CITY OF SEATTLE

ORDINANCE __________________

COUNCIL BILL __________________

..title

AN ORDINANCE relating to land use and zoning; amending Chapter 23.32 of the Seattle Municipal Code (SMC) at pages 2, 3, 4, 5, 6, 7, 8, 9, 12, 13, 14, 15, 16, 17, 18, 19, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 48, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 70, 71, 72, 73, 74, 75, 76, 77, 78, 80, 81, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 101, 102, 103, 104, 105, 106, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 143, 144, 145, 146, 147, 149, 150, 151, 152, 155, 156, 157, 158, 159, 160, 161, 163, 164, 165, 166, 167, 168, 170, 172, 173, 174, 175, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 195, 197, 198, 200, 203, 205, 206, 208, 215, 216, 217, 218, and 219 of the Official Land Use Map to rezone certain land throughout the City; amending Sections 23.30.010, 23.34.008, 23.34.010, 23.34.011, 23.34.012, 23.34.024, 23.44.002, 23.44.006, 23.44.008, 23.44.010, 23.44.012, 23.44.014, 23.44.016, 23.44.022, 23.44.024, 23.44.034, 23.44.041, 23.44.042, 23.45.502, 23.45.508, 23.45.509, 23.45.510, 23.45.512, 23.45.514, 23.45.516, 23.45.517, 23.45.518, 23.45.520, 23.45.522, 23.45.529, 23.45.536, 23.45.545, 23.47A.002, 23.47A.005, 23.47A.008, 23.47A.009, 23.47A.012, 23.47A.013, 23.47A.014, 23.47A.017, 23.48.002, 23.48.021, 23.48.025, 23.48.040, 23.48.055, 23.48.300, 23.48.320, 23.48.325, 23.48.400, 23.48.420, 23.48.421, 23.48.620, 23.48.623, 23.48.627, 23.48.635, 23.48.640, 23.48.645, 23.48.646, 23.48.650, 23.50.020, 23.50.026, 23.50.028, 23.50.053, 23.50.055, 23.53.006, 23.53.025, 23.54.015, 23.54.040, 23.58A.002, 23.58A.014, 23.58B.040, 23.58B.050, 23.58C.040, 23.58C.050, 23.58D.002, 23.58D.006, 23.71.030, 23.73.009, 23.73.010, 23.73.014, 23.73.024, 23.74.010, 23.76.060, 23.84A.002, 23.84A.048, 23.86.002, 23.86.007, 23.86.012, 23.86.014, 23.86.015, 23.86.016, 23.86.019, 23.91.002, and 25.11.060 of the SMC; adding Sections 23.34.006, 23.44.009, 23.44.011, 23.44.017, 23.44.018, 23.44.019, 23.44.020, 23.45.530, 23.48.050, 23.48.340, 23.48.345, 23.48.445, 23.48.900, 23.48.905, 23.48.920, 23.48.940, and 23.48.945 to the SMC; repealing Sections 23.34.026, 23.43.006, 23.43.008, 23.43.010, 23.43.012, 23.43.040, 23.48.425, 23.48.621, 23.48.721, 23.58A.025, 23.58A.026, 23.58A.028, and 23.71.040 of the SMC; recodifying Section 23.44.018 of the SMC as Section 23.44.021; and amending the titles of Chapter 23.45 and Subchapter IV of Chapter 23.58A of the SMC; all to implement Mandatory Housing Affordability requirements and modify existing development standards to improve livability.

WHEREAS, in September 2014, the City Council adopted Resolution 31546, in which the Council and Mayor proposed that a Seattle Housing Affordability and Livability Agenda
(HALA) Advisory Committee be jointly convened by the Council and the Mayor to
evaluate potential housing strategies; and

WHEREAS, the HALA Advisory Committee provided final recommendations to the Mayor and
City Council on July 13, 2015; and

WHEREAS, the HALA Advisory Committee recommended extensive Citywide upzoning of
residential and commercial zones and, in connection with such upzones, implementation
of a mandatory inclusionary housing requirement for new residential development and
commercial linkage fees for new commercial development; and

WHEREAS, the HALA Advisory Committee recommended that the mandatory inclusionary
housing requirement offer developers the option of building affordable housing or
making a cash contribution to fund preservation and production of affordable housing,
and that the requirement be implemented upon approval of extensive Citywide upzoning
of residential and commercial zones; and

WHEREAS, RCW 36.70A.540 authorizes and encourages cities to enact or expand affordable
housing incentive programs providing for the development of low-income housing units
through development regulations or conditions on rezoning or permit decisions, or both;

and

WHEREAS, according to RCW 36.70A.540, jurisdictions may establish a minimum amount of
affordable housing that must be provided by all residential developments in areas where
increased residential development capacity has been provided; and

WHEREAS, a mandatory housing affordability requirement for residential development is one of
many actions the City intends to undertake to implement the Comprehensive Plan’s goals
and policies for housing affordability; and
WHEREAS, the Countywide Planning Policies provide that jurisdictions may consider a full range of programs, from optional to mandatory, that will assist in meeting the jurisdiction’s share of the countywide need for affordable housing; and

WHEREAS, one of the City’s planning goals under the Growth Management Act, chapter 36.70A RCW, is to make adequate provision for the housing needs of all economic segments of the City; and

WHEREAS, this ordinance would increase development capacity and implement Mandatory Housing Affordability requirements in urban centers and villages as well as existing multifamily and commercial zones in Seattle; and

WHEREAS, increased residential development in the areas in which residential development capacity is being increased by this ordinance will assist in achieving local growth management and housing policies; and

WHEREAS, The City of Seattle has determined that the increased residential development capacity can be achieved within the identified area, subject to consideration of other regulatory controls on development; and

WHEREAS, this ordinance was informed by over two years of public engagement including over 180 meetings, mailings to over 80,000 households, door-to-door canvassing of over 10,000 households, three telephone town halls, a telephone hotline, extensive online dialogue with over 2,000 participants, an email newsletter with a distribution of over 4,700 people, and numerous individual comments and letters; NOW, THEREFORE,

BE IT ORDAINED BY THE CITY OF SEATTLE AS FOLLOWS:

Section 1. The Official Land Use Map, Chapter 23.32 of the Seattle Municipal Code, is amended to rezone properties on pages 2, 3, 4, 5, 6, 7, 8, 9, 12, 13, 14, 15, 16, 17, 18, 19, 21, 22,
A. Properties identified for rezones in Maps 1 through 54 as shown on Attachment 1 to this ordinance are rezoned as shown in those maps.

B. Except for:

- Properties identified to be rezoned in Maps 1 through 54 as shown on Attachment 1 to this ordinance;
- Properties identified as excluded from the rezone in Maps A through AE as shown on Attachment 2 to this ordinance; and
- Properties in zones with a mandatory housing affordability suffix of (M), (M1), or (M2) prior to the effective date of this ordinance;

the Official Land Use Map is amended as follows:

1. All areas designated with a zone shown in Table A for Section 1 are rezoned as shown in Table A for Section 1.

2. Where the existing zoning includes a Major Institution Overlay, the underlying zoning shall be modified as stated in this subsection B and the Major Institution Overlay shall continue to apply.

3. The rezones in this subsection B shall not remove any existing suffixes other than height suffixes.

Section 2. Section 23.30.010 of the Seattle Municipal Code, last amended by Ordinance 125432, is amended as follows:

23.30.010 Classifications for the purpose of this Subtitle III

A. General zoning designations. The zoning classification of land shall include one of the designations in this subsection 23.30.010.A. Only in the case of land designated “RC,” the classification shall include both “RC” and one additional multifamily zone designation in this subsection 23.30.010.A.

B. Suffixes—Height limits, letters, and mandatory housing affordability provisions.

((and incentive provisions.)) The zoning classifications for land subject to some of the designations in subsection 23.30.010.A include one or more numerical suffixes indicating height limit(s) or a range of height limits, or one or more letter suffixes indicating certain overlay districts or designations, ((or numerical suffixes enclosed in parentheses indicating the}
application of incentive zoning provisions, or letter suffixes and letter-with-numerical suffixes enclosed in parentheses indicating the application of mandatory housing affordability provisions, or any combination of these. Mandatory housing affordability suffixes include (M), (M1), and (M2). A letter suffix may be included only in accordance with provisions of this Title 23 expressly providing for the addition of the suffix. A zoning classification that includes a numerical or letter suffix or other combinations denotes a different zone than a zoning classification without any suffix or with additional, fewer, or different suffixes. Except where otherwise specifically stated in this Title 23 or where the context otherwise clearly requires, each reference in this Title 23 to any zoning designation in subsection 23.30.010.A without a suffix, or with fewer than the maximum possible number of suffixes, includes any zoning classifications created by the addition to that designation of one or more suffixes.

Section 3. A new Section 23.34.006 of the Seattle Municipal Code is added to Subchapter I of Chapter 23.34 as follows:

23.34.006 Application of MHA suffixes in Type IV rezones

A. When the Council approves a Type IV amendment to the Official Land Use Map that increases development capacity in an area to which Chapters 23.58B and 23.58C have not previously been applied, the following provisions govern application of Chapters 23.58B and 23.58C to the rezoned area through use of a mandatory housing affordability suffix:

1. If the rezone is to another zone in the same MHA zone category according to Table A for 23.34.006, the new zone should have a (M) suffix.

2. If the rezone is to another zone that is one category higher than the existing zone according to Table A for 23.34.006, the new zone should have a (M1) suffix.
3. If the rezone is to another zone that is two or more categories higher than the existing zone according to Table A for 23.34.006, the new zone should have a (M2) suffix.

</table>

Footnote to Table A for 23.34.006

¹ An increase in development capacity of more than 25 percent, but no more than 50 percent, within Category 5 should be treated as a change of a single category. An increase in development capacity of more than 50 percent within Category 5 should be treated as a change of two categories.

B. When the Council approves a Type IV amendment to the Official Land Use Map in an area to which Chapters 23.58B and 23.58C have previously been applied through the use of a mandatory housing affordability suffix, the suffix for the new zone shall be determined as follows:

1. If the rezone would not increase development capacity or is to another zone in the same MHA zone category according to Table A for 23.34.006, the MHA suffix should not change.

2. If the rezone is to another zone that is one category higher than the existing zone according to Table A for 23.34.006, the new zone should:
   a. Have a (M1) suffix if it currently has an (M) suffix; or
   b. Have a (M2) suffix if it currently has an (M1) or (M2) suffix.

3. If the rezone is to another zone that is two or more categories higher than the existing zone according to Table A for 23.34.006, the new zone should have a (M2) suffix.
Section 4. Section 23.34.008 of the Seattle Municipal Code, last amended by Ordinance 125173, is amended as follows:

**23.34.008 General rezone criteria (**3**)**

* * *

E. Zoning (**Principles**) **principles.** The following zoning principles shall be considered:

1. The impact of more intensive zones on less intensive zones, or industrial and commercial zones on other zones, shall be minimized by the use of transitions or buffers, if possible. A gradual transition between zoning categories, including height limits, is preferred.

2. Physical buffers may provide an effective separation between different uses and intensities of development. The following elements may be considered as buffers:
   a. Natural features such as topographic breaks, lakes, rivers, streams, ravines, and shorelines;
   b. Freeways, expressways, other major traffic arterials, and railroad tracks;
   c. Distinct change in street layout and block orientation;
   d. Open space and greenspaces.

3. Zone (**Boundaries**) **boundaries**
   a. In establishing boundaries, the following elements shall be considered:
      1) Physical buffers as described in subsection (**E2 above**)

23.34.008.E.2; **and**

   2) Platted lot lines.

b. Boundaries between commercial and residential areas shall generally be established so that commercial uses face each other across the street on which they are
located, and face away from adjacent residential areas. An exception may be made when
physical buffers can provide a more effective separation between uses.

4. In general, height limits greater than forty (40) feet should be limited to
urban villages. Height limits greater than forty (40) feet may be considered outside of urban
villages where higher height limits would be consistent with an adopted neighborhood plan, a
major institution’s adopted master plan, or where the designation would be consistent with the
existing built character of the area.)

F. Impact (Evaluation) evaluation. The evaluation of a proposed rezone shall consider
the possible negative and positive impacts on the area proposed for rezone and its
surroundings.

1. Factors to be examined include, but are not limited to, the following:

a. Housing, particularly low-income housing;

b. Public services;

c. Environmental factors, such as noise, air and water quality, terrestrial
   and aquatic flora and fauna, glare, odor, shadows, and energy conservation;

d. Pedestrian safety;

e. Manufacturing activity;

f. Employment activity;

g. Character of areas recognized for architectural or historic value; and

h. Shoreline view, public access, and recreation.

2. Service (Capacities) capacities. Development which can reasonably be
anticipated based on the proposed development potential shall not exceed the service capacities
which can reasonably be anticipated in the area, including:
a. Street access to the area;

b. Street capacity in the area;

c. Transit service;

d. Parking capacity;

e. Utility and sewer capacity; and

f. Shoreline navigation.

G. Changed ((Circumstances)) circumstances. Evidence of changed circumstances shall be taken into consideration in reviewing proposed rezones, but is not required to demonstrate the appropriateness of a proposed rezone. Consideration of changed circumstances shall be limited to elements or conditions included in the criteria for the relevant zone and/or overlay designations in this ((chapter)) Chapter 23.34.

H. Overlay ((Districts)) districts. If the area is located in an overlay district, the purpose and boundaries of the overlay district shall be considered.

I. Critical ((Areas)) areas. If the area is located in or adjacent to a critical area ((SMC)) (Chapter 25.09), the effect of the rezone on the critical area shall be considered.

J. Incentive Provisions. If the area is located in a zone with an incentive zoning suffix a rezone shall be approved only if one of the following conditions are met:

1. The rezone includes incentive zoning provisions that would authorize the provision of affordable housing equal to or greater than the amount of affordable housing authorized by the existing zone; or

2. If the rezone does not include incentive zoning provisions that would authorize the provision of affordable housing equal to or greater than the amount of affordable housing authorized by the existing zone, an adopted City housing policy or comprehensive
plan provision identifies the area as not a priority area for affordable housing, or as having an
adequate existing supply of affordable housing in the immediate vicinity of the area being
rezoned.))

Section 5. Section 23.34.010 of the Seattle Municipal Code, last amended by Ordinance
123816, is amended as follows:

23.34.010 Designation of ((single-family)) SF 5000, SF 7200, and SF 9600 zones

A. Except as provided in ((subsections B or C of Section 23.34.010)) subsection

23.34.010.B, ((single-family zoned)) areas zoned SF 5000, SF 7200, or SF 9600 may be rezoned
to zones more intense than ((Single-family)) SF 5000 only if the City Council determines that the
area does not meet the locational criteria for ((single-family designation)) SF 5000, SF 7200, or
SF 9600 zones.

B. Areas zoned ((single-family or RSL)) SF 5000, SF 7200, or SF 9600 that meet the
locational criteria ((for single-family zoning)) contained in subsection ((B of Section 23.34.011))
23.34.011.B and that are located within the adopted boundaries of an urban village may be
rezoned to zones more intense than ((Single-family)) SF 5000 if all of the following conditions
are met:

1. ((A neighborhood plan has designated the area as appropriate for the zone
designation, including specification of the RSL/T, RSL/C, or RSL/TC suffix, if applicable;)) The
Comprehensive Plan Future Land Use Map designation is a designation other than Single-Family
or, if the Comprehensive Plan Future Land Use Map designation is Single-Family, the rezone is
to RSL; and

2. The rezone is ((i)) to a zone that is subject to the provisions of Chapter 23.58B
and Chapter 23.58C.
(a) To a Residential Small Lot (RSL), Residential Small Lot-Tandem (RSL/T), Residential Small Lot Cottage (RSL/C), Residential Small Lot-Tandem/Cottage (RSL/TC), Lowrise 1 (LR1), Lowrise 1/Residential-Commercial (LR1/RC), or

b. Within the areas identified on Map P-1 of the adopted North Beacon Hill Neighborhood Plan, and the rezone is to any Lowrise zone, or to an NC1 zone or NC2 zone with a 30 foot or 40 foot height limit, or

c. Within the residential urban village west of Martin Luther King Junior Way South in the adopted Rainier Beach Neighborhood Plan, and the rezone is to a Lowrise 1 (LR1) or Lowrise 2 (LR2) zone, or

d. Within an urban village and the Comprehensive Plan Future Land Use Map designation is a designation other than Single Family.

C. Areas zoned single-family within the Northgate Overlay District, established pursuant to Chapter 23.71, that consist of one or more lots and meet the criteria for single-family zoning contained in subsection B of Section 23.34.011 may be rezoned through a contract rezone to a neighborhood commercial zone if the rezone is limited to blocks (defined for the purpose of this subsection C as areas bounded by street lot lines) in which more than 80 percent of that block is already designated as a neighborhood commercial zone.)

Section 6. Section 23.34.011 of the Seattle Municipal Code, last amended by Ordinance 122190, is amended as follows:
23.34.011 **(Single-family) SF 5000, SF 7200, and SF 9600 zones, function, and locational criteria**

A. Function. An area that provides predominantly detached single-family structures on lot sizes compatible with the existing pattern of development and the character of single-family neighborhoods.

B. Locational **(Criteria) criteria.** A **(single-family) SF 5000, SF 7200, or SF 9600 zone designation is most appropriate in areas** **(meeting)** that are outside of urban centers and villages and meet the following criteria:

1. Areas that consist of blocks with at least **(seventy (70))** 70 percent of the existing structures, not including detached accessory dwelling units, in single-family residential use; or

2. Areas that are designated by an adopted neighborhood plan as appropriate for single-family residential use; or

3. Areas that consist of blocks with less than **(seventy (70))** 70 percent of the existing structures, not including detached accessory dwelling units, in single-family residential use but in which an increasing trend toward single-family residential use can be demonstrated; for example:

   a. The construction of single-family structures, not including detached accessory dwelling units, in the last five **(5)** years has been increasing proportionately to the total number of constructions for new uses in the area, or

   b. The area shows an increasing number of improvements and rehabilitation efforts to single-family structures, not including detached accessory dwelling units, or
c. The number of existing single-family structures, not including detached accessory dwelling units, has been very stable or increasing in the last five ((5)) years, or

d. The area’s location is topographically and environmentally suitable for single-family residential developments.

C. An area that meets at least one ((1)) of the locational criteria in subsection ((B) above) 23.34.011.B should also satisfy the following size criteria in order to be designated as a single-family SF 5000, SF 7200, or SF 9600 zone:

1. The area proposed for rezone should comprise ((fifteen (15))) 15 contiguous acres or more, or should abut ((an)) existing ((single-family)) SF 5000, SF 7200, or SF 9600 zones.

2. If the area proposed for rezone contains less than ((fifteen (15))) 15 contiguous acres, and does not abut ((an)) existing ((single-family)) SF 5000, SF 7200, or SF 9600 zones, then it should demonstrate strong or stable single-family residential use trends or potentials such as:

   a. That the construction of single-family structures, not including detached accessory dwelling units, in the last five ((5)) years has been increasing proportionately to the total number of constructions for new uses in the area, or

   b. That the number of existing single-family structures, not including detached accessory dwelling units, has been very stable or increasing in the last five ((5)) years, or

   c. That the area’s location is topographically and environmentally suitable for single-family structures, or
d. That the area shows an increasing number of improvements or rehabilitation efforts to single-family structures, not including detached accessory dwelling units.

D. Half-blocks at the edges of single-family SF 5000, SF 7200, or SF 9600 zones which have more than 50 percent single-family structures, not including detached accessory dwelling units, or portions of blocks on an arterial which have a majority of single-family structures, not including detached accessory dwelling units, shall generally be included. This shall be decided on a case-by-case basis, but the policy is to favor including them.

Section 7. Section 23.34.012 of the Seattle Municipal Code, enacted by Ordinance 117430, is amended as follows:

23.34.012 Residential Small Lot (RSL) zone, function and locational criteria

A. Function. An area within an urban village that provides for the development of homes on small lots that may be appropriate and affordable to households with children and other households which might otherwise choose existing detached houses on larger lots.

B. Locational criteria. An RSL zone shall be appropriate only under circumstances as provided in Section 23.34.010 B. is most appropriate in areas generally characterized by the following:

1. The area is similar in character to single-family zones;

2. The area is located inside an urban center, urban village, or Station Area Overlay District where it would provide opportunities for a diversity of housing types within these denser environments;

3. The area is characterized by, or appropriate for, a mix of single-family dwelling units, multifamily structures that are similar in scale to single-family dwelling units,
such as duplex, triplex, rowhouse, and townhouse developments, and single-family dwelling units that have been converted to multifamily residential use or are well-suited to conversion;

4. The area is characterized by local access and circulation that can accommodate low density development oriented to the ground level and the street, and/or by narrow roadways, lack of alleys, and/or irregular street patterns that make local access and circulation less suitable for higher density multifamily development;

5. The area is within a reasonable distance of high frequency transit access, but is not close enough to make higher density multifamily development more appropriate.

6. The area would provide a gradual transition between single-family zoned areas and multifamily or neighborhood commercial zoned areas; and

7. The area is supported by existing or projected facilities and services used by residents, including retail sales and services, parks, and community centers.

Section 8. Section 23.34.024 of the Seattle Municipal Code, last amended by Ordinance 123209, is amended as follows:

23.34.024 Midrise (MR) zone, function, and locational criteria (1)

A. Function. An area that provides concentrations of housing in desirable, pedestrian-oriented urban neighborhoods having convenient access to regional transit stations, where the mix of activity provides convenient access to a full range of residential services and amenities, and opportunities for people to live within walking distance of employment.

B. Locational (Criteria) criteria

1. Threshold (Conditions) conditions. Subject to subsection 23.34.024.B.2. (of this section,)) properties that may be considered for a Midrise designation are limited to the following:
a. Properties already zoned Midrise;

b. Properties in areas already developed predominantly to the intensity permitted by the Midrise zone; or

c. Properties within an urban center or urban village, (where a neighborhood plan adopted or amended by the City Council after January 1, 1995 indicates that the area is appropriate for a Midrise zone designation.)

2. Environmentally (Critical Areas) critical areas. Except as stated in this subsection 23.34.024.B.2, properties designated as environmentally critical may not be rezoned to a Midrise designation, and may remain Midrise only in areas predominantly developed to the intensity of the Midrise zone. The preceding sentence does not apply if the environmentally critical area either:

   a. Was created by human activity, or

   b. Is a designated peat settlement; liquefaction, seismic; or volcanic hazard; flood-prone area; or abandoned landfill.

3. Other (Criteria) criteria. The Midrise zone designation is most appropriate in areas generally characterized by the following:

   a. Properties that are adjacent to business and commercial areas with comparable height and bulk;

   b. Properties in areas that are served by major arterials and where transit service is good to excellent and street capacity could absorb the traffic generated by midrise development;

   c. Properties in areas that are in close proximity to major employment centers;
d. Properties in areas that are in close proximity to open space and recreational facilities;
e. Properties in areas along arterials where topographic changes either provide an edge or permit a transition in scale with surroundings;
f. Properties in flat areas where the prevailing structure height is greater than 37 feet or where due to a mix of heights, there is no established height pattern;
g. Properties in areas with moderate slopes and views oblique or parallel to the slope where the height and bulk of existing structures have already limited or blocked views from within the multifamily area and upland areas;
h. Properties in areas with steep slopes and views perpendicular to the slope where upland developments are of sufficient distance or height to retain their views over the area designated for the Midrise zone; and
i. Properties in areas where topographic conditions allow the bulk of the structure to be obscured. Generally, these are steep slopes, 16 percent or more, with views perpendicular to the slope.

Section 9. Section 23.34.026 of the Seattle Municipal Code, last amended by Ordinance 117430, is repealed:

((23.34.026 Midrise/85' (MR/85') zone, function and locational criteria.))

A. The Midrise/85' (MR/85') is most appropriate in areas generally characterized by the criteria described for a rezone to Midrise in Section 23.34.024.

B. In addition, the following shall apply to designate an MR zone as Midrise/85':

1. A neighborhood plan adopted by the City Council shall have designated the area as suitable for Midrise zoning with an eighty-five (85) foot height limit; and

Template last revised December 1, 2016
2. A height of eighty-five (85) feet could be accommodated without significantly blocking views; and

3. The development permitted by the zone would not exceed the service capacities which exist in the area, including transit service, parking, and sewers; and

4. A gradual transition in height and scale and level of activity between zones is provided unless major physical edges are present. These edges may be the following:
   a. Natural features such as topographic breaks, water bodies and ravines,
   b. Freeways, expressways, and other major traffic arterials, and railroad tracks,
   c. Street grid and block orientation, or
   d. Significant open space and greenspaces.

Section 10. Chapter 23.43 of the Seattle Municipal Code, last amended by Ordinance 124592, is repealed:

Chapter 23.43 RESIDENTIAL SMALL LOT

23.43.006 Residential Small Lot zone, principal uses permitted outright

The following principal uses are permitted outright in the Residential Small Lot (RSL) zone:

A. Single-family Dwelling Unit on One Lot. The designation RSL without a suffix shall indicate that a detached single-family dwelling unit on one lot is the only residential structure type allowed in the zone.

B. Tandem Houses, pursuant to a neighborhood plan adopted or amended by the City Council after January 1, 1995. The designation RSL/T shall indicate that in addition to detached single-family dwelling units on individual lots, tandem houses are allowed in the zone.
C. Cottage Housing Developments, pursuant to a neighborhood plan adopted or amended by the City Council after January 1, 1995. The designation RSL/C shall indicate that in addition to detached single-family dwelling units on individual lots, cottage housing developments are allowed in the zone.

D. The designation RSL/TC shall indicate that in addition to detached single-family dwelling units on individual lots, tandem houses and cottage housing developments are allowed in the zone.

E. Parks and open space, and community gardens.

23.43.008 Development standards for one dwelling unit per lot

A. Lot Area. Minimum lot area for one (1) detached dwelling unit shall be two thousand five hundred (2,500) square feet.

B. Height Limit and Roof Pitch. The basic height limit shall be twenty-five (25) feet. The ridge of pitched roofs with a minimum slope of four to twelve (4:12) may extend above the height limit to thirty (30) feet. All parts of the roof above twenty-five (25) feet shall be pitched.

C. Structure Depth. The depth of any structure shall not exceed sixty (60) feet. Decks, balconies, and bay windows shall be excluded from measurement for the purposes of this provision.

D. Yards and setbacks

1. Front and rear yards

   a. The sum of the front yard plus the rear yard shall be a minimum of 30 feet.

   b. In no case shall either yard have a depth of less than 10 feet.
e. If recommended in a neighborhood plan adopted or amended by the City Council after January 1, 1995, an ordinance designating an area as RSL may require front and/or rear yards greater than 10 feet, provided that the requirement of subsection 23.43.008.D.1.a shall not be increased or decreased, and the requirement of subsection 23.43.008.D.1.b shall not be reduced.

2. Side setbacks. The required minimum side setback is 5 feet. The side setback may be averaged. No portion of the side setback shall be less than 3 feet, except as follows:

- a. Street-side setbacks shall be a minimum of 5 feet.
- b. If an easement is provided along a side lot line of the abutting lot sufficient to leave a 10 foot separation between the two principal structures of the two lots, the required side setback may be reduced from the requirement of subsection 23.43.008.D.2. The easement shall be recorded with the King County Department of Records and Elections. The easement shall provide access for normal maintenance activities to the principal structure on the lot with less than the required side setback. No principal structure shall be located in the easement area, except that the eaves of a principal structure may project a maximum of 18 inches into the easement area. No portion of any structure, including eaves, shall cross the property line.

3. Exceptions from standard yard and setback requirements. The following parts of structures may project into a required yard or setback, provided that the applicable restrictions in subsections 23.43.008.D.3 and 23.43.008.D.4 are met:

- a. Uncovered porches or steps. Uncovered, unenclosed porches or uncovered, unenclosed steps that project into a required yard or setback, if the porch or steps are no higher than 4 feet on average above existing grade, are no closer than 3 feet to any side lot
line, no wider than 6 feet, and project no more than 6 feet into a required front or rear yard. The
heights of porches and steps are to be calculated separately.

b. Certain features of a structure

1) External architectural features with no living area, such as chimneys, eaves, cornices and columns, that project no more than 18 inches into a required yard or setback.

2) Bay windows that are no wider than 8 feet and project no more than 2 feet into a required front or rear yard or street side setback.

3) Other external architectural features that include interior space such as garden windows, and project no more than 18 inches into a required yard or setback, starting a minimum of 30 inches above the height of a finished floor, and with maximum dimensions of 6 feet in height and 8 feet in width.

c. A structure may be permitted to extend into front and rear yards as necessary to protect exceptional trees and trees over 2 feet in diameter pursuant to Section 25.11.060.

d. Above-grade green stormwater infrastructure (GSI) features are allowed without yard or setback restrictions if:

1) Each above-grade GSI feature is less than 4.5 feet tall, excluding piping;

2) Each above-grade GSI feature is less than 4 feet wide; and

3) The total storage capacity of all above-grade GSI features is no greater than 600 gallons.
e. Above-grade GSI features larger than what is allowed in subsection 23.43.008.D.3.d are allowed within a required yard or setback if:

1) Above-grade GSI features do not exceed 10 percent coverage of any one yard or setback area;

2) No portion of an above-grade GSI feature is located closer than 2.5 feet from a side lot line; and

3) No portion of an above-grade GSI feature projects more than 5 feet into a front or rear setback area.

4. Limit on features on a façade. The combined area of features that project into a required yard or setback pursuant to subsection 23.43.008.D.3.b may not exceed 30 percent of the area of the façade on which the features are located.

E. Parking.

1. One (1) parking space per dwelling unit shall be required as provided for single-family structures in Chapter 23.54, Quantity and Design Standards for Access and Off-street Parking.

2. Access. Access to parking shall be from the alley when the property abuts a platted alley improved to the standards of subsection C of Section 23.53.030, Alley improvements in all zones, or when the Director determines that alley access is feasible and desirable to mitigate parking access impacts.

3. Location.

a. Parking shall be located on the same lot as the principal structure.

b. Parking may be in or under a structure, or outside a structure, provided that:
(1) Parking shall not be located in the front yard;
(2) Parking shall not be located in a side setback abutting a street or in the first ten (10) feet of a rear yard abutting a street.

23.43.010 Tandem housing

A. Density and Minimum Lot Area.

1. The maximum density shall be one (1) dwelling unit per two thousand five hundred (2,500) square feet of lot area.

2. A maximum of two (2) residential structures may be located on a lot used for tandem houses.

3. The minimum lot area for tandem houses shall be five thousand (5,000) square feet.

4. Accessory dwelling units shall not be permitted on a lot containing tandem houses.

B. Height Limit and Roof Pitch.

1. The basic height limit for new principal structures shall be eighteen (18) feet. Existing structures may remain and be expanded, provided that new portions of the structure shall not exceed the height limits of this subsection.

2. The ridge of pitched roofs with a minimum slope of six to twelve (6:12) may extend up to twenty-eight (28) feet. The ridge of pitched roofs with a minimum slope of four to twelve (4:12) may extend up to twenty-three (23) feet. All parts of the roof above eighteen (18) feet shall be pitched at the required slope.

C. Yards and setbacks

1. Front Yard. The front yard is required to be a minimum of 10 feet.
2. Interior Separation between Tandem Houses. The interior separation between the residential structures is required to be a minimum of 10 feet.

3. Rear Yard. Where no platted alley exists, the rear yard for a lot containing tandem houses shall be a minimum of 10 feet. Where a platted developed alley exists, this rear yard requirement does not apply.

4. Total Combined Yards. The total of the front yard, rear yard (if any), and the interior separation is required to be a minimum of 35 feet.

5. Modification of Front and Rear Yards. If recommended in a neighborhood plan adopted or amended by the City Council after January 1, 1995, an ordinance designating an area as RSL may require front and/or rear yard setbacks greater than 10 feet (except for rear yards where platted and developed alleys exist), subject to the provisions of subsections 23.43.010.C.1, C.2, C.3, and C.4, and provided that the required total combined yards does not exceed 35 feet.

6. Side Setbacks. The required minimum side setback is 5 feet. The side setback may be averaged. No portion of the side setback shall be less than 3 feet, except as follows:

   a. Street side setbacks is required to be a minimum of 5 feet.

   b. If an easement is provided along a side lot line of the abutting lot sufficient to leave a 10 foot separation between the two principal structures of the two lots, the required side setback may be reduced from the requirement of Section 23.43.010.C.6. The easement shall be recorded with the King County Department of Records and Elections. The easement shall provide access for normal maintenance activities on the principal structure on the lot with less than the required side setback. No principal structure shall be located in the easement area, except that eaves of a principal structure may project a maximum of 18 inches into the easement area. No portion of any structure, including eaves shall cross the property line.
7. Exceptions from standard yard, setback and interior separation requirements.

