

Access Seattle

Overview & Next Steps

First Hill Improvement Association

Brian de Place

September 9, 2014

SDOT's mission & vision

Mission: delivering a first-rate transportation system for Seattle.

Vision: a vibrant Seattle with connected people, places, and products.

SDOT's core principles

Presentation overview

- Setting the context
- Proposed framework
- Three Pillars:
 1. Construction Coordination
 2. Traveler engagement
 3. Business and community support
- Questions & discussion

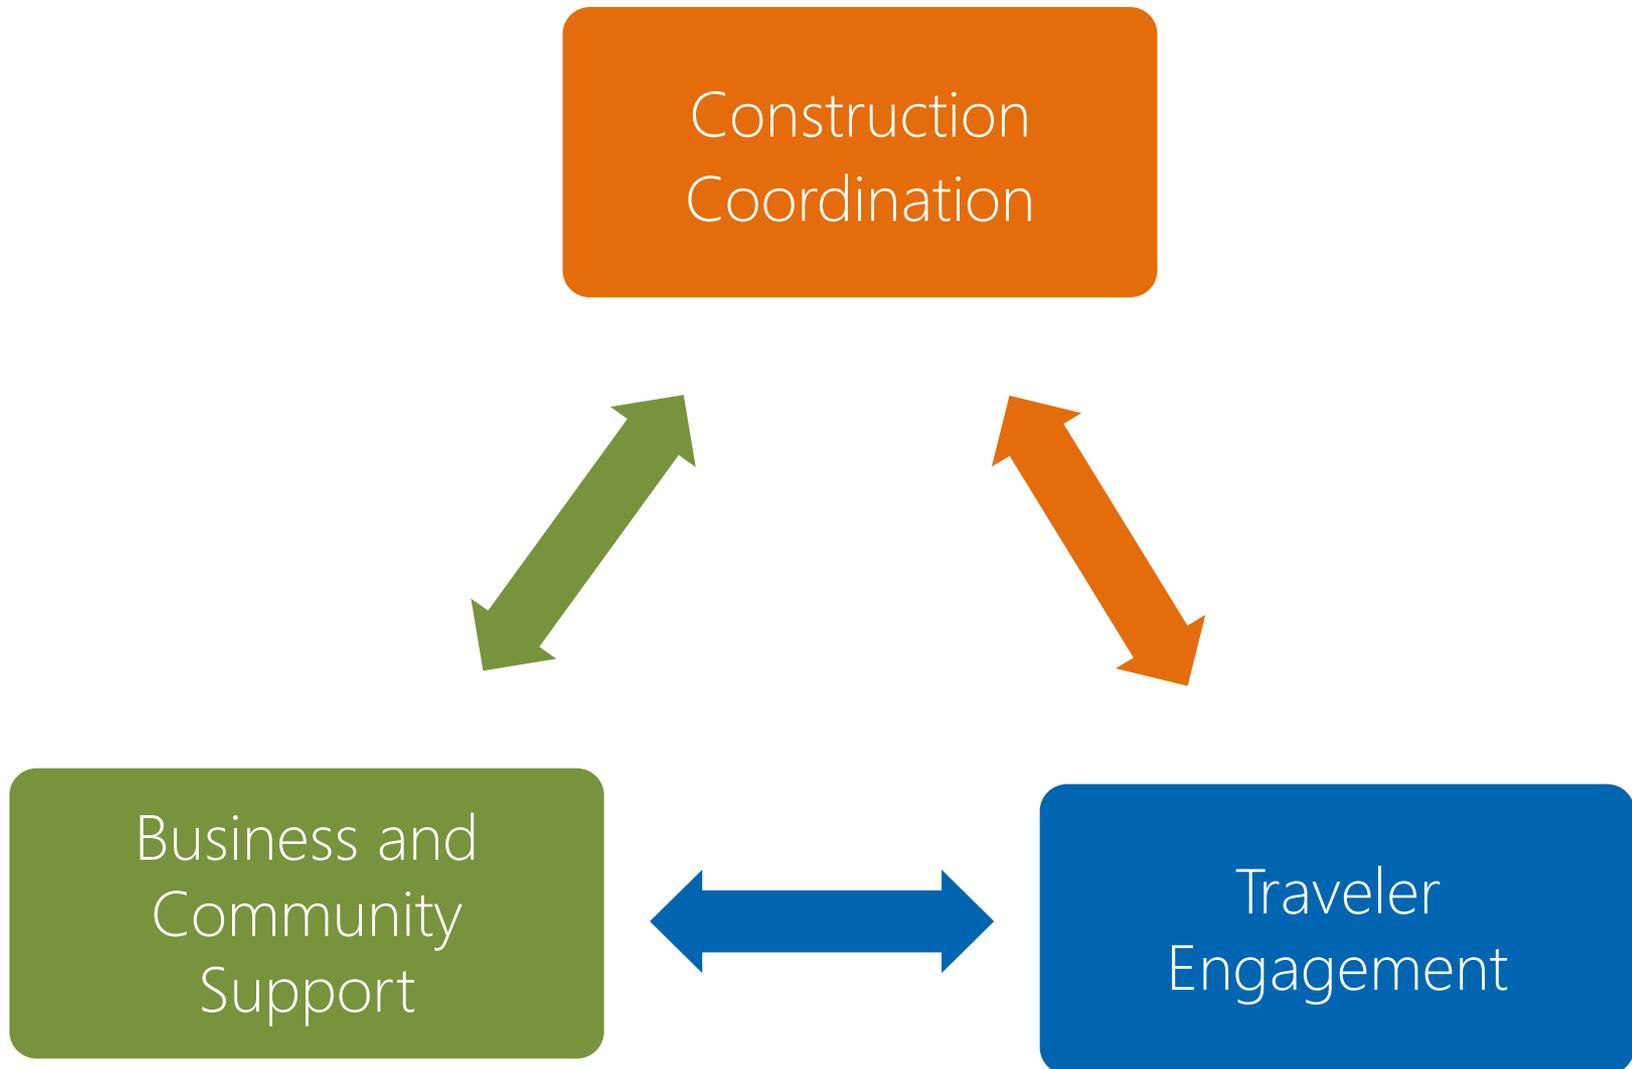

Context

- Unprecedented growth and development
- Progressive policies yield strong housing and job growth in Center City
- Neighborhoods outside of Center City are growing and want to remain vibrant and thriving

