

City of Seattle

ENVIRONMENTAL CHECKLIST

A. BACKGROUND:

1. Name of proposed project, if applicable:

The proposal would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones. Currently Seattle's Land Use Code does not define transitional encampments and lacks standards that directly address these types of communities and associated activities or services.

In order for the proposal to proceed the following SEPA action would be taken: an ordinance amending Sections 23.43.040, 23.50.012, and 23.84A.038 of the Seattle Municipal Code; and adding new Sections 23.42.054, 23.44.053, 23.45.595, and 23.47A.036, to permit transitional encampments for homeless individuals as a use accessory to religious facilities in all zones.

2. Name of Applicant:

City of Seattle Department of Planning and Development

3. Address and phone number of applicant and contact person:

City of Seattle
Department of Planning and Development (DPD)
700 Fifth Avenue, Suite 2000
PO Box 34019
Seattle, Washington 98124-4019
Contact: William Mills, 684-8738

4. Date checklist prepared:

June 1, 2011

5. Agency requesting checklist:

City of Seattle Department of Planning and Development.

6. Proposed timing or schedule (include phasing if applicable):

The proposed Land Use Code amendments will likely be discussed in a public hearing and considered by the City Council in the summer of 2011.

7. Do you have any plans for future additions, expansions, or further activities related to or connected with this proposal? If yes, explain:

No.

8. List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal:

The information provided in this checklist.

9. Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain:

Not applicable. This is a non-project action that would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones.

10. List any governmental approvals or permits that will be needed for your proposal, if known:

The proposed amendment requires adoption by the City Council.

11. Give a brief, complete description of your proposal, including the proposed uses and the size of the project and site.

The proposed amendments would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones. The proposal would accomplish the following:

- Add a new definition for a “transitional encampment” to clarify that an encampment is a use providing temporary quarters for sleeping and shelter and describing the activities and development that are associated with the encampment;
- Add a new Code Section 23.42.054 providing for the transitional encampment use to locate on sites owned or occupied by a religious facility, such as a church or synagogue;
- Add specific standards for operation of the encampment in new Section 23.42.054 to address site management and operations, maintenance, hygiene, and security;

B. ENVIRONMENTAL ELEMENTS:

1. Earth

- a. General description of site (circle one): Flat, rolling, hilly, steep slopes, mountainous, other.**

The proposed amendments are a non-project action that would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones. Religious facilities are located throughout the city on a variety of sites.

- b. What is the steepest slope on the site (approximate percent slope)?**

The proposed amendments are a non-project action that would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones. Individual projects that may use the provisions of this proposal will be subject to environmental review if they meet or exceed thresholds for environmental review and environmentally critical areas regulations. Religious facilities are located throughout the city on a variety of sites including some with steep slopes.

- c. What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them and note any prime farmland.**

The proposed amendments are a non-project action that would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones. Religious facilities are located throughout the city on a variety of sites and could be located on a variety of the soil types found throughout the City. Individual projects developed under this proposal will be subject to environmental review if they meet or exceed thresholds for environmental review that will include a consideration of soil types at specific development sites.

- d. Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.**

The proposed amendments are a non-project action that would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to

religious facilities in all zones. No construction is proposed as part of an encampment use that would be authorized by the proposal. Religious facilities are located throughout the city on a variety of sites. Individual projects developed under this proposal will be subject to environmentally critical areas regulations and environmental review if they meet or exceed thresholds for environmental review that will include a consideration of whether there are surface indications of unstable soils in the vicinity of the project site.

e. Describe the purpose, type and approximate quantities of any filling or grading proposed. Indicate source of fill.

The proposed amendments are a non-project action that would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones. No permanent structures are proposed, and therefore filling or grading is unlikely. Individual projects developed under the proposal, if they involve filling and grading, will be subject to environmental review if they meet or exceed thresholds for environmental review.

f. Could erosion occur as a result of clearing, construction or use? If so, generally describe.

No. The proposed amendments are a non-project action that would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones. Individual projects developed under the provisions of this proposal will be subject to environmental review if they meet or exceed thresholds for environmental review.

g. About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?

