

SAVE MONEY when you upgrade to energy-saving lighting or equipment.

SMART BUSINESS REBATES

KWAN KIM
Wallingford Dry Cleaners

FREE energy assessment to get your energy-saving project underway. Get rebates for your projects and save on electricity bills for years to come.

Seattle City Light pays up to 70% of your costs when you upgrade to energy-saving lighting or equipment.

Seattle City Light small business customers are taking advantage of rebates that help pay for energy-saving upgrades. Participants can also save hundreds of dollars on their utility bills each year.

To get started, a Seattle City Light energy analyst will come to your business and provide a free assessment of your energy-saving opportunities in the following areas:

Lighting upgrades

- Fluorescent lighting
- Indoor compact fluorescent light bulbs (CFLs)
- Light emitting diode (LED) lighting and exit signs
- Parking lot and outdoor lights
- Lighting controls and sensors

Appliance and equipment upgrades

- Refrigerators
- Ductless heat pumps

Commercial kitchen equipment

- Convection ovens and combi-ovens
- **Icemakers**

Mechanical equipment

- Variable-speed drives (VSD)
- Compressors
- CO sensors
- Heating and cooling systems

Get started by signing-up for a **FREE** business or facility energy-saving assessment

- 1 Contact an Energy Advisor at (206) 684-3800 or SCLEnergyAdvisor@seattle.gov
- 2 An energy analyst will contact you to schedule your free energy-saving assessment
- 3 Seattle City Light pays you to upgrade to qualifying equipment or lighting

How can we serve you better?

Call (206) 684-3800 or email SCLEnergyAdvisor@seattle.gov to share your comments.

Seattle City Light can help your business save money, reduce electricity use and cut maintenance costs.

"I was so surprised at how much brighter and cleaner everything looked. My business has improved, and I think my new lighting is one reason why."

Dry Cleaners

Energy savings for Wallingford Dry Cleaners

Wallingford Dry Cleaners' old fluorescent lighting used to cast a sickly light on the storefront. A Seattle City Light energy analyst recommended and assisted with the upgrade to energy-efficient lighting, which dramatically improved both working conditions and customer satisfaction.

In addition to improved lighting, Kwan Kim will save about \$250 in energy costs every year. And the rebate from Seattle City Light offset 60% of the cost of the project, minimizing his out-of-pocket expense. The total replacement cost was \$1,364 with a rebate of \$825 from Seattle City Light.

Why we pay rebates for energy conservation

Seattle City Light offers rebates to help customers save energy because it is the most cost-effective way to meet our future electricity needs. When customers reduce their electricity use, it helps us conserve our hydro resource and avoid the expense of building new power plants or buying electricity on the open market.

This program may change without notice and is subject to the availability of funds. Note: Ask your accountant about additional federal tax incentives that may be available for energy-efficient upgrades.

♻️ Printed on recycled paper made from 10% post-consumer waste fiber.
