ALLEY LIGHTING CHARGES

Effective

January 7, 2014

Supersedes

/s/ by Jorge Carrasco

January 11, 2012

Approved by Jorge Carrasco

1.0 Policy

1.1 The Department shall install energy efficient rental lighting fixtures in alleys to provide nighttime illumination for security and safety for persons and property.

1.2 Alley lighting fixtures shall be installed on building walls or on existing Department poles. Only commercial areas with existing buildings are eligible for wall mounted lighting. Lighting for alleys adjacent to new buildings shall be addressed during the new building development as required by Seattle Department of Planning and Development.

1.3 For any installations on building walls, the following conditions must be met:

1.3.1 The customer shall obtain written approval from the building owner(s) or agent. Written approval must be provided to Seattle City Light upon application for service.

1.3.2 The wall shall be within the boundaries of the adjoining property lines and abut the alley boundary line.

1.3.3 Building wall shall allow for a minimum fixture mounting height of 16 feet.

1.3.4 An unmetered electrical circuit must be readily available on the building wall or the fixture must be positioned so it can be served from the Department's secondary distribution system where available.

1.4 Alley lighting requests shall be accepted for alleys in residential, commercial, business, and historic areas. An HPS 100 Watt historic fixture is available for historic districts only. A 100
Watt HPS cobra head fixture is available for residential areas. In addition to this fixture, commercial and business area alley lighting customers may request 150 Watt, 250 Watt and 400 Watt HPS cobra heads. At the Utilities discretion 200 Watt and 250 Watt HPS wall mounted lights are available.

The total monthly charge for each shall be composed of the following:

1.4.1 A fixture rental fee;
1.4.2 A maintenance charge for lamp and photocell replacement; and
1.4.3 An energy charge determined by the total wattage (lamp plus ballast) times 350 hours, the average monthly usage time.

1.5 Installation charges are payable upon application for service.

1.6 Replacement of burnt-out lamps and other services shall be completed as soon as reasonably possible after notification.

2.0 Charges

2.1 Installation Charges.

2.1.1 A basic installation charge which includes mounting Department-owned fixture and material to an existing utility pole, or to reach the weatherhead or alley can within 15 feet shall be $281.

2.1.2 With additional charge for service beyond 15 feet from the service point shall be charged in 10-foot increments at the rate of $272 per 10-foot length.

2.2 Monthly charge shall be per luminaire for energy, lamp replacement, and normal maintenance. See current rate ordinance for cost.

3.0 Removals

3.1 Customer requested removals will be performed by the utility without charge.

3.2 Rental light will be removed at the direction of the ESR if payments are delinquent.

3.3 Lights may be removed without consent of the customer at the direction of the Streetlight Engineering manager or Customer Care Division.