For all developments, only structures that comply with the following may project into a required yard, setback or interior separation:

a. Uncovered porches or steps. Uncovered, unenclosed porches or uncovered, unenclosed steps that project into a required yard or setback, if the porch or steps are no higher than 4 feet on average above existing grade, no closer than 3 feet to any side lot line, no wider than 6 feet, and project no more than 6 feet into a required front or rear yard, and no more than 3 feet into the interior separation between residential structures. The heights of porches and steps are to be calculated separately.

b. Certain features of a structure

1) External architectural features with no living area such as chimneys, eaves, cornices and columns, that project no more than 18 inches into a required yard, setback or interior separation between residential structures;

2) Bay windows that are no wider than 8 feet in width and project no more than 2 feet into a required front or rear yard or street side setback;

3) Other external architectural features that include interior space such as garden windows, and project no more than 18 inches into a required yard, setback, or interior separation between residential structures starting a minimum of 30 inches above the height of a finished floor, and with maximum dimensions of 6 feet in height and 8 feet in width;

4) The combined area of features that project into a required yard, setback or interior separation between residential structures pursuant to subsection 23.43.010. C.7.b may comprise no more than 30 percent of the area of the facade on which the features are located.
e. A structure may be permitted to extend into front and rear yards as necessary to protect exceptional trees and trees over 2 feet in diameter pursuant to Section 25.11.060.

d. Above-grade green stormwater infrastructure (GSI) features are allowed without yard, setback, or interior separation restrictions if:

1) Each above-grade GSI feature is less than 4.5 feet tall, excluding piping;

2) Each above-grade GSI feature is less than 4 feet wide; and

3) The total storage capacity of all above-grade GSI features is no greater than 600 gallons.

e. Above-grade GSI features larger than what is allowed in subsection 23.43.010.C.7.d are allowed within a required yard, setback, or interior separation if:

1) Above-grade GSI features do not exceed 10 percent coverage of any one yard, setback, or interior separation area;

2) No portion of an above-grade GSI feature is located closer than 2.5 feet from a side lot line; and

3) No portion of an above-grade GSI feature projects more than 5 feet into a front or rear setback area.

D. Lot Coverage. The maximum lot coverage shall be fifty (50) percent, subject to the exceptions noted in Section 23.44.010 D.

E. Parking.

1. One (1) parking space per dwelling unit shall be required, as provided for single-family structures in Chapter 23.54.
2. Access. Access to parking shall be from the alley when the property abuts a platted alley improved to the standards of subsection C of Section 23.53.030, Alley improvements in all zones, or when the Director determines that alley access is feasible and desirable to mitigate parking access impacts.

3. Location.
   a. Parking shall be located on the same lot as the tandem houses.
   b. Parking may be in or under a structure, or outside a structure, provided that:
      (1) Parking shall not be located in the front yard;
      (2) Parking shall not be located in a side setback abutting a street or the first ten (10) feet of a rear yard abutting a street.

F. Pedestrian Access to Public Right-of-way. There shall be an area of no less than ten (10) feet in width between each dwelling unit and a street or platted and developed alley. This access may be a driveway and/or cross any required yards.

23.43.012 Cottage Housing Developments (CHDs)

A. Accessory dwelling units shall not be permitted in cottage housing developments.

B. Density and Minimum Lot Area.

1. In cottage housing developments (CHDs), the permitted density shall be one (1) dwelling unit per one thousand six hundred (1,600) square feet of lot area.

2. Cottage housing developments shall contain a minimum of four (4) cottages arranged on at least two (2) sides of a common open space, with a maximum of twelve (12) cottages per development.
3. The minimum lot area for a cottage housing development shall be six thousand four hundred (6,400) square feet.

4. On a lot to be used for a cottage housing development, existing detached single-family residential structures, which may be nonconforming with respect to the standards of this section, shall be permitted to remain, but the extent of the nonconformity may not be increased.

C. Height Limit and Roof Pitch.

1. The height limit permitted for structures in cottage housing developments shall be eighteen (18) feet.

2. The ridge of pitched roofs with a minimum slope of six to twelve (6:12) may extend up to twenty-eight (28) feet. The ridge of pitched roofs with a minimum slope of four to twelve (4:12) may extend up to twenty-three (23) feet. All parts of the roof above eighteen (18) feet shall be pitched.

D. Lot Coverage and Floor Area.

1. The maximum lot coverage permitted for principal and accessory structures in cottage housing developments shall not exceed forty (40) percent.

2. The lot coverage for an individual principal structure in a cottage housing development shall not exceed six hundred fifty (650) square feet.

3. The total floor area of each cottage shall not exceed either 1.5 times the area of the main level or nine hundred seventy-five (975) square feet, whichever is less. Enclosed space in a cottage located either above the main level and more than twelve (12) feet above finished grade, or below the main level, shall be limited to no more than fifty (50) percent of the enclosed space of the main level, or three hundred seventy-five (375) square feet, whichever is less. This
restriction applies regardless of whether a floor is proposed in the enclosed space, but shall not apply to attic or crawl spaces.

E. Yards and setbacks

1. Front Setback. The minimum front setback for cottage housing developments is an average of 10 feet, and at no point shall it be less than 5 feet.

2. Rear Yards. The rear yard for a cottage housing development shall be 10 feet.

3. Side Yards. The side yard for a cottage housing development shall be 5 feet. If there is a principal entrance along a side facade, the side yard shall be no less than 10 feet along that side for the length of the pedestrian route. This 10 foot side yard requirement applies only to a height of 8 feet above the access route.

4. Interior Separation. A minimum separation of 6 feet is required between principal structures. Facades of principal structures facing facades of accessory structures shall be separated by a minimum of 3 feet. If there is a principal entrance on an interior facade of either or both of the facing facades, the minimum separation shall be 10 feet.

5. Exceptions from standard yard, setback and interior separation requirements.

For all developments, only structures that comply with the following may project into a required yard, setback or interior separation:

a. Uncovered porches or steps. Uncovered, unenclosed porches or uncovered, unenclosed steps that project into a required front setback, a side or a rear yard, if the porch or steps are no higher than 4 feet on average above existing grade, no closer than 3 feet to any side lot line, no wider than 6 feet, and project no more than 6 feet into a required front setback or rear yard. The heights of porches and steps are to be calculated separately. If an interior separation of 10 feet is required pursuant to subsection 23.43.012.E.4, uncovered,
unenclosed steps no higher than 4 feet on average above existing grade may project up to 3 feet into the interior separation. If an interior separation of 6 feet or less is required, porches and steps may not project into the interior separation.

b. Certain features of a structure

1) External architectural features with no living area such as chimneys, eaves, cornices and columns, that project no more than 18 inches into a required yard or into a required interior separation between structures;

2) Bay windows that are no wider than 8 feet and project no more than 2 feet into a required front setback or rear yard;

3) Other external architectural features that include interior space such as garden windows, and project no more than 18 inches into a required front setback or rear yard, starting a minimum of 30 inches above the height of a finished floor, and with maximum dimensions of 6 feet in height and 8 feet in width;

4) The combined area of features that project into a required yard or interior separation pursuant to subsection 23.43.012.E.5.b may comprise no more than 30 percent of the area of the facade on which the features are located.

e. A structure may be permitted to extend into front setbacks and rear yards as necessary to protect exceptional trees and trees over 2 feet in diameter pursuant to Section 25.11.060.

d. Above-grade green stormwater infrastructure (GSI) features are allowed without yard, setback, or interior separation restrictions if:

1) Each above-grade GSI feature is less than 4.5 feet tall;

excluding piping;
2) Each above-grade GSI feature is less than 4 feet wide; and
3) The total storage capacity of all above-grade GSI features is no
greater than 600 gallons.

e. Above-grade GSI features larger than what is allowed in subsection
23.43.012.E.5.d are allowed within a required yard, setback, or interior separation if:
1) Above-grade GSI features do not exceed 10 percent coverage of
any one yard, setback, or interior separation area;
2) No portion of an above-grade GSI feature is located closer than
2.5 feet from a side lot line; and
3) No portion of an above-grade GSI feature projects more than 5
feet into a front or rear setback area.

F. Required Open Space:

1. Quantity of Open Space. A minimum of four hundred (400) square feet per unit
of landscaped open space is required. This quantity shall be allotted as follows:
   a. A minimum of two hundred (200) square feet per unit shall be private
   usable open space; and

   b. A minimum of one hundred fifty (150) square feet per dwelling unit
   shall be provided as common open space.

2. Development Standards.

   a. Private usable open space shall be provided at ground level in one (1)
   contiguous parcel with a minimum area of two hundred (200) square feet. No horizontal
   dimension of the open space shall be less than ten (10) feet.
b. Required common open space shall be provided at ground level in one
   (1) contiguous parcel with a minimum area of one hundred fifty (150) square feet per unit. Each
cottage shall abut the common open space, and the common open space shall have cottages
abutting at least two (2) sides.

e. The minimum horizontal dimension for open space shall be ten (10)
   feet.

G. Parking

1. One (1) parking space per dwelling unit shall be required, as provided in
   Chapter 23.54.

2. Access. Access to parking shall be from the alley when property abuts a platted
   alley improved to the standards of subsection C of Section 23.53.030 or when the Director
determines that alley access is feasible and desirable to mitigate parking access impacts.

3. Location.
   a. Parking shall be on the same lot as the cottage housing development.
   b. Parking may be in or under a structure, or outside a structure, provided
      that:
      (1) The parking is screened from direct street view by one (1) or
      more street facing facades, by garage doors, or by a fence and landscaping as provided in
      subsection D of Section 23.45.018.
      (2) Parking outside a structure may not be located between
      cottages.
      (3) Parking may not be located in the front yard.
(4) Parking may be located between any structure and the rear lot line of the lot, or between any structure and a side lot line which is not a street-side lot line.

23.43.040 Accessory uses and structures

A. Accessory structures shall be permitted in the RSL zone under the following conditions:

1. New garages are subject to the yard and setback requirements of subsection 23.43.008.D when accessory to one detached structure per lot, of subsection 23.43.010.C when accessory to tandem houses, and of subsection 23.43.040.E when accessory to cottage housing.

2. When converted to principal use in tandem house developments, garages are subject to the development standards for tandem house principal structures.

3. Garages are limited to a height of 12 feet as measured on the facade containing the entrance for the vehicle.

4. Accessory structures other than garages are limited to 12 feet in height.

B. Solar Collectors and Solariums. Solar collectors are permitted outright as an accessory use to any principal use. Exceptions to certain development standards in this Chapter 23.43 are allowed for solar collectors and solariums, as set forth in this subsection 23.43.040.B, subject to the following standards:

1. Solar collectors, including solar greenhouses, that meet minimum standards and maximum size limits as determined by the Director shall not be counted in lot coverage.

2. Solar collectors, except solar greenhouses attached to principal structures, may exceed the height limits of the RSL zone by 4 feet or extend 4 feet above the ridge of a pitched roof. However, the total height from existing grade to the top of the solar collector may not extend more than 9 feet above the height limit established for the zone. A solar collector which
exceeds the basic height limit for the zone shall be placed so as not to shade an existing solar collector or property to the north on January 21st, at noon, any more than would a structure built to the maximum permitted height and bulk.

3. Solar collectors and solar greenhouses meeting minimum written energy conservation standards administered by the Director may be located in required yards according to the following conditions:
   a. In a side yard, no closer than 3 feet from the side lot line; or
   b. In a rear yard, no closer than 15 feet from the rear lot line unless the rear lot line abuts an alley, in which case the solar collector shall be at least 10 feet from the centerline of the alley.

4. In a front yard, solar greenhouses meeting minimum written energy conservation standards administered by the Director and solariums, in each case that are integrated with the principal structure and have a maximum height of 12 feet, may extend up to 6 feet into the front yard, but no closer than 5 feet from the lot line.

C. Home Occupations. Home occupations are regulated by Section 23.42.050.

D. Common Structures in Cottage Housing Developments. Shared structures that are used by the occupants of more than one dwelling unit are allowed. Such structures may include meeting space, a food preparation area, sinks, and toilets, but shall not include either sleeping quarters or bathing facilities.

E. Urban farms are regulated by Section 23.42.051. Urban farms with not more than 4,000 square feet of planting area are permitted outright as an accessory use to any principal use that is permitted outright or allowed by conditional use permit. Urban farms with more than 4,000 square feet in planting area may be allowed by conditional use permit as an accessory use
to any principal use that is permitted outright or allowed by conditional use permit. The Director may grant, condition, or deny a conditional use permit for an urban farm in accordance with the provisions in Section 23.42.051 and Section 23.42.042.

F. Transitional encampments accessory use. Transitional encampments accessory to religious facilities or to principal uses located on property owned or controlled by a religious organization are regulated by Section 23.42.054.)

Section 11. Section 23.44.002 of the Seattle Municipal Code, last amended by Ordinance 120928, is amended as follows:

23.44.002 ((Applicability)) Scope of provisions (i)

((This chapter details those authorized uses and their development standards which are or may be permitted in the three (3) single-family residential zones: SF 9600, SF 7200 and SF 5000. Communication utilities and accessory communication devices except as exempted in Section 23.57.002 are subject to the regulations in this chapter and additional regulations in Chapter 23.57.))

A. This Chapter 23.44 establishes regulations for the following single-family zones: RSL, SF 5000, SF 7200, and SF 9600 zones.

B. Some land in these zones may be regulated by Subtitle III, Division 3, Overlay Districts, of this Title 23 in addition to the standards of this Chapter 23.44.

C. Other regulations, including but not limited to general use provisions (Chapter 23.42); requirements for streets, alleys, and easements (Chapter 23.53); standards for parking quantity, access, and design (Chapter 23.54); standards for solid waste storage (Chapter 23.54); sign regulations (Chapter 23.55); communication regulations (Chapter 23.57); and methods for measurements (Chapter 23.86) may apply to development proposals.
Section 12. Section 23.44.006 of the Seattle Municipal Code, last amended by Ordinance 124105, is amended as follows:

23.44.006 Principal uses permitted outright

The following principal uses are permitted outright in single-family zones:

A. Single-family dwelling unit. (One single-family dwelling unit per lot, except that an accessory dwelling unit may also be approved pursuant to Section 23.44.041, and except as approved as part of an administrative conditional use permit under Section 25.09.260;)

B. In RSL zones, carriage houses, cottage housing development, rowhouse development, and townhouse developments;

C. In RSL zones, apartments containing three dwelling units or less;

D. Floating homes, subject to the requirements of Chapter 23.60A;

E. Parks and open space, and community gardens;

F. Existing railroad right-of-way;

G. Public schools meeting development standards, (In all single-family zones, new) New public schools or additions to existing public schools, and accessory uses including child care centers, subject to the special development standards and departures from standards contained in Chapter 23.51B, except that departures from development standards may be permitted or required pursuant to procedures and criteria established in Chapter 23.79;

H. Uses in existing or former public schools:

1. Child care centers, public or private schools, educational and vocational training for the disabled, adult evening education classes, nonprofit libraries, community
centers, community programs for the elderly, or similar uses, in each case in existing or former public schools.

2. Other non-school uses in existing or former public schools, if permitted pursuant to procedures established in Chapter 23.78.

3. Additions to existing public schools only when the proposed use of the addition is a public school;

(G) I. Nursing homes. Nursing homes meeting the development standards of this Chapter 23.44, and limited to eight or fewer residents;

(H) J. Adult family homes. Adult family homes, as defined and licensed by the state of Washington;

(4) K. Commercially operating horse farms in existence before July 1, 2000, on lots greater than ten acres, conforming to the limits on the number and location of farm animals and structures containing them set forth in Section 23.42.052.

Section 13. Subsection 23.44.008.I of the Seattle Municipal Code, which section was last amended by Ordinance 124105, is amended as follows:

23.44.008 Development standards for uses permitted outright

* * *

(I. Tree Requirements.

1. Trees are required when single-family dwelling units are constructed. The minimum number of caliper inches of tree required per lot may be met by using either the tree preservation option or tree planting option described in subsections 23.44.008.I.1.a. or 1.1.b., or by a combination of preservation and planting. This requirement may be met by planting or
preserving street trees in the public right-of-way. Submerged land shall not be included in
calculating lot area for purposes of either the tree preservation option or tree planting option.

a. Tree Preservation Option. For lots over 3,000 square feet, at least 2
caliper inches of existing tree per 1,000 square feet of lot area must be preserved. On lots that
are 3,000 square feet or smaller, at least 3 caliper inches of existing tree must be preserved per
lot. When this option is used, a tree preservation plan is required.

b. Tree Planting Option. For lots over 3,000 square feet, at least 2 caliper
inches of tree per 1,000 square feet of lot area must be planted. On lots that are 3,000 square
feet or smaller, at least 3 caliper inches of tree must be planted per lot.

2. Tree Measurements. Trees planted to meet the requirements in subsection
23.44.008.I.1 shall be at least 1.5 inches in diameter. The diameter of new trees shall be
measured (in caliper inches) 6 inches above the ground. Existing trees shall be measured 4.5
feet above the ground. When an existing tree is 3 to 10 inches in diameter, each 1 inch counts
as 1 inch toward meeting the tree requirements in subsection 23.44.008.I.1. When an existing
tree is more than 10 inches in diameter, each 1 inch of the tree that is over 10 inches shall
count as 3 inches toward meeting the tree requirement.

3. Tree Preservation Plans. If the tree preservation option is chosen, a tree
preservation plan must be submitted and approved. Tree preservation plans shall provide for
protection of trees during construction according to standards promulgated by the Director.

Section 14. A new Section 23.44.009 of the Seattle Municipal Code is added as follows:

23.44.009 Mandatory Housing Affordability in RSL zones

RSL zones that have a mandatory housing affordability suffix are subject to the provisions of
Chapters 23.58B and 23.58C.
Section 15. Section 23.44.010 of the Seattle Municipal Code, last amended by Ordinance 125272, is amended as follows:

23.44.010 ((Lot requirements)) Minimum lot area and lot coverage

A. Minimum lot area. The minimum lot area in single-family zones shall be as provided in Table A for 23.44.010:

<table>
<thead>
<tr>
<th>Zone</th>
<th>Minimum lot area required</th>
</tr>
</thead>
<tbody>
<tr>
<td>SF 9600</td>
<td>9,600 square feet ((sq. ft.))</td>
</tr>
<tr>
<td>SF 7200</td>
<td>7,200 ((sq. ft.)) square feet</td>
</tr>
<tr>
<td>SF 5000</td>
<td>5,000 ((sq. ft.)) square feet</td>
</tr>
<tr>
<td>RSL</td>
<td>No minimum lot area¹</td>
</tr>
</tbody>
</table>

Footnote to Table A for 23.44.010
¹ In RSL zones, there is no minimum lot area; however, the maximum number of dwelling units on a lot is limited by the density limits in subsection 23.44.017.B.

Submerged lands shall not be counted in calculating the area of lots for the purpose of these minimum lot area requirements, or the exceptions to minimum lot area requirements provided in this Section 23.44.010. A parcel that does not meet the minimum lot area requirements or exceptions of this Section 23.44.010, and that is in common ownership with an abutting lot when the abutting lot is the subject of any permit application, shall be included as a part of the abutting lot for purposes of the permit application.

B. Exceptions to minimum lot area requirements. The following exceptions to minimum lot area requirements are allowed in SF 5000, SF 7200, and SF 9600 zones, subject to the requirements in subsection 23.44.010.B.2, and further subject to the requirements in subsection 23.44.010.B.3 for any lot less than 3,200 square feet in area:
1. A lot that does not satisfy the minimum lot area requirements of its zone may be developed or redeveloped under one of the following circumstances:

   a. “The Seventy-Five/Eighty Rule.” The Seventy-Five/Eighty Rule exception may be applied to allow separate development of lots already in existence in their current configuration, or new lots resulting from a full subdivision, short subdivision, or lot boundary adjustment. In order to qualify for this exception, the lot must have an area at least 75 percent of the minimum required for the zone and also at least 80 percent of the mean area of the lots within the same block front, subject to the following provisions:

   1) To be counted as a separate lot for the purposes of calculating the mean area of the lots on a block front, a lot must be entirely within a single-family zone, and must be currently developed as a separate building site or else currently qualify for separate development based on facts in existence as of the date a building permit, full or short subdivision, or lot boundary adjustment application is filed with the Department. The existence of structures or portions of structures on the property that is the subject of the application may be disregarded when the application indicates the structures or portions of structures will be demolished. In cases where this exception is applied for the purpose of a lot boundary adjustment, the calculation shall be based on the existing lots as they are configured before the adjustment.

   2) To be counted as a separate lot for the purposes of calculating the mean area of the lots on a block front, a lot must have at least 10 feet of frontage on the street the calculation is applied to.

   3) Lots developed with institutional uses, parks, or nonconforming (nonresidential) uses may be excluded from the calculation.
There must, however, be at least one lot on the block front used for the calculation other than
the property that is the subject of the platting, lot boundary adjustment, or building permit
application that this exception is being applied to.

4) If property is to be subdivided or its lot lines are modified by a
lot boundary adjustment that increases the number of lots that qualify for separate
development, the property subject to the subdivision, or the lots modified by the lot boundary
adjustment, shall be excluded from the block front mean area calculation.

5) For purposes of this subsection 23.44.010.B.1.a, if the platting
pattern is irregular, the Director will determine which lots are included within a block front.

6) If an existing or proposed lot has frontage on more than one
street, the lot may qualify for this exception based on the calculation being applied to any
street on which the lot has at least 30 feet of frontage. If a proposed lot has frontage on
multiple streets but does not have 30 feet of frontage on any street, the exception may be
applied based on the calculation along the street on which the lot has the most frontage,
provided the lot has at least 10 feet of frontage on that street. If the lot has less than 30 feet of
frontage on any one street but equal frontage on multiple streets, the rule may be applied based
on the calculation along any one of the streets, provided the lot has at least 10 feet of frontage
on that street.

7) New lots created pursuant to subsection 23.44.010.B.1.a shall
comply with the following standards:

a) For a lot that is subdivided or short platted, the
configuration requirements of subsections 23.22.100.C.3 and 23.24.040.A.8 or with the
modification provisions of subsections 23.22.100.D and 23.24.040.B, as applicable; or
b) For an existing lot that is reconfigured under the provisions of Chapter 23.28, the configuration requirements of subsection 23.28.030.A.3 or with the modification provisions of subsection 23.28.030.A.4.

b. The lot area deficit is the result of a dedication or sale of a portion of the lot to the City or state for street or highway purposes, payment was received for only that portion of the lot, and the lot area remaining is at least 2,500 square feet.

c. The lot would qualify as a legal building site under subsection 23.44.010.B but for a reduction in the lot area due to court-ordered adverse possession, and the amount by which the lot was so reduced was less than ten percent of the former area of the lot. This exception does not apply to lots reduced to less than 2,500 square feet.

d. (Historic Lot Exception) The historic lot exception may be applied to allow separate development of lots already in existence if the lot has an area of at least 2,500 square feet, and was established as a separate building site in the public records of the county or City prior to July 24, 1957, by deed, platting, or building permit. The qualifying lot shall be subject to the following provisions:

1) A lot is considered to have been established as a separate building site by deed if the lot was held under separate ownership from all abutting lots for at least one year after the date the recorded deed transferred ownership.

2) If two contiguous lots have been held in common ownership at any time after January 18, 1987, and a principal structure extends onto or over both lots, neither lot qualifies for the exception. If the principal structure does not extend onto or over both lots, but both lots were required to meet development standards other than parking requirements in effect at the time the structure was built or expanded, neither lot qualifies for
the exception unless the vacant lot is not needed to meet current development standards other
than parking requirements. If the combined property fronts on multiple streets, the orientation
of the principal structure shall not be considered when determining if it could have been built
to the same configuration without using the vacant lot or lots as part of the principal structure’s
building site.

3) Lots that do not otherwise qualify for this exception cannot
qualify as a result of all or part of a principal structure being removed or destroyed by fire or
act of nature that occurred on or after January 18, 1987. Lots may, however, qualify as a result
of removing from the principal structure minor features that do not contain enclosed interior
space, including but not limited to eaves and unenclosed decks.

4) If parking for an existing principal structure on one lot has
been provided on an abutting lot and parking is required under Chapter 23.54 the required
parking for the existing house shall be relocated onto the same lot as the existing principal
structure in order for either lot to qualify for the exception.

e. The lot is within a clustered housing planned development pursuant to
Section 23.44.024, a planned residential development pursuant to Section 23.44.034, or a
development approved as an environmentally critical areas conditional use pursuant to Section
25.09.260.

f. If a lot qualifies for an exception to the lot area requirement under
subsection 23.44.010.B.1.a, 23.44.010.B.1.b, 23.44.010.B.1.c, 23.44.010.B.1.d, or
23.44.010.B.1.e, the boundaries between that lot and contiguous lots on the same block face
that also qualify for separate development may be adjusted through the lot boundary
adjustment process if the adjustment maintains the existing lot areas, increases the area of a
qualifying substandard lot without reducing another lot below the minimum permitted lot area,

or causes the areas of the lots to become more equal provided the number of parcels qualifying

for separate development is not increased. ((Lots resulting from a lot boundary adjustment that
do not meet the minimum lot area requirement must qualify for an exception to that
requirement.))

2. Limitations

a. Development may occur on a substandard lot containing a riparian
corridor, a wetland and wetland buffer, or a steep slope and steep slope buffer pursuant to the
provisions of Chapter 25.09 ((Regulations for environmentally critical areas)) or containing
priority freshwater habitat or priority saltwater habitat described in Section 23.60A.160, only if
one of the following conditions ((apply)) applies:

1) The substandard lot is not held in common ownership with an
abutting lot or lots at any time after October 31, 1992, or

2) The substandard lot is held in common ownership with an
abutting lot or lots, or has been held in common ownership at any time after October 31, 1992,
if proposed and future development will not intrude into the environmentally critical area or
buffer or priority freshwater habitat or priority saltwater habitat described in Section
23.60A.160.

b. Lots on totally submerged lands do not qualify for any minimum lot
area exceptions.

3. Special exception review for lots less than 3,200 square feet in area. A special
exception Type II review as provided for in Section 23.76.004 is required for separate
development of any lot with an area less than 3,200 square feet that qualifies for any lot area
exception in subsection 23.44.010.B.1. The special exception application shall be subject to the following provisions:

a. The depth of any structure on the lot shall not exceed two times the width of the lot. If a side yard easement is provided according to subsection (23.44.014.D.3), the portion of the easement within 5 feet of the structure on the lot qualifying under this provision subsection 23.44.010.B.3 may be treated as a part of that lot solely for the purpose of determining the lot width for purposes of complying with this subsection 23.44.010.B.3.a.

b. Windows in a proposed principal structure facing an existing abutting lot that is developed with a house shall be placed in manner that takes into consideration the interior privacy in abutting houses, provided that this provision subsection 23.44.010.B.3.b shall not prohibit placing a window in any room of the proposed house.

c. In approving a special exception review, additional conditions may be imposed that address window placement to address interior privacy of existing abutting houses.

C. Maximum lot coverage

1. The maximum lot coverage permitted for principal and accessory structures is as provided in Table B for 23.44.010.1 (ε):

<table>
<thead>
<tr>
<th>Zone</th>
<th>Lot size</th>
<th>Maximum lot coverage</th>
</tr>
</thead>
<tbody>
<tr>
<td>SF 5000, SF 7200,</td>
<td>Less than 5,000 square feet ((sq. ft.))</td>
<td>1,000 ((sq. ft.)) square feet plus 15 percent of lot area</td>
</tr>
<tr>
<td>and SF 9600</td>
<td>5,000 ((sq. ft.)) square feet or more</td>
<td>35 percent of lot area</td>
</tr>
<tr>
<td>RSL</td>
<td>All lots</td>
<td>50 percent of lot area</td>
</tr>
</tbody>
</table>

2. For purposes of computing maximum lot coverage, only those portions of a lot that measure at least 10 feet in all directions shall be included in lot coverage calculations,
except for portions of a lot that are used for access or that are granted a waiver under subsections 23.22.100.D, 23.24.040.B, or 23.28.030.A.4 for the purpose of providing access.

D. Lot coverage exceptions

1. Lots abutting alleys. For purposes of computing the lot coverage only:
   a. The area of a lot with an alley or alleys abutting any lot line may be increased by one-half of the width of the abutting alley or alleys.
   b. The total lot area for any lot may not be increased by the provisions of this Section 23.44.010 by more than ten percent.

2. Special structures and portions of structures. The following structures and portions of structures are not counted in lot coverage calculations:
   a. Access bridges ((\(access\) bridges))
      1) Uncovered, unenclosed pedestrian bridges 5 feet or less in width and of any height necessary for access,
      2) Uncovered, unenclosed vehicular bridges no wider than 12 feet for access to one parking space or 18 feet for access to two parking spaces and of any height necessary for access;
   b. Barrier-free access. Ramps or other access for the disabled or elderly that comply with Washington State Building Code, Chapter 11;
   c. Decks. Decks or parts of a deck that are 36 inches or less above existing grade;
   d. Freestanding structures and bulkheads. Fences, freestanding walls, bulkheads, signs, and other similar structures;
e. Underground structures. An underground structure, or underground portion of a structure;

f. Eaves and gutters. The first 36 inches of eaves and gutters that project from principal and accessory structures;

g. Solar collectors and swimming pools. Solar collectors that comply with Section 23.44.046 and swimming pools that comply with Section 23.44.044.

Section 16. A new Section 23.44.011 of the Seattle Municipal Code is added as follows:

23.44.011 Floor area in RSL zones

A. Gross floor area. In RSL zones, gross floor area includes exterior corridors, breezeways, and stairways that provide building circulation and access to dwelling units or sleeping rooms. Balconies, patios, and decks that are associated with a single dwelling unit or sleeping room and that are not used for common circulation, and ground-level walking paths, are not considered gross floor area.

B. Floor area ratio (FAR) limits. The FAR limit in RSL zones is 0.75. The applicable FAR limit applies to the total chargeable floor area of all structures on the lot.

C. The following floor area is exempt from FAR limits:

1. All stories, or portions of stories, that are underground.

2. All portions of a story that extend no more than 4 feet above existing or finished grade, whichever is lower, excluding access.

3. Fifty percent of floor area contained in structures built prior to January 1, 1982, as single-family dwelling units that will remain in residential use, regardless of the number of dwelling units within the existing structure, provided the exemption is limited to the gross square footage in the single-family dwelling unit as of January 1, 1982.
Section 17. Section 23.44.012 of the Seattle Municipal Code, last amended by Ordinance 125272, is amended as follows:

23.44.012 Height limits

A. Maximum height established. The provisions of this Section 23.44.012 apply in single-family zones, except as provided elsewhere in the Land Use Code for specific types of structures or structures in particular locations.

1. Except as provided in subsections 23.44.012.A.2 and 23.44.012.A.3, the maximum permitted height for any structure not located in a required yard is 30 feet.

2. In SF 5000, SF 7200, and SF 9600 zones, the maximum permitted height for any structure on a lot 30 feet or less in width is 25 feet.

3. In SF 5000, SF 7200, and SF 9600 zones, for a lot or unit lot of any width, if the area of the largest rectangle or other quadrilateral that can be drawn within the lot lines of the lot or unit lot is less than 3,200 square feet, the maximum permitted height for any structure on that lot shall be 18 feet. Additional height shall be allowed, subject to the limit that would otherwise apply under subsections 23.44.012.A.1 and 23.44.012.A.2, provided that the elevation at the top of the exterior walls of the structure, exclusive of pitched roofs, does not exceed the average of the elevations at the tops of the walls of single-family residences on abutting lots within the same zone. The limit of this subsection 23.44.012.A.3 shall not apply to additions to single-family residences existing as of February 1, 2013, that do not exceed the greater of 1,000 square feet of new gross floor area or the amount of gross floor area on any one floor of the existing house.

(4. The method of determining structure height and lot width is detailed in Chapter 23.86, Measurements.)
Section 18. Section 23.44.014 of the Seattle Municipal Code, last amended by Ordinance 125272, is amended as follows:

**23.44.014 Yards and separations**

**A. General**

1. Yards are required for every lot in a (SF) single-family zone. (A yard that is larger than the minimum size may be provided.)

2. In the case of a through lot, each yard abutting a street, except a side yard, shall be a front yard. Rear yard provisions shall not apply to the through lot, except pursuant to Section 23.40.030 or 23.40.035.

3. Setbacks from a street may be required in order to meet the provisions of Section 23.53.015.

4. Setbacks from access easements may also be required for principal structures according to the standards in subsections 23.53.025.C.2 and 23.53.025.D.6.

