Bicycle and Pedestrian Improvements
Coming soon

SDOT is proposing new bicycle and pedestrian facilities on NE 65th Street to provide a family-friendly connection between the Burke-Gilman Trail and Magnuson Park. Read on for information about this and other upcoming Magnuson Park projects.

Magnuson Park Project; Open House ●●●

Join us for an open house to learn about the many exciting projects taking place in and around Magnuson Park. The event will feature a presentation on a new proposed connection between the Burke-Gilman Trail and Magnuson Park, and updates on The Headwaters, Off-Leash Area Wetlands, Lakeshore Drive Parking, Central Wetland and Shoreline Improvements, and the Combined Sewer Overflow project.

Burke Gilman Trail Connection

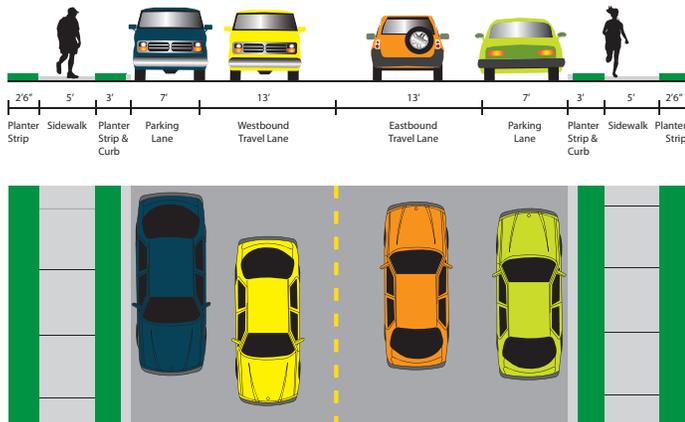

SDOT is proposing a family-friendly connection between the Burke-Gilman Trail and Magnuson Park on NE 65th Street to serve people of all ages and abilities who ride bicycles. To make this connection today, people on bicycles must either ride in the street, which is not comfortable for all types of riders, or on the sidewalk, which affects pedestrians.

The project would consist of a two-way cycle track on the south side of the street, separated from traffic by a sturdy barrier. There will be one opening along the route to maintain access to an existing driveway.

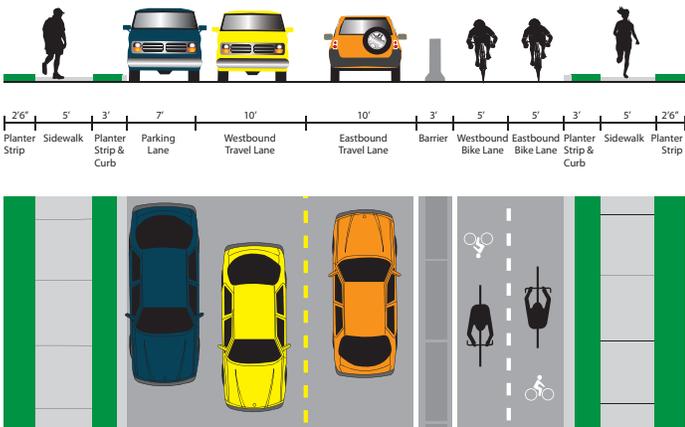

At the intersection of NE 65th Street and Sand Point Way NE, the cycle track would be complimented by new pedestrian improvements, including new ramps, shortened crossing of NE 65th Street, and a larger and more comfortable waiting area.

With the upcoming completion of the mixed-use asphalt path on NE 65th Street between 62nd Avenue NE and Sportscenter Drive, this project would allow off-street pedestrian and bicycle access all the way from the Burke-Gilman Trail to the waterfront, continuing up the Waterfront Promenade.

NE 65th between the Burke-Gilman Trail and Sand Point Way NE
EXISTING (facing east)

NE 65th between the Burke Gilman Trail and Sand Point Way NE
PROPOSED (facing east)

Other Open House information will include updates on:

- The Headwaters
- Off-Leash Area Wetlands
- Lakeshore Drive Parking
- Central Wetland and Shoreline Improvements
- Seattle Public Utilities' Combined Sewer Overflows project
