

# SAVE THE DATE

Green Gardening Program - Fall Workshop 2016  
*The Case for Sustainable Landscapes*  
Wednesday, October 19, 2016  
South Seattle College

**Mark your calendars for this chance to network, increase your knowledge, and learn about the latest developments in sustainable landscaping! Pesticide recertification credits and continuing education credits will be offered. Stay tuned for registration and workshop information coming in September. Topics include:**

- How sustainable landscape management has paid off for Montana State University and Trilogly at Redmond Ridge
- Noxious weeds, the Roundup controversy, and IPM strategies for weed management
- The business case for irrigation technologies
- How green spaces influence physical and mental health
- The latest stormwater research from Washington State University
- *IN SPANISH* – Insect ID and control - Identificación y control de los insectos

This event is sponsored by Seattle Public Utilities and funded by the Local Hazardous Waste Management Program in King County with support from South Seattle College.