The proposed amendments are a non-project action that would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones. The amount of impervious surface coverage depends upon existing site conditions and site design of a project-specific action. Individual projects subject to the provisions of this proposal will be subject to environmental review if they meet or exceed thresholds for environmental review.

h. Proposed measures to reduce or control erosion or other impacts to the earth, if any:

The proposed amendments are a non-project action that would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones. Individual projects developed under the provisions of this proposal will occur over time and cannot be evaluated in terms of measures to reduce or control erosion or other impacts to the earth at this stage. The amount of erosion depends upon existing site conditions and site design of a project-specific action. No permanent structures or other permanent development is proposed. Potential projects will be subject to environmental review if they meet or exceed thresholds for environmental review.

There are established policies and regulations to limit the potential of erosion and landslide impact of specific development proposals. The indirect effects of this non-project proposal on surface water resources are addressed in Section D, Supplemental Sheet for Non-project Actions.

2. Air

- a. What type of emissions to the air would result from the proposal (i.e., dust, automobile, odors, industrial, wood smoke) during construction and when the project is completed? If any, generally describe and give approximate quantities if known.**

This is a non-project action and no changes to odor standards are proposed. Greenhouse gas (GHG) emissions have also been considered, and no changes to GHG emissions are expected as a result of this non-project action. Individual projects developed under to the provisions of this proposal will be subject to environmental review if they meet or exceed thresholds for environmental review and existing odor and emissions requirements currently contained in the Land Use Code and promulgated by the Puget Sound Clean Air Agency. A SEPA GHG Emissions Worksheet is required for all individual projects subject to environmental review that may be developed under this proposal.

The indirect effects of this non-project proposal to air resources are addressed in Section D, Supplemental Sheet for Non-project Actions.

- b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.**

No. The proposed amendments are a non-project action that would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones. Individual projects developed under the provisions of this proposal will be subject to environmental review if they meet or exceed thresholds for environmental review. Off-site sources of emissions or odors could exist in the

vicinity of individual projects subject to the provisions of this proposal. There are established policies and regulations to prevent emissions that would result in harmful impacts on human activity in and adjacent to any proposed encampment.

c. Proposed measures to reduce or control emissions or other impacts to air, if any:

The proposed amendments are a non-project action that would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones. Individual projects developed under the provisions of this proposal will be subject to environmental review if they meet or exceed thresholds for environmental review. There are established policies and regulations to minimize or prevent adverse air quality impacts of specific development projects. Individual projects subject to the provisions of this proposal will occur over time and cannot be evaluated in terms of other measures to reduce or control emissions or other impacts to air at this stage. Such projects will be subject to environmental review if they meet or exceed thresholds for environmental review.

3. Water

a. Surface Water:

- 1) Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.**

The proposed amendments are a non-project action that would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones. It is possible that future sites could be near a surface water body.

- 2) Will the project require any work over, in or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.**

This is a non-project action. Individual projects developed under the provisions of this proposal may be located within 200 feet of water bodies and will be subject to provisions of the Shoreline Master Program and the Environmental Critical Areas regulations in the Seattle Municipal Code.

- 3) Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.**

This is a non-project action. Individual projects developed under this legislation may include fill and dredging activities, although it is unlikely since no permanent structures or permanent development is proposed, and will be subject to environmental review, the City's Shoreline Master Program and Environmentally Critical Areas regulations as well as other state and federal laws governing waterways and wetlands.

4) Will the proposal require surface water withdrawals or diversions? Give general description, purpose, and approximate quantities if known.

This is a non-project action. Individual projects developed under this proposal may require surface water withdrawals or diversions, although it is unlikely, and will be subject to environmental review if they meet or exceed thresholds for environmental review.

5) Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.

The proposed amendments are a non-project action that would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones. Religious facilities are located throughout the city on a variety of sites. Since the amendment applies to various sites, it is possible that future development sites could be located on 100-year floodplains. Development in floodplains is subject to the City's Environmentally Critical Areas Ordinance and will be subject to environmental review if they meet or exceed thresholds for environmental review.

6) Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge.

No. The proposal is a non-project action. Grey water from a potential encampment would be addressed by requiring it be discharged to an approved location, such as a City sewer system.

b. Ground Water:

1) Will groundwater be withdrawn or will water be discharged to groundwater? Give general description, purpose, and approximate quantities if known.

The proposed amendments are a non-project action that would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones. Zoning and development regulation changes in the proposed legislation are unlikely to result in the

withdrawal of or discharge to ground water as part of the site development for an individual project. Individual projects subject to the provisions of this proposal will be subject to environmental review if they meet or exceed thresholds for environmental review.

- 2) **Describe waste material that will be discharged into the ground for septic tanks or other sources, if any (for example: Domestic sewage; industrial, containing the following chemicals...; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.**

Not applicable. The proposed amendments are a non-project action that would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones. Individual projects developed under the proposal will be subject to environmental review if they meet or exceed thresholds for environmental review.

c. Water Runoff (including storm water):

- 1) **Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.**

This is a non-project action. It is possible that projects developed under the proposal could result in runoff, but that runoff would not be a direct result of the proposal. The amount of runoff and method of collection depends upon existing site conditions and site design of a project-specific action. Individual projects will be subject to the City's stormwater and drainage requirements and environmental review if they meet or exceed thresholds for environmental review. The indirect effects of this non-project proposal related to water runoff are addressed in Section D, Supplemental Sheet for Non-project Actions.

- 2) **Could waste materials enter ground or surface waters? If so, generally describe.**

The proposal is a non-project action and has no direct impact on whether waste materials would enter ground or surface waters. Individual projects developed under the proposal will be subject to the City's Environmentally Critical Areas Ordinance, and the City's stormwater and drainage requirements and environmental review if they meet or exceed thresholds for environmental review. The indirect effects of this non-project proposal related to water runoff are addressed in Section D, Supplemental Sheet for Non-project Actions.

d. Proposed measures to reduce or control surface, ground or runoff water impacts, if any:

The project is a non-project action. There are established policies and regulations to protect wetlands, riparian corridors, lakes, drainage basins, wildlife habitats, slopes, and other property from adverse drainage impacts of specific development projects. New projects developed under the proposal will be required to comply with the City's Stormwater, Grading & Drainage Control Ordinance and provide for mitigation of erosion, if required. Individual projects will also be subject to environmental review if they meet or exceed thresholds for environmental review.

4. Plants

a. Check the types of vegetation found on the site:

- Deciduous tree: alder, maple, aspen, other
- Evergreen tree: fir, cedar, pine, other
- Shrubs
- Grass
- Pasture
- Crop or grain
- Wet soil plants: cattail, buttercup, bulrush, skunk cabbage, other
- Water plants: water lily, eelgrass, milfoil, other
- Other types of vegetation

Citywide application: each of these features exists within the city limits to a limited extent.

b. What kind and amount of vegetation will be removed or altered?

The project is a non-project action. Individual development projects developed under the land use and zoning changes of the proposal will be subject to environmental review if they meet or exceed thresholds for environmental review, the City's Environmentally Critical Areas Ordinance, Significant Trees Ordinance, and other regulations. The indirect effects of this non-project proposal on vegetation are addressed in Section D, Supplemental Sheet for Non-project Actions. The amount of vegetation removed on any given site depends upon existing site conditions and project-specific site design. The proposed legislation is unlikely to affect the amount of vegetation removed or altered compared to that allowed under existing regulations.

c. List threatened or endangered species known to be on or near the site:

This is a non-project action. The proposal includes changes in land use and zoning that are unlikely to have a different affect on threatened or endangered plant species than existing regulations. Individual projects developed under the proposal will be subject to the City's Environmentally Critical Areas Ordinance that requires identification of threatened or endangered species on or near individual project sites.

d. Proposed landscaping, use of native plants or other measures to preserve or enhance vegetation on the site, if any:

The proposal is a non-project action. Individual projects developed under the proposal will occur over time and cannot be evaluated in terms of landscaping or other measures to preserve or enhance vegetation at this stage. Individual projects will be subject to environmental review if they meet or exceed thresholds for environmental review.

