

Boulevard Classification Legend Definitions

Class 1 Boulevard—Natural Landscaping: To provide for circulation and access in a manner that enhances the appreciation or use of adjacent major park lands (run along the street for one mile or more) and continuous vistas. This classification is compatible with traffic classifications of Principal, Minor and Collector Arterials. It is marginally compatible with Residential Access Streets. The emphasis is typically on natural landscaping instead of formal landscaping.

Class 2 Boulevard—Formal Landscaping: To provide special landscaping and geometric features, to provide a park-like atmosphere to a street otherwise intended to move traffic, and/or to provide access. To serve its intended traffic function as indicated by its traffic classification. This classification is compatible with traffic classifications of Principal, Minor, and Collector Arterial, and marginally compatible with Residential Access Streets. The boulevard treatment contributes the major landscaping to the corridor such as in multi-family, commercial, industrial, and manufacturing areas.

Class 1 Olmsted Boulevard: This classification would be applied to the existing, improved Olmsted Boulevards with natural landscaping.

Class 2 Olmsted Boulevard: This classification would be applied to the existing, improved Olmsted Boulevards with formal landscaping.
