CITY OF SEATTLE ANALYSIS AND DECISION OF THE DIRECTOR OF THE DEPARTMENT OF PLANNING AND DEVELOPMENT

Project Number: 3003847
Applicant Name: Mike Cain for Center Line Properties NW
Address of Proposal: 4823 18th Avenue Southwest

SUMMARY OF PROPOSED ACTION

Land Use Application to subdivide one parcel into two parcels of land. Proposed parcel sizes are: A) 10,810 sq. ft. and B) 10,631 sq. ft. Existing detached sheds are to be demolished. Existing single family residence to remain.*

*Note – The project description has been revised from the following original notice of application: “Land Use Application to subdivide one parcel into two parcels of land. Proposed parcel sizes are: A) 9,961 sq. ft. and B) 11,479 sq. ft. Existing structures are to be demolished.”

The following approval is required:

Short Subdivision - to subdivide one existing parcel into two parcels of land.
(Seattle Municipal Code (SMC) Chapter 23.24)

BACKGROUND INFORMATION

Zoning: Single Family 7200 (SF 7200).

Uses on Site: One single family residence with attached garage and two detached shed structures.

Site Description

This 21,441 square foot (sq. ft.) project site is located in a Single Family 7200 (SF 7200) zone in the Delridge neighborhood of West Seattle. The parcel is situated on the west side of 18th Avenue Southwest. An existing single family residence with attached garage and two detached shed structures reside on the site.

Vehicular access to the site is via two separate driveways abutting 18th Avenue Southwest. Eighteenth Avenue Southwest is an unimproved non-arterial street with a paved roadway and no curbs, gutters or sidewalks.

The topography of the site is relatively flat. Existing vegetation consists of grass, shrubs and some mature trees. The subject property is not located within any identified or designated Environmentally Critical Areas (ECA).

Surrounding property south, north, east and west of the proposal site is also zoned SF 7200. Existing development in the vicinity of the proposal consists of homes varying in age and architectural style on a variety of lot sizes, consistent with the zoning designation. City of Seattle Parks Department (DOPAR) property (Puget Park) abuts the proposal site's westernmost boundary line.

Proposal

The proposal is to subdivide one parcel of land into two lots. Proposed parcel sizes are indicated in the summary above. Proposed Parcel A will have direct vehicular access from 18th Avenue Southwest. Proposed Parcel B will occur via an ingress/egress utility easement via 18th Avenue Southwest. The existing single family residence with attached garage will remain. The existing detached sheds will be removed.

The subject of this analysis and decision is restricted to the proposed division of land.

Public Comment

The required public comment period for this project ended on January 16, 2013. DPD received written comments from the DOPAR property management division which are noted in the project file.

ANALYSIS – SUBDIVISION

General short subdivision standards: Pursuant to SMC 23.24.040, the Director shall, after conferring with appropriate officials, use the following criteria to determine whether to grant, condition, or deny a short plat:

1. *Conformance to the applicable Land Use Code provisions, as modified by this chapter;*
2. *Adequacy of access for pedestrians, vehicles, utilities and fire protection as provided in Section 23.53.005, Access to lots, and Section 23.53.006, Pedestrian access and circulation;*
3. *Adequacy of drainage, water supply and sanitary sewage disposal;*
4. *Whether the public use and interests are served by permitting the proposed division of land;*
5. *Conformance to the applicable provisions of Section 25.09.240, Short subdivisions and subdivisions, in environmentally critical areas;*
6. *Whether the proposed division of land is designed to maximize the retention of existing trees;*

7. *Conformance to the provisions of Section 23.24.045, Unit lot subdivisions, when the short subdivision is for the purpose of creating separate lots of record for the construction and/or transfer of title of townhouse, rowhouse, and cottage housing developments as permitted in Single-Family, Residential Small Lot, and Lowrise zones and for single-family dwelling units in Lowrise zones, or any combination of the above types of residential development, as permitted in the applicable zones; and;*
8. *Conformance to the provisions of Section 23.24.046, Multiple single-family dwelling units on a single-family lot, when the short subdivision is for the purpose of creating two or more lots from one lot with more than one existing single-family dwelling unit.*
9. *Every lot except unit lots and lots proposed to be platted for individual live-work units in zones where live-work units are permitted shall conform to the following standards for lot configuration, unless a special exception is authorized under subsection 23.24.040.B:*
 - a. *If a lot is proposed with street frontage, then one lot line shall abut the street for at least 10 feet; and*
 - b. *No lot shall be less than 10 feet wide for a distance of more than 10 feet as measured at any point; and*
 - c. *No proposed lot shall have more than six separate lot lines. The lot lines shall be straight lines, unless the irregularly shaped lot line is caused by an existing right-of-way or an existing lot line; and*
 - d. *If the property proposed for subdivision is adjacent to an alley, and the adjacent alley is either improved or required to be improved according to the standards of Section 23. 53.030, then no new lot shall be proposed that does not provide alley access, except that access from a street to an existing use or structure is not required to be changed to alley access. Proposed new lots shall have sufficient frontage on the alley to meet access standards for the zone in which the property is located.*

Conclusion

Based on information provided by the applicant, referral comments from DPD and other City Departments, and review and analysis by the Land Use Planner, the above criteria have been met. The short subdivision meets all minimum standards or applicable exceptions set forth in the Land Use Code. This short subdivision will provide pedestrian and vehicular access (including emergency vehicles), and public and private utilities. Adequate provisions for drainage control, water supply and sanitary sewage disposal will be provided for each lot and service is assured, subject to standard conditions governing utility extensions. The proposed plat maximizes the retention of existing trees. The public use and interest are served by the proposal since all applicable criteria are met and the proposal creates the potential for additional housing opportunities in the City.

DECISION - SHORT SUBDIVISION

The proposed Short Subdivision is **GRANTED**.
