North Rainier
NEIGHBORHOOD PLAN UPDATE

Recommendations to City Council

Goals, Policies and Strategies
to Achieve the North Rainier Neighborhood Vision
In the North Rainier Neighborhood Plan Update process initiated in 2009, a diverse community of stakeholders articulated priorities for the future of their neighborhood, identifying goals and shaping the policies and strategies to achieve them. They benefited from the compelling vision of the existing Neighborhood Plan, first completed in 1999, which established a vision for an interweaving of people of various backgrounds who live and work in a culturally and economically diverse area that maintains its ethnic roots. Central to this is the goal of creating a compact, mixed-use neighborhood or “Town Center” near the light rail station. Major steps have been taken in North Rainier in the past decade, including the opening of a new light rail station and improvements to Cheasty Boulevard and other parks. As the community made clear in the update process, however, significant work remains to be done, and there are newly emerging priorities and new strategies to pursue.

The workshops, meetings, and ongoing discussions that have shaped the update underscore the widely shared goal of increasing the community’s choices for how to live, work, and enjoy life in their neighborhood. There are several new recommendations intended to help maintain the community’s diversity and ethnic roots. These include strategies to preserve opportunities for small and ethnic businesses, create a multicultural community center, and encourage park facilities and programming that are culturally relevant to different communities.

Participants continue to recognize the potential of light rail service to create a neighborhood Town Center that is a corner of a more sustainable community. They have envisioned how more households would increase opportunities for the diversity of businesses and services that they value. At the same time, they have emphasized that they need a Town Center that works for them, where growth and change include housing for diverse incomes and household sizes; connecting their homes and businesses with safe, green, and walkable streets and sidewalks is equally important.

The workshops, meetings, and ongoing discussions that have shaped the update underscore the widely shared goal of increasing the community’s choices for how to live, work, and enjoy life in their neighborhood. There are several new recommendations intended to help maintain the community’s diversity and ethnic roots. These include strategies to preserve opportunities for small and ethnic businesses, create a multicultural community center, and encourage park facilities and programming that are culturally relevant to different communities.

The update recognizes the potential for the large sites to the north of S. McClellan St. to bring significant new residential and commercial development that could transform the Town Center into a vibrant community and destination. Consequently, the update includes strategies to further study a range of height increases in the Town Center. This reflects the potential for compact development, including a small number of towers. Completion of an urban design plan, design guidelines and street designs will give clear guidance to development. In addition, as part of the vision for the Town Center, the update proposes to create a “Main Street” for the Town Center along the blocks of Rainier Ave. S. between S. Bayview St. and MLK Jr. Way S. rather than pursuing a roundabout as promoted in the 1999 plan.

The update’s format and structure are designed to allow a civic partnership of the community, City, and public and private organizations to work together to make this vision a reality.

In the 1990s, community members from 38 neighborhoods across the city created a 20-year vision for how each of their neighborhoods would grow. This work was done as part of the Seattle Comprehensive Plan initiative, a citywide effort that sought to “preserve the best quality of Seattle’s distinct neighborhoods while responding positively and creatively to the pressures of change and growth.” The Neighborhood Plans developed strategies to ensure that the creative response to growth was informed by both City expertise and local knowledge and priority-setting.

In the decade after the plans were completed, there have been significant changes in Seattle and its neighborhoods, including growth in housing, and major investments in public amenities. Also, during this time the population of the city also greatly diversified. Following extensive discussion and review of the existing Neighborhood Plans and their effectiveness, in 2008, the Mayor and City Council recognized the need to revisit the plans through broad and inclusive discussions with the community, including new strategies for civic engagement.

The update process was begun in 2009 to confirm the neighborhood vision, refine the plan Goals and Policies in order to take into account changed conditions, and update work plans to help ensure that each community’s vision and goals are achieved through the implementation of the strategies and actions.

The update’s format and structure are designed to allow a civic partnership of the community, City, and public and private organizations to work together to make this vision a reality.
Over the course of the past year, a broad cross section of community members engaged with the City through both innovative and time-tested tools. From hands-on workshops and smaller-scale interactive meetings with community-based organizations, to online updates and questionnaires, neighbors used a variety of ways to be involved. Reaching a broad range of those who live and work in North Rainier, including those who have been historically underrepresented in the planning process, was a primary objective of the update process. During 2009, community members expressed their views at 28 neighborhood and City-sponsored meetings and events in North Rainier. Long-time veterans of neighborhood planning, stewards of the important work begun in the 1990s, and a new generation of neighborhood planners came together to build a broader base of civic engagement. Bicultural and bilingual Planning Outreach Liaisons (POLs) connected with 13 under-represented communities. The POLs hosted 38 community workshops where historically underrepresented North Rainier community members participated—strengthening the bridge between the City of Seattle, residents, community organizations, and businesses.

