade level is calculated by first drawing the smallest rectangle that encloses the entire structure, including all occupied floor area. The average grade level is calculated as the average of the elevation of **existing** lot grades at the midpoints, measured horizontally, of each side of this rectangle. For irregular lots, if the rectangle enclosing the proposed structure would extend beyond the lot property lines, the Director will determine how to treat the irregularity to most closely approximate the smallest enclosing rectangle.

NOTE: SEE SHEET S3.1 FOR ENLARGED SITE PLAN

Building Code: 2009 Seattle Municipal Code
Director's Rule 4-2012

23.86.006 The height shall be measured at the exterior walls of the structure. Measurement shall be taken at each exterior wall from the existing or finished grade, whichever is lower, up to a plane essentially parallel to the existing or finished grade. **(All existing grades are lower than finished grades).**

23.45.009 Structure Height Lowrise 2 = Twenty five (25) Feet
Lowrise 4 = Thirty Seven (37) Feet

C. Pitched roofs: 1. Except for cottage housing developments, in Lowrise Duplex/Triplex, Lowrise 1 and Lowrise 2 zones the ridge of pitched roofs on principal structures with a minimum slope of six to twelve (6:12) may extend up to thirty-five (35) feet. The ridge of pitched roofs on principal structures with a minimum slope of four to twelve (4:12) may extend up to thirty (30) feet. All parts of the roof above twenty-five (25) feet shall be pitched.

3. In Lowrise 3 and Lowrise 4 zones the ridge of pitched roofs on principal structures may extend up to five (5) feet above the maximum height limit. All parts of the roof above thirty (30) feet in Lowrise 3 zones and thirty-seven (37) feet in Lowrise 4 zones shall be pitched at a rate of not less than four to twelve (4:12).

Formula 2 uses the average elevations at the midpoints of the sides of the smallest rectangle that can be drawn to enclose the structure. Exterior walls for height measurement purposes shall be those walls that form the footprint of the structure that include cantilevered portions of the structure. **(We have used this formula for all structures).**

Formula 2: Enclosing Rectangle. Under this formula, the average grade level is calculated by first drawing the smallest rectangle that encloses the entire structure, including all occupied floor area. The average grade level is calculated as the average of the elevation of **existing** lot grades at the midpoints, measured horizontally, of each side of this rectangle. For irregular lots, if the rectangle enclosing the proposed structure would extend beyond the lot property lines, the Director will determine how to treat the irregularity to most closely approximate the smallest enclosing rectangle.

Except for cottage housing developments, in Lowrise Duplex/Triplex, Lowrise 1 and Lowrise 2 zones the ridge of pitched roofs on principal structures with a minimum slope of six to twelve (6:12) may extend up to thirty-five (35) feet. The ridge of pitched roofs on principal structures with a minimum slope of four to twelve (4:12) may extend up to thirty (30) feet. All parts of the roof above twenty-five (25) feet shall be pitched.

3. In Lowrise 3 and Lowrise 4 zones the ridge of pitched roofs on principal structures may extend up to five (5) feet above the maximum height limit. All parts of the roof above thirty (30) feet in Lowrise 3 zones and thirty-seven (37) feet in Lowrise 4 zones shall be pitched at a rate of not less than four to twelve (4:12).

Formula 2 uses the average elevations at the midpoints of the sides of the smallest rectangle that can be drawn to enclose the structure. Exterior walls for height measurement purposes shall be those walls that form the footprint of the structure that include cantilevered portions of the structure. **(We have used this formula for all structures).**

Formula 2: Enclosing Rectangle. Under this formula, the average grade level is calculated by first drawing the smallest rectangle that encloses the entire structure, including all occupied floor area. The average grade level is calculated as the average of the elevation of **existing** lot grades at the midpoints, measured horizontally, of each side of this rectangle. For irregular lots, if the rectangle enclosing the proposed structure would extend beyond the lot property lines, the Director will determine how to treat the irregularity to most closely approximate the smallest enclosing

BUILDING 10 AVERAGE GRADE CALCULATIONS USING DIRECTOR'S RULE 4-2012 FORMULA #2			
A	B	C	D
431.6 * 30.8 +	429.5 * 64.0 +	426.0 * 30.8 +	429.5 * 64.0
30.8 +	64.0 +	30.8 +	64.0
13,289.0 +	27,488.0 +	13,116.5 +	27,488.0
189.6			
81,381.5 / 189.6		=	429.3

NOTE: SEE SHEET S3.1 FOR ENLARGED SITE PLAN

Building Code: 2009 Seattle Municipal Code
Director's Rule 4-2012

23.86.006 The height shall be measured at the exterior walls of the structure. Measurement shall be taken at each exterior wall from the existing or finished grade, whichever is lower, up to a plane essentially parallel to the existing or finished grade.
(All existing grades are lower than finished grades).

23.45.009 Structure Height Lowrise 2 = Twenty five (25) Feet
Lowrise 4 = Thirty Seven (37) Feet

C. Pitched roofs: 1. Except for cottage housing developments, in Lowrise Duplex/Triplex, Lowrise 1 and Lowrise 2 zones the ridge of pitched roofs on principal structures with a minimum slope of six to twelve (6:12) may extend up to thirty-five (35) feet. The ridge of pitched roofs on principal structures with a minimum slope of four to twelve (4:12) may extend up to thirty (30) feet. All parts of the roof above twenty-five (25) feet shall be pitched.

3. In Lowrise 3 and Lowrise 4 zones the ridge of pitched roofs on principal structures may extend up to five (5) feet above the maximum height limit. All parts of the roof above thirty (30) feet in Lowrise 3 zones and thirty-seven (37) feet in Lowrise 4 zones shall be pitched at a rate of not less than four to twelve (4:12).

