

## A New Version of the Smart Business Funding Calculation Workbook

A new version of the Seattle City Light Smart Business funding calculation workbook will be used for projects that receive coupon numbers after August 1, 2014.

### Summary of Changes and Guidelines for Use

- The new workbook must be used for coupon numbers issued to the customer after **August 1<sup>st</sup>**.
- The funding amounts have changed, and the number of LED rebates has expanded. See the “Rebate Worksheet” for the new list of simple rebates.
- Contractors are no longer required to complete or submit the Seattle City Light **Lighting Waste Disposal Form**, however proper disposal of wastes is still required in accordance with all applicable codes and regulations.
- The **cost-based funding cap** has changed from 85% to 70%.
- The “justified” measures are now called “**custom**” measures.
- The Survey & Rebate Form has a **new column** on the far left. This allows the user to access a pull-down menu to select the simple rebate measures that are included in a project. Start with column A, then complete any green columns to the right.
- Note that some of the rebate options have **minimum hours of operation** per year to qualify for a Standard Rebate Measure. If a Standard Rebate Measure is proposed that fails to meet the minimum hours of operation per year for the standard option, it may be funded at a lower level using the custom calculation offered in the same workbook. The custom calculation is *not* available as a means to receive *higher* than the standard rebate amount.

### How to Obtain a Copy of the New Workbook

To obtain a copy of the new workbook, or ask questions about its use, please contact your Seattle City Light Smart Business analyst, or the Seattle City Light Energy Advisors at 206-684-3800.

*Thank you for your interest in the Smart Business Program and high efficiency lighting!*