This intensive effort was necessary in order to build relationships with those who were new to the planning discussion, and to provide sufficient background information to help them participate effectively. POLs went beyond translation and interpretation to create culturally appropriate opportunities for dialogue about planning and create deeper understanding of the issues and richer input. For example, sight-impaired and mobility-impaired workers at the Lighthouse for the Blind came together to discuss specific issues and recommendations for making open spaces and streets better places for people with disabilities.

In March 2009, neighbors engaged in the first phase of the update process through the North Rainier Baseline and Issues Identification Workshop at Franklin High School. They discussed neighborhood-initiated planning efforts since the writing of the existing Neighborhood Plan as well as how to build on that work given changing conditions. Neighbors described how they live, work and play in their neighborhood, what makes it unique, what they value in the community and how they see it changing in the next several years. Neighbors also described how they move around and through the community, the kinds of places they go and how they value those places, especially parks and open space. Embedded in these discussions were their identified needs for a healthy and vital neighborhood. POLs extended this conversation into their respective communities throughout March and April. North Rainier’s important issues and priorities emerged from these conversations. In May small groups of neighbors and City staff worked together at a Town Hall meeting at the Northwest African American Museum to address themes that emerged from the March and April workshops. Neighbors worked through hands-on exercises to identify gaps and opportunities for improving mobility around and through the neighborhood as well as to explore the relationships between the number of households in the neighborhood, retail destinations, parks and walkability. The POLs replicated the exercises; working with their respective communities. The community’s goals and desired improvements within the neighborhood grew from this second phase of meetings.

In September 2009, community members attended two open houses to review draft goals and recommendations that grew from the themes, issues, goals and desired improvements voiced by the community throughout the preceding months. Outreach continued through the final months of the year, including the work of POLs, who reached out to their communities to both review draft plan recommendations and to lay the groundwork for their ongoing engagement in the update’s implementation phase.

Throughout the plan update process, the workshops and meetings have been structured to engage community discussion and guidance, followed by reporting back, all of which has informed the next steps of drafting and finalizing recommendations. This broad engagement and detailed recording of community comments throughout the process created ongoing transparency that serves as the underpinning of this update to the North Rainier Neighborhood Plan.

A sustainable community is one that values and plans for its long-term social, economic, and environmental health. Seattle’s Comprehensive Plan states this as four values that are the bedrock of the City’s commitment to sustainability: community, environmental stewardship, economic opportunity and security, and social equity. North Rainier is a Hub Urban Village with remarkable existing and potential strengths as a sustainable community. A core principle of Seattle’s approach to sustainability is that it must be addressed at the neighborhood level, and that it is critical to directly engage the people who live, work, and visit our communities to shape a sustainable future. Through the update process, the neighborhoods’ commitment was clear to making their neighborhood remain and improve as a place that is walkable, livable, and meets the promise of its new light rail service—offering more choices to the people who live and work there. That choice can have an impact on one of the most significant environmental standards—reducing greenhouse gas emissions—by reducing vehicle miles traveled. If you don’t have to get in your car to get groceries, go to work, or enjoy an afternoon in a park or neighborhood downtown, you can make the more sustainable choice, a local decision that can affect the global challenge of reducing greenhouse gas emissions.

Yet as community dialogue made clear throughout the update process, the arrival of light rail on its own does not guarantee sustainability. For people to make more sustainable decisions, they need to see that there are more and better choices, and to recognize the direct impact of sustainability on their lives. For example, Great City worked with the community to complete a Green Infrastructure Audit. This work has complemented and informed the update process, and underscores how a community-informed process—identifying how sustainability directly affects their lives—is key to establishing a new standard. The citywide, regional, and global decision-making remains crucial—Seattle has led the world as a city in signing on to the Kyoto Protocol in 2005 to reduce greenhouse gas emissions, and this work continues. But global standards only work if there are local commitments. As Neighborhood Plan Updates move forward, the City will continue to work with communities to develop further measures of sustainability, from walkability, to the availability of fresh, healthful food, to green infrastructure of trees and open space. At the same time, the update process has made clear that sustainability does not need to be set out as separate and apart from the overall recommendations, because communities already see it as integral to their overall vision for the future.
The businesses are strong, stimulating and economically stable. Various new commercial and industrial activities have recently entered the scene and retain the diversity and ethnic heritage that make our Rainier Valley unique. A full range of services is available without having to leave the community. Zoning coordinates industrial, commercial, and residential uses to their mutual advantage. Businesses actively participate in community activities. Retail property is well kept and accessible to all.

