

Public Hearing and Summary of Comments and Concerns

Six people attended the public hearing on May 29, 2013. Four comments were received by email, and one comment was received by phone. SDOT received 50 responses via the online survey. Comments were taken through June 7, 2013.

A majority of comments received supported the proposal. On the survey 84% of respondents said they supported adding game-day restrictions to Zone 6. Among responding households that reported not currently having a permit, 67% still supported adding the game-day restrictions. Five of the six (83%) public meeting attendees supported the proposal and three of the five (60%) email/phone comments were in favor.

Those who did not support the proposal cited several concerns. Those who live near, but not within, Zone 6 expressed concern that adding the game day restrictions will create additional parking problems in the areas just outside the zone. Others who did not support the proposal generally expressed that they did not find the additional restrictions to be necessary.