Source: Downtown Seattle Association

Three pillars of Access Seattle

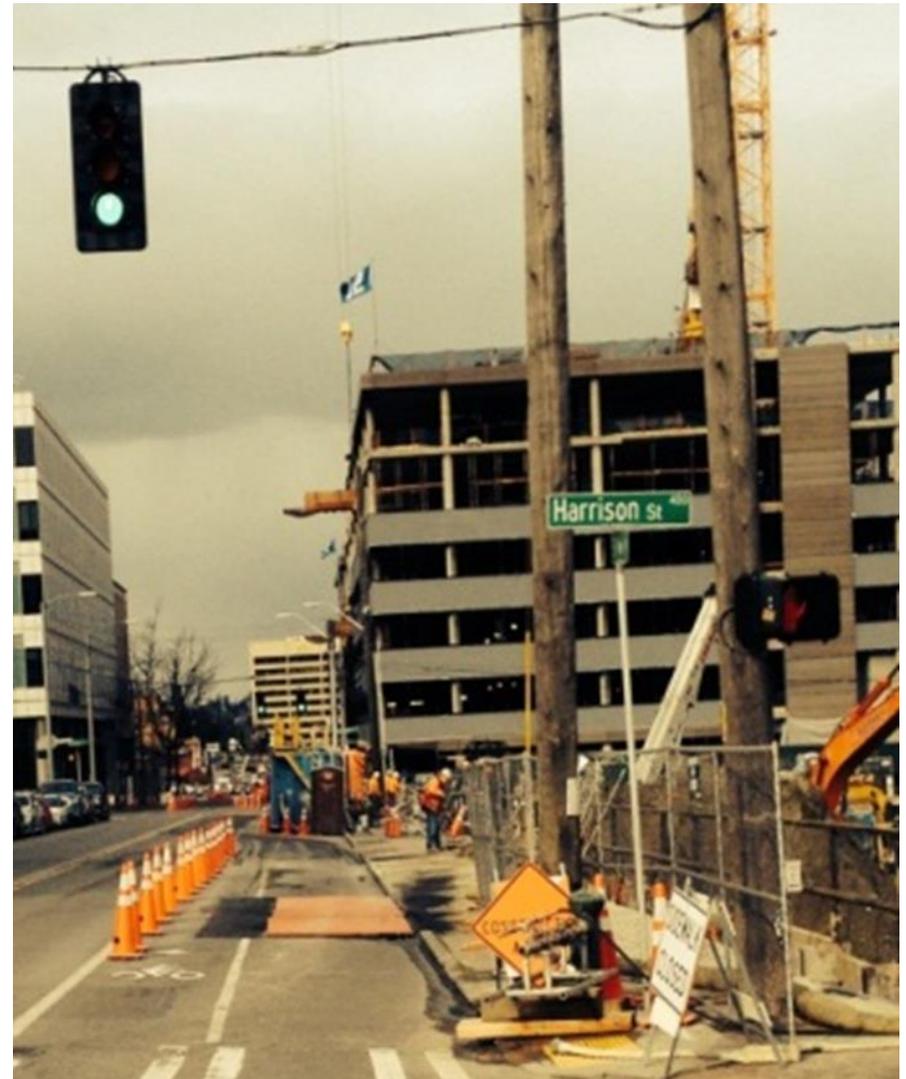

1. Construction coordination

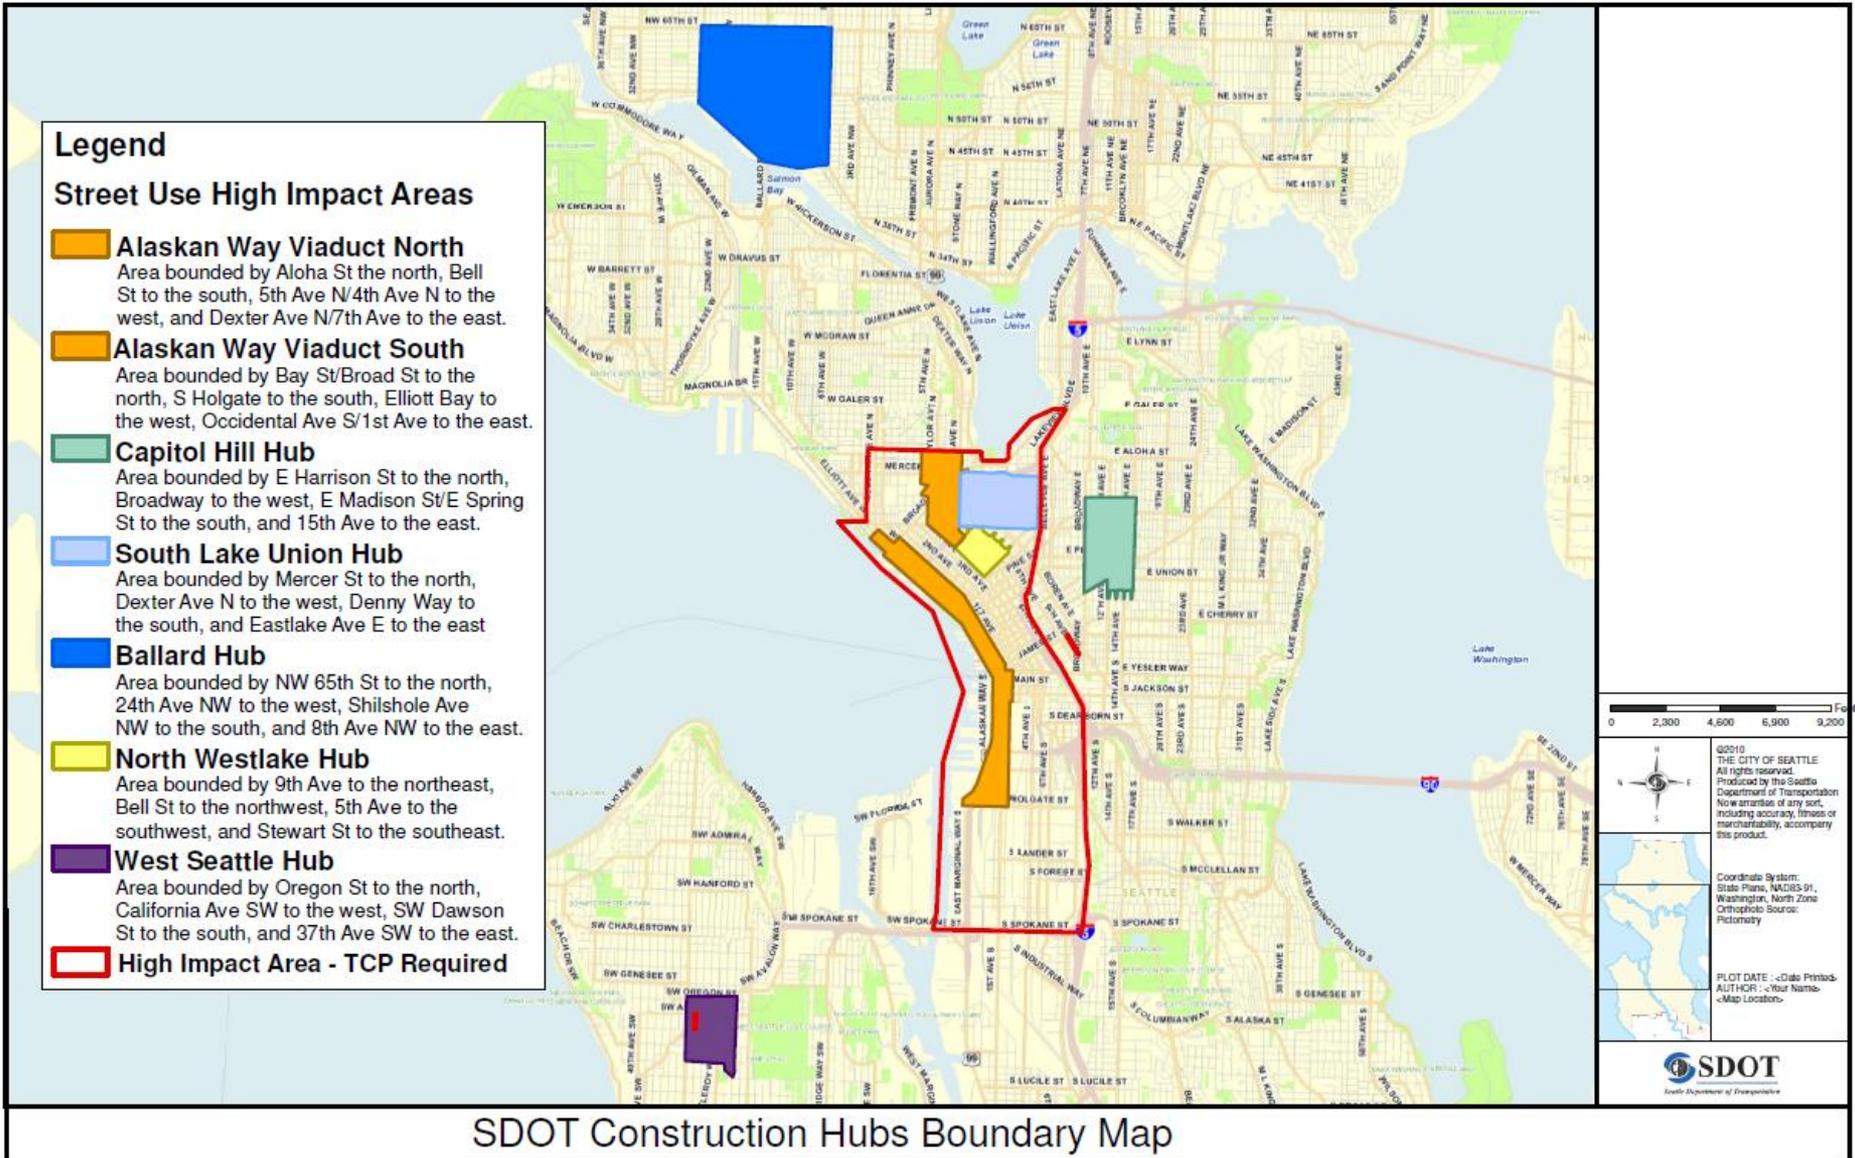

Mission: Coordinate construction and all activity that impacts right-of-way mobility

Target Audience: Everyone performing work or having events that affect the right of way

Potential Strategy: Establish formal Command Center to centralize and improve coordination functions