Public transportation has become easier to use than the automobile-oriented systems of the 20th century. Major routes are safe for bikes, pedestrians, autos and transit users and are completely accessible for the visually and physically impaired. The streets themselves are tree-lined and smooth. Transit systems link the east, west, north and south areas of Seattle, and the entire Puget Sound region in a way that is nonintrusive to the fabric of the neighborhood. The commute is easy for folks from other areas to visit, work, and shop in the North Rainier Valley.

Mount Rainier remains a landmark vista in the heart of Rainier Valley. The valley is a draw for film, theater, music, dance, and visual arts. Public squares, religious institutions, schools, and community centers are also gathering places for activities for neighborhood residents. The community enjoys and celebrates diversity. Commitment to helping immigrants become an integral part of this neighborhood, programs are set up to accommodate new immigrant populations and aid them with English classes, cultural interaction, and advocacy for their needs. Such programs are increasingly shared in and with other parts of the City.

Our ongoing commitment to the education of our youth is the cornerstone of the North Rainier Neighborhood. Schools are consistently and fully used for adult education, after-school activities, and a wide variety of educational and tutorial opportunities. Citizens are actively involved in outreach and volunteer programs. High-quality school programs have become a draw for business and employment.

The businesses are strong, stimulating and economically stable. Various new commercial and industrial activities have recently entered the scene and retain the diversity and ethnic heritage that make our Rainier Valley unique. A full range of services is available without having to leave the community. Zoning coordinates industrial, commercial, and residential uses to their mutual advantage. Businesses actively participate in community activities. Retail property is well kept and accessible to all.

Public transportation has become easier to use than the automobile-oriented systems of the 20th century. Major routes are safe for bikes, pedestrians, autos and transit users and are completely accessible for the visually and physically impaired. The streets themselves are tree-lined and smooth. Transit systems link the east, west, north and south areas of Seattle, and the entire Puget Sound region in a way that is nonintrusive to the fabric of the neighborhood. The commute is easy for folks from other areas to visit, work, and shop in the North Rainier Valley.

Mount Rainier remains a landmark vista in the heart of Rainier Valley. The pulse of our area is vibrant. The future is grand.

4. Support partnerships to strengthen the business district, such as SCORE, Small Business Development Center, University of Washington Entrepreneurial Law Clinic, Rainier Valley Community Development Fund, and HomeSight.

5. Retain a grocery store and pharmacy in the Town Center.

6. Improve the existing Town Center and make it more inviting using the City’s Neighborhood Business District Fund and Neighborhood Street Funds. Work with the community to identify projects and initiatives in which the community’s effort would be matched by funds from the Neighborhood Matching Fund. Improvements may include:
   - streetscape amenities, such as benches and banners;
   - activating public spaces with street vendors;
   - business district marketing map and brochure; and
   - encourage community-driven activities that support gatherings which draw customers such as street fairs, farmers markets, etc.

Goal 1

A vibrant, business district that serves North Rainier residents and is a destination shopping area with stores that serve the greater Rainier Valley.

Discussion

Community members want a shopping district, a place they can go for their daily to monthly needs. A number stated that they would like a place to buy clothes and shoes without going to Southcenter. Others spoke of the desire to have a place where they would spend an afternoon meeting friends, eating and shopping.

This section of the Update describes goals to preserve, enhance and improve the day-to-day life of community members. It also outlines strategies and to help achieve these goals.

Note: Numbers in parentheses, such as (NR-P6), after Goals and Policies refer to the 1999 Neighborhood Plan Goals and Policies as they were incorporated in the Comprehensive Plan. Refer to the appendix to see how the Comp Plan Amendment updates the Neighborhood Plan with new and revised goals and policies that emerged from the 2009 Update process.