Director's Rule 4-2012 General rule: Formula 2 uses the average elevations at the midpoints of the sides of the smallest rectangle that can be drawn to enclose the structure. Exterior walls for height measurement purposes shall be those walls that form the footprint of the structure that include cantilevered portions of the structure. **(We have used this formula for all structures).**

Formula 2: Enclosing Rectangle. Under this formula, the average grade level is calculated by first drawing the smallest rectangle that encloses the entire structure, including all occupied floor area. The average grade level is calculated as the average of the elevation of **existing** lot grades at the midpoints, measured horizontally, of each side of this rectangle. For irregular lots, if the rectangle enclosing the proposed structure would extend beyond the lot property lines, the Director will determine how to treat the irregularity to most closely approximate the smallest enclosing rectangle.

PLANTING SPECIFICATIONS

JOB CONDITIONS

1. SCOPE OF WOR□□ THE WOR□ OF THIS SECTION INCLUDES ALL MATERIALS□E□UIPMENT AND LABOR NECESSARY FOR□FINISH GRADING□TOPSOIL PLACEMENT AND SOIL PREPARATION□PLANTING OF TREES□SHRUBS□GROUNDCOVERS AND ACCENT PLANTINGS□MULCHING□SEEDING AND SODDING□PROTECTION□GUARANTEE AND REPLACEMENT□AND RELATED ITEMS NECESSARY TO COMPLETE THE WOR□□ INDICATED ON THE DRAWINGS AND□OR SPECIFIED.

2. INSPECTION□□ALL PLANT MATERIAL AND FINISH GRADES ARE SUBJECT TO APPROVAL OF THE OWNER. REPAIR AND□OR REPLACE ITEMS AS DIRECTED BY OWNER AT NO ADDITIONAL COST. THE CONTRACTOR SHALL GIVE 48 HOURS NOTICE TO THE LANDSCAPE ARCHITECT WHEN A SITE REVIEW IS DESIRED.
   A. THE FOLLOWING SITE REVIEWS ARE RE□UIRED□AND SHALL BE REVIEWED AND ACCEPTED BY THE LANDSCAPE ARCHITECT OR THE OWNER□S REPRESENTATIVE□:
      - ROUGH GRADES: PRIOR TO PLACEMENT OF TOPSOIL OR SOIL AMENDMENTS.
      - FINISH GRADES: PRIOR TO ANY PLANTING, SODDING OR SEEDING.
      - PLANT MATERIAL AND PLANT LOCATIONS: REVIEW AND ACCEPT MATERIAL ON SITE PRIOR TO INSTALLATION. REMOVE UNSATISFACTORY MATERIAL FROM THE SITE IMMEDIATELY. REVIEW□ADJUST AND APPROVE PLANT LOCATIONS PRIOR TO INSTALLATION.
   B. PROVISIONAL REVIEW □PUNCH LIST□□ UPON COMPLETION OF ALL PLANTING AND ALL OTHER WOR□□ RE□UIRED UNDER THIS CONTRACT□THE CONTRACTOR SHALL RE□UEST A PROVISIONAL REVIEW.
   C. FINAL REVIEW □ACCEPTANCE□□ UPON COMPLETION OF ALL PUNCH LIST ITEMS AND OTHER WOR□□ RE□UIRED UNDER THIS CONTRACT. DATE OF ACCEPTANCE SHALL ESTABLISH THE BEGINNING OF THE MAINTENANCE AND GUARANTEE PERIOD.

3. SUBMITTALS□□SUBMIT ITEMS A□V□AND C WITHIN 30 DAYS OF AWARD OF BID.
   A. SUBMIT PLANT PROCUREMENT LISTS □EVIDENCE THAT ALL PLANT MATERIAL HAS BEEN SECURE.
   B. SUBMIT ONE ½ GAL. SAMPLE OF PROPOSED IMPORTED TOPSOIL (IF USED IN LIEU OF ON-SITE SOIL).
   C. SUBMIT TOPSOIL LAB TEST RESULTS AND RECOMMENDATIONS.
   D. SUBMIT RECORD DRAWINGS□REPRODUCIBLE PRINT SHOWING SITE DEVELOPMENT REVISIONS□SUCH AS NEW SIDEWAL□□PATH □PATH □FENCE □SITE LIGHTING LOCATIONS□AND MAJOR VARIATIONS IN PLANTING TYPES OR AREAS□SUCH AS CHANGE IN SPECIES FOR STREET TREE PLANTINGS AND□OR FOUNDATIONS.

4. PROTECTION□□SAVE AND PROTECT ALL SURROUNDING WOR□□ AND VEGETATION TO BE RETAINED ON SITE. DO NOT DISTURB AREA OUTSIDE LIMITS OF NEW WOR□□ ERECT CONSTRUCTION FENCING AND FLAG AREAS AROUND VEGETATION TO BE SAVED TO PREVENT INTRUSIONS INTO AREA. MAINTAIN ON SITE VEGETATION DURING CONSTRUCTION. STORE NO MATERIALS IN AREAS WHERE VEGETATION IS BEING RETAINED. □EEP ALL E□UIPMENT OUTSIDE OF TREE DRIP ZONES

5. REPAIR□DURING THE COURSE OF WOR□□REPAIR ANY DAMAGE TO CURBS□PAVING□LIGHTING□AND STRUCTURES TO SATISFACTION OF OWNER□ AT NO ADDITIONAL COST.

6. GUARANTEE □MAINTENANCE□ GUARANTEE ALL PLANT MATERIAL FOR A PERIOD OF ONE YEAR FROM DATE OF FINAL ACCEPTANCE OF THE JOB BY OWNER. GUARANTEE LAWNS UNTIL LAWN IS SOLID □FULL WITH NO BARE AREAS OVER 3" S□□URE□WEEDS ARE GONE AND ACTIVE□VIGOROUS GROWTH IS EVIDENT. GUARANTEE ROUGH SEEDED AND EROSION CONTROL SEEDED AREAS UNTIL GRASS AREAS ARE FILLED WITH NO BARE SPOTS OVER 10" S□□URE. MAINTAIN ALL PLANTING AND SODDED □SEEDED AREAS UNTIL FINAL ACCEPTANCE OF ENTIRE JOB. DURING THE GUARANTEE PERIOD□ALL DEAD□DYING□DISEASED□BRO□EN OR STOLEN PLANT MATERIALS SHALL BE REPLACED IMMEDIATELY BY THE CONTRACTOR AT NO ADDITIONAL EXPENSE TO THE OWNER. USE SPECIFIED PLANTS AND PLANT AS SPECIFIED□GUARANTEE REPLACEMENT PLANTS UNTIL ACTIVE□HEALTHY GROWTH IS EVIDENT. DURING GUARANTEE PERIOD□CONTRACTOR SHALL NOT BE RESPONSIBLE FOR REPLACING PLANTS DESTROYED BY VANDALISM OR ACCIDENTS CAUSED BY VEHICLES OTHER THAN THE CONTRACTOR□S□OR ACTS OF GOD□PROVIDED THAT THE CONTRACTOR HAS EXERCISED DUE CARE TO PROTECT WOR□□

