# Industrial Daylighting

Workshop and Lunch • October 19, 2006

Seattle City Light

Skylights bring natural light into space

Daylighting combines the use of natural light with automatic lighting controls to reduce electric lighting during times when it's not needed. In industrial facilities and warehouses, daylighting can offer significant reduction in your electric bills. Daylighting projects that include skylights or vertical glazing may also improve workplace aesthetics and safety.

Please join us for a free lunch and workshop on daylighting in warehouses and industrial facilities.

Thursday October 19, 2006

10:00 am - 1:00 pm

Lighting Integrated Design Lab

400 E. Pine St

Seattle, WA 98122

Presentations by local daylighting experts will provide both technical information useful in creating a successful project, and case histories highlighting successful daylighting projects in the Seattle area.

Afterwards, you will be well equipped to investigate how you might use Seattle City Light energy conservation funding to develop daylighting opportunities at your facility.

10:00 am - 10:30 am - Coffee, Networking, Tour Lab

10:30 am - 11:30 am - Christopher Patano

11:30 am - 12:00 pm - Chris Meek & Eric Strandberg

12:00 pm - 1:00 pm - Complimentary Lunch, Case Studies

**Speakers:**

Christopher Patano, AIA, Patano + Hafermann Architects

Christopher Meek, RA, Lighting Design Lab

Eric Strandberg, LC, Lighting Design Lab

Aaron Houseknecht, EMA, Seattle City Light