Policies

1. Ensure the inclusion of affordable commercial space in new development.

2. Strive to facilitate the vitality of existing retail and businesses that help meet the neighborhood’s employment goals and serve as destination businesses for customers from the Rainier Valley and beyond in addition to meeting the daily needs of residents.

Strategies

1. Strengthen the Rainier Valley Chamber of Commerce and encourage increased membership from local businesses so that business owners can work together and with the community to create a vibrant neighborhood business district. The Chamber can also provide a venue for peer support and mentoring as well as a venue for its members to raise its concerns to the City and to pursue grants and technical assistance.

2. Look for opportunities in projects receiving City funding to create affordable commercial spaces.

3. Support and expand the existing diverse mix of generally small-scale businesses by:
   - using design guidelines that provide guidance for creating business spaces that are culturally appropriate (such as storefronts that open onto sidewalks);
   - providing technical assistance and access to financing to small businesses in the retail corridor;
   - encouraging membership in local business associations, and
   - encouraging peer support and mentoring.

North Rainier Neighborhood Plan Update
Creating Choices for Living, Working and Play

Goal 2
Ethnic and cultural diversity is a continued presence in the businesses and community.

Discussion
The cultural diversity of the commercial district is valued and supported by the community. The broader community would like these often small, independently owned, culturally focused businesses to remain as the North Rainier Urban Village grows and transforms. Owners of small, ethnic businesses spoke of the need to both expand their market and to support continued affordability.

Policies
2.A. Promote the location of cultural community centers and services in the transit-accessible areas of the neighborhood.

2.B. Provide technical and financial support to small businesses that meet the needs of the ethnic and cultural communities in the neighborhood.

2.C. Encourage community-based efforts for cross-cultural integration among the business owners as well as among the broader community.

2.D. Encourage the construction of physical improvements and activity programming that are culturally relevant to people with disabilities throughout the Town Center.

Strategies
1. Encourage and/or require mix of home prices and sizes through active use of incentives, direct City funding, and surplus property programs.

2. Promote the location of cultural community centers and services in the neighborhood.

3. Support community-driven gathering activities that increase awareness and education of the community's multicultural population and create a multicultural identity and destination point for Seattle.

4. Explore feasibility of using the Station Area Overlay District or incentive zoning to create affordable commercial space.

5. Implement programming and improvements that are culturally relevant to people with disabilities throughout the Town Center, such as innovative aesthetic enhancements to the public realm, and parks that incorporate audible, visual and tactile configurations.

6. Support community-driven gathering activities that increase awareness and education of the community's multicultural population and create a multicultural identity and destination point for Seattle.

Goal 3
Development within the Town Center prioritizes housing that serves households across a range of incomes.

Discussion
Many community members noted that there is little housing in the Town Center of the North Rainier Urban Village and suggested improving pedestrian and transit connections into the center, as well as increasing the vitality and personal safety of the Center by increasing the number of housing units there. More market-rate housing is needed, as well as affordable housing. Concerns were expressed that increased development will increase rents and force residents to move away. Affordable housing, including family housing and affordable senior housing, is important.

Policies
3.A. Encourage a mix of home prices and sizes through active use of incentives and funding.

3.B. Promote peer support, mentoring, technical assistance, and other means of improving business capacity for businesses interested in broadening their market.

3.C. Promote opportunities for cross-cultural integration among the business owners as well as among the broader community. Seek opportunities to create a vibrant, stable multicultural shopping area.

3.D. Encourage community-based efforts for cross-cultural integration among the business owners as well as among the broader community.

3.E. Support community-driven gathering activities that increase awareness and education of the community’s multicultural population and create a multicultural identity and destination point for Seattle.

Goal 4
North Rainier Hub Urban Village is known as a “Green Hub” providing green jobs and training, and green development.

Discussion
North Rainier is a Hub Urban Village with the capacity for an increase in jobs. Community members felt that the presence of the University of Washington as a landowner and the tradition of North Rainier Urban Village as a commercial and light manufacturing area suggests an opportunity to build a green technology incubator.

Policies
4.A. Support training programs and jobs in North Rainier that capitalize on the green technology market in order to support the role of North Rainier as the Hub Urban Village within the Rainier Valley.

4.B. Identify and promote opportunities for green infrastructure and development.

4.C. Look for opportunities for a Living Building Pilot Program project in North Rainier.

4.D. Complete a green infrastructure analysis exploring potential opportunities such as UW Laundry, Rainier Ave. S. redesign and stormwater facility work.

