

Haller Lake Loop (1.3 Miles)

Haller Lake Loop (1.3 Miles)

Project ID # NW SDOT Project

Type of Improvement: Sidewalk repair, crossing improvements, sidewalk to street end

Neighborhood: Haller Lake

Description of Project:

The Haller Lake Loop would provide 1.3 miles of walking for the community. There is an existing asphalt walkway which needs some repair and improvements at intersections where crossing is required. The exact scope of the project and priorities would need to be discussed with the community. Possible options include:

1. Repair/improve existing walkway
2. Improve intersections and crossings
3. Possible new sidewalk connection on Meridian Street
4. Possible street end park development at Meridian Street dead end with Haller Lake
