

Seattle Public Utilities Water System Synopsis as of September 18, 2017

Little precipitation was recorded in the Cedar River and South Fork Tolt River Watersheds over the past week.

The average snow accumulation across the sites that we monitor is estimated to be about 0.0 inches snow water equivalent which is at the long term average for this time of the year.

The combined reservoir storage of Chester Morse Lake, Masonry Pool, Lake Youngs and South Fork Tolt Reservoir is below the long term average for this time of the year.

Water use over the past week averaged about 153 million gallons per day (mgd), which is more than the 152 mgd used during the same period over the years 1999-2014.

Note: WY = Water Year, which is defined as the 12-month period October 1, for any given year through September 30 of the following year. The water year is designated by the calendar year in which it ends. Thus, the year ending September 30, 2017 is called water year 2017 (WY 2017).

All data is provisional and subject to revision.