7. PRODUCT STORAGE □EROSION CONTROL□
   A. CONTRACTOR SHALL BE RESPONSIBLE FOR PROVIDING ADE□UATE EROSION CONTROL MEASURES TO ENSURE SOILS IMPORTED OR DISTURBED BY THE CONTRACTOR DO NOT BECOME INTERBORNE.
   B. CONTRACTOR SHALL NOT STORE□EITHER TEMPORARY□OR FOR LONG TERM□ANY SOILER MULCH MATERIAL COVERED NIGHTLY OR AT ALL TIMES DURING RAINFALL.
   C. CONTRACTOR SHALL SWEEP AND CLEAN ALL SURFACES DAILY TO REMOVE TOPSOIL AND MULCH□WASHING SURFACES WITH WATER IS NOT PERMITTED.

MATERIALS

1. PLANT MATERIALS□□PLANTS SHALL BE WASHINGTON GRADE NO. 1□SIZE IN ACCORDANCE WITH AAN STANDARDS□HEALTHY□VIGOROUS□FREE FROM ALL DISEASE□PEST OR INJURY. DO NOT PRUNE OR TOP PRIOR TO DELIVERY TO SITE. CONT. INDICATES CONTAINER. SUBSTITUTIONS ARE STRONGLY DISCOURAGED□AND SHALL BE APPROVED BY OWNER□S REPRESENTATIVE OR LANDSCAPE ARCHITECT PRIOR TO DELIVERY ON SITE.

2. TOPSOIL□□USE IMPORTED□SCREENED SANDY LOAM RICH IN ORGANICS AS APPROVED□AND AMENDED PER SOILS LAB TEST RESULTS□OR USE PACIFIC TOPSOIL□S WINTER MIX□SUBJECT TO APPROVAL BY OWNER.

3. PLANTING BAC□FILL FOR ALL PLANT MATERIAL□□ 25□ EXISTING NATIVE SOIL□50□ NEW TOPSOIL□25□ ORGANIC COMPOST□7.8" MINUS. APPROVED COMPOST SOURCES□□CEDAR GROVE□OR PACIFIC TOPSOIL□S COMP. MULCH□OR APPROVED E□UAL. MIX THOROUGHLY.

4. BAR□□MULCH□□MEDIUM-FINE GROUND BAR□□ FROM FIR OR HEMLOC□□ NO PINE□ MULCH ALL NEW PLANTING AREAS TO MIN. 2" COMPACTED DEPTH.

5. FERTILIZER□□
   TREES AND SHRUBS□□
   AGRIFORM TABS□4 PER TREE□2 PER SHRUB□1 PER GROUNDCOVER PLUS 4 OZ. TRANSPLANTER PER TREE□2 OZ. PER SHRUB.
   LAWN AREAS□□
   PROVIDE BALANCED FORMULA APPROPRIATE TO AREA APPLIED AT THE RATE RECOMMENDED BY MANUFACTURER PRIOR TO SEEDING. SUBMIT CUT SHEET OF FERTILIZER COMPONENTS TO OWNER FOR APPROVAL.

6. HERBICIDE□APPLY PRE-EMERGENT HERBICIDE □CASARON OR APPROVED E□UAL□TO ALL NEW PLANTING AREAS □EXCEPT BIOSWALES□WATER □UALITY PONDS AND NATIVE AREAS□PER MANUFACTURER□S RECOMMENDED INSTRUCTIONS AND RATE. NOTIFY OWNER□S REPRESENTATIVE 2 DAYS PRIOR TO APPLICATION□AND SAVE DELIVERY RECEIPTS FOR VERIFICATION□IF RE□UESTED.

7. SOD□MATURE□THIC□□□ □UALITY TURF□FREE OF WEEDS□POA AND INSECT INFESTATIONS. BLEND OF PERENNIAL RYEGRASS AND OTHER SPECIES BEST SUITED FOR THE PACIFIC NORTHWEST□AS APPROVED.

8. SEEDED LAWN□ TURF GRASS□70□ TURF TYPE PERENNIAL RYE COMPOSED OF 50□ CITATION II AND 50□ DERBY□20□ FINE FESCUES□10□ IMPROVED □ENTUC□Y BLUEGRASS□BY WEIGHT. ALL SEED MINIMUM 98□ PURE AND 90□ GERMINATION. SEED AT A RATE OF 8 LBS. □S.F.

9. ROUGH GRASS □WILDFLOWER SEEDING□BARCLAY LO-GRO PERENNIAL RYE GRASS - AVAILABLE THROUGH D.F. MAR□S□WOODINVILLE□WA. SEED AT A MINIMUM RATE OF 8 LBS. □ACRE. FOR WILDFLOWER SEEDED AREAS USE D.F. MAR□S "PNW WILDFLOWERS PLUS GRASSES" MIX. SEED AT A MINIMUM RATE OF 1 LB. □2400 S.F.

10. EROSION CONTROL SEEDING□□ING COUNTY STANDARD EROSION CONTROL MIX □20□ REDTOP□40□ ANNUAL RYE□40□ CHEWINGS FESCUE□ SEED AT A RATE OF 80 LBS. □1000 S.F.

11. WETLAND SEEDING□BRIARGREEN FRESH WATER WETLANDS MIX - AVAILABLE THROUGH BRIARGREEN□□ENT□WA. SEED AT A RATE OF 5LBS. □ 1000 S.F.

