

FACT SHEET

BALLARD NEIGHBORHOOD GREENWAY PROJECT

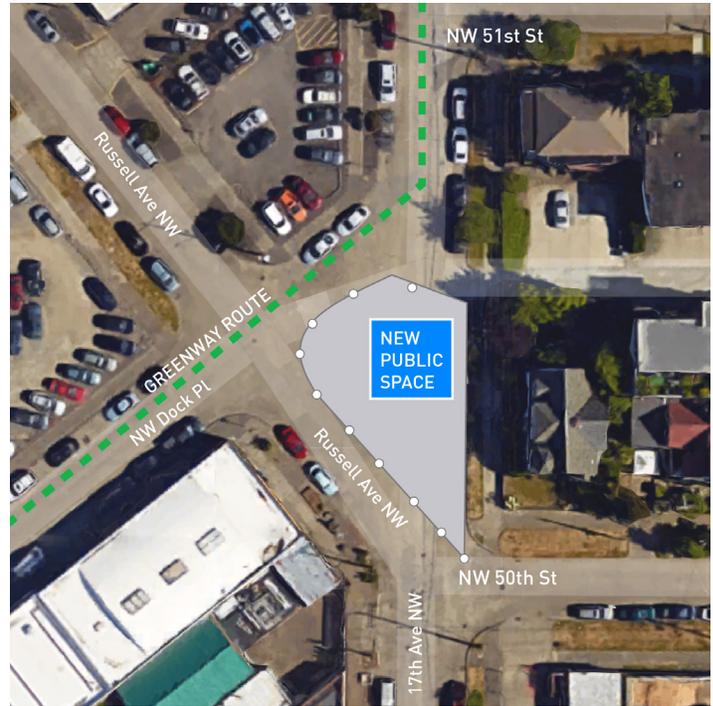

Next Steps: Intersection layout at 17th Ave NW and NW Dock Pl
November 2015

PROJECT DESCRIPTION

In early September, SDOT's contractor painted lines and installed flexible bollards on the east side of the intersection at 17th Ave NW and NW Dock Pl to improve safety, calm traffic and create a new public space. Based on traffic observations and public feedback, SDOT then considered a possible alternative intersection layout. Thank you to everyone who participated in the October 10 on-site event and all those who provided comments on the intersection layouts.

SDOT has decided to add signage to the current intersection layout (shown at right) to clarify its operations. We will then evaluate how the intersection works with the fully implemented neighborhood greenway, including the new traffic signal at the intersection of Leary Ave NW and NW Dock Pl. The intersection layout will be finalized in the fall of 2016.

A street mural designed by local artist Celeste York will be displayed on a vertical element, such as a kiosk, in the new public space. Groundswell NW will work with the community to develop a permanent park within the new public space utilizing 2016 Neighborhood Park and Street funds.