4.E. Consider building a “green” demonstration and education site for the community in relation to the green jobs and technology program that could provide visible, positive education about wind and solar technologies and other green building technologies to encourage engagement in green jobs or local use of alternative energy. This could also be a destination site that supports small businesses.
Goal 5
A community that supports and provides opportunities for neighborhood youth.

Discussion
The North Rainier Urban Village is home to Franklin High School—a center for both youth education and youth activities. The community would like to see more programs to positively engage its young people.

Policies
5.A. In fulfilling its role as the Hub Urban Village for the Rainier Valley, North Rainier should include training programs and jobs for youth that prepare them for family-wage jobs in the area and region.

5.B. Continue to fund programs that engage youth in positive and safe ways such as:
- Youth in Focus photography classes;
- Seattle Chamber Players composition workshop at Franklin High School; and
- Northwest African American Museum public sculpture classes.

5.C. Develop more coordinated training programs and jobs for youth that teach about and engage in various activities at a range of community service centers, learn about jobs and job training, as well as engage in supported physical activity in local green and open spaces.

5.D. Work more closely with local schools to create seamless access for youth to community amenities and services.

5.E. Consider using levy funds, general funds and partnerships with developers, to create a hierarchy of public and private open spaces that are publicly accessible and address the gaps identified in the Parks Gap Analysis.

5.F. Support local agriculture and access to locally grown food through public mechanisms such as P-Patches and the Cultivating Communities program, as well as nonprofit and private mechanisms including farmers markets and on-site landscaping.

5.G. Pursue the potential for acquiring new parks space within the urban village through the Parks and Green Spaces Levy funds for Neighborhood Park Acquisition.

6. Consider using levy funds, general funds and partnerships with developers, to create a hierarchy of public and private open spaces that are publicly accessible and address the gaps identified in the Parks Gap Analysis.

6.F. Support local agriculture and access to locally grown food through public mechanisms such as P-Patches and the Cultivating Communities program, as well as nonprofit and private mechanisms including farmers markets and on-site landscaping.

6.G. Pursue the potential for acquiring new P-Patch community gardening space and urban agriculture space as part of and in addition to the 2008 Parks and Green Spaces Levy.

6.H. Implement the Parks and Green Spaces Levy project to renovate and improve Atlantic Street Playground.

6.I. Implement the Parks and Green Spaces Levy project to renovate and improve Rainier Park Playground.

6.J. Use opportunities, such as the 2008 Parks and Green Spaces Levy project at Children’s Play Garden and other Parks Department programs to increase accessibility and create open spaces that are relevant to people with disabilities.

6.K. Continue to implement the Pro Parks Levy designs for Jimi Hendrix Park, including elements that improve connections to the Northwest African American Museum and the surrounding neighborhood.

6.L. Increase the vibrancy and safety of the public realm with wider sidewalks, landscaping and pedestrian lighting.

6.M. Promote the development of more P-Patches and other methods to increase access to locally based food sources and to build community.

Goal 7
North Rainier is known as a safe and hospitable neighborhood through its residents’ increased awareness of community-based crime prevention programs. (NR-Gso)

Discussion
Throughout Southeast Seattle the community’s concerns about public safety negatively affects their use of transit and parks, and walking or bicycling to local shopping areas.

Policies
7.A. Promote uses around transit facilities such as businesses open into the evening hours, and housing that provides “eyes on the street.”

7.B. Seek opportunities for the community and the Seattle Police Department to strengthen partnerships.

7.C. Build positive working relationships among community members and Seattle Police Department.

7.D. Enhance community pride through establishment of a multicultural community center, multicultural community festivals, youth mentoring, and other youth programs that support positive and safe activities for youth. (NR-Psu)

7.E. Design parks and open spaces and programming to accommodate users of diverse ages, interests and cultures.
These building height concepts were created from community discussions in spring 2009 and refined with community review from meetings that summer and fall. Using tools such as urban design framework plans, neighborhood design guidelines, zoning, and street design plans, the community will further define the desired form and characteristics of this Town Center to achieve the goals and vision of their neighborhood plan. See appendix for additional land use recommendations.
Shaping a Transit-Oriented Town Center

This section focuses on the community members’ ideas for the physical elements – streets and urban form – that support their goal to create a strong Town Center that is attractive to residents as well as visitors. Residents and business owners alike recognize the potential of light rail to serve as a catalyst to help shape a more pedestrian-oriented Town Center.