**B. Required yards for single-family zones are shown in Table A for 23.44.014.**

<table>
<thead>
<tr>

**((A. Front Yards.**

1. The front yard depth shall be either the average of the front yards of the single-family structures on either side or 20 feet, whichever is less.

2. On any lot where the natural gradient or slope, as measured from the front line of the lot for a distance of 60 feet or the full depth of the lot, whichever is less, is in excess of 35 percent, the required front yard depth shall be either 20 feet less one foot for each one percent of gradient or slope in excess of 35 percent, or the average of the front yards on either side, whichever is less.

3. In the case of a through lot, each yard abutting a street, except a side yard, shall be a front yard. Rear yard provisions shall not apply to the lot, except pursuant to Section 23.40.030 or 23.40.035.

4. A larger yard may be required in order to meet the provisions of Section 23.53.015, Improvement requirements for existing streets in residential and commercial zones.

**B. Rear Yards.** The rear yard shall be twenty-five (25) feet.

The minimum required rear yard for a lot having a depth of less than one hundred twenty-five (125) feet shall be twenty (20) percent of the lot depth and in no case less than ten (10) feet.
When the required rear yard abuts upon an alley along a lot line, the centerline of the
alley between the side lot lines extended shall be assumed to be a lot line for purposes of the
provision of rear yard and the determination of lot depth; provided, that at no point shall the
principal structure be closer than five (5) feet to the alley.

When a lot in any single-family zone abuts at the rear lot line upon a public park,
playground or open water, not less than fifty (50) feet in width, the rear yard need not exceed
the depth of twenty (20) feet.

C. Side yards. The side yard shall be 5 feet except as follows:

1. In the case of a reversed corner lot, the key lot of which is in a single-family
zone, the width of the side yard on the street side of the reversed corner lot shall not be less
than 10 feet; or

2. If any side street lot line is a continuation of the front lot line of an abutting
single-family zoned lot, whether or not separated by an alley, the width of the street side yard
shall not be less than 10 feet.}

((D)) C. Exceptions from standard yard requirements. No structure shall be placed in a
required yard except ((pursuant to the following)) as follows:

1. Garages. Garages may be located in required yard subject to the standards of
Section 23.44.016.

2. Certain ((Accessory Structures)) accessory structures in ((Side)) side and
((Rear Yards.)) rear yards

   a. Except for detached accessory dwelling units, any accessory structure
that complies with the requirements of Section 23.44.040 may be constructed in a side yard
that abuts the rear or side yard of another lot, or in that portion of the rear yard of a reversed

corner lot within 5 feet of the key lot and not abutting the front yard of the key lot, upon
recording with the King County (Department of Records and Elections) Recorder’s Office an
agreement to this effect between the owners of record of the abutting properties.

b. Except for detached accessory dwelling units, any detached accessory
structure that complies with the requirements of Section 23.44.040 may be located in a rear
yard, provided that on a reversed corner lot, no accessory structure shall be located in that
portion of the required rear yard that abuts the required front yard of the adjoining key lot, nor
shall the accessory structure be located closer than 5 feet from the key lot’s side lot line unless
the provisions of subsections (23.44.014.D.2.a) 23.44.014.C.2.a or 23.44.016.D.9 apply.

3. A (single-family) principal residential structure may extend into one side
yard if an easement is provided along the side or rear lot line of the abutting lot, sufficient to
leave a (10-foot) 10-foot separation between that structure and any principal structure on the
abutting lot. The (10-foot) 10-foot separation shall be measured from the wall of the principal
structure that is proposed to extend into a side yard to the wall of the principal structure on the
abutting lot.

a. No structure or portion of a structure may be built on either lot within
the (10-foot) 10-foot separation, except as provided in this (section) Section 23.44.014.

b. Accessory structures and features of and projections from principal
structures, such as porches, eaves, and chimneys are permitted in the (10-foot) 10-foot
separation area required by this subsection 23.44.014.C.3 if otherwise allowed in side yards by
this subsection (23.44.014.D) 23.44.014.C. For purposes of calculating the distance a
structure or feature may project into the (10-foot) 10-foot separation, assume the property line
is 5 feet from the wall of the principal structure proposed to extend into a side yard and
c. No portion of any structure, including any projection, shall cross the property line.
d. The easement shall be recorded with the King County Recorder’s Office. The easement shall provide access for normal maintenance activities to the principal structure on the lot with less than the required 5-foot side yard.

4. Certain additions. Certain additions to a single-family structure may extend into a required yard if the existing single-family structure is already nonconforming with respect to that yard. The presently nonconforming portion must be at least 60 percent of the total width of the respective facade of the structure prior to the addition. The line formed by the existing nonconforming wall of the structure is the limit to which any additions may be built, except as described in subsections 23.44.014.C.4.a through 23.44.014.C.4.e. Additions may extend up to the height limit and may include basement additions. New additions to the nonconforming wall or walls shall comply with the following requirements (Exhibit A for 23.44.014):

a. Side yard. If the addition is a side wall, the existing wall line may be continued by the addition except that in no case shall the addition be closer than 3 feet to the side lot line;

b. Rear yard. If the addition is a rear wall, the existing wall line may be continued by the addition except that in no case shall the addition be closer than 20 feet to the rear lot line or centerline of an alley abutting the rear lot line;
c. Front yard. If the addition is a front wall, the existing wall line may be continued by the addition except that in no case shall the addition be closer than 15 feet to the front lot line;

d. If the nonconforming wall of the single-family structure is not parallel or is otherwise irregular, relative to the lot line, then the Director shall determine the limit of the wall extension, except that the wall extension shall not be located closer than specified in subsections 23.44.014.D.4.a, b, and c.

e. Roof eaves, gutters, and chimneys on such additions may extend an additional 18 inches into a required yard, but in no case shall such features be closer than 2 feet to the side lot line.
Exhibit A for 23.44.014
Additions into yards for existing single-family structures

5. Uncovered porches or steps. Uncovered, unenclosed porches, or steps may project into any required yard, if they are no higher than 4 feet above existing grade, no closer than 3 feet to any side lot line, no wider than 6 feet, and if they project no more than 6 feet into required front or rear yards. The widths of porches and steps are to be calculated separately.

6. Certain features of a structure. Unless otherwise provided elsewhere in this Chapter 23.44, certain features of a principal or accessory structure, except for accessory dwelling units, may extend into required yards if they comply with the following:

   a. External architectural details with no living area, such as chimneys, eaves, cornices, and columns, may project no more than 18 inches into any required yard;
b. Bay windows are limited to 8 feet in width and may project no more than 2 feet into a required front, rear, and street side yard;

c. Other projections that include interior space, such as garden windows, may extend no more than 18 inches into any required yard, starting a minimum of 30 inches above finished floor, and with maximum dimensions of 6 feet in height and 8 feet in width;

d. The combined area of features permitted by subsections (23.44.014.D.6.b and 23.44.014.D.6.e) 23.44.014.C.6.b and 23.44.014.C.6.c may comprise no more than 30 percent of the area of the facade.

7. Covered (Unenclosed Decks and Roofs Over Patios) unenclosed decks and roofs over patios. Covered, unenclosed decks and roofs over patios, if attached to a principal structure, may extend into the required rear yard, but shall not be within 12 feet of the centerline of any alley, or within 12 feet of any rear lot line that is not an alley lot line, or closer to any side lot line in the required rear yard than the side yard requirement of the principal structure along that side, or closer than 5 feet to any accessory structure. The height of the roof over unenclosed decks and patios shall not exceed 12 feet. The roof over such decks or patios shall not be used as a deck.

8. Access bridges. Uncovered, unenclosed access bridges are permitted as follows:

a. Pedestrian bridges 5 feet or less in width, and of any height necessary for access, are permitted in required yards, except that in side yards an access bridge must be at least 3 feet from any side lot line.

b. A driveway access bridge is permitted in the required yard abutting the street if necessary for access to parking. The vehicular access bridge shall be no wider than
12 feet for access to one parking space or 18 feet for access to two or more parking spaces and of any height necessary for access. The driveway access bridge may not be located closer than 5 feet to an adjacent property line.

9. Barrier-free **access**. Access facilities for the disabled and elderly that comply with Washington State Building Code, Chapter 11 are permitted in any required yard.

10. Freestanding **structures and bulkheads**

   a. Fences, freestanding walls, bulkheads, signs, and similar structures 6 feet or less in height above existing or finished grade, whichever is lower, may be erected in any required yard. The **6-foot** height may be averaged along sloping grade for each **6-foot**-long segment of the fence, but in no case may any portion of the fence exceed 8 feet. Architectural features may be added to the top of the fence or freestanding wall above the **6-foot** height if the features comply with the following: horizontal architectural feature(s), no more than 10 inches high, and separated by a minimum of 6 inches of open area, measured vertically from the top of the fence, are permitted if the overall height of all parts of the structure, including post caps, is no more than 8 feet. Averaging the **8-foot** height is not permitted. Structural supports for the horizontal architectural feature(s) may be spaced no closer than 3 feet on center.

   b. The Director may allow variation from the development standards listed in subsection **23.44.014.D.10.a** according to the following:

      1) No part of the structure may exceed 8 feet; and

      2) Any portion of the structure above 6 feet shall be predominately open, such that there is free circulation of light and air.
c. Bulkheads and retaining walls used to raise grade may be placed in any required yard when limited to 6 feet in height, measured above existing grade. A guardrail no higher than 42 inches may be placed on top of a bulkhead or retaining wall existing as of February 20, 1982. If a fence is placed on top of a new bulkhead or retaining wall, the maximum combined height is limited to 9 1/2 feet.

d. Bulkheads and retaining walls used to protect a cut into existing grade may not exceed the minimum height necessary to support the cut or 6 feet, whichever is greater. If the bulkhead is measured from the low side and it exceeds 6 feet, an open guardrail of no more than 42 inches meeting Building Code requirements may be placed on top of the bulkhead or retaining wall. A fence must be set back a minimum of 3 feet from such a bulkhead or retaining wall.

e. If located in shoreline setbacks or in view corridors in the Shoreline District as regulated in Chapter 23.60A, structures shall not obscure views protected by Chapter 23.60A, and the Director shall determine the permitted height.

11. Decks in \((Yards)\) yards. Decks no higher than 18 inches above existing or finished grade, whichever is lower, may extend into required yards.

12. Mechanical equipment. Heat pumps and similar mechanical equipment, not including incinerators, are permitted in required yards if they comply with the requirements of Chapter 25.08 \((\text{Noise Control})\). Any heat pump or similar equipment shall not be located within 3 feet of any lot line. Charging devices for electric cars are considered mechanical equipment and are permitted in required yards if not located within 3 feet of any lot line.

13. Solar \((\text{Collectors})\) collectors. Solar collectors may be located in required yards, subject to the provisions of Section 23.44.046.
14. Front (Yard Projections for Structures on Lots 30 Feet or Less in Width)

Yard projections for structures on lots 30 feet or less in width. For a structure on a lot in an SF 5000, SF 7200, or SF 9600 zone that is 30 feet or less in width, portions of the front facade that begin 8 feet or more above finished grade may project up to 4 feet into the required front yard, provided that no portion of the facade, including eaves and gutters, shall be closer than 5 feet to the front lot line (Exhibit B for 23.44.014), and provided further that no portion of the facade of an existing structure that is less than 8 feet or more above finished grade already projects into the required front yard.
Exhibit B for 23.44.014
Front yard projections permitted for structures on lots 30 feet or less in width
15. Front and rear yards may be reduced by 25 percent, but no more than 5 feet, if the site contains a required environmentally critical area buffer or other area of the property that cannot be disturbed pursuant to subsection ((A of Section 25.09.280)) 25.09.280.A.

16. Arbors. Arbors may be permitted in required yards under the following conditions:

   a. In any required yard, an arbor may be erected with no more than a 40 square foot footprint, measured on a horizontal roof plane inclusive of eaves, to a maximum height of 8 feet. Both the sides and the roof of the arbor shall be at least 50 percent open, or if latticework is used, there shall be a minimum opening of 2 inches between crosspieces.

   b. In each required yard abutting a street, an arbor over a private pedestrian walkway with no more than a 30 square foot footprint, measured on the horizontal roof plane and inclusive of eaves, may be erected to a maximum height of 8 feet. The sides of the arbor shall be at least 50 percent open, or if latticework is used, there shall be a minimum opening of 2 inches between crosspieces.

17. Stormwater management

   a. Above-grade green stormwater infrastructure (GSI) features are allowed without yard restrictions if:

      1) Each above-grade GSI feature is less than 4.5 feet tall, excluding piping;

      2) Each above-grade GSI feature is less than 4 feet wide; and

      3) The total storage capacity of all above-grade GSI features is no greater than 600 gallons.
b. Above-grade GSI features larger than what is allowed in subsection (23.44.014.D.17.a) are allowed within a required yard if:

1) Above-grade GSI features do not exceed ten percent coverage of any one yard area;

2) No portion of an above-grade GSI feature is located closer than 3 feet from a side lot line;

3) No portion of an above-grade GSI feature is located closer than 20 feet from a rear lot line or centerline of an alley abutting the rear lot line; and

4) No portion of an above-grade GSI feature is located closer than 15 feet from the front lot line.

(18. If the side yard of a lot borders on an alley, a single-family structure may be located in the required side yard, provided that no portion of the structure may cross the side lot line.

49)) 18. A structure may be permitted to extend into front and rear yards as necessary to protect exceptional trees and trees over 2 feet in diameter pursuant to Section 25.11.060.

((E)) D. Additional standards for structures if allowed in required yards. Structures in required yards shall comply with the following:

1. Accessory structures, attached garages, and portions of a principal structure shall not exceed a maximum combined coverage of 40 percent of the required rear yard. In the case of a rear yard abutting an alley, rear yard coverage shall be calculated from the centerline of the alley.
2. Any accessory structure located in a required yard shall be separated from its principal structure by a minimum of 5 feet. This requirement does not apply to terraced garages that comply with ((Section 23.44.016.D.9.b)) subsection 23.44.016.C.9.b.

3. Except for detached accessory dwelling units in subsection 23.44.041.B, any accessory structure located in a required yard shall not exceed either 12 feet in height or 1,000 square feet in area.

(F. Setback standards from access easements. Setbacks are required for principal structures according to the standards in subsection 23.53.025.C.2 and 23.53.025.D.6.)

E. Separations between multiple structures in RSL zones

1. In RSL zones, the minimum required separation between principal structures is 10 feet, except for principal structures separated by a driveway or parking aisle.

2. If principal structures are separated by a driveway or parking aisle, the minimum required separation between the principal structures is 2 feet greater than the required width of the driveway or parking aisle, provided that the separation is not required to be any greater than 24 feet. If principal structures are separated by a driveway or parking aisle, projections that enclose floor area may extend a maximum of 3 feet into the required separation if they are at least 8 feet above finished grade.

3. Uncovered porches or steps, features of a structure listed in subsection 23.44.014.C.6, and decks shall be allowed in the separation between principal structures provided they:

   a. Comply with the standards of subsections 23.44.014.C.5, 23.44.014.C.6, and 23.44.014.C.11 if the separation were treated like a yard; and

   b. Project no more than 3 feet into the separation area.
Exhibit 23.44.014A
Permitted Additions into Required Yards for Existing Single-family Residences

((Exhibit 23.44.014A))
Exhibit 23.44.014 B
Front Yard Projections Permitted For Structures
On Lots Thirty Feet Or Less In Width

((Exhibit B for 23.44.014
Front yard projections permitted for structures on lots thirty feet or less in width.))
Section 19. Section 23.44.016 of the Seattle Municipal Code, last amended by Ordinance 125272, is amended as follows:

**23.44.016 Parking and garages**

A. Parking (Quantity) Off-street parking is required pursuant to Section 23.54.015.

B. Access to parking

1. Vehicular access to parking from an improved street, alley, or easement is required if parking is required pursuant to Section 23.54.015.

2. Access to parking is permitted through a required yard abutting a street only if the Director determines that one of the following conditions exists:

   a. There is no alley improved to the standards of subsection 23.53.030.C, and there is no unimproved alley in common usage that currently provides access to parking on the lot or to parking on adjacent lots in the same block; or

   b. Existing topography does not permit alley access; or

   c. At least 50 percent of alley frontage abuts property in a non-residential zone; or

   d. The alley is used for loading or unloading by an existing non-residential use; or

   e. Due to the relationship of the alley to the street system, use of the alley for parking access would create a significant safety hazard; or

   f. Parking access must be from the street in order to provide access to a parking space that complies with the Washington State Building Code, Chapter 11; or
g. Providing alley access would require removal of a tree on private property that is an exceptional tree or a tree greater than 2 feet in diameter measured 4.5 feet above the ground, provided that a permanent covenant meeting the standard in subsection 25.11.050.C is recorded and all other applicable criteria for tree protection in Chapter 25.11 are met.

C. Location of parking

1. Parking shall be located on the same lot as the principal use, except as provided in this subsection 23.44.016.C.

2. Parking on planting strips is prohibited.

3. For lots developed with one single-family dwelling, no more than three vehicles may be parked outdoors on any lot.

4. Parking accessory to a floating home may be located on another lot if within 600 feet of the lot on which the floating home is located. The accessory parking shall be screened and landscaped according to subsection (23.44.016.G) 23.44.016.H.

5. Parking accessory to a single-family structure existing on June 11, 1982, may be established on another lot if all the following conditions are met:

   a. There is no vehicular access to permissible parking areas on the lot.

   b. Any garage constructed is for no more than two two-axle, or two up to four-wheeled vehicles.

   c. Parking is screened or landscaped as required by the Director, who shall consider development patterns of the block or nearby blocks.

   d. The lot providing the parking is within the same block or across the alley from the principal use lot.
e. The accessory parking shall be tied to the lot of the principal use by a covenant or other document recorded with the King County Recorder’s Office.

D. Parking and garages in required yards

1. Parking and garages shall not be located in the required front yard except as provided in subsections 23.44.016.D.7, 23.44.016.D.9, 23.44.016.D.10, 23.44.016.D.11, and 23.44.016.D.12.

2. Parking and garages shall not be located in a required side yard abutting a street or the first 10 feet of a required rear yard abutting a street except as provided in subsections 23.44.016.D.7, 23.44.016.D.9, 23.44.016.D.10, 23.44.016.D.11, and 23.44.016.D.12.

3. Garages shall not be located in a required side yard that abuts the rear or side yard of another lot or in that portion of the rear yard of a reversed corner lot within 5 feet of the key lot’s side lot line unless:

   a. The garage is a detached garage located entirely in that portion of a side yard that is either within 35 feet of the centerline of an alley or within 25 feet of any rear lot line that is not an alley lot line; or

   b. An agreement between the owners of record of the abutting properties, authorizing the garage in that location, is executed and recorded, pursuant to subsection ((23.44.014.D.2.a)) 23.44.014.C.2.a.

4. Detached garages with vehicular access facing an alley shall not be located within 12 feet of the centerline of the alley except as provided in subsections 23.44.016.D.9, 23.44.016.D.10, 23.44.016.D.11, and 23.44.016.D.12.
5. Attached garages shall not be located within 12 feet of the centerline of any alley, nor within 12 feet of any rear lot line that is not an alley lot line, except as provided in subsections 23.44.016.D.9, 23.44.016.D.10, 23.44.016.D.11, and 23.44.016.D.12.

6. On a reversed corner lot, no garage shall be located in that portion of the required rear yard that abuts the required front yard of the adjoining key lot unless the provisions of subsection 23.44.016.D.9 apply.

7. If access to required parking passes through a required yard, automobiles, motorcycles, and similar vehicles may be parked on the open access located in a required yard.

8. Trailers, boats, recreational vehicles, and similar equipment shall not be parked in required front and side yards or the first 10 feet of a rear yard measured from the rear lot line.

9. Lots with uphill yards abutting streets. In SF 5000, SF 7200, and SF 9600 zones, parking for one two-axle or one up to four-wheeled vehicle may be established in a required yard abutting a street according to subsection 23.44.016.D.9.a or 23.44.016.D.9.b only if access to parking is permitted through that yard pursuant to subsection 23.44.016.B.

   a. Open parking space

      1) The existing grade of the lot slopes upward from the street lot line an average of at least 6 feet above sidewalk grade at a line that is 10 feet from the street lot line; and

      2) The parking area shall be at least an average of 6 feet below the existing grade prior to excavation and/or construction at a line that is 10 feet from the street lot line; and
3) The parking space shall be no wider than 10 feet for one parking space at the parking surface and no wider than 20 feet for two parking spaces if permitted as provided in subsection 23.44.016.D.12.

b. Terraced garage

1) The height of a terraced garage is limited to no more than 2 feet above existing or finished grade, whichever is lower, for the portions of the garage that are 10 feet or more from the street lot line. The ridge of a pitched roof on a terraced garage may extend up to 3 feet above this (2-foot) 2-foot height limit. All parts of the roof above the (2-foot) 2-foot height limit shall be pitched at a rate of not less than 4:12. No portion of a shed roof shall be permitted to extend beyond the (2-foot) 2-foot height limit of this provision.

Portions of a terraced garage that are less than 10 feet from the street lot line shall comply with the height standards in subsection 23.44.016.E.2;

2) The width of a terraced garage structure shall not exceed 14 feet for one two-axle or one up to four-wheeled vehicle, or 24 feet if permitted to have two two-axle or two up to four-wheeled vehicles as provided in subsection 23.44.016.D.12;

3) All above ground portions of the terraced garage shall be included in lot coverage; and

4) The roof of the terraced garage may be used as a deck and shall be considered to be a part of the garage structure even if it is a separate structure on top of the garage.

10. Lots with downhill yards abutting streets. In SF 5000, SF 7200, and SF 9600 zones, parking, either open or enclosed in an attached or detached garage, for one
two-axle or one up to four-wheeled vehicle may be located in a required yard abutting a street if the following conditions are met:

a. The existing grade slopes downward from the street lot line that the parking faces;

b. For front yard parking, the lot has a vertical drop of at least 20 feet in the first 60 feet, measured along a line from the midpoint of the front lot line to the midpoint of the rear lot line;

c. Parking is not permitted in required side yards abutting a street;

d. Parking in a rear yard complies with subsections 23.44.016.D.2, 23.44.016.D.5 and 23.44.016.D.6; and

e. Access to parking is permitted through the required yard abutting the street by subsection 23.44.016.B.

11. Through lots. On through lots less than 125 feet in depth in SF 5000, SF 7200, and SF 9600 zones, parking, either open or enclosed in an attached or detached garage, for one two-axle or one up to four-wheeled vehicle may be located in one of the required front yards. The front yard in which the parking may be located shall be determined by the Director based on the location of other garages or parking areas on the block. If no pattern of parking location can be determined, the Director shall determine in which yard the parking shall be located based on the prevailing character and setback patterns of the block.

12. Lots with uphill yards abutting streets or downhill or through lot front yards fronting on streets that prohibit parking. In SF 5000, SF 7200, and SF 9600 zones, parking for two two-axle or two up to four-wheeled vehicles may be located in uphill yards abutting streets or downhill or through lot front yards as provided in subsections...
23.44.016.D.9, 23.44.016.D.10, or 23.44.016.D.11 if, in consultation with the Seattle
Department of Transportation, it is found that uninterrupted parking for 24 hours is prohibited
on at least one side of the street within 200 feet of the lot line over which access is proposed.
The Director may authorize a curb cut wider than would be permitted under Section 23.54.030
if necessary for access.

E. Standards for garages if allowed in required yards. Garages that are either detached
structures or portions of a principal structure for the primary purpose of enclosing a two-axle
or four-wheeled vehicle may be permitted in required yards according to the following
conditions:

1. Maximum coverage and size
   a. Garages, together with any other accessory structures and other
      portions of the principal structure, are limited to a maximum combined coverage of 40 percent
      of the required rear yard. In the case of a rear yard abutting an alley, rear yard coverage shall
      be calculated from the centerline of the alley.
   b. Garages located in side or rear yards shall not exceed 1,000 square
      feet in area.
   c. In front yards, the area of garages is limited to 300 square feet with
      14-foot maximum width if one space is provided, and 600 square feet with 24-foot maximum
      width if two spaces are provided. Access driveway bridges permitted under subsection
      ((23.44.014.D.8.B)) 23.44.014.C.8.b shall not be included in this calculation.

2. Height limits
   a. Garages are limited to 12 feet in height measured on the facade

containing the entrance for the vehicle.
b. The ridge of a pitched roof on a garage located in a required yard may extend up to 3 feet above the 12-foot height limit. All parts of the roof above the height limit shall be pitched at a rate of not less than 4:12. No portion of a shed roof is permitted to extend beyond the 12-foot height limit (under this provision).

c. Open rails around balconies or decks located on the roofs of garages may exceed the 12-foot height limit by a maximum of 3 feet. The roof over a garage shall not be used as a balcony or deck in rear yards.

3. Separations. Any detached garage located in a required yard, including projecting eaves and gutters, shall be separated from a principal structure by a minimum of 5 feet including eaves and gutters of all structures. This requirement does not apply to terraced garages that comply with subsection 23.44.016.D.9.b.

4. Roof eaves and gutters of a garage located in a required yard may extend a maximum of 18 inches from the exterior wall of the garage. Such roof eaves and gutters are excluded from the maximum coverage and size limits of subsection 23.44.016.E.1.

5. Except for terraced garages that comply with (Section) subsection 23.44.016.D.9.b, the roof over a garage in a rear yard shall not be used as a balcony or deck.

F. Appearance of garage entrances in SF 5000, SF 7200, and SF 9600 zones. In SF 5000, SF 7200, and SF 9600 zones, the following provisions apply:

1. Garage setback. No portion of a garage, whether attached to a principal structure or within a detached accessory structure, may be closer to the street lot line than 80 percent of the remaining non-garage, street-level facade (see Exhibit A for 23.44.016) of the principal structure to which the garage is accessory. If the entire street-level facade of either a
principal or accessory structure is garage, no portion of the garage may be closer to the street lot line than 80 percent of the facade of the story above the street-level facade.

Exhibit A for 23.44.016
Garage setback

Exhibit A for 23.44.016
Garage setback

2. Garage entrance width. The total combined horizontal width of all garage entrances located on the front facade may be up to 50 percent of the horizontal width of the front facade or 10 feet, whichever is greater. On corner lots, a garage entrance shall be allowed on only one street-facing facade.

3. Exemptions
   a. Garages allowed under subsections 23.44.016.D.9, 23.44.016.D.10, 23.44.016.D.11, and 23.44.016.D.12 are not subject to the standards of this subsection 23.44.016.F.
   b. Garages that are set back more than 35 feet from the front lot line are not subject to the standards of this subsection 23.44.016.F.
   c. The Director may waive or modify the standards of this subsection 23.44.016.F based on one or more of the following factors:
1) Irregular lot shape;
2) Topography of the lot;
3) Configuration of proposed or existing structures on the lot;
4) Location of exceptional trees as defined in Section 25.11.020;
and
5) The proposed structure or addition has design features including but not limited to modulation, screening, and landscaping.

G. Appearance of garage entrances in RSL zones. In RSL zones, the following provisions apply:

1. Garage entrances facing the street shall be set back at least 18 feet from the street lot line.

2. The total combined horizontal width of all garage entrances located on all street-facing facades shall not be more than 10 feet times the number of principal dwelling units located on the lot.

((G)) H. Screening ((-))

1. Parking accessory to floating homes when located on a separate lot from the floating homes shall be screened from direct street view by a fence or wall between ((five (5))) 5 and ((six (6))) 6 feet in height. When the fence or wall runs along the street front, there shall be a landscaped strip on the street side of the fence or wall. This strip may be between ((one (1))) 1 and ((five (5))) 5 feet deep, as measured from the property line, but the average distance from the property line to the fence shall be ((three (3))) 3 feet. Such screening shall be located outside any required sight triangle.
2. The height of the visual barrier created by the screen required by subsection 1 of this subsection 23.44.016.H.1 shall be measured from street level. If the elevation of the lot line is different from the finished elevation of the parking surface, the difference in elevation may be measured as a portion of the required height of the screen, so long as the screen itself is a minimum of ((three (3)) 3 feet in height (see Exhibit B for 23.44.016)).

Exhibit B for 23.44.016
Screening of parking
Section 20. A new Section 23.44.017 of the Seattle Municipal Code is added to Subchapter I of Chapter 23.44 as follows:

23.44.017 Density limits

A. In SF 5000, SF 7200, and SF 9600 zones, only one single-family dwelling unit is allowed per lot, except that an accessory dwelling unit may also be approved pursuant to Section 23.44.041, and except as approved as part of an administrative conditional use permit under Section 25.09.260, a clustered housing planned development under Section 23.44.024, or a planned residential development under Section 23.44.034.

B. The following provisions apply in RSL zones:

1. The minimum lot area per dwelling unit is 2,000 square feet.
2. When calculation of the number of dwelling units allowed according to subsection 23.44.017.B.1 results in a fraction of a unit, any fraction up to and including 0.85 constitutes zero additional units, and any fraction over 0.85 constitutes one additional unit.

Section 21. Section 23.44.018 of the Seattle Municipal Code, last amended by Ordinance 124378, is renumbered 23.44.021 and further amended as follows:

((23.44.018)) 23.44.021 General provisions

A. Only those conditional uses identified in this Subchapter II may be authorized as conditional uses in single-family zones. The Master Use Permit Process set forth in Chapter 23.76 ((Procedures for Master Use Permits and Council Land Use Decisions,)) shall be used to authorize conditional uses.

B. Unless otherwise specified in this Subchapter II, conditional uses shall meet the development standards for uses permitted outright in Sections 23.44.008 through ((23.44.016)) 23.44.020.

C. A conditional use may be approved, conditioned, or denied based on a determination of whether the proposed use meets the criteria for establishing a specific conditional use and whether the use will be materially detrimental to the public welfare or injurious to property in the zone or vicinity in which the property is located.

D. In authorizing a conditional use, the Director or Council may mitigate adverse negative impacts by imposing requirements or conditions deemed necessary for the protection of other properties in the zone or vicinity in which the property is located.

E. Any use that was previously authorized by a conditional use permit but which has been discontinued shall not be reestablished or recommenced except pursuant to a new conditional use permit, provided that such permit is required for the use at the time re-
establishment or recommencement is proposed. The following shall constitute conclusive
evidence that the conditional use has been discontinued:

1. A permit to change the use of the property has been issued and the new use has
been established; or

2. The property has not been devoted to the authorized conditional use for more
than ((twenty-four (24)) 24) consecutive months.

(Property which is vacant) Vacant property, except for dead storage of materials or
equipment of the conditional use, shall not be considered as being devoted to the authorized
conditional use. The expiration of licenses necessary for the conditional use shall be evidence
that the property is not being devoted to the conditional use. A conditional use in a multifamily
structure or a multitenant commercial structure shall not be considered as discontinued unless all
units are either vacant or devoted to another use.

F. Minor structural work that does not increase usable floor area or seating capacity and
that does not exceed the development standards applicable to the use shall not be considered an
expansion and does not require approval as a conditional use, unless the work would exceed the
height limit of the zone for uses permitted outright. Such work includes but is not limited to roof
repair or replacement and construction of uncovered decks and porches, facilities for barrier-free
access, bay windows, dormers, and eaves.

Section 22. A new Section 23.44.018 of the Seattle Municipal Code is added to
Subchapter I of Chapter 23.44 as follows:

23.44.018 Maximum dwelling unit size in RSL zones

The maximum net unit area of any dwelling unit in RSL zones, including any floor area in an
accessory dwelling unit, is 2,200 square feet.
Section 23. A new Section 23.44.019 of the Seattle Municipal Code is added to Subchapter I of Chapter 23.44 as follows:

23.44.019 Design standards in RSL zones

In RSL zones, the following provisions apply:

A. Pedestrian access at least 3 feet in width shall be provided between each dwelling unit and the street. This access may be over a driveway and may cross any required yards or interior separation. The pedestrian access may be part of a driveway, provided that the pathway is differentiated from the driveway by pavement color, texture, or similar technique.

B. Each dwelling unit with a street-facing facade that is located within 40 feet of a street lot line shall have a pedestrian entry on such street-facing facade with a covered stoop, porch, or other similar architectural entry feature.

Section 24. A new Section 23.44.020 of the Seattle Municipal Code is added to Subchapter I of Chapter 23.44 as follows:

23.44.020 Tree requirements

A. Tree requirements in SF 5000, SF 7200, and SF 9600 zones

   1. When a single-family dwelling unit is constructed on a lot in a SF 5000, SF 7200, or SF 9600 zone, a minimum number of caliper inches of tree must be provided on the lot as follows:

      a. For lots over 3,000 square feet, at least 2 caliper inches of tree per 1,000 square feet of lot area.

      b. On lots that are 3,000 square feet or smaller, at least 3 caliper inches of tree.
2. The minimum number of caliper inches of tree required may be met by preserving existing trees, planting new trees, or by a combination of preservation and planting. The preservation or planting of trees in the right-of-way may be counted, provided that they are approved by the Director of Transportation.

