

IMPROVE FOOD QUALITY and reduce your energy costs with energy efficient ovens.

COMMERCIAL CONVECTION AND COMBINATION OVENS

Seattle City Light offers a \$2,000 instant cash rebate for your energy efficient combi-oven.

Seattle City Light helps pay for commercial convection ovens or combi-ovens recognized for energy efficiency by the Food Service Technology Center.

Reduce your electric bill

An approved convection or combi-oven can save energy and money:

- A combi-oven saves about 12,450 kilowatt-hours (kWh), reducing your electric bill by \$623 a year.
- A convection oven saves about 1,560 kWh, reducing your bill by \$78 a year.

For details, see the estimated savings chart on the reverse. Savings will vary depending on the model you choose and operating hours.

Improve the meals you serve

The design features that make recognized commercial ovens more energy efficient may also:

- Provide more even cooking temperatures throughout the oven to improve your baked and roasted products.
- Include higher-quality sensors and thermostats, enabling you to better regulate temperature, humidity, fan speed, and cooking time.
- Provide greater throughput, so you can cook more food at once — up to 80 pounds per hour for a convection oven and 100 pounds for a combi-oven.
- Come with programmable controls so you can, for example, have the oven keep the food hot after it's cooked.
- Use higher-quality components, so the oven will last longer, with less need for repairs.

Get a cash rebate at time of purchase

For an approved combi-oven, Seattle City Light pays a cash rebate of \$2,000. For an approved convection oven, we'll rebate \$300.

ESTIMATED SAVINGS for installing energy efficient combi-ovens and convection ovens

COMBI-OVEN	ESTIMATED ANNUAL ENERGY USE	ESTIMATED ANNUAL ENERGY COST (\$0.05 PER kWh)
Standard combi-oven	27,195 kWh	\$1,360
Efficient combi-oven	14,745 kWh	\$737
Estimated annual savings	12,450 kWh	\$623

CONVECTION OVEN	ESTIMATED ANNUAL ENERGY USE	ESTIMATED ANNUAL ENERGY COST (\$0.05 PER kWh)
Standard convection oven	8,820 kWh	\$441
Efficient convection oven	7,263 kWh	\$363
Estimated annual savings	1,557 kWh	\$78

Energy savings, based on information on the Food Service Technology Center website (www.fishnick.com), assume oven use of 12 hours per day, 300 days per year, with one preheat daily, cooking 100 pounds per day of food for a convection oven and 200 pounds per day for a combi-oven.

Based on these figures, over the projected 12-year life of an energy efficient combi-oven, you would realize a total savings of about \$7,470 on your electric bill. For a convection oven, the estimated 12-year savings would be \$935.

Conservation is our most cost-effective energy resource

Seattle City Light offers incentives such as technical assistance and rebates to business and institutional customers to promote adoption of energy-saving technologies. We offer rebates because conservation is a cost-effective way to meet our future electricity needs.

HOW TO GET YOUR SEATTLE CITY LIGHT REBATE

- 1 Find participating vendors at www.seattle.gov/tradeally and click on "Search for a Trade Ally." Select "Buy Equipment" as the service and "Commercial Kitchen" as the technology to secure a list of three participating vendors.
- 2 Find qualifying convection ovens at <http://fishnick.com/saveenergy/rebates/ovens.pdf>; for combi-ovens, go to <http://fishnick.com/saveenergy/rebates/combis.pdf>.
- 3 Go to a participating vendor and buy qualified equipment to be used within Seattle City Light's service territory. You will receive your rebate at the time of purchase.
- 4 If you purchase from a non-participating vendor, just contact City Light for a claim form and return it with your receipt to secure your rebate.

To learn more, call (206) 684-3800 or go to www.seattle.gov/saveenergy.

Reduce your carbon footprint

Using energy efficient ovens does more than save you money. Replacing one standard convection oven with an approved efficient model will keep about 2,060 pounds of CO₂ — a greenhouse gas — out of the atmosphere annually.

The City of Seattle is a national leader in protecting the environment. Seattle residents and businesses are joining in efforts to help reduce the negative impacts of climate change.

Seattle City Light is a publicly owned utility dedicated to exceeding our customers' expectations in producing and delivering low-cost, reliable power in an environmentally responsible and safe way. We are committed to delivering the best customer service experience of any utility in the nation.

Fact sheet data is based on estimated energy use and expense; actual savings will vary. This program may change without notice and is subject to the availability of funds.