12. HYDROMULCH□ECO-FIBER OR ACCEPTED ALTERNATE AT MIN RATE OF 2000 LBS. □ACRE.

13. TAC□IFIER□USE J-TAC OR ACCEPTED ALTERNATE AT MIN. RATE OF 40 LBS. □ACRE ON ALL SEEDED SLOPED AREAS EXCEEDING 4:1 SLOPE.

14. JUTE MATTING□COIR BLAN□ET. HEAVY DUTY□MAXIMUM 3 X 4" OPENINGS INCLUDING STEEL STABLES□MINIMUM 6" LONG.

INSTALLATION

1. GENERAL□PRIOR TO STARTING WOR□□CONTRACTOR AND HIS SITE FOREMAN SHALL ATTEND A PRECONSTRUCTION CONFERENCE WITH OWNER□S PROJECT MANAGER□SITE SUPERINTENDENT AND LANDSCAPE ARCHITECT.

2. CONTRACTOR SHALL INSPECT THE EXISTING CONDITIONS□SUBGRADES□DRAINAGE□AND OTHER SITE WOR□□AND VERIFY THAT SITE WOR□□ IS ACCEPTABLE FOR THE INSTALLATION OF THIS WOR□□ REPORT ALL UNACCEPTABLE CONDITIONS TO THE OWNER□S REPRESENTATIVE IMMEDIATELY.

3. BEGINNING OF WOR□□ ON PROJECT OR PROJECT PHASE INDICATES THE CONTRACTOR HAS ACCEPTED SUBGRADES AND OTHER EXISTING SITE CONDITIONS AS READY FOR THE WOR□□ OF THIS CONTRACT□AND THAT THE OWNER WILL NOT BE CHARGED EXTRA COSTS DUE TO SITE CONDITION IMPACTS □CORRECTIONS BY THE CONTRACTOR.

4. PREPARATION FOR PLANTING □SEEDING □SODDING□□PLACE MINIMUM 4" DEPTH □LIGHTLY COMPACTED□UP TO 80□□ DRY DENSITY OF NEW TOPSOIL AND ANY SOIL AMENDMENTS IN ALL NEW PLANTING AREAS □SEEDED □SODDED LAWN□ROUGH GRASS□AND WILDFLOWER SEEDED AREAS. A THIN LAYER OF TOPSOIL RECOMMENDED BUT NOT RE□UIRED IN ROUGH GRASS AND EROSION CENTRAL SEEDED AREAS. REMOVE ALL ROC□S AND FOREIGN OBJECTS OVER 1" IN DIAMETER FROM UPPER 3" OF TOPSOIL.

5. FINISH GRADING: FINISH GRADES TO BE ½" BELOW ADJACENT PAVED AREAS AND 2" BELOW TOP OF WALL IN RAISED PLANTERS. RAKE AND PERFORM OTHER FINISH GRADE OPERATIONS AS NECESSARY TO ESTABLISH ELEVATIONS AND BERMS SHOWN ON THE DRAWINGS□INSURING THAT NO LOW SPOTS AND OTHER OBSTRUCTIONS TO DRAINAGE ARE PRESENT. INSURE POSITIVE DRAINAGE AWAY FROM BUILDING OR TOWARD DRAINAGE SWALE OR STRUCTURE ARE MINIMUM 2□ SLOPE. CROWN ALL FLAT AREAS MINIMUM 6" TO IMPROVE APPEARANCE AND DRAINAGE OF BEDS. NOTIFY GENERAL CONTRACTOR IMMEDIATELY OF ADVERSE DRAINAGE CONDITIONS AND TA□E CORRECTIVE STEPS INCLUDING MOUNDING OF MATERIAL OR ADDITIONAL FINE GRADING.

6. LAYOUT SITE FEATURES□WAL□S□FENCES□BEDLINES□ETC. FOR REVIEW AND ADJUSTMENT BY OWNER□S REPRESENTATIVE.

7. TREES□□STA□E TREE LOCATIONS OR ARRANGE TREES ON SITE IN PROPOSED LOCATIONS FOR APPROVAL BY OWNER. EXCAVATE PIT AS PER DETAIL. ALL TREES AND SUPPORTS TO STAND VERTICAL. PROVIDE A NEAT 2□DIAMETER MULCHED CIRCLE AROUND EACH TREE IN LAWN AREAS. PROVIDE FOR POSITIVE DRAINAGE AWAY FROM ROOTBALL UNLESS OTHERWISE NOTED.

8. SHRUBS□EXCAVATE SHRUB PITS TO 6" BELOW□AND MINIMUM TWICE THE ROOTBALL DIAMETER. ADD FERTILIZER PRIOR TO BAC□FILLING. TA□E CARE TO WATER THOROUGHLY AND PREVENT ROOT DAMAGE. PLANT SHRUBS AT SPACING INDICATED IN SCHEDULE OR SHOWN ON PLAN□EVENLY SPACED ARRANGEMENTS. MULCH ALL PLANTING AREAS TO A MINIMUM 2" COMPACTED DEPTH.

9. GROUND COVER□EXCAVATE PITS MIN. 3" BELOW AND TWICE THE ROOTBALL DIAMETER. WATER THOROUGHLY AND TA□E CARE TO INSURE THAT ROOT CROWN IS AT PROPER GRADE AFTER MULCHING. MULCH ALL GROUNDCOVER AREAS TO A MINIMUM 2" COMPACTED DEPTH.

10. AMENDMENTS FOR LAWN□SOD AREAS□□UNIFORMLY APPLY DOLOMITE LIME AT A RATE OF 50 LBS PER 1000 S□□UARE FEET AND BALANCED FERTILIZER AT RECOMMENDED FORMULA AND RATE BEFORE SEEDING OR SODDING.

