D. M. Sugimura, Director

**CITY OF SEATTLE
ANALYSIS AND DECISION OF THE DIRECTOR OF
THE DEPARTMENT OF PLANNING AND DEVELOPMENT**

Application Number: 3015072
Applicant Name: Jeff Wegener
Address of Proposal: 2343 10th Ave E.

SUMMARY OF PROPOSAL

Land Use Application to allow two, 2-unit townhouses (four units total) with parking for 4 vehicles located within the structures in an environmentally critical area. Existing structure to be demolished.

The following approval is required:

SEPA Environmental Threshold Determination (SMC Chapter 25.05)

SEPA DETERMINATION:

Determination of Non-significance

- No mitigating conditions of approval are imposed.
- Pursuant to SEPA substantive authority provided in SMC 25.06.660, the proposal has been conditioned to mitigate environmental impacts

BACKGROUND

The project has gone through the Streamline Design Review (SDR) process which is required when more than two townhouse units are being proposed for development. The SDR report was completed on June 24, 2013. A copy of the report is located on DPD's website at:
<http://www.seattle.gov/dpd/aboutus/news/events/DesignReview/SearchPastReviews/default.asp>.

SITE AND VICINITY

Site Location: The neighborhood is an eclectic mix of styles and residential structures including simple older three and four story apartment buildings, newer modulated wood-sided apartments and older single family residences converted into multifamily uses. To the north is a small neighborhood commercial zone of mostly single-story structures. To the north and west is the I-5, 520 interchange.

Zoning: Lowrise 3 (LR3)
Parcel Size: 5,760 sq. ft.
Existing Use: One multi-family duplex.
ECA: Steep Slope

PROJECT DESCRIPTION:

The proposed development will consist of two three-story townhouse structures, both containing two units. Two units have street frontage. The street facing units will have their entry accessed off the sidewalk on 10th Ave. E. The other two units have their pedestrian entry off the common access auto-court. All of the units will have private usable amenity space at grade and access to a private roof deck. Each unit includes an enclosed parking space. Access to parking is over a shared driveway by easement with the property to the south.

PUBLIC COMMENT:

The public comment period ended on August 8, 2013. No public comments were received.

ANALYSIS – SEPA

The proposal site is located in an environmentally critical area, as noted above. Proposals located in landslide prone areas (i.e. known landslide areas, potential landslide areas, and steep slopes), wetlands, and fish and wildlife habitat conservation areas may require environmental review (SMC 25.05.908), thus this application is not exempt from SEPA review. However, the scope of environmental review of projects within these critical areas is limited to: 1) documenting whether the proposal is consistent with the City's Environmentally Critical Areas (ECA) regulations in SMC 25.09; and 2) Evaluating potentially significant impacts on the critical area resources not adequately addressed in the ECA regulations. This review includes identifying additional mitigation measures needed to protect the ECA in order to achieve consistency with SEPA and other applicable environmental laws.

Environmental review resulting in a Threshold Determination is required pursuant to the Seattle State Environmental Policy Act (SEPA), WAC 197-11, and the Seattle SEPA Ordinance (Seattle Municipal Code Chapter 25.05).

The initial disclosure of the potential impacts from this project was made in the environmental checklist submitted by the applicant on July 15, 2013. The Department of Planning and Development has analyzed and annotated the environmental checklist submitted by the project applicant; reviewed the project plans and any additional information in the file and any pertinent

comments which may have been received regarding this proposed action have been considered. As indicated in the checklist, this action may result in adverse impacts to the environment. However, due to their temporary nature and limited effects, the impacts are not expected to be significant

City codes and/or ordinances apply to the proposal and will provide mitigation for some of the identified impacts. Specifically these are: the Stormwater Code (SMC 22.800-808), the Grading Code (SMC 22.170), the Street Use Ordinance (SMC Title 15), the Seattle Building Code, and Regulations for Environmentally Critical Areas (SMC 25.09).