3. Submerged land shall not be included in calculating lot area for purposes of either the tree preservation option or tree planting option.

4. Tree measurements. Trees planted to meet the requirements in this subsection 23.44.020.A shall be at least 1.5 inches in diameter. The diameter of new trees shall be measured (in caliper inches) 6 inches above the ground. Existing trees shall be measured 4.5 feet above the ground. When an existing tree is 3 to 10 inches in diameter, each 1 inch counts as 1 inch toward meeting the tree requirements in this subsection 23.44.020.A. When an existing tree is more than 10 inches in diameter, each 1 inch of the tree that is over 10 inches shall count as 3 inches toward meeting the tree requirement.

5. Tree preservation plans. If the tree preservation option is chosen, a tree preservation plan must be submitted and approved. Tree preservation plans shall provide for protection of trees during construction according to standards promulgated by the Director.

B. Tree requirements in RSL zones

1. Trees sufficient to achieve one point, according to Table A for 23.44.020, per 750 square feet of lot area shall be provided for any development:
   a. Containing one or more new dwelling units;
   b. Containing more than 4,000 square feet of non-residential uses in either a new structure or an addition to an existing structure; or
c. Expanding surface area parking by more than 20 parking spaces for automobiles.

2. Individual trees preserved during construction or planted after construction count toward the tree score according to Table A for 23.44.020. All required trees shall meet standards promulgated by the Director to provide for the long-term health, viability, and coverage of plantings. These standards may include, but are not limited to, the type and size of plants, spacing of plants, depth, and quality of soil, access to light and air, and protection practices during construction.

<table>
<thead>
<tr>

<tr>
<td>Small/medium tree planted after construction</td>
</tr>
<tr>
<td>Medium/large tree planted after construction</td>
</tr>
<tr>
<td>Large tree planted after construction</td>
</tr>
<tr>
<td>Trees 6 inches in diameter or greater that are preserved during construction</td>
</tr>
</tbody>
</table>

3. Tree protection areas shall be designated for all trees that are proposed to be preserved to receive points under this subsection 23.49.020.B. No excavation, fill, placing of materials or equipment, or vehicle operation shall be allowed during construction within a tree protection area. Tree protection areas shall be an area equal to the outer extent of the dripline of the tree, except that they may be reduced if the following conditions are met:

a. The alternative tree protection area is prepared by an arborist who has visited the site and examined the specific tree’s size, location, and extent of root cover, evaluated the tree’s tolerance to construction impact based on its species and health, and identified any past impacts that have occurred within the root zone; and
b. The arborist has prepared a plan providing the rationale used to
demonstrate that the alternate method provides an adequate level of protection.

C. Street tree requirements in RSL zones

1. Street trees are required in RSL zones for development that would add one or
more principal dwelling units on a lot, except as provided in subsection 23.43.020.C.2 and
Section 23.53.015. Existing street trees shall be retained unless the Director of Transportation
approves their removal. The Director, in consultation with the Director of Transportation, shall
determine the number, type, and placement of additional street trees to be provided in order to:

   a. Improve public safety;

   b. Promote compatibility with existing street trees;

   c. Match trees to the available space in the planting strip;

   d. Maintain and expand the urban forest canopy;

   e. Encourage healthy growth through appropriate spacing;

   f. Protect utilities; and

   g. Allow access to the street, buildings, and lot.

2. If a lot borders an unopened right-of-way, the Director may reduce or waive
the street tree requirement along that right-of-way as a Type I decision if, after consultation
with the Director of Transportation, the Director determines that the right-of-way is unlikely to
be opened or improved.

   Section 25. Subsection 23.44.022.D of the Seattle Municipal Code, which section was
last amended by Ordinance 125272, is amended as follows:
23.44.022 Institutions

* * *

D. General provisions

1. New or expanding institutions in single-family zones shall meet the development standards for uses permitted outright in Sections 23.44.008 through 23.44.020 unless modified elsewhere in this subsection 23.44.022.D or in a Major Institution master plan.

2. The establishment of a child care center in a legally established institution devoted to the care or instruction of children, or establishment of a shelter for homeless youths and young adults in a legally established institution devoted to the care or instruction of children, shall not be considered a new use or an expansion of the institutional use if the shelter occupants are enrolled students of the institution and if the use does not violate any condition of approval of the existing institutional use or require expansion of the existing structure.

3. Institutions seeking to establish or expand on property that is developed with residential structures may expand their campus up to a maximum of 2 1/2 acres. An institution campus may be established or expanded beyond 2 1/2 acres if the property proposed for the expansion is substantially vacant land.

* * *

Section 26. Section 23.44.024 of the Seattle Municipal Code, last amended by Ordinance 124952, is amended as follows:

23.44.024 Clustered housing planned developments

Clustered housing planned developments (CHPDs) may be permitted as an administrative conditional use in (single-family) SF 5000, SF 7200, and SF 9600 zones. A CHPD is intended
to enhance and preserve natural features, encourage the construction of affordable housing,
allow for development and design flexibility, and protect and prevent harm in environmentally
critical areas. CHPDs shall be subject to the following provisions:

* * *

Section 27. Section 23.44.034 of the Seattle Municipal Code, last amended by Ordinance
124952, is amended as follows:

**23.44.034 Planned residential development (PRD)**

Planned residential developments (PRDs) may be permitted in (single-family) SF 5000, SF
7200, and SF 9600 zones as a council conditional use. A PRD is intended to enhance and
preserve natural features, encourage the construction of affordable housing, allow for
development and design flexibility, promote green stormwater infrastructure and protect and
prevent harm in environmentally critical areas. PRDs shall be subject to the following
provisions:

* * *

Section 28. Section 23.44.041 of the Seattle Municipal Code, last amended by Ordinance
124843, is amended as follows:

**23.44.041 Accessory dwelling units**

A. Accessory dwelling units, general provisions. The Director may authorize an
accessory dwelling unit, and that dwelling unit may be used as a residence, only under the
following conditions:

1. ((A)) In an SF 5000, SF 7200, or SF 9600 zone, a lot with or proposed for a
single-family dwelling unit may have no more than one accessory dwelling unit. In an RSL
zone, each principal dwelling unit may have no more than one accessory dwelling unit.
2. The owner(s) of the lot shall comply with the owner occupancy requirements of subsection 23.44.041.C.

3. Any number of related persons may occupy each unit in a dwelling unit with an accessory dwelling unit; provided that, if unrelated persons occupy either unit, the total number of persons occupying both units may not altogether exceed eight.

4. All accessory dwelling units are required to meet the development standards in Table A for 23.44.041, unless modified in subsection 23.44.041.B:

Table A for 23.44.041 Development ((Standards for All Accessory Dwelling Units)) standards for all accessory dwelling units

<table>
<thead>
<tr>
<th>Standard</th>
<th>Requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td>a. Maximum gross floor area</td>
<td>Attached accessory dwelling units are limited to 1,000 square feet, including garage and storage area. Detached accessory dwelling units are limited to 800 square feet, including any garage and storage area provided in the same structure as the accessory dwelling unit, but excluding areas below grade, measured as set forth in Section 23.86.007.</td>
</tr>
<tr>
<td>b. Entrances</td>
<td>((Only)) In SF 5000, SF 7200, and SF 9600 zones, only one entrance to the structure may be located on each street-facing facade of the dwelling unit.</td>
</tr>
</tbody>
</table>

Footnotes to Table A for 23.44.041 (((1))):
1 The gross floor area of an attached accessory dwelling unit may exceed 1,000 square feet only if the portion of the structure in which the accessory dwelling unit is located was in existence as of June 1, 1999, and if the entire accessory dwelling unit is located on one level, except that a garage for the accessory dwelling unit may be located on a different level.

2 More than one entrance may be allowed if: a) two entrances on the street-facing facade existed on January 1, 1993; or b) the Director determines that topography, screening, or another design solution is effective in de-emphasizing the presence of a second entrance.

5. Except on lots located within areas that are defined as either an urban center or urban village in the City’s Comprehensive Plan, one off-street parking space is required for the accessory dwelling unit and may be provided as tandem parking with the parking space provided for the principal dwelling unit. An existing required parking space may not be eliminated to accommodate an accessory dwelling unit unless it is replaced elsewhere on the lot. Except for lots located in either Map A for 23.54.015, University District Parking
Over

Impact Area, or Map B for 23.54.015, Alki Area Parking Overlay, the Director may waive the off-street parking space requirement for an accessory dwelling unit if:

a. The topography or location of existing principal or accessory structures on the lot makes provision of an off-street parking space physically infeasible; or

b. The lot is located in a restricted parking zone (RPZ) and a current parking study is submitted showing a utilization rate of less than 75 percent for on-street parking within 400 feet of all property lines of the site.

6. Accessory dwelling units in RSL zones are required to meet the following additional standards:

a. An accessory dwelling unit shall be located within the same structure as the principal dwelling unit or in an accessory structure located between the principal dwelling unit, including lines extended from the edge of the principal dwelling unit to all side lot lines, and the rear lot line.

b. Exterior stairs. Exterior stairs providing access to an accessory dwelling unit may not exceed 4 feet in height, except for exterior stairs providing access to an accessory dwelling unit located above a garage.

B. Accessory dwelling units, detached, additional provisions. (A detached accessory dwelling unit is also known as a backyard cottage.) The Director may authorize a detached accessory dwelling unit, and that unit may be used as a residence, only under the conditions set forth in subsection 23.44.041.A and the following additional conditions:

1. Detached accessory dwelling units are not permitted on a lot if any portion of the lot is within the Shoreline District established pursuant to Section 23.60A.010.
2. Detached accessory dwelling units are required to meet the additional development standards set forth in Table B for 23.44.041.

Footnotes to Table B for 23.44.041 (\(\dagger\))

1. The Director may allow an exception to standards a through f, h, i, and j pursuant to subsection 23.44.041.B.3, for converting existing accessory structures.

2. For lots that do not meet the lot depth requirement, but have a greater width than depth and an area greater than 5,000 square feet, a detached accessory dwelling unit is permitted, provided the detached accessory dwelling unit is not located in a required yard.

3. (If the lot line is adjacent to an alley and a detached accessory dwelling unit includes a garage with a vehicle entrance that faces the alley, the garage portion of the structure may not be located within 12 feet of the centerline of the alley.) The exceptions from standard yard requirements in subsection 23.44.014.C.6.a shall also apply.

4. (On a reversed corner lot, no detached accessory dwelling unit shall be located in that portion of the required rear yard that abuts the required front yard of the adjoining key lot.) If the lot line is adjacent to an alley and a detached accessory dwelling unit includes a garage with a vehicle entrance that faces the alley, the garage portion of the structure may not be located within 12 feet of the centerline of the alley.

5. (Features such as chimneys, antennas, and flagpoles may extend up to 4 feet above the maximum allowed height.) On a reversed corner lot, no detached accessory dwelling unit shall be located in that portion of the required rear yard that abuts the required front yard of the adjoining key lot.

6. (Detached accessory dwelling units on lots that have a width greater than 40 feet up to 50 feet may be built to the maximum height limit applicable in the column for lots greater than 50 feet when the detached accessory dwelling unit is located on a lot with a rear lot line that is adjacent to an alley.) Features such as chimneys, antennas, and flagpoles may extend up to 4 feet above the maximum allowed height.

7. (The exceptions from standard yard requirements in subsection 23.44.014.D.6.a shall also apply) Detached accessory dwelling units on lots that have a width greater than 40 feet up to 50 feet may be built to the maximum height limit applicable in the column for lots greater than 50 feet when the detached accessory dwelling unit is located on a lot with a rear lot line that is adjacent to an alley.
3. Conversion of accessory structures. An existing accessory structure that is not located in a required front yard, or that is located in a front yard where Section 23.40.030 or 23.40.035 applies, may be converted into a detached accessory dwelling unit if the structure complies with the minimum standards set forth in Sections 22.206.010 through 22.206.140 of the Housing and Building Maintenance Code and with the Seattle Residential Code, if work requiring a permit is performed on the structure or has previously been performed without a permit. The Director may allow an exception to one or more of the development standards for accessory dwelling units contained in subsection 23.44.041.A.4 and standards a through f, h, i, and j listed in Table B for 23.44.041, provided the conversion does not increase the structure’s nonconformity with the standard and the applicant can demonstrate that the accessory structure
was constructed prior to June 1, 1999, as an accessory structure. If an accessory structure constructed prior to June 1, 1999, was replaced to the same configuration in accordance with the standards of Section 23.42.112, then the replacement structure also qualifies for conversion under this subsection 23.44.041.B.3. For purposes of this subsection 23.44.041.B.3, the term “conversion” means either keeping the accessory structure intact or removing and rebuilding the accessory structure, provided that any expansion or relocation of the accessory structure complies with the development standards for detached accessory dwelling units.

* * *

Section 29. Section 23.44.042 of the Seattle Municipal Code, enacted by Ordinance 123378, is amended as follows:

23.44.042 Urban farms

* * *

B. An urban farm with over 4,000 square feet of planting area may be permitted as an administrative conditional use accessory to any principal use permitted outright or accessory to a permitted conditional use, pursuant to Sections 23.44.018 and 23.42.051.

Section 30. The name of Chapter 23.45 of the Seattle Municipal Code is amended as follows:

Chapter 23.45 (MULTIFAMILY)  MULTIFAMILY

Section 31. Section 23.45.502 of the Seattle Municipal Code, last amended by Ordinance 125267, is amended as follows:

23.45.502 Scope of provisions

A. This Chapter 23.45 establishes regulations for the following zones:

1. Lowrise 1 (LR1);
2. Lowrise 2 (LR2);
3. Lowrise 3 (LR3);
4. Midrise (MR); (references to MR zones include the Midrise/85 (MR/85) zone unless otherwise noted) and
5. Highrise (HR).

(B. Zones listed in subsection 23.45.502.A and having an incentive zoning suffix are subject to this Chapter 23.45 and Chapter 23.58A, Incentive Provisions.

C. Zones listed in subsection 23.45.502.A that have a mandatory housing affordability suffix of either (M), (M1), or (M2) are subject to this Chapter 23.45 and to the provisions of Chapters 23.58B and 23.58C. Specific provisions that apply to zones with a mandatory housing affordability suffix are in Section 23.45.517.

D. Areas in multifamily zones described in subsection 23.76.026.D are vested according to the provisions of subsection 23.76.026.D.))

B. Some land in these zones may be regulated by Subtitle III, Division 3, Overlay Districts, of this Title 23.

C. Other regulations, including but not limited to general use provisions (Chapter 23.42); requirements for streets, alleys, and easements (Chapter 23.53); standards for parking quantity, access, and design (Chapter 23.54); standards for solid waste storage (Chapter 23.54); signs (Chapter 23.55); communication regulations (Chapter 23.57); and methods for measurements (Chapter 23.86), may apply to development proposals.
Section 32. Section 23.45.508 of the Seattle Municipal Code, last amended by Ordinance 124843, is amended as follows:

23.45.508 General provisions

* * *

((I. All use provisions and development standards applicable to MR zones, except maximum height, also apply in the MR/85 zone.))

((J.) Any other provision of the Seattle Municipal Code notwithstanding, an applicant is not entitled to a permit for any use or development on a lot in an LR zone that would be inconsistent with any term, condition, or restriction contained either in any recorded agreement that is in effect as to that lot and was made in connection with a rezone of the lot to LDT, L1, L2, L3, or L4, or in any City Council decision or ordinance related to a rezone of the lot to LDT, L1, L2, L3, or L4 conditioned on a recorded agreement prior to April 19, 2011.))

((K.) If more than one category of residential use is located on a lot, and if different development standards apply to the different categories of use, then each category’s percentage of the total limit imposed by the development standard shall be calculated according to the formula for floor area ratio (FAR) in subsection 23.86.007.E.))

((L.) Unless otherwise specified, the development standards of each zone shall be applied in that zone, and may not be used in any other zone, except that if both zones have the same development standards, the development standard shall be applied to the lot as a whole. If a lot or development site includes more than one zoning designation and a development standard is based on lot area, the lot area used in applying the development standard shall be the portion of the contiguous area with the corresponding zoning designation.))
Section 33. Subsection 23.45.509.B of the Seattle Municipal Code, which section was enacted by Ordinance 125267, is amended as follows:

**23.45.509 Standards applicable to specific areas**

* * *

B. University Community Urban Center. The following provisions apply to development in the MR (M1) zone.

1. Lots located in MR (M1) zones are eligible as Landmark TDR and TDP sending sites if the lot meets the definition of the applicable TDR or TDP sending site in Chapter 23.84A and meets all applicable standards in Section 23.58A.042.

2. The maximum amount of TDR and TDP that can be transferred from an eligible sending site shall not exceed an amount of floor area equivalent to the numerical value of the FAR permitted on a lot, (in a Midrise zone with a mandatory housing affordability suffix as listed in subsection 23.45.517.B.2,) multiplied by the lot area of the sending site and minus the sum of any chargeable floor area on the lot plus any TDR and TDP previously transferred.

3. Eligible receiving sites are limited to those lots in SM-U zones specified in subsection 23.48.623.C.

Section 34. Section 23.45.510 of the Seattle Municipal Code, last amended by Ordinance 125359, is amended as follows:

**23.45.510 Floor area (ratio (FAR) limits**

A. General provisions

1. All gross floor area not exempt under subsection 23.45.510.E, including the area of stair penthouses with enclosed floor space, counts toward the maximum gross floor area allowed under the FAR limits.
2. The applicable FAR limit applies to the total non-exempt gross floor area of all structures on the lot.

3. If a lot is in more than one zone, the FAR limit for each zone applies to the portion of the lot located in that zone, and the floor area on the portion of the lot with the lower FAR limit may not exceed the amount that would be permitted if it were a separate lot.)

A. Gross floor area. In multifamily zones, gross floor area includes exterior corridors, breezeways, and stairways that provide building circulation and access to dwelling units or sleeping rooms. Balconies, patios, and decks that are associated with a single dwelling unit or sleeping room and that are not used for common circulation, and ground-level walking paths, are not considered gross floor area.

B. Floor area ratio (FAR) limits in LR and MR zones. FAR limits apply in LR and MR zones as shown in Table A for 23.45.510 (provided that if the LR zone designation includes an incentive zoning suffix, then gross floor area may exceed the base FAR as identified in the suffix designation, up to the limits shown in Table A for 23.45.510, if the applicant complies with Chapter 23.58A, Incentive Provisions. In LR zones the following standards apply to the calculation of gross floor area for application of FAR limits:)) The applicable FAR limit applies to the total chargeable floor area of all structures on the lot.

1. Exterior corridors, breezeways, and stairways that provide building circulation and access to dwelling units or sleeping rooms are included in gross floor area.

2. Balconies, patios, and decks that are associated with a single dwelling unit or sleeping room and that are not used for common circulation, and ground-level walking paths, are excluded from gross floor area.
3. Common walls separating individual rowhouse and townhouse dwelling units are considered to be exterior walls.

Footnotes to Table A for 23.45.510

1. FAR limits for LR zones with a mandatory housing affordability suffix are shown in subsection 23.45.517.B.1.
2. If more than one type of residential use is provided on a lot, the FAR limit for each residential use is the higher FAR limit for each residential use in this Table A for 23.45.510 only if the conditions in subsection 23.45.510.C are satisfied for all residential uses on the lot.
3. The higher FAR limit applies if the project meets the standards of subsection 23.45.510.C.
4. On lots that abut a street with frequent transit service, the higher FAR limit is 1.6.

Footnote to Table A for 23.45.510

1. Except that the FAR is 1.6 for apartments that provide one or more common, ground-level, outdoor amenity areas meeting the requirements of Section 23.45.522 and the following provisions are met:
1. The total amount of common, ground-level, outdoor amenity area is equal to at least 35 percent of the lot area; and
2. No part of such amenity area has a width or depth of less than 20 feet.

(C. In LR zones, in order to qualify for the higher FAR limit shown in Table A for 23.45.510, the following standards shall be met:

1. The applicant shall make a commitment that the proposed development will meet the green building standard and shall demonstrate compliance with that commitment, all in accordance with Chapter 23.58D; and

2. For all categories of residential use, if the lot abuts an alley and the alley is used for access, improvements to the alley shall be required as provided in subsections 23.53.030.E and 23.53.030.F, except that the alley shall be paved rather than improved with crushed rock, even for lots containing fewer than ten dwelling units.

3. Parking location if parking is provided

a. For rowhouse and townhouse developments, parking shall be totally enclosed within the same structure as the residential use, located in a structure or portion of a structure that meets the requirements of subsection 23.45.510.E.5, or located in a parking area or structure at the rear of the lot. A parking area not within a structure that is located at the rear of the lot shall be located behind all structures except, if accessed from an alley, the parking area may be located no closer to the front lot line than 50 percent of the lot depth.

b. For apartments, parking may either:

1) be totally enclosed within the same structure as the residential use; or

2)
2) On lots located outside of urban centers, urban villages, and the Station Area Overlay District, be located off an alley at the rear of the lot, provided that all surface parking is limited to a single row of spaces along the alley and access to each surface parking space is taken directly from the alley.

4. Access to parking if parking is provided
   a. Access to required barrier-free parking spaces may be from either a street or an alley. Subsections 23.45.510.C.4.b, 23.45.510.C.4.c, and 23.45.510.C.4.d do not apply to required barrier-free parking spaces.
   b. If the lot abuts an alley, access to parking shall be from the alley, unless one or more of the conditions in subsection 23.45.536.C.2 are met.
   c. If access cannot be provided from an alley, access shall be from a street if the following conditions are met:
      1) On corner lots, the driveway shall abut and run parallel to the rear lot line of the lot or a side lot line that is not a street lot line.
      2) On a non-corner lot, there is no more than one driveway per 160 feet of street frontage.
   d. If access to parking does not meet one of the standards in this subsection 23.45.510.C.4, or if an exception is granted that allows parking access from both an alley and a street pursuant to subsection 23.45.536.C, the lower FAR limit on Table A for 23.45.510 applies.

D)) C. FAR limits in ((MR and)) HR zones. FAR limits apply ((to all structures and lots)) in ((MR and)) HR zones as shown in Table B for 23.45.510, ((provided that if the MR or HR zone designation includes an incentive zoning suffix, then gross floor area may exceed the base...)}
FAR as identified in the suffix designation, up to the limits in Table B for 23.45.510, if the applicant complies with Chapter 23.58A, Incentive Provisions.) The applicable FAR limit applies to the total chargeable floor area of all structures on the lot. All floor area above the base FAR, up to the maximum FAR, is considered extra floor area achievable through the provisions of Section 23.45.516 and Chapter 23.58A.

*The maximum FAR limit for MR zones with a mandatory housing affordability suffix is shown in subsection 23.45.517.B.2.*

**Footnotes to Table B for 23.45.510**

1. All stories, or portions of stories, that are underground.
2. The floor area contained in a Landmark structure subject to controls and incentives imposed by a designating ordinance, if the owner of the Landmark has executed and recorded an agreement acceptable in form and content to the Landmarks Preservation Board, providing for the restoration and maintenance of the historically significant features of the structure, except that this exemption does not apply to a lot from which a transfer of development potential (TDP) has been made under Chapter 23.58A, and does not apply for purposes of determining TDP available for transfer under Chapter 23.58A.
3. The floor area contained in structures built prior to January 1, 1982, as single-family dwelling units that will remain in residential use, regardless of the number of dwelling units within the existing structure, provided that:

a. (no) No other principal structure is located between the existing single-family dwelling unit and the street lot line along at least one street frontage. If the existing residential structure is moved on the lot, the floor area of the existing residential structure remains exempt if it continues to meet this provision; and

b. (the) The exemption is limited to the gross floor area in the single-family dwelling unit existing residential structure as of January 1, 1982.

4. Portions of a story that extend no more than 4 feet above existing or finished grade, whichever is lower, excluding access, (see Exhibit A for 23.45.510), in the following circumstances:

a. (apartments) Apartments in LR zones (that qualify for the higher FAR limit shown in Table A for 23.45.510);

b. (rowhouse) Rowhouse and townhouse developments in LR zones, located on lots that have a lot depth of 100 feet or less, do not have alley access, and that qualify for the higher FAR limit shown in Table A for 23.45.510, provided that all parking access is located at the rear of the rowhouse development structure or is enclosed in structures with garage entrances located on the rear facade; and

c. (all) All multifamily structures in MR and HR zones.
Exhibit A for 23.45.510
Area exempt from FAR

5. For rowhouse and townhouse developments and apartments (that qualify for the higher FAR limit shown in Table A for 23.45.510) floor area within a (structure) story, or portion of a (structure) story, that is partially above grade (is used for parking or other accessory uses, and has no additional stories above,) if all of the following conditions are met:

a. The story, or portion of the story, that is partially above grade is used for parking or other accessory uses and has no additional stories above;

((a)) b. The average height of the exterior walls enclosing the floor area does not exceed one story, measured from existing or finished grade, whichever is lower;

((b)) c. The roof area above the exempt floor area is predominantly flat, is used as amenity area, and meets the standards for amenity area at ground level in Section 23.45.522; and
((e)) d. At least 25 percent of the perimeter of the amenity area on the roof above the floor area is not enclosed by the walls of the structure.

6. Enclosed common amenity area in HR zones.

7. As an allowance for mechanical equipment, in any structure more than 85 feet in height, 3.5 percent of the gross floor area that is not otherwise exempt under this subsection

((23.45.510.E)) 23.45.510.D.

8. In HR zones, ground floor commercial uses meeting the requirements of Section 23.45.532, if the street level of the structure containing the commercial uses has a minimum floor-to-floor height of 13 feet and a minimum depth of 15 feet.

9. Common walls separating individual rowhouse and townhouse dwelling units.

((F)) E. If TDP is transferred from a lot pursuant to Section 23.58A.042, the amount of non-exempt floor area that may be permitted is ((the applicable base FAR)) an FAR of 7, plus any net amount of TDP previously transferred to the lot, minus the sum of the existing non-exempt floor area on the lot and the amount of TDP transferred.

Section 35. Section 23.45.512 of the Seattle Municipal Code, last amended by Ordinance 125359, is amended as follows:

23.45.512 Density limits and family-size unit requirements—LR zones

((A. The minimum lot area per dwelling unit in LR zones for cottage housing developments, townhouse developments, and apartments is shown on Table A for 23.45.512, except as provided in subsections 23.45.512.B, 23.45.512.C, 23.45.512.D, 23.45.512.E, and 23.45.512.G.))

Footnotes for Table A for 23.45.512

\(^1\) Density limits for LR zones with a mandatory housing affordability suffix are shown in subsection 23.45.517.C.

\(^2\) When density calculations result in a fraction of a unit, any fraction up to and including 0.85 constitutes zero additional units, and any fraction over 0.85 constitutes one additional unit.

\(^3\) See Section 23.45.531 for specific regulations about cottage housing developments.

\(^4\) One single-family residence meeting the standards of subsection 23.45.510.C may be built on a lot that is existing as of April 19, 2011, and has an area of less than 1,600 square feet.

\(^5\) For townhouse developments that meet the standards of subsection 23.45.510.C, the higher density shown is permitted in LR1 zones, and there is no density limit in LR2 and LR3 zones.

\(^6\) For apartments that meet the standards of subsection 23.45.510.C, there is no density limit in LR2 and LR3 zones.

\(^7\) The density limit for rowhouse development in LR1 zones applies only on lots less than 3,000 square feet in size.

A. Density limits

1. The following developments must meet the density limits described in this subsection 23.45.512.A:

a. All rowhouse and townhouse developments in LR1 zones; and

b. All development in Lowrise zones that do not have a mandatory housing affordability suffix.

2. Development described in subsection 23.45.512.A.1 shall not exceed a density of one dwelling unit per 1,350 square feet of lot area, except that apartments in LR3 zones that do not have a mandatory housing affordability suffix shall not exceed a density limit of one dwelling unit per 800 square feet.
3. When density calculations result in a fraction of a unit, any fraction up to and including 0.85 constitutes zero additional units, and any fraction over 0.85 constitutes one additional unit.

((B)) 4. Density exception for certain types of low-income multifamily residential uses

((4)) a. The exception in this subsection ((23.45.512.B)) 23.45.512.A.4 applies to low-income disabled multifamily residential uses, low-income elderly multifamily residential uses, low-income elderly/low-income disabled multifamily residential uses, and other low-income residential uses, operated by a public agency or a private nonprofit corporation, if they do not qualify for the higher FAR limit shown in Table A for 23.45.510.

((2)) b. The uses listed in subsection ((23.45.512.B.1)) 23.45.512.A.4.a shall have a maximum density of one dwelling unit per 400 square feet of lot area if a majority of the dwelling units are designed for and dedicated to tenancies of at least three months, and the dwelling units remain in low-income disabled multifamily residential use, low-income elderly multifamily residential use, low-income elderly/low-income disabled multifamily residential use, or other low-income residential uses, for the life of the structure.

B. Family-sized unit requirements in LR1 zones

1. Developments in LR1 zones with four or more units shall provide at least one unit with two or more bedrooms and a minimum net unit area of 850 square feet for every four units in the structure.

2. One unit with three or more bedrooms and a minimum net unit area of 1,050 square feet may be provided in place of any two units required to include two bedrooms and a minimum net unit area of 850 square feet.
C. ((Carriage houses, nursing)) Nursing homes, congregate housing, assisted living facilities, and accessory dwelling units that meet the standards of Section 23.45.545 are exempt from the density limit set in ((Table A for 23.45.512)) subsection 23.45.512.A and the requirements in subsection 23.45.512.B.

((D. In LR1 zones no apartment shall contain more than three dwelling units, except as permitted in subsections 23.45.512.E and 23.45.512.G.))

((E)) D. Dwelling unit(s) located in structures built prior to January 1, 1982, as single-family dwelling units that will remain in residential use are exempt from density limits ((and the provisions of subsection 23.45.512.D)).

((F)) E. If dedication of right-of-way is required, permitted density shall be calculated before the dedication is made.

((G)) F. Adding units to existing structures

1. One additional dwelling unit may be added to an existing residential structure regardless of the density restrictions in ((subsections)) subsection 23.45.512.A ((and 23.45.512.B, 23.45.512.C, and 23.45.512.D)) and the requirements in subsection 23.45.512.B. An additional unit is allowed only if the proposed additional unit is to be located entirely within an existing structure, and no additional floor area to accommodate the new unit is proposed to be added to the existing structure.

2. For the purposes of this subsection ((23.45.512.G)) 23.45.512.F, “existing residential structures” are those that were established under permit as of October 31, 2001, or for which a permit has been granted and the permit has not expired as of October 31, 2001.
Section 36. Section 23.45.514 of the Seattle Municipal Code, last amended by Ordinance 125359, is amended as follows:

**23.45.514 Structure height**

A. Subject to the additions and exceptions allowed as set forth in this Section 23.45.514, the height limits for (principal) structures (permitted) in LR zones are as shown on Table A for 23.45.514.

Table B for 23.45.514
Structure height for MR and HR zones (in feet)

| Height limit |
|---|---|---|
| MR | 80 | HR | 440 |

Footnote to Table B for 23.45.514
1. Except that the height limit is 60 feet in zones without a mandatory housing affordability suffix.

C. The maximum height limit for accessory structures that are located in required setbacks or separations is 12 feet, except as follows:

1. Garages and carports are limited to 12 feet in height as measured on the facade containing the vehicle entrance. Open rails may extend an additional 3 feet above the roof of the garage or carport if any portion of the roof is within 4 feet of existing grade. The ridge of a pitched roof on a garage located in a required yard may extend up to 3 feet above the 12-foot height limit. All parts of the roof above the height limit shall be pitched at a rate of not less than 4:12. No portion of a shed roof is permitted to extend beyond the 12-foot height limit.

2. The height limit is 20 feet for an accessory dwelling unit located in a required yard may extend up to 3 feet above the 20-foot height limit. All parts of the roof above the height limit shall be pitched at a rate of not less than 4:12. No portion of a shed roof is permitted to extend beyond the 20-foot height limit.
height limit for an accessory dwelling unit that is accessory to a single-family dwelling unit shall be set according to Section 23.44.041-2)

3. Freestanding flagpoles and religious symbols for religious institutions are exempt from height controls, except as regulated in Chapter 23.64, Airport Height Overlay District, provided they are no closer to any lot line than 50 percent of their height above existing grade.