To be a vital place that offers all the desired amenities, there must be sufficient density of housing businesses and jobs, good design, diversity of activities and people, and desirable destinations. These elements are also central to realizing a sustainable urban community where walking and transit are the preferred ways to get around.

Goal 8
A Town Center that concentrates housing, commercial uses, services and living-wage employment opportunities; that is well served by transit and nonmotorized travel options; and that is well designed and attractive to pedestrians.

A vibrant, business district that serves North Rainier residents and is a destination shopping area with stores that serve the greater Rainier Valley.

Discussion
Creating a Town Center for North Rainier was a central component of the neighborhood plan and station area plan. Community members continue to support this, and offer a more definitive vision about the character of the area, the mix of uses and the connections to the surrounding single family areas. While most of the recommended public improvements have been completed, the envisioned new development and critical elements of streetscape improvements have not. Property owners now see opportunities to create redevelopments that would be defining elements of the Town Center.

Policies
B.A. Foster development of a shopping district comprised of businesses that provide products and services meeting the needs of community members from different cultural backgrounds.

B.B. Assess utility capacity within the Town Center for its ability to support the desired future density.

B.C. Strengthen local business associations that include and support the presence and growth of businesses owned by immigrant and minority community members.

B.D. Support and expand the existing diverse mix of generally small-scale businesses.

B.E. Include a portion of single-family area located between 24th Ave. S. and 25th Ave. S. north of S. McClellan St. within the urban village and within the Station Area Overlay District, and support a multifamily zoning designation for the area that would allow more compact residential development. (See pages 12 and 13.)

B.F. Within mixed-use zones in the Station Area Overlay District, define and consider minimum residential densities in new buildings in order to create the critical mass of people and activity for a Town Center.

Strategies
1. Use mechanisms such as urban design framework plans, neighborhood design guidelines, and street design plans to describe the desired form of future development.

2. Create neighborhood design guidelines and an urban design framework plan for the North Rainier Town Center area. Plan elements could include• building height options;• incentive features;• breaking down scale of super blocks to create a balance of inwardly and outwardly focused development;• use of green building strategies such as those that address drainage, building efficiency, tree canopy; and opportunities for district energy systems;• open space that invites people to gather and to engage in physical activity;

• pedestrian connections and sidewalk widths; and• guidelines to help ensure that new housing doesn’t create a “walled” of undesirable facades that is counter to the feel of the neighborhood.

3. Through processes that engage community stakeholders consider and evaluate the application of zoning designations and related development regulations that are most likely to achieve the neighborhood’s urban design vision. Include evaluation of new regulatory and programmatic tools as they become available. Rezone key opportunity sites to encourage redevelopment of parcels around the light rail station in a manner that incorporates housing, commercial services (such as a grocery store and small businesses) and amenities. (See pages 12 and 13.)

4. Evaluate proposed height and land use changes within the Town Center. (See pages 12 and 13.)

5. Address zoning on west side of Rainier Ave S. immediately south of S. Walden St. There are eight single-family parcels adjacent to parcels zoned NC3-65 and L-3. Rezone these parcels to be more consistent with adjacent properties.

6. Expand the Town Center area to focus new mixed use development south of S. Bayview St. and north of S. Byron St.

7. Consider including within the urban village a portion of single-family area located between 24th Ave. S. and 25th Ave. S. and north of S. McClellan St., and rezoning to be more consistent with adjacent zoning, and to allow more compact residential development.

8. Within mixed-use zones in the Station Area Overlay District, consider minimum residential densities (related to the zoning designations).

9. Maintain and expand collaboration with Sound Transit, King Country Metro, property owners, and community members to pursue redevelopment opportunities in the Station Area Overlay District, such as surplus Sound Transit parcels and the Metro bus layover, to create dense, mixed-use projects that establish a vital pedestrian environment, provide affordable housing, and support the development of small businesses.

10. Continue to pursue redevelopment of the triangle block containing the bus transfer facility. Possible solutions could include undertaking a joint development project incorporating the bus transfer facility, or finding a new location for the bus transfer facility on the west side of Rainier Ave S. and redeveloping the block.

11. Pursue opportunities to create a multicultural shopping area/center/market.

12. Work with Seattle City Light, Seattle Public Utilities and the Department of Information Technology when considering changes to zoning to evaluate if there are area-specific capacity problems resulting from the potential increase in development capacity.