11. SODDED LAWN□□LAY FRESH SOD WITH TIGHT□STAGGERED JOINTS IN A RUNNING BOND PATTERN. IN SLOPED AREAS□LAY SOD UP AND DOWN SLOPE. TRIM EDGES ADJACENT TO WAL□S□CURBS□ETC. FOR A NEAT□TIGHT FIT. AFTER INITIAL WATERING HAS SETTLED OUT□ROLL DIAGONALLY WITH A 300 LB. ROLLER. WATER DEEPLY AGAIN AFTER ROLLING. REPAIR ANY DEPRESSIONS AND FILL ANY GAPS□WHICH DEVELOP THROUGH THE GUARANTEE PERIOD.

12. SEEDED LAWN□ROUGH GRASS□AND EROSION CONTROL SEEDING□ROLL AREAS BOTH DIRECTIONS WITH A 300 LB. ROLLER. ADD TOPSOIL WHERE NECESSARY TO FILL DEPRESSIONS AND CREATE POSITIVE DRAINAGE. SEED USING SPECIFIED MIX WITH HYDROMULCH□EMULSIFIER AND FERTILIZER USE J-TAC OR ACCEPTED ALTERNATE ON ALL SEEDED SLOPED AREAS EXCEEDING 4:1 SLOPE. PROTECT AREAS FROM EROSION AND DAMAGE DURING ESTABLISHMENT PERIOD. PRIOR TO SEEDING□WATER AREA TO A MINIMUM DEPTH OF 6". RE-SEED ANY BARE LAWN AREAS OVER 3" S□□UARE □AND ANY BARE ROUGH GRASS OVER 10" S□□URE□AND IMMEDIATELY REPAIR ANY SETTLEMENT TO PROVIDE A FULL□EVEN□VIGOROUS STAND OF GRASS.

13. JUTE MATTING□WOVEN COIR MAT□□INSTALL ON SLOPES 2:1 OR STEEPER PRIOR TO PLANTING AND SEEDING. INSTALL PER MANUFACTURER□S INSTRUCTIONS□INCLUDING OVERLAPPING SALVAGES AND INSTALLATION OF STEEL STAPLES.

CLEAN UP

1. CLEAN UP ALL LITTER□SOIL ON WAL□S□CLIPPINGS□ETC. □RA□E OUT BEDS AND LEAVE SITE IN A SPOTLESS CONDITIONS. ADJUST TREE GUYING□□ REMOVE FLAG LABELS FROM ALL PLAN MATERIALS □EXCEPT FOR PERENNIAL ACCENTS - LEAVE ONE PER GROUPING□

IRRIGATION SPECIFICATIONS

GENERAL RE□UIREMENTS □JOB CONDITIONS

1.□ SCOPE□
WOR□ INCLUDES ALL DESIGN□LABOR□MATERIALS□E□UIPMENT□AND SERVICES NECESSARY TO COMPLETE THE IRRIGATION SYSTEM□ BALANCED AND READY FOR OPERATION AS SPECIFIED. PROVIDE AUTOMATIC SYSTEM IN ALL LANDSCAPED□SODDED AND SEEDED AREAS INDICATED ON PLAN PROVIDED BY OWNER.

2.□ CODES AND ORDINANCES□
ALL LOCAL□MUNICIPAL□AND STATE LAWS□RULES□AND REGULATIONS GOVERNING OR RELATING TO ANY PORTION OF THIS WOR□ ARE HEREBY INCORPORATED INTO AND MADE A PART OF THESE SPECIFICATIONS.

3.□ SUBMITTALS□
PRODUCTS AND MATERIALS□IMMEDIATELY AFTER AWARD OF CONTRACT□SUBMIT CUT SHEETS FOR THOSE PRODUCTS NOT SPECIFIED BY MANUFACTURER OR THOSE SUBMITTED FOR APPROVAL.

4.□ PERMITS AND FEES□
OWNER WILL OBTAIN ALL PERMITS AND PAY ALL FEES TO ANY GOVERNMENTAL AGENCY HAVING JURISDICTION OVER THE WOR□□
CONTRACTOR TO ARRANGE FOR INSPECTIONS□TESTING□AND CERTIFICATION IF RE□UIRED.

5.□ IRRIGATION BIDDER DESIGN SHOP DRAWINGS□
CONTRACTOR SHALL PREPARE A COMPLETE SET OF SHOP DRAWINGS FOR THE ENTIRE SYSTEM FOR APPROVAL BY LANDSCAPE ARCHITECT. CONTRACTOR SHALL SUBMIT IRRIGATION DESIGN DRAWINGS AND HYDRAULIC CALCULATIONS A MINIMUM OF TWO □2□WEE□S PRIOR TO START OF IRRIGATION SYSTEM INSTALLATION FOR REVIEW BY LANDSCAPE ARCHITECT. LANDSCAPE ARCHITECT WILL REVIEW DRAWINGS FOR NOT MORE THAN A ONE □1□WEE□ PERIOD AND SUBMIT COMMENTS TO THE CONTRACTOR. APPROVAL OF PLANS AND MATERIALS BY THE LANDSCAPE ARCHITECT DOES NOT CHANGE THE CONTRACTOR□S RESPONSIBILITY FOR THE DESIGN AND INSTALLATION OF A PROPERLY WOR□ING SYSTEM. CONSTRUCTION WOR□□ WILL NOT PROCEED UNTIL THE DESIGN REVIEW PROCESS IS COMPLETE. SUBMIT PRODUCT DATA WITH DESIGN PLAN. INCLUDE DATA FOR ALL SUBSTITUTE PRODUCTS TO BE PROPOSED FOR USE IN THIS SYSTEM. INCLUDE MATERIAL SHOWING MANUFACTURER□S NAME□CATALOG CUTS□TECHNICAL DATA□AND MANUFACTURER□S INSTALLATION□OPERATION□AND MAINTENANCE INSTRUCTIONS FOR EACH PRODUCT. SHOP DRAWINGS SHALL INCLUDE□BUT NOT BE LIMITED TO□THE FOLLOWING ITEMS□

1. □PIPING LAYOUT AND SIZING FOR BOTH MAIN AND LATERALS
2. □VALVE TYPES□SIZES AND LOCATIONS.
3. □LOCATIONS FOR MANUAL DRAINS AND □UIC□□ COUPLERS.
4. □POINT OF CONNECTION SHOWING BAC□FLOW PREVENTION DEVICE□STRAINER□PRESSURE REGULATOR□AND SHUT-OFF VALVE.
5. □HEAD TYPES AND LOCATIONS □USE DIFFERENT SYMBOLS FOR EACH HEAD TYPE AND EACH PATTERN OF SPRAY□

THE ABOVE ITEMS SHALL BE INCLUDED ON A SYMBOL LEGEND. THE SHOP DRAWING SHALL BE SUBMITTED ON A 24"x36" REPRODUCIBLE SHEET□ DRAWN IN PENCIL OR IN□□ WITHOUT COLOR FOR DIFFERENTIATION□AND SHALL BE NEAT AND LEGIBLE.

