

# S LANDER ST BRIDGE PROJECT

Summer 2016

## PROJECT DESCRIPTION

S Lander St is an essential east-west corridor in SODO serving traffic from freight, daily commuters, pedestrians, and bicycles, as well as King County Metro and the Port of Seattle. The Seattle Department of Transportation (SDOT) will build a bridge over the train tracks on S Lander St between 1st Ave S and 4th Ave S to improve local traffic circulation, rail operations, and safety in the SODO neighborhood.

## BENEFITS

- **Safety:** Conflicts between cars, bikes, trains, and pedestrians at this site have led to several fatalities
- **Jobs:** S Lander St creates direct connections to Port of Seattle facilities and freight operational support centers, which contribute to 75,000 existing jobs and an additional 25,000 jobs that are forecasted by 2040
- **Traffic congestion:** Train crossings create more than 4.5 hours of delay for commuters and freight each day, impacting the mobility of tens of thousands of people and affecting access to port and manufacturing facilities critical to our economy

## WHAT YOU NEED TO KNOW

- SDOT is building a bridge over the railroad tracks on S Lander St
- We are currently revisiting project design to ensure the safest and most effective solution
- At this early phase in the design process, we want to hear from you on this project and its key design features

## COST AND FUNDING

- This project was on hold for several years due to funding limitations. With the recent Levy to Move Seattle, this project is now moving forward.
- Additional funds are being sought through the federal FASTLANE grant program; SDOT will know by early September 2016 whether the project has been selected for federal funding
- The current total estimated project cost is \$140 million
- SDOT engineers are reevaluating the project design to see how costs can be reduced by increasing efficiencies while maintaining project goals