D. Exceptions for pitched roofs in LR zones that are not shed or butterfly roofs (\(\square\))

1. Pitched roofs that are not shed or butterfly roofs may extend up to 5 feet above the height limits set in Table A for 23.45.514, (subject to the following limits,\(\square\)) provided that all parts of the roofs above the height limit have a minimum slope of 6:12 (\(\square\), except as provided in subsection 23.45.514.D.5):

1. For cottage housing developments in all LR zones, the ridge of pitched roofs on principal structures may extend up to 7 feet above the height limit.

2. In LR1 and LR2 zones, for structures subject to a 30 foot height limit, the ridge of pitched roofs on principal structures may extend up to 5 feet above the height limit if the height exception in subsection 23.45.514.F is not used.

3. In LR3 zones, for structures subject to a 30 foot height limit, the ridge of pitched roofs on principal structures may either:

\(a\). extend up to 10 feet above the height limit, if the height exception provided in subsection 23.45.514.F is not used, and the number of full stories above grade is limited to three; or

\(b\). extend up to 5 feet above the height limit, if the height exception provided in subsection 23.45.514.F is used.
4. In LR3 zones, for structures subject to a 40 foot height limit, the ridge of pitched roofs on principal structures may extend up to 5 feet above the height limit provided that the height exception in subsection 23.45.514.F is not used.

5) Portions of curved roof forms, such as barrel and domed roofs, may have a lesser slope than 6:12, if the Director determines that the massing of the roof form is comparable to a pitched roof form such as a gable or gambrel roof that would have a minimum slope of 6:12.

E. Shed and butterfly roofs in LR zones

1. In LR zones, the high side(s) of a shed or butterfly roof may extend 3 feet above the height limits set in Table A for 23.45.514, provided that the low side(s) of the shed or butterfly roof are no higher than the height limit (see Exhibit A for 23.45.514) if the height limit exception in subsection 23.45.514.F is not used.

2. The roof line of a shed or butterfly roof may be extended in order to accommodate eaves, provided that the highest point of the roof extension is no more than 4 feet above the height limit.

Exhibit A for 23.45.514
Height exception for shed and butterfly roofs
F. For apartments in LR2 zones, and for all residential uses in LR3 zones, the applicable height limit is increased 4 feet above the height shown on Table A for 23.45.514 for a structure that includes a story that is partially below-grade, provided that:

1. This height exception does not apply to portions of lots that are within 50 feet of a single-family zone boundary line, unless the lot in the LR zone is separated from a single-family zoned lot by a street;

2. The number of stories above the partially below-grade story is limited to

- four stories for residential uses with a 40-foot height limit and to
- five stories for residential uses with a 50-foot height limit;
3. On the street-facing facade(s) of the structure, the story above the partially below-grade story is at least 18 inches above the elevation of the street, except that this requirement may be waived to accommodate units accessible to the disabled or elderly, consistent with the Seattle Residential Code, ((Section R322)) Chapter 3, or the Seattle Building Code, Chapter 11; and

4. The average height of the exterior walls of the portion of the story that is partially below-grade does not exceed 4 feet, measured from existing or finished grade, whichever is less.

((G. In MR zones, the base height limit is increased by 5 feet if the number of stories in the structure that are more than 4 feet above existing or finished grade, whichever is lower, does not exceed six, and one or more of the following conditions is met:

1. The FAR exemption provided in Section 23.45.510.E.4 is used;

2. All stories in the structure, except stories used only for parking, have floor to ceiling heights of 9 feet or more; or

3. The lot is split between a MR zone and an NC zone, and the base structure height allowed on the NC-zoned portion is 65 feet or more.

H)) G. Roofs enclosed by a parapet. Roof surfaces that are completely surrounded by a parapet may exceed the applicable height limit to allow for a slope, provided that the height of the highest elevation of the roof surface does not exceed 75 percent of the parapet height, and provided that the lowest elevation of the roof surface is no higher than the applicable height limit. See Exhibit B for 23.45.514.
Exhibit B for 23.45.514((i))

Height ((Allowance)) allowance for ((Sloped Roofs Concealed)) sloped roofs concealed by a ((Parapet)) parapet

Exhibit B for 23.45.514

Height Allowance for Sloped Roofs Concealed by a Parapet

Exhibit B for 23.45.514

Height allowance for sloped roofs concealed by a parapet

highest point of roof slope cannot exceed 75% of parapet height
4 feet maximum height of parapet above
height limit
((4)) H. Green roofs. For any structure with a green roof that meets standards promulgated by the Director and that covers at least 50 percent of the surface of the roof, up to 2 feet of additional height above the maximum height otherwise allowed for the roof is allowed to accommodate structural requirements, roofing membranes, and soil. See Exhibit C for 23.45.514.

Exhibit C for 23.45.514
Green roof height allowance

((5)) I. Rooftop features

1. Flagpoles and religious symbols for religious institutions that are located on a roof are exempt from height controls, except as regulated in Chapter 23.64, Airport Height
Overlay District, provided they are no closer to any lot line than 50 percent of their height above
the roof portion where attached.

2. Open railings, planters, greenhouses not dedicated to food production, parapets, and firewalls on the roofs of principal structures may extend 4 feet above the maximum height limit set in subsections 23.45.514.A, 23.45.514.B, 23.45.514.E, and 23.45.514.F (of this Section 23.45.514.).

3. Architectural projections that result in additional interior space, such as dormers, skylights, and clerestories, are subject to the following limits:

   a. On pitched roofs, projections may extend to the height of the ridge of a pitched roof that is allowed pursuant to subsection 23.45.514.D, if the following conditions are met:

      ((i-the)) 1) The total area of the projections is no more than 30 percent of the area of each roof plane measured from the plan view perspective;

      ((ii-each)) 2) Each projection is limited to 10 feet in width; and

      ((iii-each)) 3) Each projection is separated by at least 3 feet from any other projection (see Exhibit D for 23.45.514).
Exhibit D for 23.45.514((z))

Permitted (Projections on Pitched Roofs) projections on pitched roofs

Exhibit D for 23.45.514
Permitted projections on pitched roofs

roof plane area = c \times d = e

\text{total area of projections (3 \times f)}

\text{must not exceed 30\% roof plane area (e)}

a = 10 \text{ foot maximum}

b = 3 \text{ foot minimum separation between projections}
b. On flat roofs, the projections may extend 4 feet above the maximum height limit allowed by subsections 23.45.514.A, 23.45.514.B, and 23.45.514.F if the following requirements are met:

1) The total area of the projections is no more than 30 percent of the area of the roof plane; and

2) The projections are set back at least 4 feet from any street facing facade.

4. In LR zones, the following rooftop features may extend 10 feet above the height limit set in subsections 23.45.514.A and 23.45.514.F, if the combined total coverage of all features does not exceed 15 percent of the roof area or 20 percent of the roof area if the total includes screened mechanical equipment:

a. Stair penthouses, except as provided in subsection (23.45.514.I.6);

b. Mechanical equipment;

c. Play equipment and open-mesh fencing that encloses it, if the fencing is at least 5 feet from the roof edge;

d. Chimneys;

e. Wind-driven power generators; and

f. Minor communication utilities and accessory communication devices, except that height is regulated according to the provisions of Section 23.57.011.

5. In MR and HR zones, the following rooftop features may extend 15 feet above the applicable height limit set in subsection 23.45.514.B (and 23.45.514.G), if
the combined total coverage of all features does not exceed 20 percent of the roof area, or 25 percent of the roof area if the total includes screened mechanical equipment:

a. Stair penthouses, except as provided in subsection (23.45.514.1.6)

23.45.514.1.6:

b. Mechanical equipment;

c. Play equipment and open-mesh fencing that encloses it, if the fencing is at least 5 feet from the roof edge;

d. Chimneys;

e. Sun and wind screens;

f. Penthouse pavilions for the common use of residents;

g. Greenhouses and solariums, in each case that meet minimum energy standards administered by the Director;

h. Wind-driven power generators; and

i. Minor communication utilities and accessory communication devices, except that height is regulated according to the provisions of Section 23.57.011.

6. Subject to the roof coverage limits in subsections (23.45.514.1.4)

23.45.514.1.4 and 23.45.514.1.5, elevator penthouses may extend above the applicable height limit up to 16 feet. (If additional height is needed to accommodate energy-efficient elevators in HR zones, elevator penthouses may extend the minimum amount necessary to accommodate energy-efficient elevators, up to 25 feet above the applicable height limit. Energy-efficient elevators are defined by Director’s Rule.) Stair penthouses may be the same height as an elevator penthouse if the elevator and stairs are co-located within a common penthouse structure.

7. For height exceptions for solar collectors, see Section 23.45.545.
8. In order to protect solar access for property to the north, the applicant shall either locate the rooftop features listed in this subsection (\(23.45.514.1.8\)) at least 15 feet from the north lot line, or provide shadow diagrams to demonstrate that the proposed location of such rooftop features would shade property to the north on January 21 (\(\text{st}\)) at noon no more than would a structure built to maximum permitted bulk:

   a. Solar collectors;
   b. Planters;
   c. Clerestories;
   d. Greenhouses and solariums that meet minimum energy standards administered by the Director;
   e. Minor communication utilities and accessory communication devices, permitted according to the provisions of Section 23.57.011;
   f. Play equipment;
   g. Sun and wind screens;
   h. Penthouse pavilions for the common use of residents.

9. For height limits and exceptions for communication utilities and devices, see Section 23.57.011.

10. Greenhouses that are dedicated to food production are permitted to extend 15 feet above the applicable height limit, as long as the combined total coverage of all features gaining additional height listed in this subsection (\(23.45.514.1.8\)) does not exceed 50 percent of the roof area, and the greenhouse meets the requirements of subsection \((23.45.514.1.8)\).
11. Additional height in HR zones. A structure may exceed the applicable height limit in the HR zone as follows:

   a. If the applicable height limit is 240 feet, the height of the structure may be increased by 30 feet if the area bounded by the facades of the portion of the structure above 240 feet is no greater than 6,500 square feet, or if the area bounded by the facades at an elevation that is halfway between 240 feet and the height of the structure is no greater than 50 percent of the area bounded by the facades at a height of 240 feet.

   b. If the applicable height limit is 300 feet, the height of a structure may be increased (1) by 30 feet if the area bounded by the facades of the portion of the structure above 300 feet is no greater than 6,500 square feet, or (2) by 45 feet if the area bounded by the facades at an elevation that is halfway between 300 feet and the height of the structure is no greater than 50 percent of the area bounded by the facades at a height of 300 feet.

   c. In all cases the area bounded by the facades extending above the height limit may be occupied only by those uses or features otherwise permitted in this Section 23.45.514 as an exception above the height limit, although any limits on the height or coverage of those uses or features totally screened by the facades extending above the applicable height limit shall not apply. Height exceptions permitted for screening of rooftop features under other provisions of this subsection 23.45.514.J are not permitted above the height gained by a structure under this subsection 23.45.514.J.11.)
Section 37. Section 23.45.516 of the Seattle Municipal Code, last amended by Ordinance 125173, is amended as follows:

**23.45.516 (Additional height and) Method to achieve extra residential floor area in (MR and) HR zones**

A. **General.** Definitions in Section 23.58A.004 apply in this Section 23.45.516 unless otherwise specified.

1. In MR, MR/85, and HR zones, extra residential floor area may be permitted up to the maximum limits allowed by Section 23.45.510.

2. In MR and HR zones, additional height above the base height limit is permitted for structures that qualify for extra residential floor area, up to the maximum limits allowed by Sections 23.45.514 and 23.45.516.

B. Eligible lots. The following lots are eligible for extra residential floor area and, except in MR/85 zones, additional height:

1. Lots in MR or MR/85 zones in urban villages, urban centers, and the Station Area Overlay District, except when the lot abuts a lot zoned single-family or is directly across an alley from a lot zoned single-family, and

2. Lots in HR zones.

C. HR zones

1. **Extra residential floor area.**

B. In HR zones, extra residential floor area above the base FAR may be gained in accordance with Chapter 23.58A subject to the conditions and limits in this Section 23.45.516.

((Up to all)) All extra residential floor area ((may)) shall be gained through the affordable
housing incentive program provisions in Section 23.58A.014. ((Up to 40 percent of extra residential floor area may be gained by one or any combination of:

a. transfer of development potential;

b. providing neighborhood open space or a payment in lieu thereof; and/or
c. providing a neighborhood green street setback if allowed pursuant to subsection 23.45.516.F, all in accordance with this Section 23.45.516 and Chapter 23.58A.

2. Structure height

a. Structures 240 feet or less in height. The applicable height limit in an HR zone under subsection 23.45.514.B is 240 feet if the applicant satisfies the conditions for extra floor area but not all of the conditions in subsection 23.45.516.C.2.b are met.

b. Structures over 240 feet. The applicable height limit in an HR zone under subsection 23.45.514.B is 300 feet if the applicant satisfies the conditions for extra floor area and the following additional conditions are met:

1) For any structure above a height of 85 feet, the average residential gross floor area per story above a height of 45 feet does not exceed 9,500 square feet;

2) No parking is located at or above grade, unless it is separated from all street lot lines by another use; and

3) At least 25 percent of the lot area at grade is one or more landscaped open spaces, each with a minimum horizontal dimension of 10 feet, or at least 20 percent of the lot area at grade is landscaped, common amenity area meeting the standards of Section 23.45.522.
D. Transferable Development Potential (TDP) from Landmark structures and open space

1. Sending lots. TDP may be transferred under the provisions of Section 23.45.516, only from Landmark TDP sites and open space TDP sites. In order to be eligible as a Landmark TDP site or open space TDP site, a lot shall be located in First Hill and shall be zoned MR or HR. Sending lots are subject to the limits and conditions in this Chapter 23.45 and Chapter 23.58A. The amount of TDP that may be transferred from a lot is limited to the amount by which the base FAR under Section 23.45.510 exceeds floor area on the lot that is not exempt under Section 23.45.510.

2. Receiving lots. Any lot located in an HR zone within First Hill is eligible for extra residential floor area according to the provisions of this Section 23.45.516 to receive TDP from an eligible sending lot, subject to the limits and conditions in this Chapter 23.45 and Chapter 23.58A.

E. Combined lot development. When authorized by the Director pursuant to this Section 23.45.516, lots located on the same block in an HR zone may be combined, whether contiguous or not, solely for the purpose of allowing some or all of the capacity for chargeable floor area on one or more such lots under this Chapter 23.45 to be used on one or more other lots, according to the provisions of this subsection 23.45.516.E.

1. Up to all of the capacity on one lot, referred to in this subsection 23.45.516.E as the “base lot,” for chargeable floor area in addition to the base FAR, pursuant to Section 23.45.510 (referred to in this subsection 23.45.516.E as “bonus capacity”), may be used on one or more other lots, subject to compliance with all conditions to obtaining extra residential floor area, pursuant to Chapter 23.58A, as modified in this Section 23.45.516. For purposes of applying any conditions related to amenities or features provided on site under this Section...
23.45.516, only the lot or lots on which such bonus capacity is used are considered to be the lot
or site using a bonus. Criteria for use of extra residential floor area that apply to the structure(s)
shall be applied only to the structure(s) on the lots using the transferred bonus capacity. For
purposes of the condition to height above 240 feet in subsection 23.45.516.C.2.b.3 of this Section
23.45.516, all lots in a combined lot development are considered as one lot.

2. Only if all of the bonus capacity on all lots in a combined lot development is
used on fewer than all of those lots, there may be transferred from a base lot where no bonus
capacity is used, to one or more other lots in the combined lot development, up to all of the
unused base FAR on the base lot, without regard to limits on the transfer of TDP or on use of
TDP in Chapter 23.58A or subsection 23.45.516.D. Such transfer shall be treated as a transfer of
TDP for purposes of determining remaining development capacity on the base lot and TDP
available to transfer under Chapter 23.58A, but shall be treated as additional base FAR on the
other lots, and, to the extent that, together with other base floor area, it does not exceed the
amount of chargeable floor area below the base height limit on the lot where it is used, it shall
not be treated as extra residential floor area. If less than all of the bonus capacity of the base lot
is used on such other lots, and if the base lot qualifies as a sending lot for TDP, the unused base
FAR may be transferred as TDP to the extent permitted by Chapter 23.58A and this Section
23.45.516, but in each case only to satisfy in part the conditions to achieve extra floor area, not
as additional base FAR.

3. To the extent permitted by the Director, the maximum chargeable floor area for
any one or more lots in the combined lot development may be increased up to the combined
maximum chargeable floor area under Section 23.45.510 computed for all lots participating in
the combined lot development, provided that the maximum chargeable floor area on one or more
other lots in the combined lot development is correspondingly reduced. To the extent permitted
by the Director, and subject to subsection 23.45.516.E.2, the base floor area for any one or more
lots in the combined lot development may be increased up to the combined base chargeable floor
area under Section 23.45.510 computed for all lots participating in the combined lot
development, provided that the base floor area on one or more other lots in the combined lot
development is correspondingly reduced.

4. The Director shall allow a combined lot development only to the extent that the
Director determines, in a Type I land use decision, that permitting more chargeable floor area
than would otherwise be allowed on a lot or lots and the corresponding reduction on another lot
or lots will result in a significant public benefit through one of more of the following:

a. preservation of a landmark structure located on the block or on an
adjacent block either through the inclusion of the lot with the landmark structure as a base lot in
the combined lot development or through the transfer of TDP from the lot with the landmark
structure to a lot in the combined lot development;

b. inclusion on the same block of a structure in which low-income housing
is provided to satisfy all or part of the conditions to earn extra residential floor area; and/or

c. provision of open space on the same block to satisfy in part the
conditions to achieve extra residential floor area.

5. The fee owners of each of the combined lots shall execute an appropriate
agreement or instrument, which shall include the legal descriptions of each lot and shall be
recorded in the King County real property records. In the agreement or instrument, the owners
shall acknowledge the extent to which development capacity on each base lot is reduced by the
use of such capacity on another lot or lots, at least for so long as the chargeable floor area for
which such capacity is used remains on such other lot or lots. The agreement or instrument shall also provide that its covenants and conditions shall run with the land and shall be specifically enforceable by the parties and by the City of Seattle.

6. Nothing in this subsection 23.45.516.E shall allow the development on any lot in a combined lot development to exceed or deviate from height limits or other development standards.

F. Neighborhood green street setback. Floor area may be gained for a neighborhood green street setback according to the provisions of Chapter 23.58A by development on lots abutting one of the streets or street segments within the First Hill Urban Village shown on Map A for 23.45.516.
Map A for 23.45.516
Neighborhood Green Streets
G. Neighborhood open space. In HR zones, subject to the limits in this Section 23.45.516 and Chapter 23.58A, extra residential floor area may be gained through a voluntary agreement to provide neighborhood open space or a payment in lieu of neighborhood open space, according to the provisions of Section 23.58A.040.

Section 38. Section 23.45.517 of the Seattle Municipal Code, last amended by Ordinance 125432, is amended as follows:

23.45.517 ((Multifamily zones with a mandatory)) Mandatory housing affordability (suffix) (MHA) in multifamily zones

(The following standards apply to multifamily zones with a mandatory housing affordability suffix, which include (M), (M1), and (M2):)

A. Affordable housing requirements. Development is subject to the provisions of Chapters 23.58B and 23.58C.

B. Floor area ratio (FAR)

1. FAR limits for LR1, LR2, and LR3 zones with a mandatory housing affordability suffix are shown in Table A for 23.45.517. (suffix)

<table>
<thead>
<tr>
<th>Zone</th>

Footnotes to Table B for 23.45.517

1. When density calculations result in a fraction of a unit, any fraction up to and including 0.85 constitutes zero additional units, and any fraction over 0.85 constitutes one additional unit.
2. Accessory dwelling units and detached accessory dwelling units are not subject to the provisions of Chapter 23.58C.
3. See Section 23.45.531 for specific regulations about cottage housing developments.
4. One single-family residence meeting the standards of subsection 23.45.510.C may be built on a lot that is existing as of April 19, 2011, and has an area of less than 1,600 square feet.)

D. Structure height

1. The height limits for principle structures permitted in LR1, LR2, and LR3 zones with a mandatory housing suffix are as shown on Table C for 23.45.517, subject to the additions and exceptions allowed as set forth in subsection 23.45.514.C through subsection 23.45.514.J.)

(2. The height limit for principal structures permitted in MR zones with a mandatory housing affordability suffix is 80 feet, subject to the additions and exceptions allowed as set forth in subsections 23.45.514.C, 23.45.514.H, 23.45.514.I, and 23.45.514.J.

E. Green building performance. Applicants for development in LR1 and LR2 zones with a mandatory housing affordability suffix shall make a commitment that the proposed development will meet the green building standard and shall demonstrate compliance with that commitment, all in accordance with Chapter 23.58D.))

LR, MR, and HR zones with a mandatory housing affordability suffix are subject to the provisions of Chapters 23.58B and 23.58C.

Section 39. Section 23.45.518 of the Seattle Municipal Code, last amended by Ordinance 125272, is amended as follows:

**23.45.518 Setbacks and separations**

A. LR zones ((\(z\))

1. Required setbacks for the LR zones are shown in Table A for 23.45.518 and subsection 23.45.518.A.2.
### Table A for 23.45.518

</tr>
</tbody>
</table>

**Footnotes to Table A for 23.45.518 ((f))**

¹ Additions to existing nonconforming structures shall be set back a sufficient distance so that the addition complies with setback standards.

² ((Portions of structures that qualify for the FAR exemption in subsection 23.45.510.E.5 are not considered part of the facade length for the purposes of determining the side setback requirement)) If the side facades of rowhouse developments on abutting lots are not joined, then a 3.5-foot setback is required, except the side setback may be reduced to zero if the abutting lot contains a rowhouse development and an easement is provided along the shared lot line of the abutting lot sufficient to leave a 3.5-foot separation between the principal structures of the abutting rowhouse developments.

³ ((If the side facades of rowhouse developments on abutting lots are not joined, then a 3.5-foot setback is required, except the side setback may be reduced to zero if the abutting lot contains a rowhouse development and an easement is provided along the shared lot line of the abutting lot sufficient to leave a 3.5-foot separation between the principal structures of the abutting rowhouse developments)) Portions of structures that qualify for the FAR exemption in subsection 23.45.510.D.5 are not considered part of the facade length for the purposes of determining the side setback requirement.
2. Upper-level setbacks in LR2 and LR3 zones

   a. An upper-level setback of 12 feet from the front lot line is required for all portions of a structure above the following height:

      1) Forty-four feet for zones with a height limit of 40 feet; and
      2) Fifty-four feet for zones with a height limit of 50 feet.

   b. An upper-level setback of 12 feet from each side or rear lot line that abuts a lot zoned single-family is required for all portions of the structure above 34 feet in height.

   c. Projections allowed in subsection 23.45.518.H are allowed in upper-level setbacks.

   d. Structures allowed in subsection 23.45.518.J are not allowed in upper-level setbacks.

   e. Rooftop features are not allowed in upper-level setback except as follows:

      1) A pitched roof, other than a shed roof or butterfly roof, is allowed in the upper-level setback if all parts of the roof are pitched at a rate of not less than 6:12 and not more than 12:12.

      2) Open railings may extend up to 4 feet above the height at which the setback begins.

      3) Parapets may extend up to 2 feet above the height at which the setback begins.
**B. MR zones ((-))**

1. Minimum setbacks for the MR zone are shown in Table B for 2.34.5.518 and subsection 2.34.5.518.B.2.

Exhibit A for 23.45.518: MR courtyard example
2. Upper-level setbacks in MR zones

   a. For lots abutting a street that is less than 56 feet in width, all portions of the structure above 70 feet in height must be set back 15 feet from the front lot line abutting that right-of-way.

   b. Projections allowed in subsection 23.45.518.H are allowed in upper-level setbacks.

   c. Structures allowed in subsection 23.45.518.J are not allowed in upper-level setbacks.

   d. Rooftop features are not allowed in upper-level setback except as follows:

       1) Open railings may extend up to 4 feet above the height at which the setback begins.

       2) Parapets may extend up to 2 feet above the height at which the setback begins.

C. HR zones. Minimum setbacks for HR zones are shown in Table C for 23.45.518.

Exhibit B for 23.45.518 ((‡))
HR ((Setbacks)) setbacks
D. Through lots. In the case of a through lot, each setback abutting a street except a side setback shall be a front setback. Rear setback requirements shall not apply to the lot.

E. Other setback requirements. Additional structure setbacks may be required in order to meet the provisions of Chapter 23.53, Requirements for Streets, Alleys, and Easements.
F. Separations between multiple structures ((-))

1. In LR and MR zones, the minimum required separation between principal structures at any two points on different interior facades is 10 feet, except for cottage housing developments, and principal structures separated by a driveway or parking aisle.

2. In LR and MR zones, if principal structures are separated by a driveway or parking aisle, the minimum required separation between the principal structures is 2 feet greater than the required width of the driveway or parking aisle, provided that the separation is not required to be any greater than 24 feet. If principal structures are separated by a driveway or parking aisle, projections that enclose floor area may extend a maximum of 3 feet into the required separation if they are at least 8 feet above finished grade.

3. Cottage housing developments in LR and MR zones:
   a. The minimum required separation between principal structures at any two points on different interior facades is 6 feet, unless there is a principal entrance on an interior facade, in which case the minimum separation required from that facade is 10 feet.
   b. Facades of principal structures shall be separated from facades of accessory structures by a minimum of 3 feet.

4. HR zones. Where two or more structures or portions of a structure above 85 feet in height are located on one lot, the minimum horizontal separation between interior facades in each height range is as provided in Table D for 23.45.518.

<table>

G. Front and rear setbacks and all separations on lots containing certain environmentally
critical areas or buffers may be reduced pursuant to Sections 25.09.280 and 25.09.300.

H. Projections permitted in required setbacks and separations

1. Cornices, eaves, gutters, roofs, and other forms of weather protection may
project into required setbacks and separations a maximum of 4 feet if they are no closer than
3 feet to any lot line.

2. Garden windows and other features that do not provide floor area may project a
maximum of 18 inches into required setbacks and separations if they:

a. Are a minimum of 30 inches above the finished floor;

b. Are no more than 6 feet in height and 8 feet wide; and

c. Combined with bay windows and other features with floor
area, make up no more than 30 percent of the area of the facade.

3. Bay windows and other features that provide floor area may project a
maximum of 2 feet into required setbacks and separations if they:

a. Are no closer than 5 feet to any lot line;

b. Are no more than 10 feet in width; and

c. Combined with garden windows and other features

included in subsection 23.45.518.H.2, make up no more than 30 percent of the area of the facade.

4. Unenclosed decks up to 18 inches above existing or finished grade, whichever
is lower, may project into required setbacks or separations to the lot line.

5. Unenclosed porches or steps

a. Unenclosed porches or steps no higher than 4 feet above existing grade,
or the grade at the street lot line closest to the porch, whichever is lower, may extend to within
4 feet of a street lot line, except that portions of entry stairs or stoops not more than 2.5 feet in height from existing or finished grade, whichever is lower, excluding guard rails or hand rails, may extend to a street lot line. See Exhibit C for 23.45.518.

b. Unenclosed porches or steps no higher than 4 feet above existing grade may project into the required rear setback or required separation between structures a maximum of 4 feet provided they are a minimum of 5 feet from a rear lot line.

c. Unenclosed porches or steps permitted in required setbacks and separations shall be limited to a combined maximum width of 20 feet.

Exhibit C for 23.45.518
Setbacks for unenclosed porches

4 feet of a street lot line, except that portions of entry stairs or stoops not more than 2.5 feet in height from existing or finished grade, whichever is lower, excluding guard rails or hand rails, may extend to a street lot line. See Exhibit C for 23.45.518.

b. Unenclosed porches or steps no higher than 4 feet above existing grade may project into the required rear setback or required separation between structures a maximum of 4 feet provided they are a minimum of 5 feet from a rear lot line.

c. Unenclosed porches or steps permitted in required setbacks and separations shall be limited to a combined maximum width of 20 feet.

Exhibit C for 23.45.518
Setbacks for unenclosed porches

Exhibit C for 23.45.518: Setbacks for unenclosed porches

d. Permitted porches or steps may be covered, provided that no portions of the cover-structure, including any supports, are closer than 3 feet to any lot line.

6. Fireplaces and chimneys may project up to 18 inches into required setbacks or separations.

((4)) 7. Unenclosed decks and balconies may project a maximum of 4 feet into required setbacks if each one is:
((4) a. No closer than 5 feet to any lot line;)

((2) b. No more than 20 feet wide; and)

((3) c.Separated from other decks and balconies on the same facade of the structure by a distance equal to at least 1/2 the width of the projection.

((4)) I. Structures in required setbacks or separations, except upper-level setbacks

1. Detached garages, carports, or other accessory structures may be located in required separations and required rear or side setbacks, subject to the following requirements:

   a. Any accessory structure located between a principal structure and a side lot line shall provide the setback required for the principal structure;

   b. Any portion of an accessory structure located more than 25 feet from a rear lot line shall be set back at least 5 feet from the side lot line;

   c. Accessory structures shall be set back at least 7 feet from any lot line that abuts a street; and

   d. Accessory structures shall be separated by at least 3 feet from all principal structures, including the eaves, gutters, and other projecting features of the principal structure.

2. Ramps or other devices necessary for access for the disabled and elderly that meet the Seattle Residential Code, Chapter 3, or Seattle Building Code, Chapter 11, Accessibility, are permitted in any required setback or separation.

3. Uncovered, unenclosed pedestrian bridges, necessary for access and 5 feet or less in width, are permitted in any required setback or separation.

4. Underground structures are permitted in any required setback or separation.
5. Solar collectors may be permitted in required setbacks or separations, pursuant to the provisions of Section 23.45.545.

6. Freestanding structures, signs and similar structures 6 feet or less in height above existing or finished grade, whichever is lower, may be erected in each required setback or separation, provided that signs meet the provisions of Chapter 23.55, Signs.

7. Fences ((–))
   a. Fences no greater than 6 feet in height are permitted in any required setback or separation, except that fences in the required front setback extended to side lot lines or in street side setbacks extended to the front and rear lot lines may not exceed 4 feet in height. Fences located on top of a bulkhead or retaining wall are also limited to 4 feet. If a fence is placed on top of a new bulkhead or retaining wall used to raise grade, the maximum combined height is limited to 9.5 feet.
   b. Up to 2 feet of additional height for architectural features such as arbors or trellises on the top of a fence is permitted, if the architectural features are predominately open.
   c. Fence height may be averaged along sloping grades for each 6-foot-long segment of the fence, but in no case may any portion of the fence exceed 8 feet in height when the height permitted by subsection ((23.45.518.17.a)) 23.45.518.17.a is 6 feet, or 6 feet in height when the height permitted by subsection ((23.45.518.17.a)) 23.45.518.17.a is 4 feet.

8. Bulkheads and retaining walls ((–))
   a. Bulkheads and retaining walls used to raise grade may be placed in each required setback if they are limited to 6 feet in height, measured above existing grade. A guardrail no higher than 42 inches may be placed on top of a bulkhead or retaining wall existing as of January 3, 1997.
b. Bulkheads and retaining walls used to protect a cut into existing grade may not exceed the minimum height necessary to support the cut or 6 feet measured from the finished grade on the low side, whichever is greater. If the bulkhead is measured from the low side and it exceeds 6 feet, an open guardrail of no more than 42 inches meeting Seattle Residential Code or Seattle Building Code requirements may be placed on top of the bulkhead or retaining wall. Any fence shall be set back a minimum of 3 feet from such a bulkhead or retaining wall.

9. Arbors may be permitted in required setbacks or separation under the following conditions:

a. In each required setback or separation, an arbor may be erected with no more than a 40-square-foot footprint, measured on a horizontal roof plane inclusive of eaves, to a maximum height of 8 feet. At least 50 percent of both the sides and the roof of the arbor shall be open, or, if latticework is used, there shall be a minimum opening of 2 inches between crosspieces.

b. In each required setback abutting a street, an arbor over a private pedestrian walkway with no more than a 30-square-foot footprint, measured on the horizontal roof plane and inclusive of eaves, may be erected to a maximum height of 8 feet. At least 50 percent of the sides of the arbor shall open, or, if latticework is used, there shall be a minimum opening of 2 inches between crosspieces.

10. Above-grade green stormwater infrastructure (GSI) features are allowed without setback or separation restrictions if:

a. Each above-grade GSI feature is less than 4.5 feet tall, excluding piping;

b. Each above-grade GSI feature is less than 4 feet wide; and
c. The total storage capacity of all above-grade GSI features is no greater than 600 gallons.

11. Above-grade GSI features larger than what is allowed in subsection 23.45.518.I.10 are allowed within a required setback or separation if:

a. Above-grade GSI features do not exceed ten percent coverage of any one setback or separation area;

b. No portion of an above-grade GSI feature is located closer than 2.5 feet from a side lot line; and

c. No portion of an above-grade GSI feature projects more than 5 feet into a front or rear setback area.

