Gregory J. Nickels, Mayor

Department of Planning and Development

D. M. Sugimura, Director

**CITY OF SEATTLE
ANALYSIS AND DECISION OF THE DIRECTOR
OF THE DEPARTMENT OF PLANNING AND DEVELOPMENT**

Application Number: 3006049
Applicant Name: Brittani Ard for Miklos Kohary
Address of Proposal: 1415 25th Avenue

SUMMARY OF PROPOSED ACTION

Land Use Application to allow two single family residences and one, 3-unit townhouse structure (5 units total). Parking for five vehicles to be provided within the structures. Existing single family residence to be demolished.

The following approval is required:

SEPA - Environmental Determination - Chapter 25.05, Seattle Municipal Code.

SEPA DETERMINATION: Exempt DNS MDNS EIS

DNS with conditions

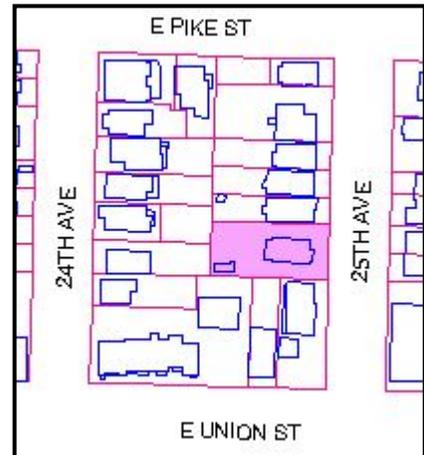

DNS involving non-exempt grading, or demolition,
or another agency with jurisdiction.

BACKGROUND DATA

Site & Area Description

The 7,696 square foot property is located at midblock on 25th Avenue between East Pike Street and East Union Street. All surrounding streets are improved with concrete curb, gutter, planting strip and sidewalk. The site is occupied by a single family residence and a small shed.

The subject property is located in a Multi-family Lowrise 1 zone (L-1), which continues to the north and east. A Neighborhood Commercial 2 zone (NC2-40) zone abuts the subject property to the south at East Union. A Single Family Residential 5000 (SF 5000) zone is located to the north and east. Surrounding uses consist of single family, multi-family, and small commercial development. The area is undergoing transition with several townhouse developments under construction

Proposal

The applicant proposes to construct two single family residences and one, 3-unit townhouse with vehicular access from 25th Ave. Parking for each unit will be provided within the building.

Public Comments

Public notice of the proposal was issued on January 4, 2007. No public comments were offered.

ANALYSIS - SEPA

The initial disclosure of the potential impacts from this project was made in the annotated environmental checklist dated October 26, 2006, and supplemental information in the project file submitted by the applicant's agent. The information in the checklist, the supplemental information, and the experience of the lead agency with the review of similar projects form the basis for this analysis and decision.

The SEPA Overview Policy (SMC 25.05.665 D) clarifies the relationship between codes, policies, and environmental review. Specific policies for each element of the environment, certain neighborhood plans, and other policies explicitly referenced may serve as the basis for exercising substantive SEPA authority.

The Overview Policy states, in part, "Where City regulations have been adopted to address an environmental impact, it shall be presumed that such regulations are adequate to achieve sufficient mitigation" subject to some limitations. Under such limitations/circumstances (SMC 25.05.665 D1-7) mitigation can be considered. Thus, a more detailed discussion of some of the impacts is appropriate.

Short-term Impacts

The following temporary or construction-related impacts are expected: decreased air quality due to increased dust and other suspended air particulates during construction; increased noise and vibration from construction operations and equipment; and increased traffic and parking demand from construction personnel. These impacts are not considered significant because they are temporary and/or minor in scope.

Compliance with existing ordinances, such as the Street Use Ordinance and the Noise Ordinance will provide sufficient mitigation. The other impacts not noted here as mitigated by codes or conditions (e.g., increased traffic and parking demand from construction personnel) are not sufficiently adverse to warrant further mitigation by conditioning. These impacts are not considered significant; however some of the impacts warrant further discussion and review.