5. Animals

a. Circle any birds and animals that have been observed on or near the site or are known to be on or near the site:

This proposal is a non-project action and does not involve construction or development activity. Individual projects developed under the land use and zoning changes of this proposal will occur over time and cannot be evaluated in terms of specific animals present on any property at this stage.

b. List any threatened or endangered species known to be on or near the site.

This proposal is a non-project action and does not involve construction or development activity. Individual projects developed under the land use and zoning changes of this proposal will occur over time and cannot be evaluated in terms of specific animals present on any property at this stage.

c. Is the site part of a migration route? If so, explain.

Not applicable. The proposed amendments are a non-project action that would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones. Individual projects developed under this proposal may include sites that are part of a migration route and will be subject to environmental review if they meet or exceed thresholds for environmental review, which would consider if individual sites are part of a migration route, and individual projects would be subject to review under the City's Regulations for Environmentally Critical Areas as applicable.

d. Proposed measures to preserve or enhance wildlife, if any:

The proposal is a non-project action that is not anticipated to have any specific impacts on wildlife. Individual projects developed under the proposal will occur over time and cannot be evaluated in terms of measures to preserve or enhance wildlife at this stage. Such projects will be subject to environmental review if they meet or exceed thresholds for environmental review.

6. Energy and Natural Resources

a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing etc.

The project is a non-project action. Individual projects developed under the proposal will occur over time and cannot be evaluated in terms of energy requirements at this stage. Such projects will be subject to subsequent environmental review if they meet or exceed thresholds for environmental review.

b. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.

This is a non-project action. Individual projects developed under the proposal will occur over time and cannot be evaluated in terms of impacts to adjacent properties at this stage. Individual development projects subject to the proposal will also be subject to environmental review and design review if they meet or exceed relevant thresholds for height, bulk, and scale impacts.

c. What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any:

The proposal is a non-project action. Individual projects developed under the proposal will occur over time and cannot be evaluated in terms of energy conservation features or measures to reduce or control energy impacts at this stage. Potential projects will be

subject to environmental review if they meet or exceed thresholds for environmental review. The indirect effects of this non-project proposal on energy resources are addressed in Section D, Supplemental Sheet for Non-project Actions.

7. Environmental Health

a. Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill or hazardous waste, that could occur as a result of this proposal? If so, describe.

This is a non-project action. Individual projects developed under the proposal will be subject to the City's Environmentally Critical Areas Ordinance and environmental review if they meet or exceed thresholds for environmental review.

1) Describe special emergency services that might be required.

The amount of potential development that would result from the proposal is within the range covered by the City of Seattle's Comprehensive Plan for Fire Protection and Police Services. In general, emergency service providers including the Fire and Police Departments will review the effects of increased development and propose enhanced services as necessary as part of their planning for future service needs. The indirect effects of this non-project proposal are not expected to result in an increased need for emergency services. Individual projects developed under this proposal will occur over time and cannot be evaluated in terms of special emergency services required at this stage. Such projects will be subject to environmental review if they meet or exceed thresholds for environmental review. See discussion in Section D, Supplemental Sheet for Non-project Actions.

2) Proposed measures to reduce or control environmental health hazards, if any:

The indirect effects of this non-project proposal are not expected to result in an increase of environmental health hazards. Individual projects developed under the proposal will occur over time and cannot be evaluated in terms of measures to reduce or control environmental health hazards at this stage. Such projects will be subject to project-specific environmental review if they meet or exceed thresholds for environmental review. See discussion in Section D, Supplemental Sheet for Non-project Actions.

b. Noise

1) What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?

The proposed amendments are a non-project action that would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may

accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones. For individual projects developed under the proposal, the extent of existing traffic and other noise affecting a given project will be assessed through project-specific environmental review if they meet or exceed thresholds for environmental review.

2) What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site.

