

Annualized Costs per Rider Charts

The following charts present the preliminary annualized costs per rider for each technology, bus rapid transit, elevated, and tram/streetcar. The annualized costs include both the capital and operating costs (see Task 3.8 for greater detail). In order to facilitate comparison across each technologies and between corridors, the cost bars are color coded by corridor.

The green bars show data for the Aurora/Greenwood - Fremont - Downtown corridor, the blue bars show data for the Lake City - Northgate - Ballard - Downtown corridor, the orange bars show data for the Ballard - Fremont - University District corridor, the purple bars present data for the Downtown and Environs area, the yellow bars show data for the Lake City - University District - Central Area - Columbia City corridor, and the pink bars present data for the West Seattle/White Center - Downtown corridor.