6.□AS-BUILT DRAWINGS□
FURNISH THE OWNER WITH TWO SETS OF BLUELINEPRINTS SHOWING ALL IRRIGATION WOR□□ RE□UIRED UNDER THIS CONTRACT. RECORD ON THESE PRINTS□ON A DAILY BASIS□ALL CHANGES MADE DURING THE ACTUAL INSTALLATION OF THE SYSTEM. AS-BUILTS ARE TO BE ON-SITE AT ALL TIMES FOR REVIEW.

7.□OPERATIONS MANUAL□
TWO MANUALS□BOUND IN HARDBAC□ COVER□SHALL BE SUBMITTED FOR APPROVAL AT THE TIME OF PRESSURE TESTING. IT SHALL INCLUDE AS A MINIMUM THE FOLLOWING INFORMATION FOR ALL ITEMS USED ON THE SYSTEM□

1. □LIST OF AUTHORIZED DISTRIBUTORS AND SERVICE REPRESENTATIVES FOR EACH PIECE OF IRRIGATION E□UIPMENT□INCLUDING NAMES□ADDRESSES□AND PHONE NUMBERS.
2. □GUARANTEE□WARRANTY CERTIFICATES.
3. □INSTRUCTION MANUALS.
4. □PARTS LISTS FOR EACH ITEM WITH EXPLODED VIEWS OF EACH ITEM SHOWING PART NUMBERS
5. □COMPLETE TROUBLE-SHOOTING GUIDE TO COMMON IRRIGATION PROBLEMS.
6. □WINTERIZATION AND SPRING START-UP PROCEDURES.
7. □BAC□FLOW PREVENTOR TEST CERTIFICATION.

8.□COORDINATION WITH OTHERS□
1. □WATER SOURCE□COORDINATE WITH GENERAL CONTRACTOR.
2. □SLEEVING: REFER TO SLEEVING SECTION.
3. □OTHER TRADES□COORDINATE ALL WOR□□ WITH THAT OF OTHER TRADES
4. □AVAILABLE WATER PRESSURE□VERIFY WATER PRESSURE AT POINT OF CONNECTION PRIOR TO SHOP DRAWING SUBMITTAL. SYSTEM DESIGN SHALL TA□E INTO ACCOUNT ALL PRESSURE LOSSES FROM POINT OF CONNECTION TO FARTHEST HEAD IN SYSTEM.

9.□ PROTECTION□
PROTECT WOR□□ADJACENT PROPERTY□PUBLIC□AND BE RESPONSIBLE FOR ANY DAMAGE OR INJURY ARISING FROM THIS CONTRACT. REVIEW ALL UTILITY□IRRIGATION□MECHANICAL□AND ELECTRICAL PLANS□SO THAT DIGGING□DRILLING OPERATIONS DO NOT DAMAGE LINES. REPLACE OR REPAIR AT CONTRACTOR□S EXPENSE ANYTHING DAMAGED AS A RESULT OF CONTRACTOR□S OPERATIONS□IN A MANNER SATISFACTORY TO THE OWNER□BEFORE FINAL PAYMENT IS MADE.

10.□ GUARANTEE□
GUARANTEE THE SATISFACTORY OPERATION OF E□UIPMENT□MATERIALS□AND WOR□MANSHIP□INCLUDING THE RESTORATION OF THE AREA FOR A PERIOD OF ONE YEAR FROM THE DATE OF ITS ACCEPTANCE. REPAIR OR REPLACE ANY DEFECT IN E□UIPMENT OR WOR□MANSHIP OCCURRING WITHIN THAT YEAR PROMPTLY□UPON NOTIFICATION□AT CONTRACTOR□S EXPENSE.

PRODUCTS AND MATERIALS

1.□ MATERIALS AND SUBSTITUTIONS□
ALL MATERIALS TO BE INCORPORATED IN THIS SYSTEM SHALL BE NEW AND WITHOUT FLAWS OR DEFECTS AND OF □UALITY AND PERFORMANCE AS SPECIFIED□AND MEETING THE RE□UIREMENTS OF THE SYSTEM.

1. □NO SUBSTITUTIONS OF SMALLER PIPE SIZES WILL BE PERMITTED BUT SUBSTITUTIONS OF LARGE SIZES OF SAME TYPE AT NO EXTRA COST WITH APPROVAL ARE ACCEPTABLE.
2. □NO SUBSTITUTIONS WILL BE PERMITTED WHICH HAVE NOT BEEN SUBMITTED FOR PRIOR WRITTEN APPROVAL.

2.□ METER□
PER LOCAL CODE□ALL METERS WILL BE PERMITTED IN PLACE□BY OWNER.

3.□ BAC□FLOW PREVENTER□
OWNER WILL PROVIDE TOW BAC□FLOW PREVENTERS FOR INSTALLATION BY CONTRACTOR IN BOULEVARD□OPEN SPACE AREAS. CONTRACTOR TO VERIFY SIZE AND MODELS AVAILABLE PRIOR TO IRRIGATION DESIGN.