This is a non-project action. The indirect effects of this non-project proposal are not expected to increase noise impacts. Individual projects developed under the proposal will occur over time and cannot be evaluated in terms of noise impacts at this stage. Such projects will be subject to environmental review if they meet or exceed thresholds for environmental review as they move forward. See discussion in Section D, Supplemental Sheet for Non-project Actions. Projects will also be subject to the Noise Ordinance.

3) Proposed measures to reduce or control noise impacts, if any:

This proposal is a non-project action and does not involve construction or development activity. Individual projects subject to the provisions of this proposal will occur over time and cannot be evaluated in terms of measures to reduce or control noise impacts at this stage. Such projects will be subject to project-specific environmental review if they meet or exceed thresholds for environmental review.

8. Land and Shoreline Use

a. What is the current use of the site and adjacent properties?

The proposed amendments are a non-project action that would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones. Religious facilities are located throughout the city on a variety of sites and in a variety of zones. Religious facilities are classified as a type of institution, while adjacent properties could contain a variety of uses, including residential, commercial, institutional, and industrial uses.

b. Has the site been used for agriculture? If so, describe.

No. The proposed amendments are a non-project action that would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones.

c. Describe any structures on the site.

The proposed amendments are a non-project action that would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones. Structures found on the sites to be regulated by the proposed amendments include primarily religious structures classified as institutions. However, religious facilities are located throughout the city on a variety of sites and in a variety of zones, and have building types of varying heights, building materials, age, and lot coverage.

d. Will any structures be demolished? If so, what?

This is a non-project action. No demolition is expected as a direct result of the proposal. Individual projects developed under the land use and zoning provisions of the proposal are unlikely to include demolition of existing structures.

e. What is the current zoning classification of the site?

The proposed amendments are a non-project action that would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones. Religious facilities are located throughout the city on a variety of sites and in a variety of zones.

f. What is current comprehensive plan designation of the site?

The proposed amendments are a non-project action that would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones. Religious facilities are located throughout the city on a variety of sites and in a variety of zones, with a variety of comprehensive plan designations.

g. If applicable, what is the current shoreline master program designation of the site?

The area subject to the proposed amendment could include sites located within the shoreline overlay districts and within various shoreline designations. The proposed changes will not result in changes to any shoreline designation.

h. Has any part of the site been classified as an "environmentally sensitive" area? If so, specify.

The proposed amendments are a non-project action that would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones. Religious facilities are located throughout the city on a variety of sites and in a variety of zones. The variety of sites proposed to be regulated by the legislation could include some sites with "environmentally sensitive" areas.

i. Approximately how many people would reside or work in the completed project?

Not applicable. The proposed amendments are a non-project action that would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones.

j. Approximately how many people would the completed project displace?

The indirect effects of this non-project proposal are not expected to increase the rate and extent at which residences or businesses are displaced.

k. Proposed measures to avoid or reduce displacement impacts, if any:

The indirect effects of this non-project proposal are not expected to increase the rate or extent at which residences or businesses are displaced.

l. Proposed measures to ensure the proposal are compatible with existing and projected land uses and plans, if any:

The proposed amendments are a non-project action that would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones. The proposal would establish a use of land classified as a transitional encampment that would be regulated as a use accessory to a religious facility. Encampments would be subject to standards governing health and safety and these limitations address compatibility with existing and projected land uses and plans.

9. Housing

a. Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.

This is a non-project action. The proposal is for a non-residential use that is not expected to provide housing.

b. Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.

This is a non-project action. Individual projects subject to the provisions of this proposal will occur over time and cannot be evaluated in terms of elimination of housing units at this stage. Proposed projects will be subject to environmental review if they meet or exceed thresholds for environmental review, and will need to meet the City's requirements for providing replacement use for any housing units that are proposed to be demolished. However, due to the proposed requirement for siting as a use accessory to religious facilities, it is unlikely that housing units would be eliminated as a result of this proposal.

c. Proposed measures to reduce or control housing impacts, if any:

The indirect effects of this non-project proposal are not expected to result in increased housing impacts.

10. Aesthetics

a. What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?

