SEATTLE CITY

SCL SOLAR PROGRAMS

Customer Generation

Customers install solar photovoltaic (PV) systems on their own premises

Community Solar

Customers purchase units of larger solar projects and get shared benefits of net metering and state production incentives

Education and Outreach

• Washington State Production Incentive

- Incentives paid to solar PV owners for generation
- SCL is reimbursed through a credit state business tax credit

Net Metering

- Compensates customers for the energy they generate at the retail rate using net metering.
- Municipal code revised to increase available net metering capacity

CUSTOMER GENERATION

Description	Incentive Rate/kWh
Manufactured Outside of WA	\$0.15
Panel Manufactured in WA	\$0.18
Inverter Manufactured in WA	\$0.36
All Manufactured in WA	\$0.54

The majority of installations have made-in-WA systems, particularly in recent years

- Number of PV Systems: 2037 (Aug. 2015)
- Capacity: 10.7 MW (Aug. 2015)
- Incentives paid in 2015: \$3,390,000

- Program Design:
 - o SCL builds
 - Customers "pay back"
 - Host site gets long-term benefit
- City Light has chosen to work with non-profit sites
- Hosts chosen for community & conservation orientation mission plus solar feasibility

• Low Entry Cost:

- Ounits cost \$150; each represents a 28 watt piece of the system
- Customers buy from 1 125 units
- Current State production incentives (\$1.08/kWh) and bill credits for the energy produced (about 7.5 cents/kWh) add up to \$1.16 per kilowatt-hour of electricity
- Online enrollment system; charges divided into 2 equal payments across 2 bills

COMMUNITY SOLAR

PHINNEY RIDGE SOLD OUT-12/11/2014 74.79 kW

The Phinney Ridge project includes two solar arrays-one at the Phinney Neighborhood Association community center and one at the Woodland Park Zoo. Both groups are active in promoting solar energy.

HOLIDAY APARTMENTS SOLD OUT-5/4/2015

The project opened in November 2014 and includes a solar array located on a lowincome apartment building in Capitol Hill. The project is a component of the Capitol Hill EcoDistrict, a neighborhoodbased sustainability initiative.

JEFFERSON PARK SOLD OUT-2012 23.K kW

City Light completed its first Community Solar project at Jefferson Park in the Beacon Hill neighborhood in 2012. Participants helped build three new picnic shelters with solar electric panels installed on the roofs.

SEATTLE AQUARIUM

SOLD OUT-2013 44.4 kW

Community Solar at the Seattle Aquarium opened for enrollment in September of 2013 and sold out the 1,850 available units in only 6 weeks.

COMMUNITY SOLAR

Installed Capacity by Project

- Renewable energy presentations and events powered by 'MobE', the mobile-solar kiosk
- Community workshops with solar installers, solar lenders, and residential customers
- Teacher trainings to advance solar energy education at Seattle Schools
- Institutional partnerships with leaders in energy research and education, including the University of Washington

- State renewable incentive law sets a cap on the tax credit per utility:
 - 0.5 percent of the utility's taxable power sales or \$100,000, whichever is greater
- City Light expects to exceed cap in the FY2016
 Increased adoption of WA components
 - Larger average solar system size installed
 - Greater solar resources More sunshine (actual production higher than previous estimates)
 - Decreased retail sales

- 2016 incentive cap estimate: ~\$3.98 million
- 2016 projected incentive payments: \$5.77 million.
- Projected overage: \$1.79 million
- This number is highly variable and affected by:
 - Weather
 - Number and size of new installations
 - Made-in-WA systems
- Bottom line could be 31% reduction in incentive payments

INCENTIVE CAP-OUTREACH

Direct

- o SCL website
- o Solar installers email
- Direct mail to all solar customers
- Media Push
 - Powerlines blog post
 - Press release
 - o Social media
 - o Light Reading Newsletter

CUSTOMERS

New Customers by Year 2008 2009 2010 2011 2012 2013 2014 2015

Total Number of Customers by Year

- 93% of our solar customers are residential
- The majority of customers receive the state incentive

DEMOGRAPHICS – CUSTOMER SOLAR

DEMOGRAPHICS – COMMUNITY SOLAR

THE NATION'S GREENEST UTILITY | 22

- Similar to Seattle, rapid growth in the solar industry can be attributed to:
 - The decline in installed system prices
 - Increasing productivity
 - More streamlined installation
- However, adoption differs from California/SW
 Third-party ownership (leased solar)
 Available solar resource

UPCOMING LEGISLATION

N'S GREENES

1905

SINCE

SEATTLE CITY

- Washington State's Renewable Energy System Cost Recovery program (RCW 82.16.120) establishes incentive cap
 - Other utilities are also exceeding their cap (e.g. Orcas Power and Light)
 - Hoping legislation will raise the per-utility cap and extend the incentive
 - City of Seattle to include this issue in its 2016 State Legislative Agenda

- Under Washington law (RCW 80.60.010), all utilities are required to offer net metering for systems up to 100 kilowatts
- In Washington, utilities are required to make netmetering available, but only up to a relatively low capacity limit
 - o 0.5 % of 1996 peak load

- The state production incentive is unavailable to third party owners or users of leased systems
- Production incentive capped at \$5,000 per recipient per year, which does not encourage third-party-owned or commercial systems

NEXT STEPS

- Current study to assess the potential for SCL to add new distributed PV capacity over the next 20 years
- Two views:
 - Service territory solar potential
 - Solar potential broken out geographically (by substations)
 - Is there more value in investing in solar in certain locations?
 - How might SCL's system benefit from solar?

- Seattle City Light seeks to better define our role in a rapidly changing PV market, while balancing the needs of the utility and all its customers.
 - Assemble cross-functional team in next several months
 - Collaborative analysis and research approach
 - Recommend program strategy for City Light

• Issues in play:

 Rate/tariff design (net metering, feed-in tariff, equity issues)

- Distribution system impacts
- Legislative authority
- Outility program/service program options

OUR VISION

To set the standard—to deliver the best customer service experience of any utility in the nation.

OUR MISSION

Seattle City Light is dedicated to exceeding our customers' expectations in producing and delivering environmentally responsible, safe, low-cost and reliable power.

OUR VALUES

Excellence, Accountability, Trust and Stewardship.