Air Quality

Demolition and transport will create dust, leading to an increase in the level of suspended particulates in the air, which could be carried by winds out of the construction area. The Street Use Ordinance (SMC 15.22) requires watering the site, as necessary, to reduce dust. In addition, the Puget Sound Clean Air Agency (PSCAA regulation 9.15) requires that reasonable precautions be taken to avoid dust emissions. In addition to spraying water or chemical suppressants, this may require activities which produce air-borne materials or other pollutant elements to be contained within a temporary enclosure. Demolition could require the use of heavy trucks and smaller equipment such as generators and compressors. These engines would emit air pollutants that would contribute slightly to the degradation of local air quality. Since the demolition activity would be of short duration, the associated impact is anticipated to be minor, and does not warrant mitigation under SEPA.

Noise

Excavation will be required to prepare the building sites and foundations for the new buildings. Additionally, as development proceeds, noise associated with construction of the buildings could adversely affect the surrounding residential uses. Due to the proximity of neighboring residential uses, the limitations of the Noise Ordinance are found to be inadequate to mitigate the potential noise impacts. Pursuant to the SEPA Overview Policy (SMC.25.05.665) and the SEPA Construction Impacts Policy (SMC 25.05.675 B), mitigation is warranted. The hours of construction activity shall be limited to non-holiday weekdays between the hours of 7:30 A.M. and 6:00 P.M., Saturdays from 9:00 A.M. to 6:00 P.M. This condition may be modified by DPD to allow work of an emergency nature or to permit low-noise exterior work (e.g., installation of landscaping) after approval from DPD.

Long-term Impacts

Long-term or use-related impacts are also anticipated as a result of approval of this proposal including: increased surface water runoff due to greater site coverage by impervious surfaces; increased bulk and scale on the site; increased traffic in the area; increased demand for parking; and increased demand for public services and utilities.

Several adopted City codes and/or ordinances provide mitigation for some of the identified impacts. Specifically these are: the Stormwater, Grading and Drainage Control Code which requires on site collection of stormwater with provisions for controlled tight line release to an approved outlet and may require additional design elements to prevent isolated flooding; the City Energy Code which will require insulation for outside walls and energy efficient windows; and

the Land Use Code which controls site coverage, setbacks, building height and use and contains other development and use regulations to assure compatible development. Compliance with these applicable codes and ordinances is adequate to achieve sufficient mitigation of most long term impacts and no further conditioning is warranted by SEPA policies.

Height, Bulk and Scale

There will be increased height, bulk and scale on this site due to the proposed project. Setbacks, modulation requirements and roof pitch requirements are being met. Open space is being provided as prescribed in the Land Use Code. The proposed development is allowed in this zone and no additional height, bulk, or scale SEPA mitigation is warranted pursuant to the SEPA height, bulk and scale policy.

Parking

There will be increased parking demand created by the project. The project will provide parking for 5 vehicles. Adequate parking is provided for the proposed project.

Traffic

The applicant has stated that the proposed change of use would generate a total of approximately 10-30 vehicle trips per day. Thirty vehicle trips per day would likely have little effect on the existing traffic patterns in this area. Thus, the noted traffic-related impacts are not considered significant under SEPA (SMC 25.05.675.R).

Summary

The Department of Planning and Development has reviewed the environmental checklist submitted by the project applicant; reviewed the project plans and any additional information in the file; and any comments which may have been received regarding this proposed action have been considered. As indicated in the checklist, this action will result in probable adverse impacts to the environment. However, due to their temporary nature and limited effects, the impacts are not expected to be significant.

Codes and development regulations applicable to this proposed project will provide sufficient mitigation and no further conditioning or mitigation is warranted pursuant to the SEPA Overview Policy (SMC 25.05.665).

DECISION - SEPA

This decision was made after review by the responsible official on behalf of the lead agency of a completed environmental checklist and other information on file with the responsible department. This constitutes the Threshold Determination and form. The intent of this declaration is to satisfy the requirements of the State Environmental Policy Act (RCW 43.21C), including the requirement to inform the public agency decisions pursuant to SEPA.

- Determination of Non-Significance. This proposal has been determined to not have a significant adverse impact upon the environment. An EIS is not required under RCW 43.21C.030 2C.
- Determination of Significance. This proposal has or may have a significant adverse impact upon the environment. An EIS is required under RCW 43.21C.030 2C.

CONDITIONS – SEPA

Prior to Issuance of Master Use Permit:

1. Any plan changes shall be reflected in the construction permit for application number 6112965.

During Construction

2. The hours of construction shall be limited to non-holiday weekday hours between 7:00 A.M. and 5:00 P.M., Saturdays from 9:00 A.M. to 6:00 P.M.