This is a non-project action. Projects and development consistent with this proposal will occur over time and cannot be evaluated in terms of heights or building materials at this stage. Proposed projects will be subject to environmental review if they meet or

exceed thresholds for environmental review. No permanent structures would be allowed under the proposal.

b. What views in the immediate vicinity would be altered or obstructed?

This is a non-project action. Individual projects developed under this proposal will occur over time and cannot be evaluated in terms of view alteration at this stage. Individual projects subject to the proposal will be subject to environmental review if they meet or exceed thresholds for environmental review. No permanent structures are proposed to be allowed.

c. Proposed measures to reduce or control aesthetic impacts, if any:

Not applicable. The proposed amendments are a non-project action that would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones.

11. Light and Glare

a. What type of light or glare will the proposal produce? What time of day would it mainly occur?

This is a non-project action. Individual projects subject to the proposal will be subject to environmental review if they meet or exceed thresholds for environmental review.

b. Could light or glare from the finished project be a safety hazard or interfere with views?

This is a non-project action. Individual projects developed under the proposal will be subject to environmental review if they meet or exceed thresholds for environmental review. Impacts are unlikely as no permanent structures are allowed by the proposal.

c. What existing off-site sources of light or glare may affect your proposal?

This is a non-project action. The proposed amendments are a non-project action that would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones. Religious facilities are located throughout the city on a variety of sites and in a variety of zones. Ambient light and glare typical of urban areas exist in various locations throughout the city. The extent of light and glare resulting from an individual project subject to this proposal will be assessed through project-specific environmental review if they meet or exceed thresholds for environmental review.

d. Proposed measures to reduce or control light and glare impacts, if any:

This is a non-project action. The extent of light and glare resulting from an individual project will be assessed and mitigated through project-specific environmental review if they meet or exceed thresholds for environmental review.

12. Recreation

a. What designated and informal recreational opportunities are in the immediate vicinity?

The proposed amendments are a non-project action that would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones. Individual projects developed under the proposal will be subject to environmental review if the project meets or exceeds thresholds for environmental review.

b. Would the proposed project displace any existing recreational uses? If so, describe.

This is a non-project proposal which is not likely to change the potential for displacement of any existing recreational uses. Individual projects subject to the proposal will also be subject to environmental review if they meet or exceed thresholds for environmental review.

c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:

This is a non-project proposal. Individual projects developed under the proposal will also be subject to environmental review if they meet or exceed thresholds for environmental review.

13. Historical and Cultural Preservation

a. Are there any places or objects listed on, or proposed for national, state, or local preservation registers known to be on or next to the site? If so, generally describe.

The proposed amendments are a non-project action, applicable to a variety of sites in all zones. City, State and National Landmarks are found throughout the city.

b. Generally describe any landmarks or evidence of historic, archaeological, scientific, or cultural importance known to be on or next to the site?

This is a non-project action. Individual projects and development that are subject to the proposal will be subject to the City's regulations related to historic and archaeologically significant landmarks as well as environmental review if they meet or exceed thresholds for environmental review.

c. Proposed measures to reduce or control impacts, if any:

The proposed amendments are a non-project action that would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones. The indirect impacts of this non-project proposal on historic and cultural resources are discussed in Section D, Supplemental Sheet for Non-project Actions. There are established policies and regulations to maintain and preserve significant historic sites and structures and to provide the opportunity for analysis of archaeological sites during review of specific development projects. Projects involving structures or sites which have been designated as landmarks are subject to compliance with the Landmarks Preservation Ordinance.

14. Transportation

a. Identify public streets and highways serving the site, and describe the proposed access to the existing street system. Show on site plans, if any.

The proposed amendments are a non-project action that would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones. Seattle is served by a variety of streets and highways located near or adjacent to the sites to be affected by the proposed amendments.

b. Is the site currently served by public transit? If not, what is the approximate distance to the nearest transit stop?

The proposed amendments are a non-project action that would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones. The properties that could be affected by the legislation are served by varying levels of public transportation services depending on location and density of the neighborhood.

c. How many parking spaces would the completed project have? How many would the project eliminate?

