

## SEATTLE FIRE DEPARTMENT

### Information Bulletin # 2002-2

## Recreational and Cooking Fire Regulations

Recreational fires, cooking fires and use of patio fireplaces are allowed in the City of Seattle providing that fire safety requirements are met, and that air quality conditions allow outdoor burning. Burning of trash, yard waste, or rubbish is prohibited.

### Air Quality Regulations

When air quality conditions are poor, **the Puget Sound Clean Air Agency** may enact a ban on both indoor and outdoor burning. To determine if an air quality burn ban is in effect, call 1-800-595-4341, or visit their web site at [www.pscleanair.org](http://www.pscleanair.org)

### Requirements for Recreational Fires (Seattle Fire Code)

Recreational fires are those for cooking, pleasure, religious, ceremonial or similar purposes where the fire is not contained in an outdoor fireplace, grill or barbecue pit. Recreational fires are allowed providing the following requirements are met.

- ❑ The fire is not more than three feet in diameter and two feet in height.
- ❑ The fire is located at least 25 feet from any structure or combustible material. Conditions which could cause a fire to spread shall be eliminated prior to ignition.
- ❑ Trash, yard waste, rubbish, or paper products are not being burned.
- ❑ Fire extinguishing equipment is readily available for use. This should include a shovel and two buckets of water, or a charged garden hose or fire extinguisher with a 4-A rating.
- ❑ The fire is continually attended by an adult until it is completely extinguished.
- ❑ The fire is not being conducted on public property where fires are prohibited, such as in a park or on school grounds. Fires in parks are only allowed where specifically

authorized, and where appropriate burning receptacles are provided.

- ❑ No air quality burn ban is in effect.

### Use of Patio Fireplaces

A patio fireplace is one that is designed to function the same as a masonry or factory-built fireplace, except that they are portable, outdoor, solid-fuel burning fireplaces. They may be constructed of steel, concrete or clay and may or may not be equipped with a short chimney.

Use of patio fireplaces is allowed providing the following conditions are met.

- ❑ The patio fireplace is not placed on a deck or balcony and is not located within 10 feet of a structure or combustible material or vegetation. Use of patio fireplaces at single family homes and duplexes are exempt from this requirement.
- ❑ Trash, yard waste, rubbish, or paper products are not being burned.
- ❑ Fire extinguishing equipment is readily available for use. This should include a shovel and two buckets of water, or a charged garden hose or fire extinguisher with a 4-A rating.
- ❑ The fire is not being conducted on public property where fires are prohibited, such as in a park or on school grounds. Fires in parks are only allowed where specifically authorized, and where appropriate burning receptacles are provided.
- ❑ No air quality burn ban is in effect.

*(over)*

## **Barbecues**

Use of barbecues for cooking is not regulated in the City of Seattle.

## **Hazardous Fires**

The Seattle Fire Code, Section 307.6, authorizes the Fire Department to require that a recreational fire or fire in a patio fireplace immediately be extinguished if it constitutes a hazard.

## **When is a Permit Required?**

Fire Department permits are not required for use of patio fireplaces or recreational fires and cooking fires unless they exceed three feet in diameter and two feet in height. Fires larger than three feet by two feet require a permit from both the Puget Sound Clean Air Agency and the Seattle Fire Department.

For additional information about fires requiring a permit contact the Special Events Section of the Fire Marshal's Office at 206-386-1450.