13. Encourage the use of City grant programs to improve the Town Center and make it more inviting.
Goal 9
A neighborhood served by a network of safe streets with amenities for pedestrians and bicyclists. (NR-G9)

Discussion
It was clearly acknowledged that this is currently an auto-oriented neighborhood. Both Rainier Ave. S. and MLK Jr. Way S. are dominated by vehicular traffic and are difficult to navigate as a pedestrian or bicyclist. Many people are afraid for their personal safety while waiting on the street for a bus. Nearby residents who could actually walk to the stores said they choose not to because it is unsafe and difficult to walk from store to store. In the future, this area is envisioned as a destination shopping area where it is possible to run multiple errands in one trip during the day or evening. Currently, the area does not feel secure because there are no “eyes on the street” from local businesses and residences.

Policies
9.A. Create seamless pedestrian and bicycle links within the Town Center, and to the surrounding community facilities.
9.B. Prioritize development of universally accessible routes between the Town Center and locations such as Lighthouse for the Blind and Center Park.
9.C. Ensure that standards for new development projects will accommodate a vibrant pedestrian environment throughout the Town Center.

Goal 10
Rainier Ave. S. is a highly functioning multimodal “complete street” that serves as the spine of the Rainier Valley and retains its existing views of Mount Rainier. (NR-G10)

Continue to develop Martin Luther King Jr. Way S. as a “complete street,” and part of the neighborhood’s network of streets with amenities for pedestrians, bicyclists, and transit riders. (NR-G10A)

A transformed Rainier Avenue S. between S. Bayview St. and Martin Luther King Jr. Way S. that functions as a pedestrian-oriented main street.

Discussion
Almost everyone agreed that Rainier Ave. S. and the abutting development in its current form are not conducive to creating a vibrant Town Center. By reducing traffic on Rainier Ave. S., the streetscape would be made more appealing for pedestrians and still be able to adequately accommodate transit.

Policies
10.A. Promote alternative transportation programs, such as bicycle commuting, local hiring, van pools, and transit ridership. (NR-P10)
10.B. Support actions that improve the pedestrian and transit functions along Rainier Ave. S. between S. Bayview Str. and MLK Jr. Way S. so that the section becomes more of a local main street for the North Rainier neighborhood.

Strategies
1. Implement the recommendations from the Southeast Transportation Study (SETS), which serves as the blueprint for programming transportation improvements in Southeast Seattle.
2. Use the Pedestrian Master Plan as a tool for prioritizing pedestrian improvements and Neighborhood Street Fund projects.
3. Use the Bicycle Master Plan as a tool for prioritizing bicycle improvements.
4. Continue to pursue a bicycle route along Rainier Ave. S. or parallel street that takes advantage of the flat grade in the valley floor.
5. Look for opportunities to develop transportation corridors that might encompass several roads. For example, consider if Chief Sealth Trail can function as the major north/south bike route, enhancing the connections from it to commercial areas.
Goal 10 (continued)

6. Consider adding destination spaces along Chief Sealth Trail, such as play areas, community gardens and pocket parks, to encourage use.

7. Use health impacts assessments to help ensure that transportation projects consider accessibility, livability and health quality.

   • This strategy calls for the rerouting of through-traffic from Rainier Ave. S. to MLK Jr. Way S. at the Rainier Ave. S. and MLK Jr. Way S. intersection and back to Rainier Ave. S. by way of S. Bayview St. (Note: The re-route strategy would require more detailed modeling and operational analysis to understand the traffic volumes that would be diverted, effects upon congestion especially at intersections, geometric requirements, and the need to acquire additional rights-of-way (ROW). Both existing and future conditions would need to be studied before any decision can be made about this alternative. Currently, there is no funding for such an analysis, engineering, design, or construction.)

9. Develop street design cross-sections for Rainier Ave. S. that support a more pedestrian-oriented shopping area.

   • SDOT will complete a conceptual design for Rainier Ave. S. from the Rainier Ave. S. and MLK Jr. Way intersection to S. Bayview St. that shows a possible new cross-section which includes landscaped median where possible, and other features such as a parking lane. This design would require additional ROW from private land-owners. (Note: Before any design alterations could be accomplished, SDOT would have to conduct an operational analysis of any proposed changes. This analysis would include impacts upon levels of congestion, especially at intersections, and transit speed and reliability. Both existing and future conditions may need to be studied. Currently, there is no funding for such an analysis, engineering, design, or construction.)
