

How will SDOT rebuild the roadway?

1 Relocate utilities

Impacts

- This work will be done during the day requiring single-lane closures of the roadway

2 Remove the existing roadway

Impacts

- This work will be noisy
- Concrete breaking will be done during the day
- Some work may occur on weekends

3 Install drainage pipes

Impacts

- Trenching in the roadway will be required to install pipes and drainage facilities

4 Repave the roadway

Impacts

- Concrete work will be done during the day
- Some work may occur on weekends

5 Install sidewalks and new curb ramps

Impacts

- This work will be done during the day
- Sections of sidewalks and crosswalks will be closed at times, requiring pedestrian detours

6 Restripe and cleanup

Impacts

- This work will be done during the day or at night, and will not be noisy
- Restriping will require single-lane closures
