

Use network server software to reduce PC energy use and **SAVE MONEY.**

POWER MANAGEMENT SOFTWARE FOR NETWORKED COMPUTERS

Seattle City Light will pay \$8 per PC for adoption of power management software for networked desktop computers.

Save up to \$25 a year in energy costs per PC.

Install and use power management software to save energy and money. This software will ensure that:

- Connected personal computers are automatically shut down according to pre-determined schedules
- Power management settings on connected PCs are maintained

Seattle City Light offers a one-time cash rebate of \$8 per connected PC to encourage the use of power management software. To be eligible for the rebate, you must provide a trend log and identify the type of PCs you use to establish current energy use. In addition, the power management software you install must:

- Be able to detect and alter power management settings of networked PCs
- Allow for grouping and scheduling of connected PCs with similar usage patterns
- Be capable of shutting down groups of PCs according to user-defined schedules

Power management software will not affect normal use of computers. Rebates available for desktop computers only, mobile computers are not eligible.

Power management software case studies

ENERGY STAR® has documented several case studies to show how power management software saves energy. For details go to http://energystar.gov/index.cfm?c=power_mgt.pr_power_mgt_ss#uwi.

Call (206) 684-3800 to get your rebate

Call to work with an energy analyst to evaluate your project and estimate your rebate and energy savings. You must secure authorization prior to purchase or installation of software to qualify for rebate. For details, visit www.seattle.gov/saveenergy.

Conservation is our most cost-effective energy resource

Seattle City Light offers incentives such as technical assistance and rebates to business and institutional customers to promote the adoption of energy saving technologies. We offer rebates because conservation is a cost-effective way to meet our future electricity needs.

Seattle City Light is a publicly owned utility dedicated to exceeding our customers' expectations in producing and delivering low cost, reliable power in an environmentally responsible and safe way. We are committed to delivering the best customer service experience of any utility in the nation.

Fact sheet data is based on estimated energy use and expense; actual savings will vary depending on software settings and computer use practices. This program may change without notice and is subject to availability of funds. SLD PMS 0410