 Exceptions for existing single-family structures (⊂)

1. In all multifamily zones, certain additions to a single-family dwelling unit may extend into a required side setback if the structure is already nonconforming with respect to that setback, and if the presently nonconforming section is at least 60 percent of the total width of the respective facade of the structure prior to the addition. The line formed by the nonconforming wall of the structure shall be the limit to which any additions may be built, which may extend up to the height limit and may include basement additions (Exhibit D for 23.45.518), provided that additions shall be at least 3 feet from the side lot line.

2. An existing single-family dwelling unit in a Lowrise LR zone may be converted to a multifamily use without conforming to setback standards for apartments in subsection 23.45.518.A, provided that the building envelope is not changed. For the purposes of this subsection 23.45.518.K.2, “existing single-family dwelling unit” is one that
was established under permit as of October 31, 2001, or for which a permit has been granted and the permit has not expired on October 31, 2001.

Exhibit D for 23.45.518
Permitted additions into required setbacks for existing single-family dwelling units

((L. In LR zones, a minimum upper-level setback from all street lot lines is required in addition to any required ground-level setback, as follows:

1. For structures with a 30 foot height limit according to Table A for 23.45.514, the upper-level setback requirement is 12 feet above a height of 34 feet.
2. For structures with a 40 foot height limit according to Table A for 23.45.514, the upper-level setback requirement is 16 feet above a height of 44 feet.

3. The minimum upper-level setback shall be provided at all points along the length of the street property line as measured from finished grade.

4. In addition to the projections permitted in subsection 23.45.518.H, open railings, and parapets that are predominantly transparent above a height of 1.5 feet, may be located in the required upper-level setback.

Section 40. Section 23.45.520 of the Seattle Municipal Code, last amended by Ordinance 124378, is amended as follows:

23.45.520 HR zone ((width and floor size limits)) upper-level development standards

((A. In HR zones, for structures over 85 feet in height, portions of structures above a height of 45 feet are limited to a maximum facade width of 110 feet. The width of the structure measured along the longest street lot line may be increased as follows, provided that if both street lot lines are of the same length, the increase in the width of the facade is only permitted along one street lot line:

1. A maximum facade width of 130 feet is permitted, provided that the average gross floor area of all stories above 45 feet in height does not exceed 10,000 square feet; or

2. If the applicant earns bonus residential floor area by providing all of the affordable housing within the project pursuant to Section 23.58A.014, the maximum facade width of the structure above 45 feet in height is 150 feet, provided that the average gross floor area of all stories above 45 feet in height does not exceed 12,000 square feet.

B. All portions of structures above 85 feet in height that reach the maximum facade width limit specified in subsection 23.45.520.A must be separated from any other portion of a...)}
structure on the lot above 45 feet at all points by the minimum horizontal distance shown on
Table D for 23.45.518, except that projections permitted in required setbacks and separations
pursuant to subsections 23.45.518.H and 23.45.518.I are permitted.))

A. For the purpose of this Section 23.45.520, a “tower” is any portion of a structure that
exceeds 45 feet in height, excluding rooftop features permitted above the height limit. Rooftop
features permitted above the height limit shall not be included in calculating the gross floor
area per story and floor area coverage of a tower.

B. If any proposed or existing structures in HR zones exceed a height of 85 feet,
excluding rooftop features permitted above the height limit, all structures or portions of
structures greater than 45 feet in height are subject to following standards:

1. A structure may have one or more towers.
2. The maximum width of an individual tower is 130 feet.
3. The average gross floor area per story of an individual tower shall not exceed
10,000 square feet and the maximum gross floor area for any individual story of an individual
tower shall not exceed 10,500 square feet.
4. The average floor area coverage of all existing and proposed towers on the lot
shall not be more than 60 percent of the lot area.
5. Where two or more towers are located on the lot, the minimum horizontal
separation between proposed towers or between proposed and existing towers shall be 40 feet.
Section 41. Subsection 23.45.522.A of the Seattle Municipal Code, which section was last amended by Ordinance 124952, is amended as follows:

23.45.522 Amenity area

A. Amount of amenity area required for rowhouse and townhouse developments and apartments in LR zones

1. The required amount of amenity area for rowhouse and townhouse developments and apartments in LR zones is equal to 25 percent of the lot area.

2. A minimum of 50 percent of the required amenity area shall be provided at ground level, except that amenity area provided on the roof of a structure that meets the provisions of subsection (23.45.510.D.5) may be counted as amenity area provided at ground level.

3. For rowhouse and townhouse developments, amenity area required at ground level may be provided as either private or common space.

4. For apartments, amenity area required at ground level shall be provided as common space.

* * *

Section 42. Section 23.45.529 of the Seattle Municipal Code, last amended by Ordinance 124843, is amended as follows:

23.45.529 Design standards

A. Intent. The intent of the design standards in this Section 23.45.529 is to:

1. Enhance street-facing and side facades to provide visual interest, promote new development that contributes to an attractive streetscape, and avoid the appearance of blank walls along a street or adjacent residential property;
2. Foster a sense of community by integrating new pedestrian-oriented multifamily development with the neighborhood street environment and promoting designs that allow easy surveillance of the street by area residents;

3. Promote livability in multifamily areas by providing a sense of openness and access to light and air; and

4. Encourage the compatibility of a variety of housing types with the scale and character of neighborhoods where new multifamily development occurs.

B. Application of provisions. The provisions of this Section 23.45.529 apply to all residential uses that do not undergo any type of design review pursuant to Chapter 23.41, except single-family dwelling units.

C. Treatment of street-facing facades. For the purposes of this subsection 23.45.529.C, a “street-facing facade” includes all vertical surfaces enclosing interior space, including gables and dormers, as shown in Exhibit A for 23.45.529.
Exhibit A for 23.45.529
Measurement of ((Street-facing Facades)) facades
1. Facade openings
   a. At least 20 percent of the area of each street-facing facade shall consist of windows and/or doors, except as provided in subsection 23.45.529.C.1.b. If a front and side facade are street-facing, the two facades may be combined for the purpose of this calculation.
   b. For any rowhouse or townhouse dwelling unit that has (a) both a front and a side facade that are street-facing, the percentage of the side street-facing facade required to consist of windows and/or doors is reduced to (10) ten percent for the portion of the facade associated with that dwelling unit. This reduction to (10) ten percent is not allowed if the facades are combined for the purpose of this standard pursuant to subsection 23.45.529.C.1.a or if any of the exceptions in subsection 23.45.529.C.3 are applied.
   c. Windows count toward the requirement for facade openings in this subsection 23.45.529.C.1 only if they are transparent. Windows composed of glass blocks or opaque glass, garage doors, and doors to utility and service areas (1) do not count.

2. Facade articulation
   a. If a street-facing facade or portion of a street-facing facade is not vertical, the Director shall determine whether the facade is substantially vertical and required to comply with this subsection 23.45.529.C.
   b. If the street-facing facade of a structure exceeds 750 square feet in area, division of the facade into separate facade planes is required (see Exhibit B for 23.45.529).
   c. In order to be considered a separate facade plane for the purposes of this subsection 23.45.529.C.2, a portion of the street-facing facade shall have a minimum area
of 150 square feet and a maximum area of 500 square feet, and shall project or be recessed from abutting facade planes by a minimum depth of 18 inches.

d. Trim that is a minimum of 0.75 inches deep and 3.5 inches wide is required to mark roof lines, porches, windows, and doors on all street-facing facades.

Exhibit B for 23.45.529 Street-facing (Facades) facades
3. The Director may allow exceptions to the facade (openings) requirements in subsection 23.45.529.C.1 and the facade articulation requirements in subsection 23.45.529.C.2, if the Director determines that the street-facing facade will meet the intent of subsection 23.45.529.A.1, and the intent of subsections 23.45.529.E.2, 23.45.529.F.3, and 23.45.529.G.4 for cottage housing developments, rowhouse developments, and townhouse developments, respectively, through one or more of the following street-facing facade treatments:

a. Variations in building materials and/or color, or both, that reflect the stacking of stories or reinforce the articulation of the facade;
b. Incorporation of architectural features that add interest and dimension to the facade, such as porches, bay windows, chimneys, pilasters, columns, cornices, and/or balconies;

c. Special landscaping elements provided to meet Green Factor requirements pursuant to Section 23.45.524, such as trellises, that accommodate vegetated walls covering a minimum of 25 percent of the facade surface;

d. Special fenestration treatment, including an increase in the percentage of windows and doors to at least 25 percent of the street-facing facade(s).

D. Treatment of side facades that are not street-facing. For the purposes of this subsection 23.45.529.D, a side facade that is not street-facing includes all vertical surfaces enclosing interior space, including gables and dormers, as shown in Exhibit A for 23.45.529, if located within 10 feet of a side lot line.

1. If the side facade of a structure that is not street-facing exceeds 1,000 square feet in area, one of the following must be met:

   a. A portion of the side facade with a minimum area of 250 square feet and a maximum area of 750 square feet shall project or be recessed from abutting facade planes by a minimum depth of 18 inches; or

   b. The side facade shall include vertical or horizontal variations in building materials or color, covering a minimum of 25 percent of the facade surface.

2. Structures shall be designed to maintain the privacy of dwelling units by minimizing placement of proposed windows where they would directly align with windows on the side facade of a structure on an abutting lot located within 20 of the side property line or by
use of fencing, screening, landscaping, or translucent windows to create privacy between buildings.

((D)) E. Design standards for cottage housing developments ((c))

1. Pedestrian entry. Each cottage with a street-facing (façade) facade that is located within 10 feet of the street lot line shall have a visually prominent pedestrian entry through the use of covered stoops, porches, or other architectural entry features. For cottages on corner lots that have more than one street-facing (façade) facade within 10 feet of the street lot line, a visually prominent pedestrian entry is required on only one of the street-facing facades. Access to these entrances may be through a required private amenity area that abuts the street.

2. Architectural expression. Cottage housing developments shall include architectural details that reduce the visual scale of the units. Each cottage shall employ one or more of the following design techniques to reduce visual scale of the units:

   a. Attached covered porch;
   b. Roofline features such as dormers or clerestories;
   c. Bay windows;
   d. Variation in siding texture and materials; and
   e. Other appropriate architectural techniques demonstrated by the applicant to reduce the visual scale of cottages.

((E)) F. Design standards for rowhouse developments ((c))

1. Pedestrian entry. Each rowhouse unit shall have a pedestrian entry on the street-facing facade that is designed to be visually prominent through the use of covered
stoops, porches, or other architectural entry features. For rowhouse units on corner lots, a visually prominent pedestrian entry is required on only one of the street-facing facades.

2. Front setback. Design elements to provide a transition between the street and the rowhouse units, such as landscaping, trees, fences, or other similar features, are required in the front setback.

3. Architectural expression. The street-facing facade of a rowhouse unit shall provide architectural detail or composition to visually identify each individual rowhouse unit as seen from the street. Design elements such as trim or molding, modulation, massing, color and material variation, or other similar features may be used to achieve visual identification of individual units. Rooftop features, such as dormers or clerestories, or roofline variation may be used to visually identify individual rowhouse units.

(F) G. Design standards for townhouse developments

1. Building orientation. Townhouse developments shall maximize the orientation of individual units to the street by complying with one of the following conditions:
   a. At least 50 percent of the townhouse units shall be located so that there is no intervening principal structure between the unit and the street, unless the intervening principal structure was established under permit as of October 31, 2001, or was granted a permit on October 31, 2001, and the permit has not expired; or
   b. All townhouse units shall have direct access to a common amenity area meeting the requirements of Section 23.45.522 that either abuts the street or is visible and accessible from the street by a clear pedestrian pathway.

2. Pedestrian pathway. A clear pedestrian pathway from the street to the entrance of each townhouse unit shall be provided. The pedestrian pathway may be part of a
driveway, provided that the pathway is differentiated from the driveway by pavement color, texture, or similar technique. Signage identifying townhouse unit addresses and the directions to the unit entrance(s) from the street shall be provided.

3. **Pedestrian entry.** Each townhouse unit (façade) with a street-facing facade shall have a pedestrian entry on the street-facing facade that is designed to be a visually prominent feature through the use of covered stoops, porches, or other architectural entry features. For townhouse units on corner lots, a visually prominent pedestrian entry is required on only one of the street-facing facades.

4. **Architectural expression.** Architectural detail or composition shall be provided to visually identify each individual townhouse unit, as seen from the public street. Design elements such as trim or molding, modulation, massing, color and material variation, or other similar features may be used to achieve visual identification of individual units. Rooftop features such as dormers or clerestories, or roofline variation may be used to visually identify individual townhouse units.

5. **Building entry orientation standards for apartments (façade)**

   1. For each apartment structure, a principal shared pedestrian entrance is required that faces either a street or a common amenity area, such as a landscaped courtyard, that abuts and has direct access to the street. Additional pedestrian entrances to individual units are permitted.

   2. If more than one apartment structure is located on a lot, each apartment structure separated from the street by another principal structure shall have a principal entrance that is accessible from a common amenity area with access to the street.
3. The shared entrance of each apartment structure shall have a pedestrian entry that is designed to be visually prominent, through the use of covered stoops, overhead weather protection, a recessed entry, or other architectural entry features.

Section 43. A new Section 23.45.530 of the Seattle Municipal Code is added as follows:

23.45.530 Green building standards

For projects exceeding the floor area ratio (FAR) in Table A for 23.45.530, the applicant shall make a commitment that the proposed development will meet the green building standard and shall demonstrate compliance with that commitment, all in accordance with Chapter 23.58D.

Section 44. Section 23.45.536 of the Seattle Municipal Code, last amended by Ordinance 125272, is amended as follows:

23.45.536 Parking location, access, and screening

A. Off-street parking spaces are required to the extent provided in Chapter 23.54, Quantity and Design Standards for Access, Off-Street Parking, and Solid Waste Storage.

B. Location of parking

1. If parking is required, it shall be located on the same lot as the use requiring the parking, except as otherwise provided in this subsection 23.45.536.B.
2. Surface parking

   a. Except as otherwise provided in this subsection 23.45.536.B, surface parking may be located anywhere on a lot except:

   ((a. between)) 1) Between a principal structure and a street lot line;

   ((b. in)) 2) In the required front setback or side street side setback; and

   ((e. within)) 3) Within 20 feet of any street lot line.

   b. If access is taken directly from an alley, surface parking may be located anywhere within 25 feet from an alley lot line provided it is no closer than 7 feet to any street lot line.

3. Parking in a structure. Parking may be located in a structure or under a structure, provided that no portion of a garage that is higher than 4 feet above existing or finished grade, whichever is lower, shall be closer to a street lot line than any part of the street-level, street-facing facade of the structure in which it is located;

4. On a through lot, parking may be located between the structure and one front lot line. The front setback in which the parking may be located will be determined by the Director based on the prevailing character and setback patterns of the block.

5. On waterfront lots in the Shoreline District, parking may be located between the structure and the front lot line, if necessary to prevent blockage of view corridors or to keep parking away from the edge of the water, as required by Chapter 23.60A, Shoreline Master Program Regulations.
6. Parking accessory to a residential use may be located on a lot within 800 feet of the lot where the residential use that requires the parking is located, provided that:
   a. ((the)) The lot is not located in a single-family zone; and
   b. ((the)) The requirements of Section 23.54.025 are met.

C. Access to parking

1. Alley access required. Except as otherwise expressly required or permitted in subsections 23.45.536.C or 23.45.536.D, access to parking shall be from the alley if the lot abuts an alley and one of the conditions in this subsection 23.45.536.C.1 is met; ((s))
   a. The alley is improved to the standards of subsection 23.53.030.C; or
   b. The development gains additional FAR pursuant to subsection 23.45.510.C; or
   e)) b. The Director determines that alley access is feasible and desirable to mitigate parking access impacts, improve public safety, and/or maintain on-street parking capacity.

2. Street access required. Access to parking shall be from the street if:
   a. The lot does not abut an alley.
   b. The lot abuts an alley, and the Director determines that the alley should not be used for access for one or more of the following reasons:
      1) Due to the relationship of the alley to the street system, use of the alley for parking access would create a significant safety hazard;
      2) Topography makes alley access infeasible; or
      3) The alley is on the uphill side of a steeply sloping lot, and the following conditions are met:
a) Access from the street is to a common parking garage in or under the structure, located a maximum of 4 feet above grade.

b) The siting of development results in an increased Green Factor score, larger ground-level amenity areas, and/or reduced surface parking area than if alley access is used.

3. On corner lots, if street access is permitted pursuant to subsection 23.45.536.C.2, the applicant may determine the street from which access is taken, unless the Director determines that the use of the street chosen by the applicant would create a significant safety hazard.

4. On steeply sloping lots, the Director may permit the use of both an alley and a street for access, provided that the following conditions are met:

   a. Access from the street is to a common parking garage in or under the structure, that is underground or extends no more than 4 feet above grade.

   b. The siting of development results in an increased Green Factor score, larger ground-level amenity areas, and/or reduced surface parking area than if alley access alone is used.

   ((c. In LR zones, if the project uses both the alley and street for access to parking other than required barrier-free parking spaces, the project does not qualify for the higher FAR limit in subsection 23.45.510.B.))

5. Access to required barrier-free parking spaces that meet the standards in the Seattle Residential Code, Section R322, or the Seattle Building Code, Chapter 11, may be from ((either)) the street ((or alley, or both)) where alley access would otherwise be required if
providing access from an alley would reduce accessibility to a dwelling unit for persons with disabilities.

6. If the alley is used for access, the alley shall be improved according to the standards in subsections 23.53.030.E and 23.53.030.F, except that if a development gains additional FAR pursuant to subsection 23.45.510.C, the alley shall be paved rather than improved with crushed rock, even for lots containing fewer than ten units.

7. If the lot does not abut an improved alley or street, access may be permitted from an easement that meets the provisions of Chapter 23.53, Requirements for Streets, Alleys, and Easements.

8. If street access is required, either:
   a. Driveways that provide access from the street to garages opening on a street-facing facade of individual townhouse or rowhouse units shall be paved with permeable materials; or
   b. Access to a majority of garages opening on street-facing facades of individual townhouse or rowhouse units shall be provided by shared driveways.

D. Screening of parking

1. Parking shall be screened from direct street view by:
   a. The street-facing facade of a structure;
   b. Garage doors;
   c. A fence or wall; or
   d. Landscaped areas, including bioretention facilities or landscaped berms.
2. Screening provided by a fence, wall, or vegetation in a landscaped area shall not be located within any required sight triangle and shall meet the following conditions:
   a. The fence, wall, or vegetation in the landscaped area shall be at least 3 feet tall measured from the elevation of the curb, or from the elevation of the street if no curb is present. If the elevation of the ground at the base of the fence, wall, or landscaped area is higher than the finished elevation of the parking surface, the difference in elevation may be measured as a portion of the required height of the screen, so long as the fence, wall, or vegetation in the landscaped area is at least 3 feet in height. If located in a setback, the fence or wall shall meet the requirements of subsection (23.45.518.17).
   b. The fence, wall, or vegetation in the landscaped area shall be set back at least 3 feet from the lot line.

3. Screening by garage doors. If parking is provided in a garage in or attached to a principal structure and garage door(s) face a street, the garage door(s) may be no more than 75 square feet in area.

E. Other provisions. Garage doors in LR zones and MR zones facing the street shall be set back at least 18 feet from the street lot line, and shall be no closer to the street lot line than the street-facing facade of the structure.

Section 45. Section 23.45.545 of the Seattle Municipal Code, last amended by Ordinance 124378, is amended as follows:

23.45.545 Standards for certain accessory uses

* * *

I. In LR zones, accessory dwelling units are allowed, in single-family, rowhouse, and townhouse units, as follows:
1. One accessory dwelling unit is allowed for each single-family, rowhouse, or townhouse unit that is a “principal unit”. A “principal unit” is a dwelling unit that is not an accessory dwelling unit.

2. The owner of a principal unit shall comply with the owner occupancy requirements of subsection 23.44.041.C.

3. The height limit for a detached accessory dwelling unit is 20 feet, except that the ridge of a pitched roof on a detached accessory dwelling may extend up to 3 feet above the 20-foot height limit. All parts of the roof above the height limit shall be pitched at a rate of not less than 4:12. No portion of a shed roof is permitted to extend beyond the 20-foot height limit.

((3)) 4. The maximum gross floor area of an accessory dwelling unit is 650 square feet, provided that the total gross floor area of the accessory dwelling unit does not exceed 40 percent of the total gross floor area in residential use on the lot or unit lot, if present, exclusive of garages, storage sheds, and other non-habitable spaces.

((4)) 5. An accessory dwelling unit shall be located completely within the same structure as the principal unit or in an accessory structure located between the single-family, rowhouse, or townhouse unit and the rear lot line.

((5)) 6. The entrance to an accessory dwelling unit provided within the same structure as the principal unit shall be provided through one of the following configurations:

a. Through the primary entry to the principal unit; or

b. Through a secondary entry on a different facade than the primary entry to the principal unit; or
c. Through a secondary entry on the same facade as the primary entry to
the principal unit that is smaller and less visually prominent than the entry to the principal unit,
and does not have a prominent stoop, porch, portico, or other entry feature.

((6)) 7. Exterior stairs. Exterior stairs providing access to an accessory dwelling
unit may not exceed 4 feet in height, except for exterior stairs providing access to an accessory
dwelling unit located above a garage.

((4)) 8. Parking. Parking is not required for an accessory dwelling unit.

(J. An accessory dwelling unit within an established single-family dwelling unit or on
the lot of an established single-family dwelling unit shall be considered an accessory use to the
single-family dwelling unit, shall meet the standards listed for accessory dwelling units in
Section 23.44.041, and shall not be considered a separate dwelling unit for any development
standard purposes in multifamily zones.

(K)) 1. Urban farms are subject to the standards in Section 23.42.051 and the conditional
use requirement in subsection 23.45.504.C.8.

Section 46. Section 23.47A.002 of the Seattle Municipal Code, last amended by
Ordinance 125267, is amended as follows:

23.47A.002 Scope of provisions

A. This Chapter 23.47A describes the authorized uses and development standards for the
following zones:

1. Neighborhood Commercial 1 (NC1);

2. Neighborhood Commercial 2 (NC2);

3. Neighborhood Commercial 3 (NC3);

4. Commercial 1 (C1); and
5. Commercial 2 (C2).

((B) Zones listed in subsection 23.47A.002.A and having an incentive zoning suffix are subject to this Chapter 23.47A and Chapter 23.58A, Incentive Provisions.

C. Zones listed in subsection 23.47A.002.A that have a mandatory housing affordability suffix of either (M), (M1), or (M2) are subject to this Chapter 23.47A and to the provisions of Chapters 23.58B and 23.58C. Specific provisions for zones with a mandatory housing affordability suffix are in Section 23.47A.017.

D) B. Some land in (C zones and NC) these zones may be regulated by Subtitle III, Division 3, Overlay Districts, of this Title 23.

(E) C. Other regulations, including but not limited to (major marijuana activity (Section 23.42.058)) general use provisions (Chapter 23.42); requirements for streets, alleys, and easements (Chapter 23.53); standards for parking quantity, access, and design (Chapter 23.54); standards for solid waste storage (Chapter 23.54); signs (Chapter 23.55); communications regulations (Chapter 23.57); and methods for measurements (Chapter 23.86) may apply to development proposals. (Communication utilities and accessory communication devices, except as exempted in Section 23.57.002, are subject to the regulations in this Chapter 23.47A and additional regulations in Chapter 23.57, Communications Regulations.))
Section 47. Subsection 23.47A.005.D of the Seattle Municipal Code, which section was last amended by Ordinance 125272, is amended as follows:

23.47A.005 Street-level uses

* * *

D. In pedestrian-designated zones the locations of uses are regulated as follows:

1. Along designated principal pedestrian streets, one or more of the following uses are required along 80 percent of the street-level, street-facing facade in accordance with the standards provided in subsection 23.47A.008.C.

   a. Arts facilities;
   b. Community gardens;
   c. Eating and drinking establishments;
   d. Entertainment uses, except for adult cabarets, adult motion picture theaters, and adult panorams;
   e. Food processing and craft work;
   f. Institutions, except hospitals or major institutions;
   g. Lodging uses;
   h. Medical services;
   i. Offices, provided that no more than 30 feet of the street-level, street-facing facade of a structure may contain an office use;
   j. Parks and open spaces;
   k. Rail transit facilities;
1. Retail sales and services, automotive, in the Pike/Pine Conservation Overlay District if located within an existing structure or within a structure that retains a character structure as provided in Section 23.73.015;

   m. Sales and services, general, provided that no more than 40 feet of the street-level, street-facing facade of a structure on a principal pedestrian street may contain a customer services office; and

   n. Sales and services, heavy, except for heavy commercial sales, and provided that no more than 30 feet of the street-level, street-facing facade of a structure may contain a non-household sales and service use.

   The establishment of any such use is subject to the applicable use provisions of this Title 23.

2. The following streets are principal pedestrian streets when located within a pedestrian-designated zone:

   10th Avenue;

   11th Avenue;

   12th Avenue;

   13th Avenue, between East Madison Street and East Pine Street;

   14th Avenue South, except within the North Beacon Hill Residential Urban Village;

   15th Avenue East;

   15th Avenue Northeast, north of Lake City Way Northeast;

   15th Avenue Northwest;

   17th Avenue Northwest;
20th Avenue Northwest;
22nd Avenue Northwest;
23rd Avenue;
24th Avenue Northwest;
25th Avenue Northeast;
32nd Avenue West;
35th Avenue Northeast, except within the Lake City Hub Urban Village;
35th Avenue Southwest, except within the West Seattle Junction Hub Urban Village;
39th Avenue Northeast;
Aurora Ave North, except within the Bitter Lake Village Hub Urban Village;
Ballard Avenue ((NW)) Northwest;
Beacon Avenue South;
Boren Avenue;
Boylston Avenue, except within the Pike/Pine Conservation Overlay District;
Broadway;
Broadway East;
California Avenue Southwest;
Delridge Way Southwest;

Section 48. Section 23.47A.008 of the Seattle Municipal Code, last amended by Ordinance 125272, is amended as follows:

**23.47A.008 Street-level development standards**

A. Basic street-level requirements

1. The provisions of this subsection 23.47A.008.A apply to:
   a. Structures in NC zones;
   b. Structures that contain a residential use in C zones;
   c. Structures in C zones across the street from residential zones; and
   d. All structures in pedestrian-designated zones.

2. Blank facades

   a. For purposes of this Section 23.47A.008, facade segments are considered blank if they do not include at least one of the following:

   1) Windows;
   2) Entryways or doorways;
   3) Stairs, stoops, or porticos;
   4) Decks or balconies; or
   5) Screening and landscaping on the facade itself.

   b. Blank segments of the street-facing facade between 2 feet and 8 feet above the sidewalk may not exceed 20 feet in width.

   c. The total of all blank facade segments may not exceed 40 percent of the width of the facade of the structure along the street.
3. Street-level, street-facing facades shall be located within 10 feet of the street lot line, unless wider sidewalks, plazas, or other approved landscaped or open spaces are provided.

B. Non-residential street-level requirements

1. In addition to the provisions of subsection 23.47A.008.A, the provisions of this subsection 23.47A.008.B apply to:
   a. Structures with street-level non-residential uses in NC zones;
   b. Structures with street-level non-residential uses that also contain residential uses in C zones;
   c. Structures with street-level non-residential uses in C zones across the street from residential zones; and
   d. All structures in pedestrian designated zones.

2. Transparency
   a. Sixty percent of the street-facing facade between 2 feet and 8 feet above the sidewalk shall be transparent. For purposes of calculating the 60 percent of a structure’s street-facing facade, the width of a driveway at street level, not to exceed 22 feet, may be subtracted from the width of the street-facing facade if the access cannot be provided from an alley or from a street that is not a designated principal pedestrian street.
   b. Transparent areas of facades shall be designed and maintained to provide views into and out of the structure. Except for institutional uses, no permanent signage, window tinting or treatments, shelving, other furnishings, fixtures, equipment, or stored items shall completely block views into and out of the structure between 4 feet and 7 feet above
adjacent grade. The installation of temporary signs or displays that completely block views may be allowed if such temporary sign complies with subsection 23.55.012.B.

3. Depth provisions for new structures or new additions to existing structures.
Non-residential uses shall extend an average depth of at least 30 feet and a minimum depth of 15 feet from the street-level, street-facing facade. If the combination of the requirements of Sections 23.47A.005 or 23.47A.008 and this depth requirement would result in a requirement that an area greater than 50 percent of the structure’s footprint be dedicated to non-residential use, the Director may modify the street-facing facade or depth requirements, or both, so that no more than 50 percent of the structure’s footprint is required to be non-residential.

4. Height provisions for new structures or new additions to existing structures.
Non-residential uses at street level shall have a floor-to-floor height of at least 13 feet.

C. In addition to the provisions of subsections 23.47A.008.A and 23.47A.008.B, the following standards also apply in pedestrian designated zones:

1. A minimum of 80 percent of the width of a structure’s street-level, street-facing facade that faces a principal pedestrian street shall be occupied by uses listed in subsection 23.47A.005.D.1. The remaining 20 percent of the street frontage may contain other permitted uses and/or pedestrian entrances (see Exhibit A for 23.47A.008).
Exhibit A for 23.47A.008
Uses and pedestrian access allowed along street-level, street-facing facades
2. For purposes of calculating the 80 percent of a structure’s street-level facade, the width of a driveway at street level, not to exceed 22 feet, may be subtracted from the width of the street-facing facade if the access cannot be provided from an alley or from a street that is not a designated principal pedestrian street.

3. If the street-facing facade and depth requirements would result in a requirement that an area greater than 50 percent of the structure’s footprint be dedicated to the uses in subsection 23.47A.005.D.1, the Director may modify the street-facing facade or depth requirements, or both, so that no more than 50 percent of the structure’s footprint is required to be dedicated to the uses in subsection 23.47A.005.D.1.
4. Overhead weather protection

   a. Continuous overhead weather protection (i.e., canopies, awnings, marquees, and arcades) is required along at least 60 percent of the street frontage of a structure on a principal pedestrian street, except for structures within the Pike/Pine Conservation Overlay District on lots that contain a character structure as provided in Chapter 23.73.

   b. The covered area shall have a minimum width of 6 feet, unless there is a conflict with existing or proposed street trees or utility poles, in which case the width may be adjusted to accommodate such features as provided in subsection 23.47A.008.C.4.f.

   c. The overhead weather protection must be provided over the sidewalk, or over a walking area within 10 feet immediately adjacent to the sidewalk. When provided adjacent to the sidewalk, the covered walking area must be at the same grade or within 18 inches of sidewalk grade and meet Washington state requirements for barrier-free access.

   d. The lower edge of the overhead weather protection shall be a minimum of 8 feet and a maximum of 12 feet above the sidewalk for projections extending a maximum of 6 feet. For projections extending more than 6 feet from the structure, the lower edge of the weather protection shall be a minimum of 10 feet and a maximum of 15 feet above the sidewalk.

   e. Adequate lighting for pedestrians shall be provided. The lighting may be located on the facade of the building or on the overhead weather protection.

   f. Where the standards listed in this subsection 23.47A.008.C.4 conflict with the vertical and horizontal clearance requirements in the street rights-of-way, the standards may be modified by the Director in consultation with the Director of Transportation.
5. Maximum width and depth limits

a. The maximum width and depth of a structure, or of a portion of a structure for which the limit is calculated separately according to subsection 23.47A.008.C.5.b, is 250 feet, except as otherwise provided in subsection 23.47A.008.C.5.c.

b. For purposes of this subsection 23.47A.008.C.5, the width and depth limits shall be calculated separately for a portion of a structure if:

1) There are no connections allowing direct access, such as hallways, bridges, or elevated stairways, between that portion of a structure and other portions of a structure; or

2) The only connections between that portion of a structure and other portions of a structure are in stories, or portions of a stories, that are underground or extend no more than 4 feet above the sidewalk, measured at any point above the sidewalk elevation to the floor above the partially below-grade story, excluding access.

c. For purposes of this subsection 23.47A.008.C.5, the following portions of a structure shall not be included in measuring width and depth:

1) Designated Landmark structures that are retained on the lot.

