

Gilman Ave W sidewalk

Gilman Ave W Sidewalk

Project ID # Magnolia/Queen Anne SDOT Project

Type of Improvement: Sidewalk

Neighborhood: Magnolia

Description of Project:

This project would provide a new six foot wide sidewalk along the northside of Gilman Ave W from W Emerson Place to 29th Ave W. This ½ mile stretch of road has a worn dirt trail in the grass that people use to jog and to get to and from the existing bus stops. The new sidewalk would provide a great walking trail without intersection conflicts as well as better access to bus stops.

While the southside of the street has an existing sidewalk, there are many streets that enter at angles. This creates extra-wide intersections that pedestrians need to navigate. Some of these intersections could be reduced in width to facilitate shorter pedestrian crossing distances.
