- 30 - 41
- 12 - 29 (less diverse)
- Seattle City Limit

Data Source:
 U.S. Census Bureau
 Decennial Census 100% Count data
 1990, 2000, 2010

The diversity index measures the probability that any two people chosen at random, would be of different races. If all people are of the same race group the index would be zero. A perfectly mixed group of people would have an index of 100.

Gibbs and Martin, 1962.