The SEPA Overview Policy (SMC 25.05.665) clarifies the relationship between codes, policies, and environmental review. Specific policies for each element of the environment, and certain neighborhood plans and other policies explicitly referenced, may serve as the basis for exercising substantive SEPA authority. The Overview Policy states, in part, “*Where City regulations have been adopted to address and environmental impact, it shall be presumed that such regulations are adequate to achieve sufficient mitigation*” subject to some limitations. Under such limitations or circumstances (SMC 25.05.665 D) mitigation can be considered. Thus, a more detailed discussion of some of the impacts is appropriate. Short-term and long-term adverse impacts are anticipated from the proposal.

SHORT TERM IMPACTS

The following temporary or construction-related impacts on the environmentally critical area are expected: 1) temporary soil erosion; and 2) increased vibration from construction operations and equipment. These impacts are not considered significant because they are temporary and/or minor in scope (SMC 25.05.794).

Earth / Soils

The ECA Ordinance and Director’s Rule ([DR 18-2011](#)) require submission of a soils report to evaluate the site conditions and provide recommendations for safe construction in landslide prone areas. Pursuant to this requirement the applicant submitted a geotechnical engineering study by Geotech Consultants on July 16, 2013. The study has been reviewed and approved by DPD’s geotechnical experts, who will require what is needed for the proposed work to proceed without undue risk to the property or to adjacent properties.

No additional conditioning is warranted pursuant to SEPA policies.

LONG -TERM IMPACTS

Long term or use-related impacts on the environmentally critical area are also anticipated as a result of this proposal, including: increased surface water runoff due to greater site coverage by impervious surfaces; loss of plant and animal habitat. Compliance with applicable codes and ordinances will reduce or eliminate most adverse long-term impacts to the environment.

No additional conditioning is warranted pursuant to SEPA policies.

DECISION – SEPA

This decision was made after review by the responsible official on behalf of the lead agency of a completed environmental checklist and other information on file with the responsible department. This constitutes the Threshold Determination and form. The intent of this declaration is to satisfy the requirement of the State Environmental Policy Act (RCW 43.21.C), including the requirement to inform the public of agency decisions pursuant to SEPA.

- Determination of Non-Significance. This proposal has been determined to not have a significant adverse impact upon the environment. An EIS is not required under RCW 43.21.030(2) (c).

The lead agency for this proposal has determined that it does not have a probable significant adverse impact on the environment. An environmental impact statement (EIS) is not required under RCW [43.21C.030](#) (2)(c). This decision was made after review of a completed environmental checklist and other information on file with the lead agency. This information is available to the public on request.

This DNS is issued after using the optional DNS process in WAC [197-11-355](#) and Early review DNS process in SMC 25.05.355. There is no further comment period on the DNS.

CONDITIONS – SEPA

None required.

IMPORTANT INFORMATION FOR ISSUANCE OF YOUR MASTER USE PERMIT

Master Use Permit Expiration and Issuance

The appealable land use decision on your Master Use Permit (MUP) application has now been published. At the conclusion of the appeal period, your permit will be considered “approved for issuance”. (If your decision is appealed, your permit will be considered “approved for issuance” on the fourth day following the City Hearing Examiner’s decision.) Projects requiring a Council land use action shall be considered “approved for issuance” following the Council’s decision.

The “approved for issuance” date marks the beginning of the **three year life** of the MUP approval, whether or not there are outstanding corrections to be made or pre-issuance conditions to be met. The permit must be issued by DPD within that three years or it will expire and be cancelled. (SMC 23-76-028) (Projects with a shoreline component have a **two year life**. Additional information regarding the effective date of shoreline permits may be found at 23.60.074.)

All outstanding corrections must be made, any pre-issuance conditions met and all outstanding fees paid before the permit is issued. You will be notified when your permit has issued.

Questions regarding the issuance and expiration of your permit may be addressed to the Public Resource Center at prc@seattle.gov or to our message line at 206-684-8467.