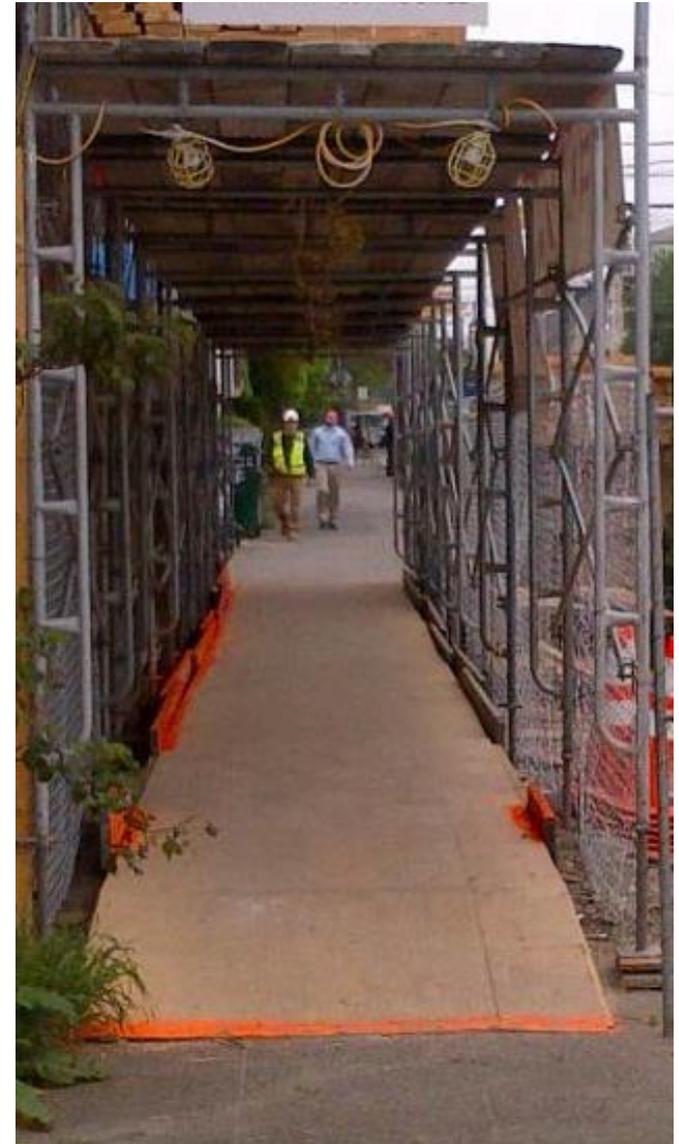

Construction hubs

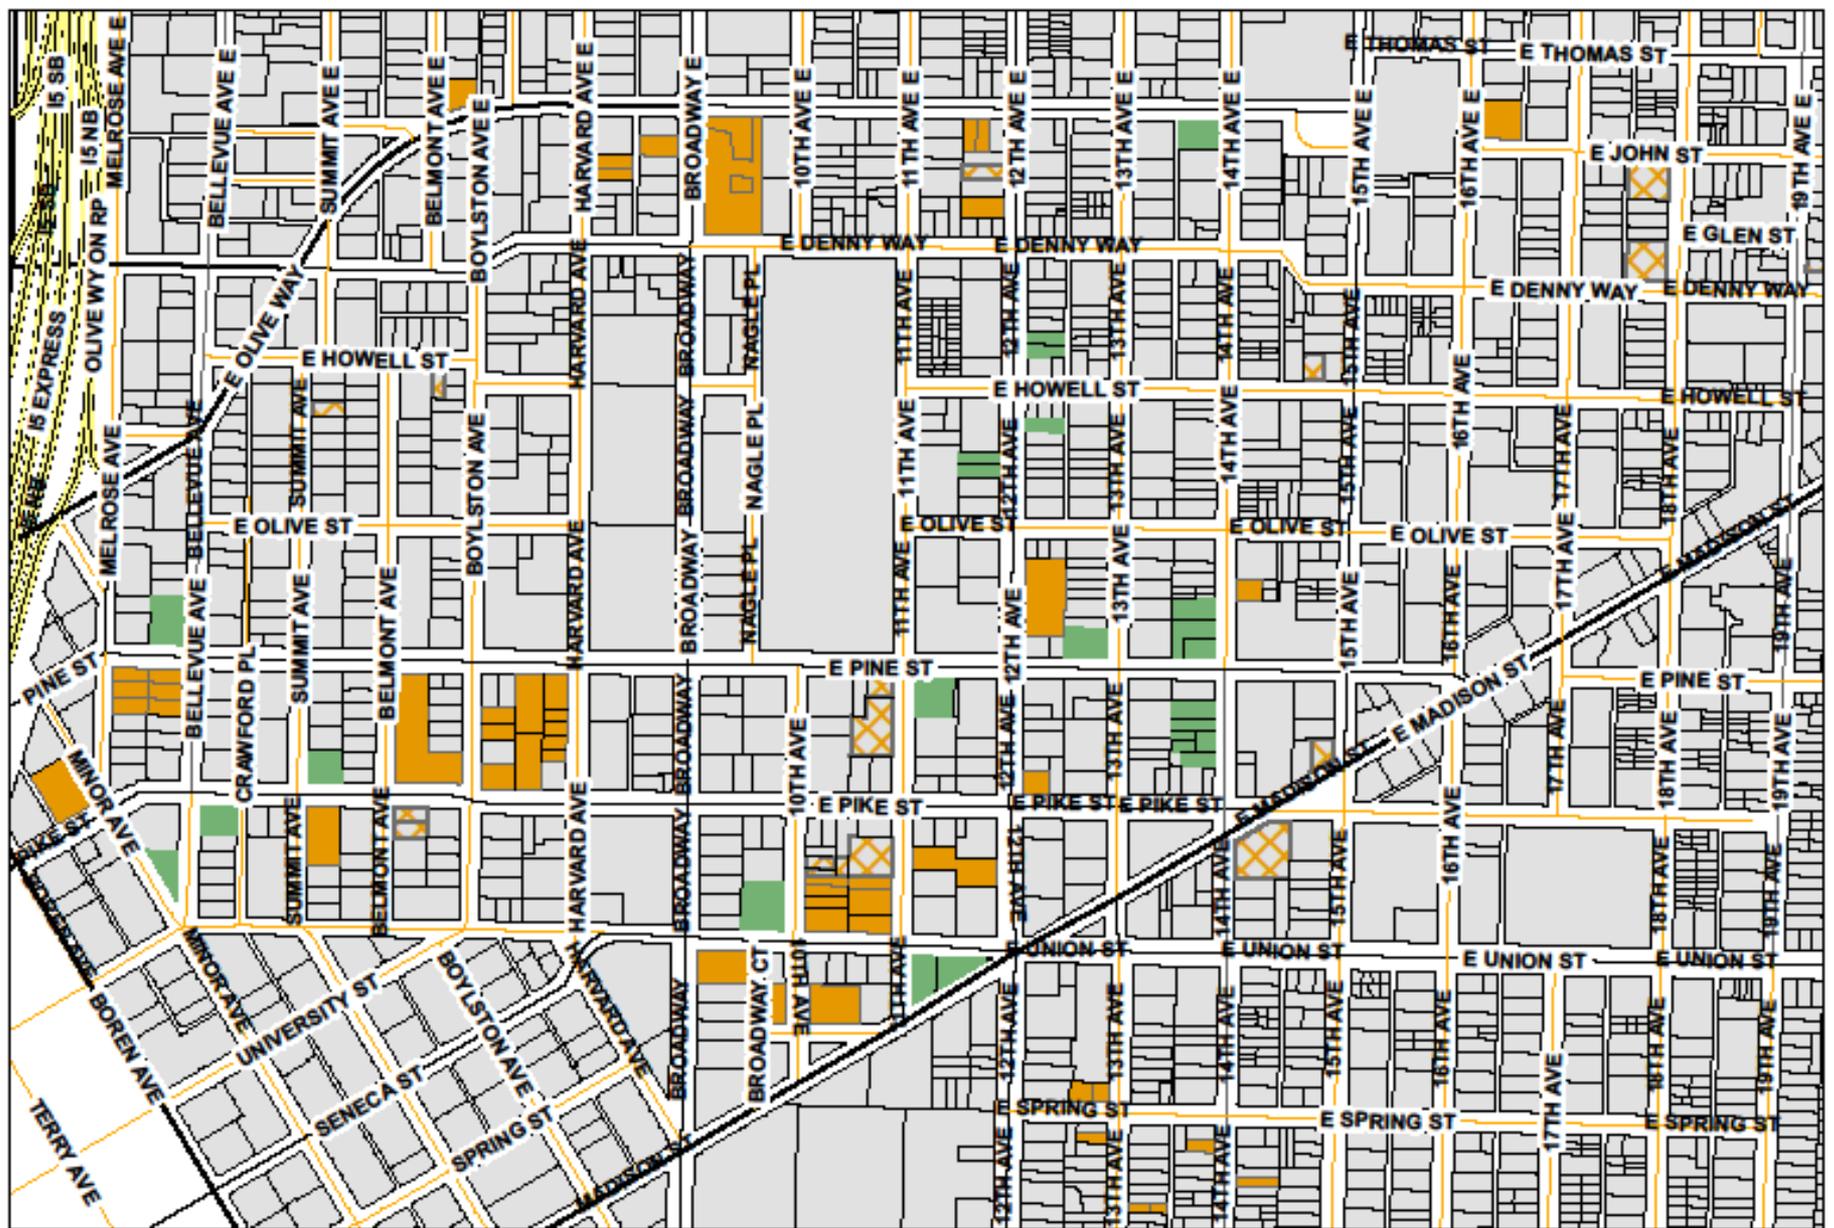

SDOT Construction Hubs Boundary Map

Construction hub program objectives

- Assess all project schedules together - identify conflicts and minimize mobility/access impacts
- Create mapping systems showing all planned and active mobility impacts from all hub-area construction, in all phases
- Establish reliable lines of communication with impacted communities
- Provide on-site enforcement to monitor and resolve conflicts

