

## Car Ownership Emissions Chart

This helps you determine monthly emissions for the car you own. Pick from the categories of vehicles represented the one that is most like your car: SUV's, Minivans, 4 Door Sedans, Compact Cars, and Light Trucks. To determine the exact emissions information for your make, model, and year of vehicle please refer to the Environmental Defense website\*.

If the vehicle you are calculating is your *primary* vehicle, assume you drive it approximately 800 miles per month.

If the vehicle you are calculating is your *second or third* vehicle, assume you drive it approximately 250 miles per month.

Figures for emissions pollutants are in pounds.
