

ERCOLINI SITE DEVELOPMENT NOTES Meeting #3 2/13/07

Should Fence be Included?

Just fence in play area

Whale tail is open – it's nice

It's going to be a bit more dangerous with grading so a fence is good along Alaska

I like the proposed fences

I'm concern about the alley – need fence

Make it a split rail / log fence

Use sustainable material that lasts

Fences also create a “barrier” for all people

Should Skate Spot be Pursued as a Priority?

It's good to have something for all ages

Same here, Me too

Pre-manufactured ramps do not hold up

Be cautious about the play area bark mixing with skate elements

If we have a skatespot - have another meeting to get design input from skaters

Try to fund it

Which Play Equipment is Preferred?

Game Time has nice amount. Nice to separate ages a bit.

Like spinning things.

Like LSI, long slide for preschool

The Game Time offers a lot of interaction between kids.

Kids love climbing bars.

Like swing separate, off to the side.

Game Time does seem to give more bang for the bucks.

The access points are good for GameTime.

Are there possibilities to do individual elements with Game Time?

You can put a lot of elements close together with Komp Pan

Is there a way to do an artistic element like truck or something like that in sandbox?

What Colors?

Prefer warmer colors like

KP colors

Other

Post Letter of Intent to apply for Neighborhood Matching Fund Grant

Conclusion:

1) Fences should be included, but wood is preferred.

2) Attendees generally would like to include the skatespot and to pursue funding. It would be good to hold a design meeting with kids.

3) Game Time is the preferred manufacturer, but would like more subtle colors instead of the bright yellow. red and blue.