Capitol Hill Development Status

As of Sep 2014

Project Status

- Complete
- In Construction
- Planning/Permitting

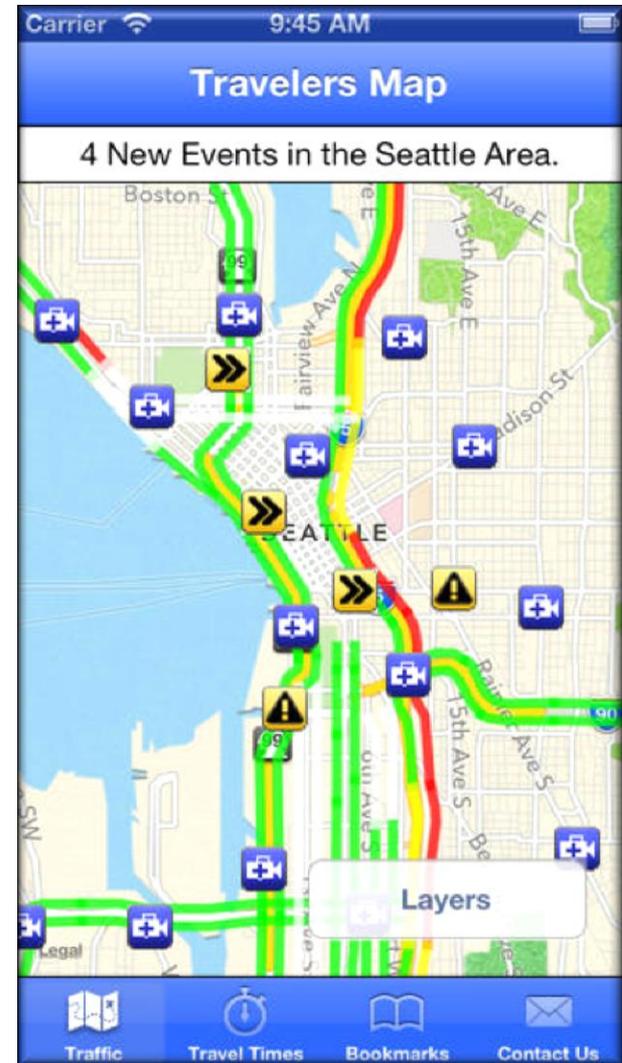

0 250 500 750 Feet

2. Traveler engagement

Mission: Engage travelers with real-time, actionable information on travel and transportation options

