LIGHTING REBATE MEASURES		
Motion Sensor, Wall-mounted	\$30	<p>OTHER LIGHTING MEASURES</p> <p>Lighting measures that are not on this list may be funded as custom measures. Custom measure calculations are provided in the same file as the standard rebates presented here.</p> <p>LOW HOURS OF OPERATION PER YEAR</p> <p>Measures that are on this list but do not meet the minimum hours of operation per year may be funded as custom measures.</p> <p>TERMINOLOGY</p> <ul style="list-style-type: none"> • “Lamp-Only” is any lighting fixture upgrade that can be reversed by replacing the lamp. This includes what are sometimes called “screw-ins.” It also includes some 4-foot LED replacements for 4-foot fluorescent lamps. • “Hard-wired” covers any energy efficiency upgrade that cannot be reversed by replacing the lamp. “Hard-wired” upgrades include new fixtures, ballast replacements, and some retrofit kits. <p>BEYOND LIGHTING</p> <p>Small commercial buildings are also eligible for energy conservation funding for non-lighting measures.