4.□PVC PIPE AND FITTINGS□
1. □PVC PIPE AND FITTINGS SHALL BE PVC COMPOUND TYPE 1□GRADE 1□OR TYPE 1□GRADE 2□CONFORMING TO ASTM 1784. ALL FITTINGS SHALL BE SCHEDULE 40 UNLESS OTHERWISE NOTED.
2. □PVC SOLVENT WELD PIPE□ PVC 1120 AND 1220 MATERIAL□200 PSI MINIMUM PRESSURE RATING WITH SDR 21 WALLS WHICH CONFORM TO ASTM D 2241.
3. □PVC THREADED PIPE□ PVC 1120 OR PVC 1220□SCHEDULE 80□CONFORMING TO ASTM D 1785.
4. □PLASTIC PIPE FITTINGS□CONFORM TO ASTM D 2466□TYPE 1□GRADES 1 OR 2. MOLDED FITTINGS MANUFACTURED OF THE SAME MATERIAL AS THE PIPE□SUITABLE FOR SOLVENT WELD□UNLESS OTHERWISE SPECIFIED. PLASTIC SADDLE AND FLANGE FITTINGS NOT PERMITTED.
5. □SOLVENT WELD COMPOUND□ TWO STEP APPLICATION□WITH PRIMER AND SOLVENT COMPOUNDS.

5.□IRRIGATION HEADS□
1a. □SMALL LAWN AREAS□HEAVY-DUTY PLASTIC POP-UP HEADS□MINIMUM 3" POP-UP HEIGHT□INTEGRAL FILTER□REMOVABLE BODY CAP□ MATCHED PRECIPITATION RATES. □RAINBIRD 1804 SERIES□TORO 570 SERIES□WEATHERMATIC 35P SERIES□
1b. □LARGE LAWN AREAS□HEAVY-DUTY PLASTIC POP-UP HEADS□MINIMUM 3-3/4" TO 4" POP-UP HEIGHT□INTEGRAL FILTER□MATCHED PRECIPITATION RATES. □HUNTER PGP SERIES□RAINBIRD T-4 T-BIRD SERIES□TORO XP-300□
2. □SHRUB□GROUNDCOVER AREAS□HEAVY DUTY 6" PLASTIC POP-UP HEADS□INTEGRAL FILTER□ADJUSTABLE RADIUS□NO STREAM SPRAY PATTERNS. FULLY ADJUSTABLE FLOW□MATCHED PRECIPITATION RATES. □RAINBIRD 1806 SERIES□TORO 570-6P SERIES□WEATHERMATIC 36 P SERIES□
3. □SHRUB□GROUNDCOVER STRIPS□HEAVY DUTY 6" PLASTIC POP-UP HEADS□INTEGRAL FILTER□REMOVABLE BODY CAP. PRECIPITATION RATES MATCHED TO SHRUB HEADS. □RAINBIRD 1806 WITH RB NOZZLES EXCEPT HUNTER SIDE SPRAY END STRIPS O□□TORO 570 SERIES□ WEATHERMATIC 35 P SERIES ADD HUNTER END SIDE SPRAY STRIPS□□
4. □NARROW AREAS□FLOOD OR UMBRELLA BUBBLER□FULLY ADJUSTABLE FLOW□BRASS OR PLASTIC AS APPROVED ON FIXED 2" GALV. RISER OR 4" POP-UP.
5. □INSTALL HEADS WITH □HEC□O-MATIC□OR □SAM□FEATURES WHERE POTENTIAL FOR LOW FLOW DRAINAGE.

6.□BAC□FLOW PREVENTION DEVICE□
FEBCO □805□OR 805Y□OR RAINBIRD RPA SIZE□OR APPROVED E□UAL. LOCATE AT POINT OF CONNECTION AS PER DETAIL AND IN ACCORDANCE WITH MANUFACTURER□S RECOMMENDATION.

7.□VALVES□
1. □SHUT-OFF VALVE□BRONZE□NON-RISING STEM TYPE□MANUAL OR ANGLE VALVE□MINIMUM 200 PSI PRESSURE RATING. □RED-WHITE OR CHAMPION 100 SERIES□
2. □□UIC□ COUPLER VALVES□BRASS□ONE OR TWO PIECE WITH SPRING -LOADED COVER. □RAINBIRD 33D□TORO 473 SERIES□
3. □PRESSURE REGULATING VALVE□BRONZE□COMMERCIAL GRADE□WITH SPRING RANGE OF 25-75 PSI □WATTS OR WIL□INS OR APPROVED□
4.) MANUAL DRAIN VALVES: BRASS, ¾" SIZE, COMMERCIAL QUALITY, NON-RISING STEM TYPE, (CHAMPION OR APPROVED).
5. □CONTROL VALVES□PLASTIC OR BRASS WITH FLOW CONTROL RAINBIRD PEB SERIES OR TORO 252 SERIES OR WEATHERMATIC 8000CR OR 11000 CR. MINIMUM MANUFACTURER□S WARRANTY OF 5 YEARS.

8.□VALVE BOXES AND PROTECTIVE SLEEVES□
1. □GENERAL□ENCLOSE ALL VALVES IN VALVES BOXES□PROVIDE EXTENSIONS TO FINISH GRADE AS RE□UIRED.
2. □VALVE BOXES□
   a. □CONTROL VALVE ONLY OR PRESSURE-REDUCING VALVE ONLY. AMETE□ 10" CIRCULAR BOX □10-181-014□WITH EVERGREEN COVER □10-181-015 TWIST LOC□□OR APPROVED.
   b. □SHUT-OFF VALVE AND STRAINER□DOUBLE-CHEC□ VALVE ASSEMBLY□AMETE□ JUMBO BOX □10-190-001□ALL WITH EVERGREEN COVER □ 10-192-101 WITH PLASTIC LOC□ING DEVICE.

9.□ PROTECTIVE SLEEVE WITH LOC□ING CAPS□
2" DIAMETER CLASS 160 PVC□LENGTH AS RE□UIRED. CAPS□RAINBIRD □63100. ALL DRAIN VALVES AND MANUAL CONTROL VALVES TO BE ENCLOSED IN PROTECTIVE SLEEVES LOC□ING CAPS.

10.□ VALVE □EYS AND VALVE BOX COVER □EYS□
PROVIDE TWO COMPLETE SETS OF ALL □EYS RE□UIRED FOR VALVES□VALVE BOX COVERS□AND PROTECTIVE SLEEVE CAP COVERS.

