Some sewer and drainage improvements we are considering could result in temporary street lane closures during construction. What are your thoughts about road impacts during construction?

---

---

---

Some options could require that SPU acquire private property to build an underground sewer storage tank and/or above-ground stormwater pond with native plants and trees. What are your thoughts about SPU purchasing private property as part of a solution to address sewer backups and stormwater flooding?

---

---

---

Some sewer options SPU is considering would require us to coordinate with property owners to seal leaks in privately owned side sewers through low impact construction methods. What are your thoughts about allowing SPU to access private properties to make these improvements to private side sewer lines?