The proposed amendments are a non-project action that would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones. No parking would be added or eliminated by this non-project action. Individual projects developed under the proposal will be subject to environmental review if they meet or exceed thresholds for environmental review.

d. Will the proposal require any new roads or streets, or improvements to existing roads or streets, not including driveways? If so, generally describe (indicate whether public or private).

The proposed amendments are a non-project action that would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones. The proposal is not expected to require new roads or streets.

e. Will the project use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.

The proposed amendments are a non-project action that would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones. Seattle is served city-wide by water, rail and air transportation.

f. How many vehicular trips per day would be generated by the completed project? If known, indicate when peak volumes would occur.

The proposed amendments are a non-project action that would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones. The proposal will likely result in a slight increase in the number of vehicular trips for any site on which an encampment to be regulated by the proposed legislation would be located. The increase is not expected to be significant. Most occupants of an encampment would use public transit. The direct and indirect effects of this non-project proposal on vehicle trips are discussed in Section D, Supplemental Sheet for Non-project Actions.

g. Proposed measures to reduce or control transportation impacts, if any:

Not applicable. The proposed amendments are a non-project action that would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones. Individual projects subject to the proposal will be subject to environmental review if they meet or exceed thresholds for environmental review.

15. Public Services

a. Would the project result in an increased need for public services (for example: fire protection, police protection, health care, schools, other)? If so, generally describe.

The proposed amendments are a non-project action that would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones. The proposed amendments would change potential demand for public services on a site where a proposed encampment would be located, but the change is not expected to be significant. The indirect effects of this non-project proposal on public services are discussed in Section D, Supplemental Sheet for Non-project Actions.

b. Proposed measures to reduce or control direct impacts on public services, if any.

None needed. The proposed amendments are a non-project action that would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones. The impacts on public services are not expected to be significant.

16. Utilities

a. Utilities currently available at the site: electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system, other.

The proposed amendments are a non-project action that would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones. Individual projects developed under this proposal may be served by utilities including electricity, natural gas, water, refuse service, telephone, or sanitary sewer.

b. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed:

The proposed amendments are a non-project action that would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones. The proposal is not expected to change potential demand for utility services or the specific services to be provided, which are decided on a site-by-site basis. The indirect effects of this non-project proposal on utilities are discussed in Section D, Supplemental Sheet for Non-project Actions.

C. SIGNATURE

Signature provided following section D below.

D. SUPPLEMENTAL SHEET FOR NON-PROJECT ACTIONS

Because these questions are very general, it may be helpful to read them in conjunction with the list of the elements of the environment.

When answering the questions, be aware of the extent of the proposal, or the types of activities likely to result from the proposal, would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

1. How would the proposal be likely to increase discharge to water; emissions to air; production, storage, or release of toxic or hazardous substances; or production of noise?

The proposed amendments are a non-project action that would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones. It is expected that there is no potential for increased impacts to water, air, or noise or additional release of hazardous substances. No permanent development is proposed. Greenhouse gas (GHG) emissions have also been considered, and no changes to GHG emissions are expected as a result of this non-project action. Individual projects developed under the land use and zoning provisions of the proposal will occur over time and cannot be evaluated in terms of discharge to water, emissions to air, production, storage, or release of toxic or hazardous substances, or noise, at this stage. Proposed projects will be subject to environmental review if they meet or exceed thresholds for environmental review.

Proposed measures to avoid or reduce such increases are:

As discussed above, there is little to no potential for indirect impacts of this non-project proposal. The existing regulatory framework, the Land Use Code, the Shoreline Master Program, Environmentally Critical Areas Ordinance, and the City's SEPA ordinance will address impacts during review of development proposals on a project-specific basis. A SEPA GHG Emissions Worksheet is required for all individual projects that may be developed under this proposal if they meet or exceed thresholds for environmental review.

2. How would the proposal be likely to affect plants, animals, fish or marine life?

The proposed amendments are a non-project action that would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones. The potential for increased environmental impacts to plants, animals, fish or marine life is low, as no permanent development is proposed and there are likely minimal numbers of plants or animals on the sites of existing religious facilities that would be eligible sites for an encampment under the proposal. On a site-by-site basis, future development projects could potentially result in plant and animal impacts as a result of clearing vegetation or habitat that may be present on these sites, but any impacts are expected to be minimal.