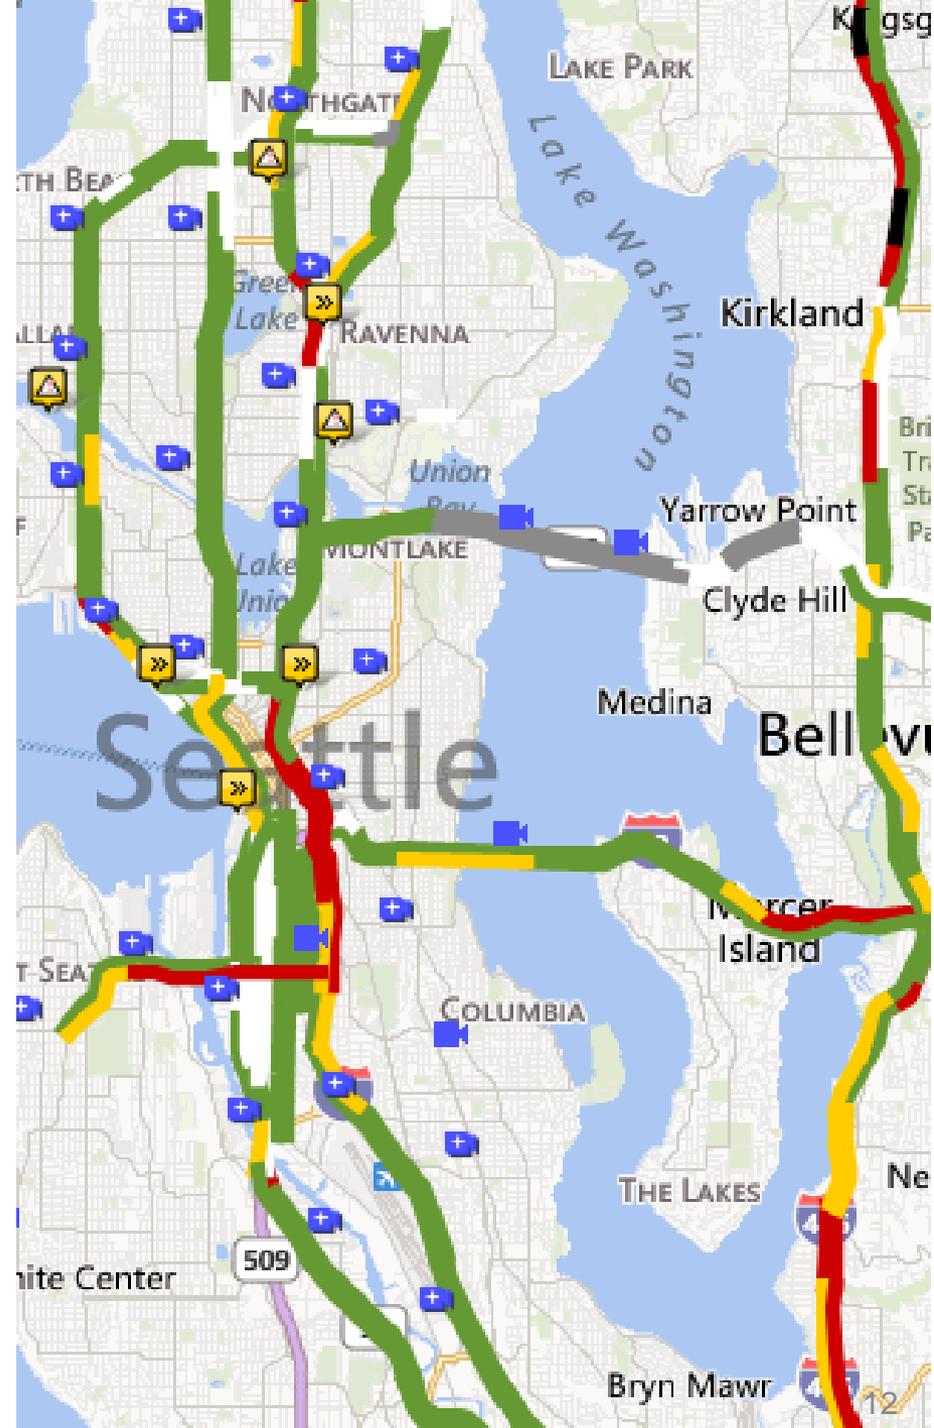

Target Audience: Traveling public

Potential Strategy: Develop “One Stop” mobile app and other dynamic tools that provide information on construction activity, parking, and optimal modal choice

Leveraging opportunities:

- Next Generation ITS, Traveler Map, Traffic Management Center Rebuild, e-Park and DMS programs
- Seattle as Tech Incubator and OED-Supported Industry
- Travel Options programs including Bike Share, Car2Go

Next Generation Center City ITS

Increases ability to manage mobility for all modes during particularly heavy periods of construction.

Examples of system improvements:

- Real-time responsive signal timing
- Adaptive signal control on key corridors feeding into Center City
- Dynamic signs allowing SDOT to modify lane assignments and improve traffic flow

Examples of communications programs

- Traveler Information Map available as smart phone app
- Sensors that provide travel time information
- Dynamic signs showing travel times on multiple routes
- e-Park expansion into SODO and Seattle Center area
- Automated commercial vehicle load zone occupancy information

3. Business and community support

Mission: Support business districts as thriving destinations by ensuring inviting experience and intuitive wayfinding

Target Audience: Business owners, residents, and visitors in construction hubs

Potential Strategies:

- Designate SDOT Ombudsman for all construction-related issues, spanning across public and private projects
- Develop *"Construction Hub Toolkit"* to provide business assistance, signage and streetscape improvements, etc.

Maintaining Pedestrian Access

- Educating contractors
- Key corridors assessed: East-West travel along Pike/Pine
- Enforcing & encouraging:
 - Walkthrough scaffold (*overhead protection*) allowing storage above and pedestrian access full-time
 - Pedestrian detours to the opposing sidewalk at nearest crossing
 - Advanced warning signs for closure, detour signs showing specifically where to cross
