

CLASS 320 AMP METERING (Residential Only)

Single Metered 226-400 Amperes, 120/240, 1Ø, Self-Contained Metering

For overhead or underground single metered residential single-phase services which are to be metered by a self-contained 320 ampere meter. The customer shall furnish, install, and maintain the metering equipment per Seattle City Lights' requirements.

COMBINATION METER AND SERVICE TERMINATION ENCLOSURE FOR THREE WIRE

NOTES:

1. The above figure shows a meter socket and enclosure for a 320 ampere self-contained meter. This equipment shall conform to the requirements for 320 ampere metering equipment except that it may be designed for overhead or underground service connection.
2. The customer's load conductors may go directly to a 400 ampere main breaker or to two 200 ampere main breakers.
