D. M. Sugimura, Director

CITY OF SEATTLE ANALYSIS AND DECISION OF THE DIRECTOR OF THE DEPARTMENT OF PLANNING AND DEVELOPMENT

Project Number: 3014629
Applicant Name: Eve Riley for Tom Borgen
Address of Proposal: 3715 SW 100th Street

SUMMARY OF PROPOSED ACTION

Land Use Application to subdivide two parcels into three parcels of land. Proposed parcel sizes are: A) 6,346 sq. ft. B) 5,533 sq. ft. and C) 5,333 sq. ft. Existing single family residence to remain, existing shed to be removed.

The following approval is required:

Short Subdivision - to subdivide two existing parcels into three parcels of land.
(Seattle Municipal Code (SMC) Chapter 23.24)

BACKGROUND INFORMATION

Zoning: Single Family 5000 (SF5000)
Uses on Site: One single family residence with detached garage.

Site Description

This 17,415 square foot (sq. ft.) project site is located in a SF500 zone in the southwest area of the City of Seattle. The parcel is situated on the south side of Southwest 100th Street between 37th Ave. Southwest and 39th Ave. Southwest. An existing single family residence and a detached garage/shed is located on the site.

Vehicular access to the site is via a curbcut abutting Southwest 100th Street. Southwest 100th Street is an improved non-arterial street with a paved roadway, curbs, gutters, street trees and sidewalks.

The topography of the site is nearly flat. Existing vegetation consists of grass, shrubs and some mature trees. The subject property is not located within any identified or designated Environmentally Critical Areas (ECA).

Surrounding property south, north, east and west of the proposal site is also zoned SF 5000. Existing development in the vicinity of the proposal consists of single family homes varying in age and architectural style on a variety of lot sizes, consistent with the zoning designation.

Proposal

The proposal is to subdivide one parcel of land into three parcels. Proposed parcel sizes are indicated in the summary above. Proposed Parcel A will have direct vehicular and pedestrian access to Southwest 100th Street. Proposed Parcels B and C will have vehicular access via recorded easement. The existing single family residence on proposed Parcel A will remain while the detached garage/shed will be removed.

The subject of this analysis and decision is restricted to the proposed division of land.

Public Comment

The required public comment period for this project ended on March 27, 2013. DPD received written comments from one neighbor regarding this proposal. The neighbor requested to be added to the mailing list and inquired about future development at the subject property. No permits for development at the site have been submitted to date.

ANALYSIS – SUBDIVISION

General short subdivision standards: Pursuant to SMC 23.24.040, the Director shall, after conferring with appropriate officials, use the following criteria to determine whether to grant, condition, or deny a short plat:

1. *Conformance to the applicable Land Use Code provisions, as modified by this chapter;*
2. *Adequacy of access for pedestrians, vehicles, utilities and fire protection as provided in Section 23.53.005, Access to lots, and Section 23.53.006, Pedestrian access and circulation;*
3. *Adequacy of drainage, water supply and sanitary sewage disposal;*
4. *Whether the public use and interests are served by permitting the proposed division of land;*
5. *Conformance to the applicable provisions of Section 25.09.240, Short subdivisions and subdivisions, in environmentally critical areas;*

6. *Whether the proposed division of land is designed to maximize the retention of existing trees;*
7. *Conformance to the provisions of Section 23.24.045, Unit lot subdivisions, when the short subdivision is for the purpose of creating separate lots of record for the construction and/or transfer of title of townhouse, rowhouse, and cottage housing developments as permitted in Single-Family, Residential Small Lot, and Lowrise zones and for single-family dwelling units in Lowrise zones, or any combination of the above types of residential development, as permitted in the applicable zones; and;*
8. *Conformance to the provisions of Section 23.24.046, Multiple single-family dwelling units on a single-family lot, when the short subdivision is for the purpose of creating two or more lots from one lot with more than one existing single-family dwelling unit.*
9. *Every lot except unit lots and lots proposed to be platted for individual live-work units in zones where live-work units are permitted shall conform to the following standards for lot configuration, unless a special exception is authorized under subsection 23.24.040.B:*
 - a. *If a lot is proposed with street frontage, then one lot line shall abut the street for at least 10 feet; and*
 - b. *No lot shall be less than 10 feet wide for a distance of more than 10 feet as measured at any point; and*
 - c. *No proposed lot shall have more than six separate lot lines. The lot lines shall be straight lines, unless the irregularly shaped lot line is caused by an existing right-of-way or an existing lot line; and*
 - d. *If the property proposed for subdivision is adjacent to an alley, and the adjacent alley is either improved or required to be improved according to the standards of Section 23. 53.030, then no new lot shall be proposed that does not provide alley access, except that access from a street to an existing use or structure is not required to be changed to alley access. Proposed new lots shall have sufficient frontage on the alley to meet access standards for the zone in which the property is located.*

Conclusion

Based on information provided by the applicant, referral comments from DPD and other City Departments, and review and analysis by the Land Use Planner, the above criteria have been met. The short subdivision meets all minimum standards or applicable exceptions set forth in the Land Use Code. This short subdivision will provide pedestrian and vehicular access (including emergency vehicles), and public and private utilities. Adequate provisions for drainage control, water supply and sanitary sewage disposal will be provided for each lot and service is assured, subject to standard conditions governing utility extensions. The proposed plat maximizes the retention of existing trees. The public use and interest are served by the proposal since all applicable criteria are met and the proposal creates the potential for additional housing opportunities in the City.

DECISION –SHORT SUBDIVISION

The proposed Short Subdivision is **GRANTED**.
