

## MICROSURFACING BEGINS AS EARLY AS JULY 27

As early as Wednesday, July 27, 2016, crews working on behalf of the Seattle Department of Transportation (SDOT) will apply a microsurfacing overlay to streets in your neighborhood. This overlay extends the life of the pavement. You may see preparatory work in the area a few days prior such as removing pavement markings. The map on the back shows the specific timing of work in your neighborhood. Please review this notice and contact our outreach team using the information below with questions or concerns.

### What to expect

- 2 to 3 days before the work begins, crews will distribute confirmation notices with dates and instructions and place “No Parking” signs on streets.
- Noise, tar-like odors, and large equipment are expected with the work.
- Streets will be closed for up to 8 hours; the average closure is 4 to 6 hours. Please avoid the road surface during this time. When wet, the microsurfacing emulsion is sticky and difficult to remove from clothing and pet fur.
- Emergency vehicles will be allowed through the work area immediately.

### Actions for residents, business operators, and employees

- Cars must be relocated off the road and planting strip area prior to the start of work. On the day of microsurfacing, please remove all personal items from the road and park cars on a nearby block not being microsurfaced that day. Streets cannot be driven on while closed.
- If it is your normal garbage, recycling, or yard waste pick-up day, please have bins to the curb by 6 AM for collection.
- Please do not wash cars or water lawns the day before or during the work.
- Please keep children and animals away from the area during the work.