Proposed measures to protect or conserve plants, animals, fish, or marine life are:

As discussed above, it is not expected that there will be any potential for indirect impacts of this non-project proposal. The existing regulatory framework, the Land Use Code, The Shoreline Master Program, Environmentally Critical Areas Ordinance, and the City's SEPA ordinance will address impacts during review of development proposals on a project-specific basis.

3. How would the proposal be likely to deplete energy or natural resources?

The proposed amendments to the Land Use Code would be unlikely to result in any major changes to the rate of development or patterns of development in the City. As a result, the potential for increased depletion of energy and natural resources is low.

Proposed measures to protect or conserve energy and natural resources are:

As discussed above, the potential for indirect impacts of this non-project proposal are expected to be minor. The existing regulatory framework, the Land Use Code, The Shoreline Master Program, Environmentally Critical Areas Ordinance, and the City's SEPA ordinance will address impacts during review of development proposals on a project-specific basis.

4. How would the proposal be likely to use or affect environmentally sensitive areas or areas designated (or eligible or under study) for governmental protection; such as

parks, wilderness, wild and scenic rivers, threatened, or endangered species habitat, historic or cultural sites, wetlands, floodplains, or prime farmlands?

The proposed amendments are a non-project action that would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones. The existing regulatory framework, the Land Use Code, the Shoreline Master Program, Environmentally Critical Areas Ordinance, and the City's SEPA ordinance will address impacts during review of development proposals on a project-specific basis.

Proposed measures to protect such resources or to avoid or reduce impacts are:

The existing regulatory framework, the Land Use Code, The Shoreline Master Program, Environmentally Critical Areas Ordinance, and the City's SEPA ordinance will address impacts during review of development proposals on a project-specific basis.

5. How would the proposal be likely to affect land and shoreline use, including whether it would allow or encourage land and shoreline uses incompatible with existing plans?

The proposed amendments are a non-project action that would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones. No permanent structures or other permanent development would be allowed under the proposal. It is unlikely to result in any major changes to the rate of development or patterns of development in shoreline areas of the City or that are incompatible with existing plans. The existing regulatory framework, the Land Use Code, The Shoreline Master Program, Environmentally Critical Areas Ordinance, and the City's SEPA ordinance will address impacts during review of development proposals on a project-specific basis.

Proposed measures to avoid or reduce shoreline and land use impacts are:

The proposed amendments are a non-project action that would amend the Land Use Code to define transitional encampments as a use intended for temporary sleeping and shelter, including defining what activities and development may accompany the encampment, and provide minimum standards for their location as a use accessory to religious facilities in all zones. Projects developed under the proposal are subject to review under the existing regulatory framework, the Land Use Code, The Shoreline Master Program, Environmentally Critical Areas Ordinance, and the City's SEPA ordinance. Impacts will be addressed through the review of specific projects for compliance under the provisions of these regulations.

6. How would the proposal be likely to increase demands on transportation or public services and utilities?

The proposed amendment will not result in significant adverse impacts to traffic or parking or public services and utilities. The existing regulatory framework, the Land Use Code, The Shoreline Master Program, Environmentally Critical Areas Ordinance, and the City's SEPA ordinance will address impacts during review of development proposals on a project-specific basis. The proposal is not anticipated to have a substantial effect on public services or utilities.

Proposed measures to reduce or respond to such demands are:

Projects developed under the proposal would be reviewed on a case-by-case basis and mitigation would be required where permitted and appropriate.

7. Identify, if possible, whether the proposal may conflict with local, state, or federal laws or requirements for the protection of the environment.

No conflicts are anticipated with local, state, or federal laws or requirements for protection of the environment.

SIGNATURE:

I, the undersigned, state that to the best of my knowledge the above information is true and complete. It is understood that the lead agency may withdraw any declaration of non-significance that it might issue in reliance upon this checklist should there be any willful misrepresentation or willful lack of full disclosure on my part.

William K. Mills
