

# Construction Notice

## Mercer Corridor Project Mercer East Construction

February 25, 2011

Current road closures and upcoming construction activities.

Sewer replacement work continues on parts of 9th Ave. N.

### What's Next?

Continue installation of new sewer line on 9th Ave. N between Aloha St. and Republican St.

*Please note all schedules are dependent on weather conditions and availability of materials.*

### Upcoming Night Work at Mercer St. and 9th Ave. N

**What & Where:** Mercer St. will have up to three lanes closed overnight near the intersection of Mercer St. and 9th Ave. N. Eastbound traffic will be routed around the closure and will continue on Mercer St.

**Why:** Installation of underground utilities across Mercer St.

**Work Hours:** Weeknight work, 7:00 p.m. to 5:00 a.m.

**Duration:** Approximately two weeks.

### Mercer St. to Republican St.: 9th Ave. N Sewer Installation Continues

Expect increased construction activity as crews continue installing a new 30-inch diameter sewer line. To minimize surface impacts, much of the construction activity will continue to occur below ground, using a pipe reaming machine to bore through the soil and place the new pipe.

Nearby neighbors and businesses can expect:

- 9th Ave. N closed between Republican St. and Mercer St. during active work hours (local and emergency access allowed) and flaggers directing traffic as needed
- Access pits and heavy machinery
- Continued lane and sidewalk closures with appropriate traffic, bicycle and pedestrian detours
- Noise, dust, and vibration

**Work Hours:** Weekdays and weekends. Crews may work up to 24 hours per day if required.

**Duration:** Approximately six weeks.

### Adjacent Project Work: Dexter Ave. N. Paving Project

SDOT will begin repaving Dexter Ave. N between Fremont Ave. N and Roy St. on March 7, 2011. Paving work will continue through September 2011 and is anticipated to be done in three phases moving generally from north to south.

The project is being coordinated with the Mercer Corridor Project to consider joint traffic and detour impacts. For questions about the Dexter Ave. N Paving Project, please visit the project website at:
