

Equity Toolkit Application  
“Love Food, Stop Waste” Project

---

October 5, 2016

# Equity Toolkit Overview

# Purpose

---

The ***SPU Equity Planning Toolkit*** is comprised of worksheets for use in planning and decision-making processes to help ensure equitable access and outcomes for all those who live, work, and play in Seattle.

Use of the Equity Planning Toolkit helps meet the **SPU Inclusion Value** to *listen and collaborate to ensure our actions are equitable and improve quality of life*. As a result, a more inclusive range of customers truly reflecting the diversity of our community will engage and benefit from all the SPU offers.

SPU Equity Toolkit SharePoint site:

<https://seattlegov.sharepoint.com/sites/SPU-T1/EquityTools/SitePages/Home.aspx>

# Worksheets

## 1. Stakeholder Analysis

Objective: Identify all known and potential stakeholders who will be impacted by the project, and what their role will or might be.

Purpose: Provide a basis for further planning around what approach is most effective in engaging stakeholders, and what equity-related concerns may exist.

## 2. Inclusive Outreach and Public Engagement Plan

Objective: Identify primary audiences and potential disparate impacts related to planning, design, and implementation of community outreach and engagement-related activities.

Purpose: Help design outreach activities to achieve more equitable access and participation of the community and customers.

## 3. Service, Project, or Program Development

Objective: Identify potential disparate impacts related to planning, design, and implementation of SPU services, projects, and programs.

Purpose: Help design the project to achieve more equitable access, participation, and benefits for the community and customers.

- Living documents
- Group discussion with diverse participation to bring in multiple perspectives
- Result in actionable steps, not just discussion

# “Love Food, Stop Waste” Project Overview

# Goals

---

- Increase awareness among Seattle residents about how much food we're wasting and why it matters
- Help residents waste less food through providing them with information, resources and tools

# Increase awareness among Seattle residents about how much food we're wasting and why it matters

---

We waste A LOT: 40% of food in the U.S. goes uneaten. Households are responsible for almost half of that, throwing away 20% of the food we buy.

Money: An average family of 4 throws away \$1500 worth of food a year.

Environment: 25% of freshwater and 5% of energy used in the U.S. is wasted on food that is never eaten. Wasted food is responsible for about 8% of global greenhouse gas emissions.

People: The use of all those wasted resources increases the cost of food, hurting low-income households the most. Wasted food uses up scarce freshwater resources in places where people are struggling with droughts, and it damages the climate we all live in.

# Research Completed

---

## 2013 – weighing study (Carl)

- 100+ households measured edible vs. inedible food waste for 13 weeks
- About 1/3 of the food people were throwing out was edible

(edible = food that is intended for human consumption, but gets thrown out because no one wants to eat it or it goes bad)

## 2014 – baseline survey and interviews

More than 400 in-person surveys at grocery stores, farmers markets, and community events to provide a baseline understanding of awareness, behaviors and interest in wasting less food. High participation by African American, Chinese, and Vietnamese communities. Low participation by Hispanic/Latino and East African communities.

## 2015 – pilot

Tested out outreach messaging, strategies and tools in key audiences.

# Primary Audiences

---

## 2015 Pilot

Millennials

African American Households

Families with Teens

Immigrant & Refugee Households  
(via EJSE collaboration)

