

ADVANCED METERING Opt-Out Application

Advanced Metering Opt-Out

City Light has changed to a new electrical metering standard using a digital communicating meter (an advanced meter). For an additional charge, residential customers have the option to select a non-standard meter (a non-communicating digital meter). Both meters are described below.

Advanced meters will connect to homes and businesses to collect customer energy-use information. The meters will provide automated wireless communication to City Light.

- Advanced meters record customer energy-use information throughout the day.
- Customer energy-use data will be sent several times a day to City Light using a radio frequency (RF) wireless network. This is similar to the wireless communications used by cell phones and Wi-Fi. The meters will transmit data for a maximum of 90 seconds per day.
- Once it is within City Light's secure firewall, the energy-use data will be matched up with customer accounts for billing and other customer service activities, similar to traditional metering practices.

Non-communicating digital meters are available to residential customers who choose to opt-out of the Advanced Metering program described above.

- This meter does not have an antenna or wireless communication radio. There is no radio frequency (RF) transmission from these meters. As a result, it does not receive or transmit customer energy-use data.
- The meter will have a digital display and a blue label to clearly designate it as an opt-out meter.
- Opt-out fees will apply.

Eligibility Guidelines to Opt-Out

- You must be a residential customer.
- Non-property owners who wish to opt-out must obtain signed permission from the property owner.
- You are responsible for providing and maintaining access to City Light for meter installation, maintenance, and reading. Failure to do so may result in termination of your opt-out participation, along with the installation of an Advanced Meter.
- Owners in multi-unit condominium buildings are eligible to opt-out.
- Owners and tenants of buildings with 4 units or less are eligible for opt-out. Tenants must have the owner's permission to opt-out. If the building owner chooses to opt-out the entire building, the owner will be responsible for paying all fees associated with the opt-out meters for all units.
- Customers who live in multi-unit apartment buildings with 5 or more units are not eligible to opt-out.
- Net metering customers are not eligible to opt-out.

Comparing City Light Meters

As shown by the following chart, there are additional costs associated with opting out, and fewer benefits with a non-communicating digital meter. Fees cover the City Light’s overhead, costs, ongoing maintenance, and meter reading related to the non-communicating digital meter and equipment.

	Advanced Meter	Opt-out with Non-communicating Digital Meter	Opt-out with Non-communicating Digital Meter if participating in the Utility Discount Program**
View your daily electricity use*	Yes	No	No
Outage detection*	Yes	No	No
Remotely connecting your service*	Yes	No	No
One-time service and administration fee	NO CHARGE	\$124.43	\$49.77
One-time installation fee per meter	NO CHARGE	NO CHARGE with two-week notice prior to scheduled meter installation	NO CHARGE with two-week notice prior to scheduled meter installation
		\$84.21 without two-week notice	\$33.68 without two-week notice
Recurring billing cycle fee*	NO CHARGE	\$15.87 per future billing cycle	\$6.35 per future billing cycle

*When advanced meter system is fully automated.

** Income-qualified participants in the Utility Discount Program will receive a 60% discount.

Summary of Fees as Presented in the Table Above

- A one-time service and administration fee of \$124.43.
- An ongoing charge of \$15.87 for each billing cycle will begin after the customer’s meter reading route transitions to automated reading. This includes the cost of manually reading maintaining your meter.
- An installation fee of \$84.21 may be charged if an application is not received at least two weeks prior to scheduled installation of advanced meters in your area.
- Installation fee will be waived in instances where City Light replaces meter in field for maintenance purposes.

Steps to Opt-Out

- Submit a complete application. Incomplete applications may delay processing.
- Application must be received by City Light at least two weeks before your neighborhood's scheduled installation date to avoid an installation fee.
 - If this deadline is missed, you will likely receive an advanced meter on your neighborhood's installation date until a technician can revisit your home later to install an opt-out meter. An installation fee will be added to your bill after the opt-out meter is installed. It might be days or weeks after your neighborhood's installation date before you receive an opt-out meter.
- After City Light receives an application, the customer will receive an email to confirm the application has been received. If no email address is provided, a letter will be mailed.
- After an application is processed, the customer will receive an approval or denial letter in the mail. City Light will do its best to process applications in a timely manner. However, there may be cases where more information is needed before approval. For example, if a property owner in King County records does not match the owner listed on a City Light account, more information may be requested by City Light to confirm eligibility. This could delay processing of the application.

Terms & Conditions

I represent and warrant that I am the named, authorized person on the customer account number provided. I further represent and warrant that I am either the legal owner of the premise* or a tenant at the premise who has obtained permission from the owner as indicated below. By signing this form, I am indicating that I want to opt-out of City Light's Advanced Metering program. By signing this form, I acknowledge that a non-communicating digital meter shall be installed at the premise listed on this form in lieu of an Advanced Meter. I understand that, in accordance with City Light's Opt-Out Policy (DPP III-427), my account will be assessed a one-time service and administration fee and an ongoing meter reading fee for each billing cycle once the service transitions to automated reading. I also understand that I could be assessed a meter installation fee if this application is not returned at least two weeks prior to the scheduled installation of an advanced meter. I understand that I am only eligible for City Light's basic rate tariff and will not be able to receive any other enhanced benefits that the Advanced Metering system may provide. I agree that I will maintain clear and direct access to my meter(s) allowing City Light employees to manual read the meter(s) during typical business hours throughout the month.

Account Holder Signature: _____ **Date:** _____

Print Name: _____

Property Owner Signature*: _____ **Date:** _____

Print Name: _____

* If the requestor is not the legal owner of the premise, then the owner must approve the opt-out.