2) Stories of a structure on which more than 50 percent of the total gross floor area is occupied by any of the following uses:

   a) Arts facilities;

   b) Community clubs or community centers;

   c) Preschool, elementary, or secondary schools;

   d) Performing arts theaters; or

   e) Religious facilities.
D. Where residential uses are located along a street-level street-facing facade, the following requirements apply unless exempted by subsection 23.47A.008.G:

1. At least one of the street-level street-facing facades containing a residential use shall have a visually prominent pedestrian entry; and

2. The floor of a dwelling unit located along the street-level street-facing facade shall be at least 4 feet above or 4 feet below sidewalk grade or be set back at least 10 feet from the sidewalk. An exception to the standards of this subsection 23.44.008.D.2 may be granted as a Type I decision if the following criteria are met:

   a. An accessible route to the unit is not achievable if the standard is applied or existing site conditions such as topography make access impractical if the standard is applied;

   b. The floor is at least 18 inches above average sidewalk grade or 4 feet below sidewalk grade, or is set back at least 10 feet from the sidewalk; and

   c. The visually prominent pedestrian entry is maintained.

E. When a live-work unit is located on a street-level street-facing facade, the provisions of subsections 23.47A.008.A and 23.47A.008.B, and the following requirements, apply:

1. The portion of each such live-work unit in which business is conducted must be located between the principal street and the residential portion of the live-work unit. The non-residential portions of the unit shall extend the width of the street-level street-facing facade, shall extend a minimum depth of 15 feet from the street-level street-facing facade, and shall not contain any of the primary features of the residential (live) portion of the live-work
unit, such as kitchen, bathroom, sleeping, or laundry facilities. These basic residential features shall be designed and arranged to be separate from the work portion of the live-work unit.

2. Each live-work unit must include an exterior sign with the name of the business associated with the live-work unit. Such signage shall be clearly associated with the unit and visible to pedestrians outside of the building.

3. The owner of each live-work unit must keep a copy of the current business license associated with the business located in that unit on file.

F. The Director may allow exceptions to the street-level requirements of this Section 23.47A.008, as a Type I decision, for projects that are not subject to the Design Review process, except that in a pedestrian-designated zone exceptions may not be granted for requirements for residential uses at street level, transparency requirements, or floor-to-floor height requirements as described in subsection 23.41.012.B. Exceptions may be granted if the Director determines that the project will maintain the safety and aesthetics of the streetscape for pedestrians and will:

1. ((maintain)) Maintain pedestrian access to the structure;

2. ((maintain)) Maintain urban form consistent with adjacent structures and previous design review decisions on the site;

3. ((maintain)) Maintain the visibility of non-residential uses;

4. ((maintain)) Maintain the privacy of residential uses; or

5. ((allow)) Allow the continued use of an existing structure without substantial renovation.
G. In a structure existing on January 1, 2012, an accessory dwelling unit may be established if it is accessory to an existing dwelling unit and if it meets minimum housing standards of Chapter 22.206, even if nonconforming to standards of subsection 23.47A.008.D. Section 49. Section 23.47A.009 of the Seattle Municipal Code, last amended by Ordinance 125361, is amended as follows:

23.47A.009 Standards applicable to specific areas

A. Resolution of standards conflicts. To the extent there is a conflict between this Section 23.47A.009 and other sections of Title 23, the provisions of this Section 23.47A.009 apply.

B. West Seattle Junction Hub Urban Village. The following provisions apply to development in the NC3 (85(4.75)) 95 zone located between SW Alaska Street, SW Edmunds Street, Fauntleroy Way SW, and 40th Ave SW:

1. Lot coverage limit. The maximum lot coverage permitted for principal and accessory structures shall not exceed 80 percent on lots 40,000 square feet in size or greater.

2. The total permitted FAR is as identified in Section 23.47A.013.

3. Maximum width of structures. The maximum width of all portions of a structure measured parallel to a north-south street lot line is 275 feet.

4. Setback and separation requirements

a. The following standards apply to structures greater than 250 feet in width measured parallel to a north-south street lot line:

1) A minimum separation of 30 feet is required between structures that are adjacent to the same north-south street lot line; and
2) A minimum setback of 15 feet is required from side lot lines that are not street side lot lines and that separate lots that abut the same north-south street lot line; and

3) Structures permitted in required setback and separation areas pursuant to this subsection 23.47A.009.B.4.a and subsection 23.47A.009.B.4.b are subject to subsection (23.47A.014.E)) 23.47A.014.G. In addition:

   a) Decks with open railings may project up to 5 feet into the required setback or separation area if they are no lower than 20 feet above existing or finished grade. Decks may cover no more than 20 percent of the total setback or separation area.

   b) Unenclosed porches or steps for residential units no higher than 4 feet above the grade at the street lot line closest to the porch are permitted.

   b. A setback of at least 10 feet from the street lot line is required along non-arterial north-south avenues for at least 25 percent of the lot frontage or 100 feet of the lot frontage, whichever is less.

   c. Required setback and areas separating structures identified in subsections 23.47A.009.B.4.a and 23.47A.009.B.4.b shall include landscaping, paving, and lighting. Sidewalks for pedestrian access, plazas, or other approved amenity or landscaped areas are permitted in required setback or separation areas.

   d. Upper-level setback requirements along SW Alaska Street

      1) Structures exceeding 65 feet in height on lots abutting SW Alaska Street between 38th Avenue SW and California Avenue SW shall maintain a minimum setback of 10 feet for that portion of the structure between 45 feet and 55 feet in height.
2) For portions of a structure above 55 feet in height, an additional minimum setback is required at a rate of at least 1 foot of setback for every 5 feet of height that exceeds 55 feet, up to the maximum allowable height.

3) Structures located within 100 feet of Fauntleroy Way SW are exempt from the upper-level setback requirement.

4) Heights in this subsection 23.47A.009.B.4.d shall be measured from the middle of the street lot line along SW Alaska Street.

C. Bitter Lake Village Hub Urban Village. Development on lots designated on Map A for 23.47A.009 shall meet the following requirements:
Map A for 23.47A.009
Standards Applicable to Specific Areas: Bitter Lake
1. Upper-level setback requirement. The following standards apply to development on lots abutting the east side of Linden Ave North or along both sides of the corridor required in subsection 23.47A.009.C.2.

   a. Any portion of a structure greater than 45 feet in height, measured from the finished grade along the street property line that abuts Linden Avenue North or along the access corridor required in subsection 23.47A.009.C.2, measured from the finished grade along the edge of the access corridor, shall set back an average of 10 feet from the lot line abutting Linden Avenue North or from the edge of the access corridor as measured according to Section 23.86.012. The maximum depth of a setback that can be used for calculating the average setback is 20 feet.

   b. Structures permitted in required setbacks are subject to subsection ((23.47A.014.E)) 23.47A.014.G.

2. Corridor requirement. An access corridor shall be provided on lots over ((eight)) 8 acres that abut Linden Avenue North and Aurora Avenue North, to connect Linden Avenue North and Aurora Avenue North. The location of the proposed corridor shall be clearly shown on the site plan that is submitted with the permit application.

   a. The corridor shall have a minimum width of 40 feet and a maximum width of 60 feet.

   b. The point at which the corridor intersects Linden Avenue North and Aurora Avenue North shall be at least 335 feet south of the south boundary of the North 135th Street right-of-way, and 700 feet north of the north boundary of the North 130th Street right-of-way, as illustrated by example in Map A for 23.47A.009.
c. The corridor shall include a minimum of one walkway, at least 6 feet wide, extending between Linden Avenue North and Aurora Avenue North. If vehicle access is provided within the corridor, the corridor shall include walkways at least 6 feet wide along both sides of the vehicle access.

d. Landscaping shall be provided along the corridor. If vehicle access is provided within the corridor, trees shall be provided between the walkways and vehicle travel lanes. The Director will determine the number, type, and placement of trees to be provided in order to:

1) Match trees to the available space;

2) Complement existing or planned street trees on abutting streets; and

3) Encourage healthy growth through appropriate spacing.

e. Pedestrian-scaled lighting shall be provided along the corridor.

f. The corridor shall not include any features or structures except the following:

1) Vehicle access, not more than one lane in each direction and meeting the standards of Section 23.54.030.

2) Parking meeting the standards of Section 23.54.030 is allowed along vehicle access lanes within the corridor. Such parking is in addition to the maximum number of spaces allowed under subsection 23.54.015.C.2. The requirements of subsection 23.47A.032.A do not apply to access to parking from the corridor.
3) Overhead horizontal building projections of an architectural or decorative character such as cornices, eaves, sills, and gutter, provided that they project no more than 18 inches from the structure facade.

4) Ramps or other devices that provide access for the disabled and elderly and that meet the standards of the Seattle Building Code are permitted.

5) Stairs or ramps to accommodate changes in grade.

6) Underground structures.

7) Unenclosed porches or steps for residential units no higher than 4 feet above the finished grade of the corridor are permitted to project no more than 4 feet into the corridor.

8) Green stormwater infrastructure.

9) Features required elsewhere in this subsection 23.47A.009.C.2.

10) The Director may approve other features or structures, such as overhead weather protection, signage, and art, that do not impede safe access from the site to Linden Avenue North and Aurora Avenue North, and that enhance pedestrian comfort and safety of the corridor.

g. If the area proposed for development on a site meeting the size threshold for this subsection 23.47A.009.C.2 is less than the full lot, the Director may waive or modify the access corridor requirement, if the applicant submits a site plan demonstrating how Linden Avenue North and Aurora Avenue North will be connected by an access corridor when the remainder of the lot is developed.

D. Roosevelt Urban Village. The following provisions apply within the area shown on Map B for 23.47A.009.
1. Setback requirements

   a. The following setbacks are required from the listed street property lines:

      1) Northeast 66th Street. An average ground-level setback of 10 feet along the length of the street property line and a minimum upper-level setback of 4 feet. The minimum upper-level setback shall be provided in addition to the required ground-level setback at all points along the length of the street property line at 45 feet of height and above, as measured from average finished grade.

      2) Brooklyn Avenue Northeast. An average ground-level setback of 5 feet along the length of the street property line and a minimum upper-level setback of 4 feet.
The minimum upper-level setback shall be provided in addition to the required ground-level setback at all points along the length of the street property line at 45 feet of height and above, as measured from average finished grade.

3) 14th Avenue Northeast. An average ground-level setback of 15 feet and a minimum ground-level setback of 5 feet along the length of the street property line and a minimum upper-level setback of 3 feet. The minimum upper-level setback shall be provided in addition to the required ground-level setback at all points along the length of the street property line at 45 feet of height and above, as measured from average finished grade.

4) 15th Avenue Northeast. A minimum ground-level setback of 5 feet along the length of the street property line and an average upper-level setback of 7 feet. The average upper-level setback shall be provided in addition to the required ground-level setback at all points along the length of the street property line at 45 feet of height and above, as measured from average finished grade.

5) Northeast 65th Street and 12th Avenue Northeast. An average ground-level setback of 8 feet shall be provided, and the setback may include pedestrian access and circulation.

b. Structures permitted in required setbacks are subject to subsection ((23.47A.014.E)) 23.47A.014.G, except that:

1) Decks with open railings may project up to 5 feet into the required setback area if they are no lower than 20 feet above existing or finished grade. Decks may cover no more than 20 percent of the total setback area.

2) Stoops or porches providing direct access to individual housing units may project up to 5 feet into the required ground-level setback area, except that portions of
stoops or porches not more than 2.5 feet in height from existing or finished grade, whichever is
lower, may extend to a street lot line. The 2.5-foot height limit for stoops or porches does not
apply to guard rails or hand rails. Such stoops or porches shall cover no more than 20 percent of
the total ground-level setback area.

3) Fences no greater than 4 feet in height are permitted in the
required ground-level setback, and up to 2 feet of additional height for architectural features such
as arbors or trellises on the top of a fence is permitted. Fence height may be averaged along
sloping grades for each 4-foot-long segment of the fence, but in no case may any portion of the
fence exceed 6 feet in height.

c. Where required setbacks may be averaged, measurement shall be
pursuant to subsection 23.86.012.A and the following:

1) Where a building is ((setback)) set back more than 30 feet from
a lot line at ground level, 30 feet shall be used as the ground-level setback amount for averaging
purposes.

2) Where averaging is allowed for a required upper-level setback,
the measurement shall be taken horizontally from points directly above the lot line to the facade
of the structure at the height where the upper-level setback is required.

2. Landscaping. Required ground-level setbacks shall be landscaped, and may
include paving and lighting to enhance pedestrian safety and comfort. Sidewalks, plazas, and
other amenities or landscaped areas approved by the ((Seattle Department of Construction and
Inspections)) Director are permitted in required ground-level setbacks.

3. Limit on commercial uses. Commercial uses are prohibited within 80 feet of
the street property line of Northeast 66th Street, except within 50 feet of the intersections of
Northeast 66th Street with Brooklyn Avenue Northeast, 14th Avenue Northeast, 12th Avenue Northeast, and 15th Avenue Northeast, as shown on Map B for 23.47A.009.

4. Housing units on the ground floor. All housing units with a facade that faces Northeast 66th Street with no intervening housing units or commercial uses between the housing unit and the Northeast 66th Street lot line, and located on the first floor of a building, shall have the primary pedestrian entrance to each housing unit directly accessible from the exterior of the structure rather than a primary pedestrian entry through a common entrance hallway.

5. Underground parking. Parking shall be located below grade, except a portion of a below-grade garage may extend up to 4 feet above existing or finished grade, whichever is lower, provided that the parking that extends above grade is fully screened from direct street view by the street-facing facade of the structure or by landscaping.

E. Lake City. The following provisions apply to development proposed on lots that are 40,000 square feet in size or greater and located in NC zones as shown on Map C for 23.47A.009.
Map C for 23.47A.009
Lots where Lake City area-specific development standards apply
1. Maximum lot coverage

   a. The maximum lot coverage permitted for principal and accessory structures is 80 percent of the lot area.

   b. Lot coverage exceptions. The following structures or portions of structures are not counted in the lot coverage calculation:

      1) Portions of a structure that are below grade or that do not extend more than 4 feet above the finished grade.

      2) The first 18 inches of overhead horizontal building projections of an architectural or decorative character, such as cornices, eaves, sills, and gutters.

      3) Ramps or other devices that provide access for the disabled and elderly and that meet the standards of the Seattle Building Code.

      4) The first 4 feet of unenclosed porches or steps for residential units.

   c. In the portion of the lot that is not covered by structures, owners are encouraged to provide improvements at-grade that enhance the usability and livability of the lot for occupants and visitors, such as pedestrian circulation areas, landscaping, lighting, weather protection, art, or other similar improvements.

2. Facade modulation

   a. Facade modulation requirements apply to all portions of a structure up to a height of 35 feet and located within 10 feet of a street lot line on streets designated by Map C for 23.47A.009.
b. The maximum width of any unmodulated facade is 100 feet. Facades longer than 100 feet shall be modulated by stepping back the facade from the street lot line for a minimum depth of 10 feet and a minimum width of 15 feet.

c. Facade modulation requirements do not apply to portions of a structure that are below grade or that do not extend more than 2 feet above the finished grade at the lot line.

3. Maximum structure width

a. On streets designated by Map C for 23.47A.009, the maximum allowed structure width is 250 feet.

b. Structure width limits do not apply to portions of a structure that are below grade or that do not extend more than 2 feet above the finished grade at the lot line.

4. Upper-level setbacks

a. On streets designated by Map C for 23.47A.009, a setback with an average depth of 10 feet from abutting street lot lines is required for portions of a structure above a height of 35 feet. The maximum depth of a setback that can be used to calculate the average setback is 20 feet.

b. A setback with an average depth of 15 feet from abutting street lot lines is required for portions of a structure above a height of 65 feet. The maximum depth of a setback that can be used to calculate the average setback is 25 feet.

5. Structures permitted in required setbacks are subject to subsection (23.47A.014.E) 23.47A.014.G.

F. Ballard Hub Urban Village. The following provisions apply to development proposed in NC zones within the Ballard Hub Urban Village.
1. Maximum lot coverage on lots 40,000 square feet in size or greater:
   a. The maximum lot coverage permitted for principal and accessory structures is 80 percent of the lot area.
   b. Lot coverage exceptions. The following structures or portions of structures are not counted in the lot coverage calculation:
      1) Portions of a structure that are below grade or that do not extend more than 4 feet above the existing or finished grade, whichever is lower.
      2) The first 18 inches of overhead horizontal building projections of an architectural or decorative character, such as cornices, eaves, sills, and gutters.
      3) Ramps or other devices that provide access for the disabled and elderly and that meet the standards of the Seattle Building Code.
      4) The first 4 feet of unenclosed porches or steps for residential units.
   c. In the 20 percent of the lot that remains uncovered, as required by this subsection 23.47A.009.F.1, not more than ten parking spaces may be provided, and applicants are encouraged to provide elements at-grade that enhance the usability and livability of the lot for residents and tenants such as pedestrian circulation areas, landscaping, lighting, weather protection, art, or other similar features.

2. Facade modulation
   a. Facade modulation requirements apply to all portions of a street-facing facade of a structure up to a height of 45 feet located within 10 feet of a street lot line, according to provisions of subsection 23.47A.009.F.2.c.
b. The maximum width of any unmodulated street-facing facade is 100 feet. Facades longer than 100 feet shall be modulated at no greater than 100-foot intervals by stepping back the facade from the street lot line for a minimum depth of 10 feet and a minimum width of 15 feet.

c. Facade modulation requirements do not apply to portions of a structure that are below grade or that do not extend more than 2 feet above the existing or finished grade at the street lot line, whichever is lower.

3. Maximum structure width

a. The maximum allowed structure width is 250 feet.

b. Structure width limits do not apply to portions of a structure that are below grade or that do not extend more than 2 feet above the existing or finished grade at the street lot line, whichever is lower.

4. Setback requirements

a. Street-level setbacks

1) In the area shown on Map D for 23.47A.009, portions of a structure up to 10 feet above the abutting sidewalk grade facing 15th Avenue NW shall be set back from the street lot line by a minimum depth of 6 feet up to a maximum depth of 10 feet.

b. Upper-level setbacks

1) A setback with an average depth of 10 feet from all abutting street lot lines is required for portions of a structure above a height of 45 feet. The maximum depth of a setback that can be used for calculating the average setback is 20 feet.
2) A setback with an average depth of 15 feet from all street lot lines is required for portions of a structure above a height of 65 feet. The maximum depth of a setback that can be used for calculating the average setback is 25 feet.

5. Structures permitted in required setback and separation areas according to this subsection 23.47A.009.F are subject to subsection (23.47A.014.E)) 23.47A.014.G.
Map D for 23.47A.009

Areas Where Street-level Setbacks are Required

G. University Community Urban Center. The following provisions apply to specified NC zones within the portion of the University Community Urban Center west of 15th Avenue NE.

1. Maximum width and depth limits. The following standards apply to NC zones with a mapped height limit exceeding 40 feet:
a. The maximum width and depth of a structure is 250 feet, except as otherwise provided in this subsection 23.47A.009.G.1. The width and depth limits do not apply to below-grade or partially below-grade stories with street-facing facades that do not extend more than 4 feet above the sidewalk, measured at any point above the sidewalk elevation to the floor above the partially below-grade story, excluding access.

b. For the stories of a structure subject to width and depth limits, all portions of the same story that are horizontally contiguous, including any portions connected by doorways, ramps, bridges, elevated stairways, and other such features, shall be included in the measurement of width and depth. The width and depth limit of stories in separate structures or structures on the same lot that abut but are not internally connected shall be measured separately.

Designated Landmark structures and vulnerable masonry structures included on a list promulgated by the Director that are retained on the lot are excluded from the width and depth measurement, whether or not internally or externally connected to a new structure.

c. Width and depth limits do not apply to stories of a structure with more than 50 percent of the total gross floor area occupied by any of the following uses:

   1) Community clubs or community centers;

   2) Religious facilities;

   3) Arts facilities;

   4) Preschool, elementary, or secondary schools; or

   5) Performing arts theaters.
2. Provisions for the transfer of development rights (TDR) and transfer of development potential (TDP)

   a. Lots located in NC3 and NC3P zones with height limits of 55 feet or greater are eligible as open space, vulnerable masonry structure, or Landmark TDR and TDP sending sites if the lot meets the definition of the applicable TDR or TDP sending site in Chapter 23.84A and meets all applicable standards in Section 23.58A.042.

   b. The maximum amount of TDR and TDP that can be transferred from an eligible sending site shall not exceed an amount of floor area equivalent to the numerical value of the FAR permitted on a lot that is solely occupied by residential uses or non-residential uses in the zone where the sending site is located, as shown on Table A for 23.47A.013, (and Table A for 23.47A.017 for zones with a mandatory housing affordability suffix), multiplied by the lot area of the sending site and minus the sum of any chargeable floor area on the lot plus any TDR and TDP previously transferred.

   c. Eligible receiving sites are limited to those lots in SM-U zones specified in subsection 23.48.623.C.

H. 23rd and Union. The following provisions apply to development proposed in NC zones within the area shown on Map E for 23.47A.009.
Map E for 23.47A.009

Standards applicable to specific areas: 23rd & Union

1. Setback requirements. Setbacks are required along East Spring Street, East Pike Street, 22nd Avenue, and 24th Avenue as shown on Map E for 23.47A.009 as follows:
   a. A minimum street-level setback of 5 feet along the length of the street property line unless a larger setback is required by subsection 23.47A.008.D.2; and
b. A minimum upper-level setback of 15 feet for all portions of a structure greater than 35 feet in height as measured from the average finished grade along the sidewalk;

and

c. Structures permitted in required setbacks are subject to subsection (23.47A.014.E) 23.47A.014.G.

2. Street-level residential uses. Street-level residential uses are required along East Spring Street, East Pike Street, 22nd Avenue, and 24th Avenue as shown on Map E for 23.47A.009 except for the portions of East Pike Street and East Spring Street measured within 80 feet of the property line abutting 23rd Avenue and portion of 24th Avenue measured within 120 feet of the property line abutting East Union Street.
I. 23rd and Jackson. The following provisions apply to development proposed in NC zones within the area shown on Map F for 23.47A.009.

Map F for 23.47A.009

Standards applicable to specific areas: 23rd & Jackson

1. Setback requirements

   a. Along South Jackson Street facing property lines as shown on Map F for 23.47A.009, a minimum upper-level setback of 10 feet is required for all portions of a structure greater than 45 feet in height as measured from the average finished grade.

   b. Structures permitted in required setbacks are subject to subsection ((23.47A.014.E)) 23.47A.014.G.

2. Maximum structure width. On streets designated by Map F for 23.47A.009, the maximum allowed structure width is 250 feet. Facade modulation or building separation can be considered as a break in the maximum structure width if:
a. A portion of the street-facing facade projects or is recessed from abutting facade by a minimum depth of 15 feet and a minimum width of 15 feet; or

b. A building separation is provided with a minimum width of 15 feet between structures.

3. Pedestrian connection requirement. A proposal that includes development between South Main Street and South King Street and is located within 400 feet east of 23rd Avenue South shall provide a north-south pedestrian connection in area as shown on Map F for 23.47A.009, subject to the following requirements:

a. If the pedestrian connection is located adjacent to the right-of-way, it should be incorporated into existing or planned sidewalks.

b. The pedestrian connection shall have a minimum width of 15 feet, and include at least one of the following:

1) Entries to retail stores or other buildings;

2) Seating areas for pedestrians;

3) Street furniture;

4) Bicycle parking;

5) Landscaping;

6) Pedestrian scale lighting;

7) Water features; or

8) Overhead weather protection.

c. The pedestrian connection shall include a minimum 6-foot paved walkway width and shall be designed to connect to existing or planned sidewalks and crosswalks.
d. The connection may be located between structures, or may be located in a parking area if the paved walkway is separated from the parking area with special pavements or other treatments to protect pedestrians from vehicles.

Section 50. Section 23.47A.012 of the Seattle Municipal Code, last amended by Ordinance 125272, is amended as follows:

**23.47A.012 Structure height**

A. The height limit for structures in NC zones or C zones is as designated on the Official Land Use Map, Chapter 23.32. Structures may not exceed the applicable height limit, except as otherwise provided in this Section 23.47A.012.

1. In zones with a 30-foot or 40-foot mapped height limit:
   a. The height of a structure may exceed the otherwise applicable limit by up to 4 feet, subject to subsection 23.47A.012.A.1.c, provided the following conditions are met:
      1) Either:
         a) A floor-to-floor height of 13 feet or more is provided for non-residential uses at street level; or
         b) A residential use is located on a street-level, street-facing facade, provided that the average height of the exterior facades of any portion of a story that is partially below-grade does not exceed 4 feet, measured from existing or finished grade, whichever is less, and the first floor of the structure at or above grade is at least 4 feet above sidewalk grade; and
      2) The additional height allowed for the structure will not allow an additional story beyond the number that could be built under the otherwise applicable height limit.
b. The height of a structure may exceed the otherwise applicable limit by up to 7 feet, subject to subsection 23.47A.012.A.1.c, provided all of the following conditions are met:

1) Residential and (multi-purpose) retail sales uses are located in the same structure;

2) The total gross floor area of at least one multi-purpose retail sales use exceeds 12,000 square feet;

3) A floor-to-floor height of 16 feet or more is provided for the multi-purpose retail sales use at street level;

4) The additional height allowed for the structure will not allow an additional story beyond the number that could be built under the otherwise applicable height limit if a floor-to-floor height of 16 feet were not provided at street level; and

5) The structure is not allowed additional height under subsection 23.47A.012.A.1.a.

c. The Director shall reduce or deny the additional structure height allowed by this subsection 23.47A.012.A.1 if the additional height would significantly block views from neighboring residential structures of any of the following: Mount Rainier, the Olympic and Cascade Mountains, the downtown skyline, Green Lake, Puget Sound, Lake Washington, Lake Union, or the Ship Canal.

((2. For any lot within the designated areas shown on Map A for 23.47A.012, the height limit in NC zones or C zones designated with a 40 foot height limit on the Official Land Use Map may be increased to 65 feet and may contain floor area as permitted for a 65 foot zone, according to Section 23.47A.013, provided that all portions of the structure above 40 feet contain...))
only residential uses, and provided that no additional height is allowed under subsection

23.47A.012.A.1.)

((Map A for 23.47A.012

Areas where additional height is allowed))

Legend

25 feet of Additional Height
Permitted Pursuant to 23.47.012.A
((3)) 2. Within the Station Area Overlay District within the University Community Urban Center, maximum structure height may be increased to 125 feet when all of the following are met:

a. The lot is within two blocks of a planned or existing light rail station;

b. The proposed use of the lot is functionally related to other office development, permitted prior to 1971, to have over 500,000 square feet of gross floor area to be occupied by a single entity;

c. A transportation management plan for the life of the use includes incentives for light rail and other transit use by the employees of the office use;

d. The development shall provide street-level amenities for pedestrians and shall be designed to promote pedestrian interest, safety, and comfort through features such as landscaping, lighting, and transparent facades, as determined by the Director; and

e. This subsection (23.47A.012.A.3) can be used only once for each development that is functionally related.

((4)) 3. On a lot containing a peat settlement-prone environmentally critical area, the height of a structure may exceed the otherwise applicable height limit and the other height allowances provided by this Section 23.47A.012 by up to 3 feet. In addition, 3 more feet of height may be allowed for any wall of a structure on a sloped lot, provided that on the uphill sides of the structure, the maximum elevation of the structure height shall be no greater than the height allowed by the first sentence of this subsection (23.47A.012.A.3). The Director may apply the allowances in this subsection (23.47A.012.A.4) only if the following conditions are met:
a. The Director finds that locating a story of parking underground is infeasible due to physical site conditions such as a high water table;

b. The Director finds that the additional height allowed for the structure is necessary to accommodate parking located partially below grade that extends no more than 6 feet above existing or finished grade, whichever is lower, and no more than 3 feet above the highest existing or finished grade along the structure footprint, whichever is lower, as measured to the finished floor level above; and

c. Other than the additional story of parking allowed according to this subsection (23.47A.012.A.4), the additional height shall not allow an additional story beyond the number of stories that could be built under the otherwise applicable height limit.

(5) 4. In zones that are located within the Pike/Pine Conservation Overlay District with a mapped height limit of (65 feet, or with a mapped height limit of 40 feet with provisions allowing for additional height up to 65 feet according to subsection 23.47A.012.A.2)) 75 feet, the provisions of Section 23.73.014 apply.

B. The ridge of a pitched roof, other than a shed roof or butterfly roof, may extend up to 5 feet above the otherwise applicable height limit in zones with height limits of 30 or 40 feet, if all parts of the roof above the otherwise applicable height limit are pitched at a rate of not less than 4:12 (Exhibit A for 23.47A.012).
Exhibit A for 23.47A.012 (±)
Pitched (Roof Height Exception) roof height exception

Exhibit A for 23.47A.012
Pitched roof height exception

Minimum 4:12 Pitch

Minimum 4:12 pitch
C. Rooftop features

1. Smokestacks, chimneys, flagpoles, and religious symbols for religious institutions are exempt from height controls, except as regulated in Chapter 23.64, Airport Height Overlay District, provided they are a minimum of 10 feet from any side or rear lot line.

2. Open railings, planters, skylights, clerestories, greenhouses, solariums, parapets, and firewalls may extend as high as the highest ridge of a pitched roof permitted by subsection 23.47A.012.B or up to 4 feet above the otherwise applicable height limit, whichever is higher. Insulation material, rooftop decks and other similar features, or soil for landscaping located above the structural roof surface ((2)) may exceed the maximum height limit by up to ((two)) 2 feet if enclosed by parapets or walls that comply with this subsection 23.47A.012.C.2.

3. Solar collectors

   a. In zones with mapped height limits of 30 or 40 feet, solar collectors may extend up to 4 feet above the otherwise applicable height limit, with unlimited rooftop coverage.

   b. In zones with height limits of 65 feet or more, solar collectors may extend up to 7 feet above the otherwise applicable height limit, with unlimited rooftop coverage.

4. Except as provided below, the following rooftop features may extend up to 15 feet above the applicable height limit, as long as the combined total coverage of all features gaining additional height listed in this subsection 23.47A.012.C.4, including weather protection such as eaves or canopies extending from rooftop features, does not exceed 20 percent of the roof area, or 25 percent of the roof area if the total includes stair or elevator penthouses or screened mechanical equipment:

   a. Solar collectors;

   b. Mechanical equipment;
c. Play equipment and open-mesh fencing that encloses it, as long as the fencing is at least 15 feet from the roof edge;

d. Wind-driven power generators;

e. Minor communication utilities and accessory communication devices, except that height is regulated according to the provisions of Section 23.57.012; and

f. Stair and elevator penthouses may extend above the applicable height limit up to 16 feet. (When additional height is needed to accommodate energy-efficient elevators in zones with height limits of 125 feet or greater, elevator penthouses may extend the minimum amount necessary to accommodate energy-efficient elevators, up to 25 feet above the applicable height limit. Energy-efficient elevators shall be defined by Director’s Rule. When additional height is allowed for an energy-efficient elevator, stair penthouses may be granted the same additional height if they are co-located with the elevator penthouse.

5. Within the South Lake Union Urban Center, the combined total coverage of all features listed in subsection 23.47A.012.C.4 may be increased to 65 percent of the roof area, provided that the following are satisfied:

   a. The additional rooftop coverage allowed by this subsection 23.47A.012.C.5 is used to accommodate mechanical equipment that is accessory to a research and development laboratory; and

   b. All mechanical equipment is screened; and

   c. No rooftop features other than wind-driven power generators are located closer than 10 feet from the roof edge.

   6) 5. Greenhouses that are dedicated to food production are permitted to extend 15 feet above the applicable height limit if the combined total coverage of all features gaining
additional height listed in this subsection 23.47A.012.C does not exceed 50 percent of the roof area, and the greenhouse adheres to the setback requirements in subsection (23.47A.012.C.7))

((7)) 6. The rooftop features listed in this subsection (23.47A.012.C.7))

23.47A.012.C.6 shall be located at least 10 feet from the north lot line unless a shadow diagram is provided that demonstrates that locating such features within 10 feet of the north lot line would not shade property to the north on January (21st) at noon more than would a structure built to maximum permitted height and FAR:

a. Solar collectors;

b. Planters;

c. Clerestories;

d. Greenhouses and solariums;

e. Minor communication utilities and accessory communication devices,

permitted pursuant to the provisions of Section 23.57.012;

f. Non-firewall parapets; and

g. Play equipment.

((8)) 7. Structures existing prior to May 10, 1986, may add new or replace existing mechanical equipment up to 15 feet above the roof elevation of the structure and shall comply with the noise standards of Section 23.47A.018.

((9)) 8. For height limits and exceptions for communication utilities and accessory communication devices, see Section 23.57.012.

D. Solar ((Retrofits)) retrofits. The Director may permit the retrofitting of solar collectors on conforming or nonconforming structures existing on June 9, 1986, as a special exception
pursuant to Chapter 23.76, Procedures for Master Use Permits and Council Land Use Decisions.