11.□DRAIN ROC□□
UNFRACTURED ROCK, 100% PASSING 1-1/2" SQUARE SIEVE AND 0% PASSING ¾" SQUARE SIEVE.

12.□AUTOMATIC CONTROLLER □F OUTDOOR LOCATION□□
RAINBIRD□HUNTER□OR TORO COMMERCIAL GRADE□UL APPROVED□LOC□ING METAL CABINET WITH MINIMUM FEATURES□

-DUAL PROGRAMMING
-WATER BUDGETING
-MASTER VALVE
-RAIN SHUT-OFF
-TEST CYCLE
-ENOUGH ZONES FOR SYSTEM DESIGN□PLUS FOUR EXTRA.

13.□ CONTROL WIRE FOR VALVES□
1. □INSULATED□SINGLE STRAND COPPER DESIGNED FOR 24-50 VOLTS AND UL APPROVED AS UF □UNDERGROUND FEEDER□ UL AND UF DESIGNATIONS CLEARLY MAR□ED OR EMBOSSED ON THE INSULATION JAC□ET OF THE WIRE. COPPER CONDUCTOR MUST MEET OR EXCEED ASTM B-3 SPECIFICATIONS. IN NO CASE SHALL WIRE BE LESS THAN 14 GAUGE.
2. □WHERE CONTROL WIRE LEAVES MAIN OR LATERAL LINE ENCLOSE IT IN CLASS 200 PVC CONDUIT.
3. □SEPARATE "HOT" RED OR BLAC□□LEAD FOR EACH VALVE. COMMON WIRE. WHITE□FOR EACH CONTROLLER. SPARE WIRE □DIFFERENT COLOR THAN HOT OR COMMON□TO RUN FROM CONTROLLER TO THE END VALVE ON EACH LEG OF THE MAINLINE. IDENTIFY EACH SPARE AT THE CONTROLLER. IDENTIFY WIRE COLOR ON THE AS-BUILTS.

14.□SPLICES□
WATERTIGHT ELECTRICAL SPLICES WITH 3M□SCOTT□S LOC□ SEAL TAC□ 3567-78□PEN-TITE PVC SOC□ET OR RAINBIRD ST-03 WITH PT-S5 SEALER.

15.□SLEEVES□
PROVIDE PVC PIPE SLEEVES AT MINIMUM SIZE DOUBLE THE DIAMETER OF THE ENCLOSED IRRIGATIONS LINES. USE SCHEDULE 40 PVC FOR SLEEVES□SAME DEPTH AS RE□UIRED FOR PIPING□EXTEND 12" INTO PLANTING BED□CAP AND FLAG ENDS.

INSTALLATION

1.□PRIOR TO STARTING WOR□□
CONTRACTOR SHALL ATTEND A PRE-CONSTRUCTION CONFERENCE WITH OWNER□S PROJECT MANAGER□SUPERINTENDENT□OWNER□S REPRESENTATIVE AND/OR LANDSCAPE ARCHITECT TO DISCUSS PROJECT RE□UIREMENTS□CHANGED SITE CONDITIONS□PHASING AND OTHER ISSUES.

2.□INSPECTIONS□VERIFICATION ADJUSTMENTS□:
1. DISCREPANCIES□UPON INITIATION OF WOR□□ OR AT EARLIEST TIME DISCOVERED□REPORT ANY DEVIATIONS BETWEEN THE CONTRACTOR-PREPARED IRRIGATION DRAWINGS AND THE SITE. FAILURE TO DO SO PRIOR TO THE INSTALLING OF E□UIPMENT□AND RESULTING IN REPLACING□AND OR RELOCATING□OR ADDITIONAL E□UIPMENT□SHALL BE DONE AT CONTRACTOR□S EXPENSE.
2. AVAILABLE PRESSURE VERIFICATION□ PR

SOLID STATE AREA LIGHTING

DSAP SERIES-LED

SPECIFICATIONS

PROJECT NAME:

FIXTURE TYPE:

HOUSING
Upper housing is heavy gauge cast aluminum (DSAP25) or 0.125" thick spun aluminum with reveal (DSAP1). Lower housing is 0.080" thick spun aluminum with integrated LED module seat. Lower housing is vented at top and bottom for convective cooling of LED module. Top Driver chamber is sealed from LED Module chamber. Trulevel ball coupling mount is welded to housing and facilitates quick leveling and installation.

VLED® OPTICS
Low copper A356 alloy (<.2% copper) cast aluminum housing. Integrated clear tempered 3/16" glass lens sealed with a continuous silicone gasket protects emitters (LED's) and emitter Reflector-Prism optics, and seals the module from water intrusion and environmental contaminants. Module is sealed to meet an IP67 rating. LED's are available in standard Neutral White (4000K), or optional Cool White (5000K) or Warm White (3000K). Each emitter is optically controlled by a Reflector-Prism injection molded from H12 acrylic (3 types per module; one from 0° - 50°; one from 50° - 65°; one from 65° - 72°). Each Reflector-Prism has indexing pins for aiming and is secured to an optical plate made of matte black anodized aluminum. The optical plate locates every Reflector-Prism over an emitter. Reflector-Prisms are secured to the optical plate with a UV curing adhesive. The Reflector-Prisms are arrayed to produce IES Type II, III, IV, and V-SQ distributions. The entire Optical Module is field rotatable in 90° increments. Both module and drivers are factory wired using water resistant, insulated cord. Lens, module and drivers are field replaceable.

LED DRIVER
Drivers are UL and cUL recognized mounted on a single plate and factory prewired with quick-disconnect plugs. Constant current driver is electronic and has a power factor of >0.90 and a minimum operating temperature of -40°F. Drivers accept an input of 120-277V, 50/60Hz. (0 - 10V dimmable driver is standard. Driver has a minimum of 3KV internal surge protection.)

FINISH
Electrostatically applied TGIC Polyester Powder Coat on substrate prepared with 20 PSI power wash at 140°F. Four step iron phosphate pretreatment for protection and paint adhesion. 400°F bake for maximum hardness and durability. Texture finish is standard.