High-Income

## 2016-17 Campaign

Millennials

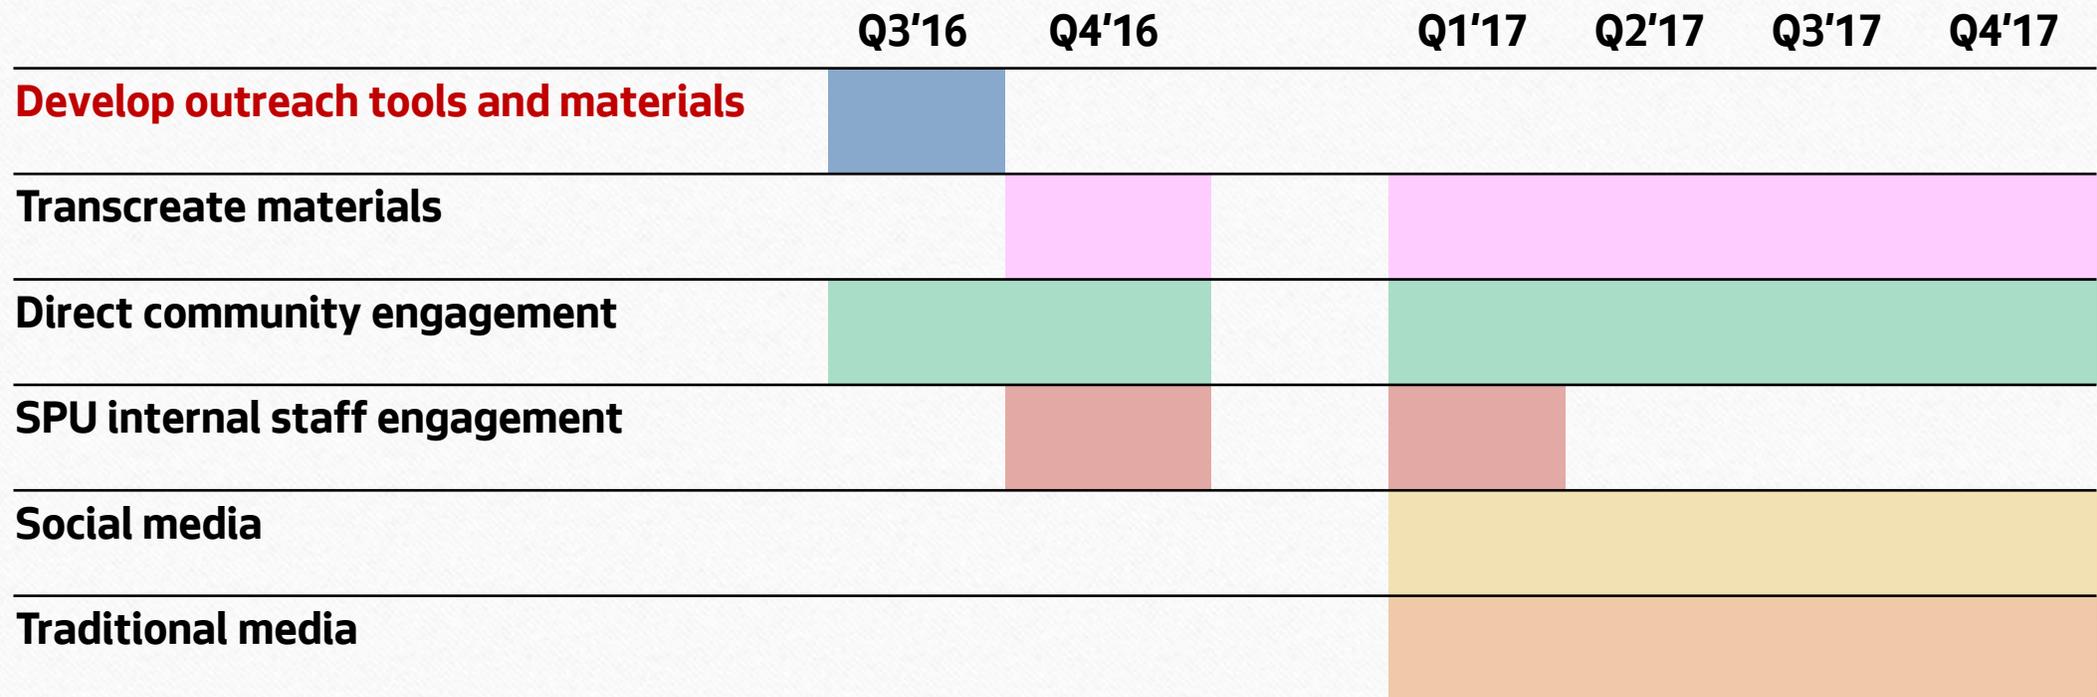

African American Households

Families with Children

Immigrant & Refugee Households  
(pending POEL guidance)

General Population
