

Open House Comment Sheet

TODAY'S DATE _____

Thanks for your interest in the draft Bicycle Master Plan (BMP). Please fill out this comment sheet to help make riding a bike more safe, comfortable and convenient in Seattle.

Proposed Bicycle Network Map

Review the proposed bicycle network map and answer the questions below.

1. Is there any part of the proposed network plan map that you would change and why? If you think a street should not contain a bicycle facility where one is proposed, please suggest an alternate route for consideration.

2. If you think there is a gap in the Citywide "all ages and abilities" Network, please suggest a route that fills the gap and provide explanation.

End-of-Trip Facilities

After reviewing the information on end-of-trip facilities, how can we best increase bicycle parking in neighborhood business districts and other areas?

Programs

Chapter 6 talks about programs to ensure safety, education and engagement. Do you believe that all programmatic actions that will improve safety should be prioritized first? Are there additional programmatic ideas that should be considered?

Prioritization Framework

Refer to evaluation criteria in Chapter 8. Do you think that the five prioritization criteria of ridership, safety, livability, connectivity, and equity all should be weighted the same, or should one or more be given more weight in the prioritization process?

WHAT ELSE?

Do you have any comments on the draft goals, facility visual glossary, funding strategies or any other information presented tonight?

Need more time to respond to comments? Would you like your friends, neighbors and local businesses to provide input? Visit www.seattle.gov/transportation/bikemaster.htm to read the draft BMP and download additional comment sheets.

Comments must be received by **July 26, 2013**. SDOT will incorporate feedback in the final Bicycle Master Plan which will be released later in 2013. Email comments to bmpupdate@seattle.gov.
