Ravenna Ave NE sidewalk

BRIDGING the GAP

SDOT Seattle Department of Transportation

Ravenna Ave NE Sidewalk

Project ID # NE SDOT Project

Type of Improvement: Sidewalk
Neighborhood: Wedgwood

Description of Project:
This project would provide a new six foot wide sidewalk and intersection improvements along the west side of Ravenna Avenue NE from the end of the existing sidewalk network at NE 85th Street to Lake City Way/NE 92nd St. Ravenna Avenue NE is a principal arterial street with high traffic volumes, regular bicycle usage, and transit service. This project will provide a safe walking route connecting schools, parks, and transit stops.

SDOT completed 10% design for this project in February 2009. East-side and west-side alternatives were considered. To minimize environmental impacts, provide for long-term viability, and provide the most cost effective approach, the west-side is the preferred alternative. The total cost for the west side alternative is $1.228 million. SDOT's sidewalk development program could provide additional funds for the project and leverage the allocation from the Neighborhood Street Fund.
