

**ENERGY EFFICIENCY
SOLUTIONS
FOR YOUR BUSINESS**

COMMERCIAL RETROFIT LIGHTING

Lighting accounts for more than 25% of the energy used in most buildings. Retrofitting with energy efficiency lighting can make a big difference to your energy bill, and your bottom line. Now City Light is making it even easier to receive financial incentives for your retrofit project, so you achieve your goals faster for maximum ROI.

FASTER PROJECT STARTS

Our program is designed to quickly provide incentive and savings estimates. You can begin work as soon as you sign our Participation Agreement.

GREATER FLEXIBILITY

Adding a few fixtures to the scope after your project has been approved? Changing to a more efficient fixture mid-project? No problem. We can adjust project scope at any point throughout the project.

CREATIVE PAYMENT OPTIONS

We can now send your project incentive funds directly to you, or to contractors, installers or property managers to help offset your project cost.

KEY CHANGES TO THE COMMERCIAL RETROFIT LIGHTING WORKBOOK

- Our application has been updated with new legal language and a more intuitive design.
- The workbook now defaults to “fixture schedule” mode. Use a fixture schedule for all but your simplest projects. You can change the workbook from fixture schedule to fixture count mode on the “Start” page.
- There are changes to the way existing fixtures are input into the workbook. Please use care if copying/ pasting from an old workbook to new. We suggest copying/ pasting one column at a time. Call your EMA with questions.
- The old “Project Summary” page has been replaced with a “Project Estimate” page. The Project Estimate provides useful metrics about your project savings and includes a step-by-step guide for receiving your incentive after your project is complete.

For more information or a detailed overview of program and workbook changes contact an Energy Advisor at (206) 684-3800 or SCLEnergyAdvisor@seattle.gov