Such a retrofit may be permitted to exceed established height limits, if the following conditions are met:

1. There is no feasible alternative solution to placing the collector(s) on the roof;
2. The positioning of such collector(s) minimizes view blockage and shading of property to the north, while still providing adequate solar access for the collectors; and
3. Such collector(s) meet minimum energy standards administered by the Director.

E. Height ((Exceptions for Public Schools.)) exceptions for public schools

1. For new public school construction on new public school sites, the maximum permitted height shall be the maximum height permitted in the zone.

2. For new public school construction on existing public school sites, the maximum permitted height shall be the maximum height permitted in the zone or 35 feet plus 15 feet for a pitched roof complying with subsection 23.47A.012.E.5, whichever is greater.

3. For additions to existing public schools on existing public school sites, the maximum height permitted shall be the maximum height permitted in the zone, the height of the existing school, or 35 feet plus 15 feet for a pitched roof complying with subsection 23.47A.012.E.5, whichever is greater.

4. Development standard departure for structure height may be granted pursuant to the procedures and criteria set forth in Chapter 23.79. For construction of new structures on new and existing public school sites to the extent not otherwise permitted outright, maximum height that may be granted as a development standard departure in zones with height limits of 30 or 40 feet shall be 35 feet plus 15 feet for a pitched roof complying with subsection
23.47A.012.E.5 for elementary schools and 60 feet plus 15 feet for a pitched roof complying with subsection 23.47A.012.E.5 for secondary schools. All height maximums may be waived by the Director when waiver would contribute to the demolition of fewer residential structures.

5. To qualify for additional height for a pitched roof under this subsection 23.47A.012.E, all parts of the roof above the height otherwise allowed must be pitched at a rate of not less than 3:12 and the roof must not be a shed roof or butterfly roof.

Section 51. Section 23.47A.013 of the Seattle Municipal Code, last amended by Ordinance 125267, is amended as follows:

**23.47A.013 Floor area ratio**

A. Floor area ratio (FAR) limits. (apply to all structures and lots in all NC zones and C zones) Except as provided in subsections 23.47A.013.C and 23.47A.013.D, FAR limits apply in C zones and NC zones as shown in Table A for 23.47A.013 and Table B for 23.47A.013. The applicable FAR limit applies to the total chargeable floor area of all structures on the lot.

((1. All gross floor area not exempt under subsection 23.47A.013.D is counted against the maximum gross floor area allowed by the permitted FAR.

2. If there are multiple structures on a lot, the highest FAR limit applicable to any structure on the lot applies to the combined non-exempt gross floor area of all structures on the lot, subject to subsection 23.47A.013.A.4.

3. Except as provided in subsection 23.47A.013.D.7, parking that is within or covered by a structure or portion of a structure and that is within a story that is not underground shall be included in gross floor area calculations.

4. If a lot is in more than one zone, the FAR limit for each zone applies to the portion of the lot located in that zone, and the floor area on the portion of the lot with the lower
FAR limit may not exceed the amount that would be permitted if it were a separate lot. If a lot is in both a multifamily zone and a commercial zone, the floor area on the commercial portion of the lot may not exceed the maximum that would be allowed if the commercial portion of the lot were a separate lot.

B. Except as provided in subsections 23.47A.013.C, 23.47A.013.D, 23.47A.013.E, 23.47A.013.F, and 23.47A.013.G, maximum FAR allowed in C zones and NC zones is shown in Table A for 23.47A.013, provided that if the commercial zone designation includes an incentive zoning suffix, then the applicant shall comply with Chapter 23.58A, Incentive Provisions, to obtain gross floor area exceeding that allowed by the FAR shown in the suffix designation.)

(D) B. The following gross floor area is not counted toward (maximum) FAR:

1. All (underground) stories, or portions of stories, that are underground;

2. All portions of a story that extend no more than 4 feet above existing or finished grade, whichever is lower, excluding access;

3. Gross floor area of a transit station, including all floor area open to the general public during normal hours of station operation but excluding retail or service establishments to which public access is limited to customers or clients, even where such establishments are primarily intended to serve transit riders;

4. Within First Hill, on lots zoned NC3 with a 160 foot height limit, all gross floor area occupied by a residential use;

5) 4. On a lot containing a peat settlement-prone environmentally critical area, above-grade parking within or covered by a structure or portion of a structure, if the Director finds that locating a story of parking below grade is infeasible due to physical site conditions such as a high water table, if either:

   a. The above-grade parking extends no more than 6 feet above existing or finished grade and no more than 3 feet above the highest existing or finished grade along the structure footprint, whichever is lower, as measured to the finished floor level or roof above, pursuant to subsection 23.47A.012.A.3; or

   b. All of the following conditions are met:

      1) No above-grade parking is exempted by subsection (23.47A.013.D.5.a)) 23.47A.013.B.4.a;

      2) The parking is accessory to a residential use on the lot;
3) Total parking on the lot does not exceed one space for each residential dwelling unit plus the number of spaces required for non-residential uses; and

4) The amount of gross floor area exempted by this subsection \((23.47A.013.D.5.b)\) \(23.47A.013.B.4.b\) does not exceed 25 percent of the area of the lot in zones with a height limit less than 65 feet, or 50 percent of the area of the lot in zones with a height limit 65 feet or greater; and

\((6)\) 5. Rooftop greenhouse areas meeting the standards of subsections \((23.47A.012.C.6\) and \(23.47A.012.C.7\)) \(23.47A.012.C.5\) and \(23.47A.012.C.6\).

\((E)\) C. Within the Station Area Overlay District within the University Community Urban Center, for office structures permitted prior to 1971, the area of the lot for purposes of calculating permitted FAR is the tax parcel created prior to the adoption of Ordinance 121846 on which the existing structure is located, provided the office structure is to be part of a functionally related development occupied by a single entity with over 500,000 square feet of area in office use. The floor area of above grade pedestrian access is exempt from the FAR calculations of this subsection \((23.47A.013.E)\) \(23.47A.013.C\), and the maximum permitted FAR is 8.

\((F)\) Within the West Seattle Junction Hub Urban Village, on lots zoned NC3 \((4.75)\), the total permitted FAR for all uses within a mixed-use structure containing residential and non-residential uses is 5.5.

\((G)\) D. Within the portion of the Greenwood Residential Urban Village, on lots zoned NC2 \((40)\) that are located abutting NW 85th Street between 1st Avenue NW and 3rd Avenue NW, the total permitted FAR within a mixed-use structure containing residential and non-residential uses is 4.
1. A minimum FAR shown in Table C for 23.47A.013 is required whenever more than 1,000 square feet of gross floor area is added to or removed from a lot located in:

a. A pedestrian-designated zone in an urban center, urban village, or Station Area Overlay District; or

b. The Northgate Overlay District and abutting a Major Pedestrian Street as shown on Map A for 23.71.004.

2. The minimum FAR requirement provided in subsection (H.1)

23.47A.013.E.1 does not apply if:

a. Additional floor area is added to an existing structure on a lot that is nonconforming with respect to the minimum FAR shown in Table C for 23.47A.013;

b. The lot is larger than five acres;
c. All existing gross floor area is demolished to create a vacant lot; or

d. Parks and open space is the principal use of the lot.

3. Portions of the lot designated as a steep slope, wetland, or riparian corridor or as a buffer to one of these areas, as defined in Chapter 25.09, shall not be included when calculating lot size for the purpose of determining the minimum FAR requirement provided in subsection ((23.47A.013.H.1)) 23.47A.013.E.1.

4. The Director, in consultation with the Director of the Department of Neighborhoods, may waive the minimum FAR requirement provided in subsection ((23.47A.013.H.1)) 23.47A.013.E.1 for lots that contain a designated Landmark, or for lots within a Landmark District pursuant to Title 25 or within a Special Review District pursuant to Chapter 23.66, if the Director determines a waiver is necessary to preserve the integrity of a Landmark or meet adopted District design and development guidelines.

5. The Director may waive the minimum FAR requirement provided in subsection ((23.47A.013.H.1)) 23.47A.013.E.1 for lots within the Pike/Pine Conservation Overlay District pursuant to Chapter 23.32, if the Director determines that the proposed development promotes neighborhood conservation objectives.

6. The following gross floor area is not counted toward the minimum FAR requirement provided in subsection ((23.47A.013.H.1)) 23.47A.013.E.1:

   a. ((Gross floor area below grade)) All stories, or portions of stories, that are underground; and

   b. Gross floor area containing parking.
7. In zones with an incentive zoning suffix, the minimum FAR requirement is the FAR indicated by the incentive zoning suffix if that FAR is less than the FAR required by subsection 23.47A.013.H.1.

Section 52. Section 23.47A.014 of the Seattle Municipal Code, last amended by Ordinance 125081, is amended as follows:

23.47A.014 Setback requirements

A. For the purposes of this Section 23.47A.014, “portions of structures” include those features listed in subsection 23.47A.012.C, Rooftop features. Rooftop features are not allowed in setbacks, except that for upper-level setbacks:

1. Open railings may extend up to 4 feet above the height at which the setback begins.

2. Parapets may extend up to 2 feet above the height at which the setback begins.

B. Setback requirements for lots abutting or across the alley from residential zones

1. A setback is required where a lot abuts the intersection of a side lot line and front lot line of a lot in a residential zone. The required setback forms a triangular area. Two sides of the triangle extend along the street lot line and side lot line 15 feet from the intersection of the residentially zoned lot’s front lot line and the side lot line abutting the residentially zoned lot. The third side connects these two sides with a diagonal line across the commercially zoned lot (Exhibit A for 23.47A.014).
Exhibit A for 23.47A.014

((Seatback)) Setback abutting a side ((or rear)) lot line of a residentially zoned lot

Exhibit A for 23.47A.014

Setback abutting a side or rear lot line of a residentially zoned lot

No development permitted in this area

No setback required unless front yard of abutting residentially zoned lot faces this street
2. **(A)** An upper-level setback is required along any rear or side lot line that abuts a lot in **(a residential)** an **LR, MR, or HR** zone or that abuts a lot that is zoned both commercial and **(residential)** **LR, MR, or HR** if the commercial zoned portion of the abutting lot is less than 50 percent of the width or depth of the lot, as follows:

   a. Ten feet for portions of structures above 13 feet in height to a maximum of 65 feet; and

   b. For each portion of a structure above 65 feet in height, additional setback at the rate of 1 foot of setback for every 10 feet by which the height of such portion exceeds 65 feet, up to a maximum setback of 20 feet (Exhibit B for 23.47A.014).
Exhibit B for 23.47A.014
Setback ((Abutting a Side or Rear Lot Line of a Residence-Zoned Lot)) abutting a side or rear lot line of a lot zoned LR, MR, or HR
3. (For a structure containing a residential use, a) An upper-level setback is required along any (side or) rear or side lot line that abuts a lot in (a residential) a single-family zone, (or) that is across an alley from a lot in (a residential) a single-family zone, or that abuts a lot that is zoned both commercial and (residential) single-family if the commercial zoned portion of the abutting lot is less than 50 percent of the width or depth of the lot((a)) as follows:

a. Fifteen feet for portions of structures above 13 feet in height to a maximum of 40 feet; and
b. For each portion of a structure above 40 feet in height, additional setback at the rate of \((2)\) \(\frac{3}{2}\) feet of setback for every 10 feet by which the height of such portion exceeds 40 feet (Exhibit C for 23.47A.014).

Exhibit C for 23.47A.014

((Setbacks for Structures with Residential Uses When Abutting)) **Setback abutting or across an alley from a ((Residentially-Zoned Lot)) lot zoned single-family**
4. One-half of the width of an abutting alley may be counted as part of the required setback. For the purpose of this Section 23.47A.014, the alley width and the location of the rear lot line shall be determined prior to any dedication that may be required for alley improvement purposes.

5. No entrance, window, or other opening is permitted closer than 5 feet to an abutting residentially-zoned lot.

C. Upper-level setbacks for street-facing facades. For zones with a height limit of 75 feet, 85 feet, or 95 feet, the street-facing facade shall be set back as follows:
1. For zones with a height limit of 75 feet, portions of structures above 65 feet must be set back from the front lot line by an average depth of 8 feet.

2. For zones with a height limit of 85 feet or 95 feet, portions of structures above 75 feet must be set back from the front lot line by an average depth of 8 feet.

3. Where a portion of the facade is set back more than 15 feet, the setback depth for that portion of the facade shall be considered 15 feet for purposes of calculating the average setback. No more than 20 percent of the portion of the structure that must be set back may have a setback of less than 5 feet.

D. Facade modulation. For structures with a width of more than 250 feet, at least one portion of the structure 30 feet or greater in width must be set back a minimum of 15 feet from the front property line. For structures with a width of more than 500 feet, at least two portions of the structure 30 feet or greater in width and separated by at least 100 feet must be set back a minimum of 15 feet from the front property line.

((E)) E. A minimum 5-foot landscaped setback may be required under certain conditions and for certain uses according to Section 23.47A.016, Screening and landscaping standards.

((D)) F. Mobile home parks. A minimum 5-foot setback is required along all street lot lines of a mobile home park. The setback must be landscaped according to the provisions of subsection 23.47A.016.D.2.

((E)) G. Structures and projections in required setbacks

1. Decks and balconies

   a. Decks with open railings may extend into the required setback, but are not permitted within 5 feet of a lot in a residential zone, except as provided in subsection ((23.47A.014.E.1.b)) 23.47A.014.G.1.b.
b. Decks that are accessory to residential uses and are no more than 18 inches above existing or finished grade, whichever is lower, are permitted within 5 feet of a lot in a residential zone.

2. Eaves, cornices, and gutters projecting no more than 18 inches from the structure facade are permitted in required setbacks.

3. Ramps or other devices necessary for access for the disabled and elderly, which meet Seattle Building Code, Chapter 11, are permitted in required setbacks.

4. Uncovered, unenclosed pedestrian bridges, necessary for access and less than 5 feet in width, are permitted in required setbacks.

5. Fences, bulkheads, freestanding walls, and other similar structures
   a. Fences, freestanding walls, and other similar structures 6 feet or less in height above existing or finished grade, whichever is lower, are permitted in required setbacks. The 6-foot height may be averaged along sloping grade for each 6-foot-long segment of the fence, but in no case may any portion of the fence exceed 8 feet.

   b. Bulkheads and retaining walls used to raise grade may be placed in any required setback when limited to 6 feet in height, measured above existing grade. A guardrail no higher than 42 inches may be placed on top of a bulkhead or retaining wall existing as of September 30, 1994. If a fence is placed on top of a new bulkhead or retaining wall, the maximum combined height is limited to ((9.5/2)) 9.5 feet.

   c. Bulkheads and retaining walls used to protect a cut into existing grade may not exceed the minimum height necessary to support the cut or 6 feet, whichever is greater. When the bulkhead is measured from the low side and it exceeds 6 feet, an open guardrail of no more than 42 inches meeting Building Code requirements may be placed on top of the bulkhead.
or retaining wall. A fence must be set back a minimum of 3 feet from such a bulkhead or retaining wall.

6. Setback requirements do not limit underground structures.

7. Detached solar collectors are permitted in required setbacks. Such collectors may be no closer than 5 feet to any other principal or accessory structure, and no closer than 3 feet to any lot line that abuts a residually zoned lot.

8. Dumpsters and other trash receptacles, except for trash compactors, located outside of structures are not permitted within 10 feet of any lot line that abuts a residential zone and must be screened per the provisions of Section 23.47A.016.

9. Green stormwater infrastructure (GSI) features are allowed without setback restrictions if:
   a. Each above-grade GSI feature is less than 4.5 feet tall, excluding piping;
   b. Each above-grade GSI feature is less than 4 feet wide; and
   c. The total storage capacity of all above-grade GSI features is no greater than 600 gallons.

10. Above-grade GSI features larger than what is allowed in subsection (23.47A.014.E.9) 23.47A.014.G.9 are allowed within a required setback if:
    a. Above-grade GSI features do not exceed ten percent coverage of any one setback area;
    b. No portion of an above-grade GSI feature is located closer than 2.5 feet from a side lot line;
    c. No portion of an above-grade GSI feature projects more than 5 feet into a front or rear setback area; and
d. Above-grade GSI features meet all applicable Building Code and Plumbing Code requirements.

((F)) H. Setback requirement for loading adjacent to an alley. Where access to a loading berth is from the alley, and truck loading is parallel to the alley, a setback of 12 feet is required for the loading berth, measured from the centerline of the alley (Exhibit D for 23.47A.014). This setback must be maintained up to a height of 12 feet.

Exhibit D for 23.47A.014
Structure (((Setback for Truck Loading)) setback for truck loading)
I. A setback may be required in order to meet the provisions of Section 23.53.015, Improvement requirements for existing streets in residential and commercial zones, and Section 23.53.030, Alley improvements in all zones.

Section 53. Section 23.47A.017 of the Seattle Municipal Code, last amended by Ordinance 125432, is amended as follows:

23.47A.017 ((Commercial zones with a mandatory)) Mandatory housing affordability

((suffix)) in C and NC zones

((The following standards apply to C or NC zones with a mandatory housing affordability suffix of either (M), (M1), or (M2);)) C and NC zones with a mandatory housing affordability suffix are subject to the provisions of Chapters 23.58B and 23.58C.

((A. Affordable housing requirements. Development is subject to the provisions of Chapters 23.58B and 23.58C.))
B. Floor area ratio (FAR). The maximum FAR allowed in C or NC zones with a mandatory housing affordability suffix is shown on Table A for 23.47A.017.

Section 54. Section 23.48.002 of the Seattle Municipal Code, last amended by Ordinance 125432, is amended as follows:

23.48.002 Scope of provisions

A. This Chapter 23.48 identifies uses that are or may be permitted in all Seattle Mixed zones and establishes development standards. The Seattle Mixed zone boundaries are shown on the Official Land Use Map. Seattle Mixed zone designations for specific geographic areas are identified in Table A for 23.48.002. The SM-SLU designation with a height limit suffix may be applied to SM-SLU zoned land in the South Lake Union Urban Center. The SM-D designation with a height limit range may be applied to SM-D zoned land in the West Dravus area. The SM-
NR designation with a height limit suffix may be applied to SM-NR zoned land in the North Rainier area. The SM-U designation with a height limit suffix may be applied to SM-U zoned land in the University Community Urban Center. The SM-UP designation with a height limit suffix may be applied to SM-UP zoned land in the Uptown Urban Center. The SM-RB designation with a height limit suffix may be applied to SM-RB zoned land in the Rainier Beach Urban Village.

B. Some land in these zones may be regulated by Subtitle III, Division 3, Overlay Districts, of this Title 23.

C. The provisions of this Subchapter I of Chapter 23.48 are applicable to all ((SM)) Seattle Mixed zones, including ((SM)) Seattle Mixed zones in geographic areas shown on Table A for 23.48.002. Supplemental regulations for ((SM)) Seattle Mixed zones in specific geographic areas are provided for in the subsequent subchapters of this Chapter 23.48. To the extent provisions in a supplemental subchapter conflict with provisions in this Subchapter I, the provisions of the supplemental subchapter shall prevail.

D. Other regulations, ((such as requirements for)) including but not limited to ((major marijuana activity (Section 23.42.058))) general use provisions (Chapter 23.42); requirements for streets, alleys, and easements (Chapter 23.53); ((quantity and design))
standards for parking quantity, access, (off-street parking,) and design (Chapter 23.54);

standards for solid waste storage (Chapter 23.54); signs (Chapter 23.55); communication regulations (Chapter 23.57); and measurements (Chapter 23.86) may apply to development proposals. (Communication utilities and accessory communication devices except as exempted in Section 23.57.002 are subject to the regulations in this Chapter 23.48 and additional regulations in Chapter 23.57.)

Section 55. Subsection 23.48.021.A of the Seattle Municipal Code, which section was last amended by Ordinance 125432, is amended as follows:

23.48.021 Extra floor area in Seattle Mixed zones

A. General

1. Development achieving extra floor area under (Section 23.48.020 or)

Section 23.48.025 shall provide public amenities according to the standards of this Section 23.48.021 and Chapter 23.58A. If the development is not located within an adopted Local Infrastructure Project Area as per Map A for 23.58A.044, extra floor area shall be achieved through the requirements of subsection 23.48.021.B. If the development is located within an adopted Local Infrastructure Project Area, extra floor area shall be achieved through the requirements of subsection 23.48.021.C.

2. Development achieving extra floor area in Seattle Mixed zones shall meet the conditions of this Section 23.48.021 and provide public amenities according to the standards of this Section 23.48.021 and Chapter 23.58A, except where supplemented in the applicable subchapter.

3. Definitions in Section 23.58A.004 apply in this Section 23.48.021 unless otherwise specified.
Section 56. Subsection 23.48.025.A of the Seattle Municipal Code, which section was last amended by Ordinance 125272, is amended as follows:

**23.48.025 Structure height**

**A. Height limits**

1. The height limits for structures in (Seattle Mixed) zones are as shown on the Official Land Use Map, Chapter 23.32, except as otherwise provided in this Section 23.48.025 or in the applicable subchapters of this Chapter 23.48 for (Seattle Mixed zone designations for specific geographic areas shown in Table A for 23.48.002. In certain zones, as specified in this Section 23.48.025, the maximum structure height is allowed only for particular uses or only under specified conditions, or both. Where height limits are established for portions of a structure that contain specified types of uses, the applicable height limit for the structure is the highest applicable height limit for the types of uses in the structure, unless otherwise specified.

2. In the SM-SLU (and SM-D and SM-NR) zones, the applicable height limit for portions of a structure that contain non-residential and live-work uses is shown as the first figure after the zone designation, and the base height limit for portions of a structure in residential use is shown as the first figure following the “/”. The third figure shown is the maximum residential height limit. (Within zones that have an incentive zoning suffix, the number in the suffix is the base FAR.)

* * *
Section 57. Section 23.48.040 of the Seattle Municipal Code, last amended by Ordinance 125432, is amended as follows:

**23.48.040 Street-level development standards**

A. Street-facing facade requirements. The following street-facing facade requirements apply to facades facing a Class 1, Class 2, or Class 3 Pedestrian Street, Neighborhood Green Streets, and all other streets, as shown on Map A for 23.48.240, Map A for 23.48.440, ((or)) Map A for 23.48.740, or Map A for 23.48.940:

1. Primary pedestrian entrance. In the SM-SLU, SM-NR, ((and)) SM-UP, and SM-RB zones, each new structure facing a Class 1 Pedestrian Street is required to provide a primary building entrance for pedestrians from the street or a street-oriented courtyard that is no more than 3 feet above or below the sidewalk grade.

2. Minimum facade height. In the SM-SLU, ((and)) SM-NR, and SM-RB zones, a minimum facade height is required for the street-facing facades of new structures, unless all portions of the structure are lower than the required minimum facade height listed below.

   a. On Class 1 Pedestrian Streets, the minimum height for street-facing facades is 45 feet.

   b. On Class 2 Pedestrian Streets and Neighborhood Green Streets, the minimum height for street-facing facades is 25 feet.

   c. On all other streets, the minimum height for street-facing facades is 15 feet.

B. Transparency and blank facade requirements. In the SM-SLU, SM-NR, SM-U, ((and the)) SM-UP, and SM-RB zones, the provisions of this subsection 23.48.040.B apply to the area of a street-facing facade between 2 feet and 8 feet above a sidewalk but do not apply to portions...
of a structure in residential use or, within the SM-U ((district)) District, to portions of a structure in use as a light rail transit station.

1. Transparency requirements

   a. In the SM-SLU, SM-NR, SM-U, ((and)) SM-UP, and SM-RB zones, on Class 1, Class 2, and Class 3 Pedestrian Streets and Neighborhood Green Streets, a minimum of 60 percent of the street-facing facade must be transparent, except that if the slope of the street frontage abutting the lot exceeds 7.5 percent, the required amount of transparency is 45 percent of the street-facing facade.

   b. In the SM-SLU, SM-D, SM-NR, SM-U, ((and)) SM-UP, and SM-RB zones, for all other streets not specified in subsection 23.48.040.B.1.a, a minimum of 30 percent of the street-facing facade must be transparent, except that if the slope of the street frontage abutting the lot exceeds 7.5 percent, the minimum amount of transparency required is 22 percent of the street-facing facade.

   c. Only clear or lightly tinted glass in windows, doors, and display windows is considered transparent. Transparent areas shall be designed and maintained to provide views into and out of the structure. Except for institutional uses, no permanent signage, window tinting or treatments, shelving, other furnishings, fixtures, equipment, or stored items shall completely block views into and out of the structure between 4 feet and 7 feet above adjacent grade. The installation of temporary signs or displays that completely block views may be allowed if such temporary installations comply with subsection 23.55.012.B.

2. Blank facade limits. Any portion of the street-facing facade that is not transparent is considered to be a blank facade and is subject to the following:
a. In the SM-SLU, SM-NR, SM-U, ((and )) SM-UP, and SM-RB zones, for
Class 1, Class 2, and Class 3 Pedestrian Streets and Neighborhood Green Streets, the following
apply:

1) Blank facades are limited to segments 15 feet wide. Blank
facade width may be increased to 30 feet if the Director determines that the facade is enhanced
by architectural detailing, artwork, landscaping, or other similar features that have visual interest.

2) The total width of all blank facade segments shall not exceed 40
percent of the width of the street-facing facade of the structure on each street frontage, or 55
percent of the width of the street-facing facade if the slope of the street frontage abutting that lot
exceeds 7.5 percent.

b. All other streets not specified in subsection 23.48.040.B.2.a are subject
to the following:

1) Blank facades are limited to segments 30 feet wide. Blank
facade width may be increased to 60 feet if the Director determines as a Type I decision that the
facade is enhanced by architectural detailing, artwork, landscaping, or other similar features that
have visual interest.

2) The total width of all blank facade segments shall not exceed 70
percent of the width of the street-facing facade of the structure on each street frontage; or 78
percent if the slope of the street frontage abutting that lot exceeds 7.5 percent.

c. Any blank segment of a street-facing facade shall be separated by
transparent areas that are at least 2 feet wide.

C. Development standards for required street-level uses. Street-level uses that are
required by subsection 23.48.005.D or 23.48.605.C, and street-level uses exempt from FAR
calculations under the provisions of subsection 23.48.220.B.2, 23.48.620.B.2, or 23.48.720.B.2,
whether required or not, shall meet the following development standards:

1. Where street-level uses are required, a minimum of 75 percent of the applicable
   street-level, street-facing facade shall be occupied by uses listed in subsection 23.48.005.D.1.

2. There is no minimum frontage requirement for street-level uses provided at
   locations where they are not required but are exempt from FAR calculations under the provisions
   of subsection 23.48.220.B.2 or 23.48.620.B.2.

3. The space occupied by street-level uses shall have a minimum floor-to-floor
   height of 13 feet and extend at least 30 feet in depth at street level from the street-front facade.

4. If the minimum requirements of subsection 23.48.040.C.1 and the depth
   requirements of subsection 23.48.040.C.2 would require more than 50 percent of the structure's
   footprint to be occupied by required uses in subsection 23.48.005.D, the Director may modify the
   street-facing facade or depth requirements, or both, so that no more than 50 percent of the
   structure’s footprint is required to be occupied by the uses required by subsection 23.48.005.D.

5. Street-level uses shall be located within 10 feet of the street lot line, except for
   the following:

   a. Required street-level uses may be located more than 10 feet from the
      applicable street lot line if they abut an outdoor amenity area provided to meet the requirements
      of Section 23.48.045, or other required or bonused amenity area or open space provided for in
      this Chapter 23.48 that separates the portion of the street-facing facade including the required
      street-level uses from the street lot line;
b. If a street-level setback is required from the street lot line by the provisions of this Chapter 23.48 or Chapter 23.53, the 10-foot distance shall be measured from the line established by the required setback; and

c. If development standards in this Chapter 23.48 require modulation of the street-facing facade at street level, the required street-level uses may abut the street-level setback area provided to comply with the modulation standards.

6. Pedestrian access to street-level uses shall be provided directly from the street, from permitted outdoor common amenity area, or from open space abutting the street. Pedestrian entrances shall be located no more than 3 feet above or below sidewalk grade or at the same elevation as the abutting permitted outdoor common amenity area or required or bonused open space.

D. Maximum width. The provisions of this subsection 23.48.040.D apply to all structures in SM-U zones and structures in all other Seattle Mixed zones, except SM-SLU zones, along Class 1 pedestrian streets.

1. The maximum width of a structure, or of a portion of a structure for which the limit is calculated separately according to subsection 23.48.040.D.2, as measured along all streets in SM-U zones and along Class 1 pedestrian street in other Seattle Mixed zones, except SM-SLU zones, is 250 feet, except as otherwise provided in subsection 23.48.040.D.3.

2. For purposes of this subsection 23.48.040.D, the width limit shall be calculated separately for a portion of a structure if:

a. There are no connections allowing direct access, such as hallways, bridges, or elevated stairways, between that portion of a structure and other portions of a structure; or
b. The only connections between that portion of a structure and other portions of a structure is in stories, or portions of a stories, that are underground or extend no more than 4 feet above the sidewalk, measured at any point above the sidewalk elevation to the floor above the partially below-grade story, excluding access.

3. For purposes of this subsection 23.48.040.D, the following portions of a structure shall not be included in facade width measurement:

a. Designated Landmark structures that are retained on the lot.

b. Structures in SM-U zones that qualify as vulnerable masonry structures according to Section 23.48.630 and are retained on the lot.

c. Stories of a structure on which more than 50 percent of the total gross floor area is occupied by any of the following uses:

1) Arts facilities;

2) Community clubs or community centers;

3) Preschool, elementary, or secondary schools;

4) Performing arts theaters; or

5) Religious facilities.

Section 58. A new Section 23.48.050 of the Seattle Municipal Code is added as follows:

23.48.050 Mandatory housing affordability (MHA) requirements

The provisions of Chapters 23.58B and 23.58C apply in all Seattle Mixed zones, except SM-SLU 85/65-160 zones and SM-UP zones that do not have a mandatory housing affordability suffix.
Section 59. Subsection 23.48.055.C of the Seattle Municipal Code, which section was last amended by Ordinance 125432, is amended as follows:

23.48.055 Landscaping and screening standards

* * *

C. Screening for specific uses

1. Gas stations shall provide 3-foot-high screening along lot lines abutting all streets, except within required sight triangles.

2. Surface parking areas

a. Surface parking areas abutting streets. Surface parking areas shall provide 3-foot-high screening along the lot lines abutting all streets, except within required sight triangles.

b. Surface parking areas abutting alleys. Surface parking areas shall provide 3-foot-high screening along the lot lines abutting an alley. The Director may reduce or waive the screening requirement for part or all of the lot line abutting the alley when required parking is provided at the rear lot line and the alley is necessary to provide aisle space.

3. Parking in structures. Except as provided for by subsection 23.48.085.B, parking located at or above street level in a garage shall be screened as follows:

a. On Class 1 and Class 2 Pedestrian Streets and Neighborhood Green Streets shown on Map A for 23.48.240, Map A for 23.48.440, and Map A for 23.48.940, and on all streets in SM-U and SM-UP zones, parking is not permitted at street level unless separated from the street by other uses, provided that garage doors need not be separated. The facade of the separating uses shall be subject to the transparency and blank facade standards in Section 23.48.040.
b. On all other streets shown on Map A for 23.48.240 and Map A for 23.48.440, parking is permitted at street level if at least 30 percent of the street frontage of the parking area, excluding that portion of the frontage occupied by garage doors, is separated from the street by other uses. The facade of the separating uses shall be subject to the transparency and blank facade standards in Section 23.48.040. The remaining parking shall be screened from view at street level and the street facade shall be enhanced by architectural detailing, artwork, landscaping, or similar visual interest features.

c. The perimeter of each floor of parking above street level shall have an opaque screen at least 3.5 feet high, except in the SM-SLU, SM-U, and SM-UP zones, where specific requirements for the location and screening of parking located on stories above the street level apply.

4. Fences or free-standing walls associated with utility services uses may obstruct or allow views to the interior of a site. Where site dimensions and site conditions allow, applicants are encouraged to provide both a landscaped setback between the fence or wall and the right-of-way, and a fence or wall that provides visual interest facing the street lot line, through the height, design or construction of the fence or wall, including the use of materials, architectural detailing, artwork, vegetated trellises, decorative fencing, or similar features. Any fence or free-standing wall for a utility service use shall provide either:

   a. A landscaped area a minimum of 5 feet in depth between the wall or fence and the street lot line; or

   b. Architectural detailing, artwork, vegetated trellises, decorative fencing, or similar features to provide visual interest facing the street lot line, as approved by the Director.
Section 60. Section 23.48.300 of the Seattle Municipal Code, enacted by Ordinance 124883, is amended as follows:

23.48.300 Applicability in Dravus

The provisions in Sections 23.48.320 through (23.48.325) 23.48.345 of the Seattle Mixed-Dravus (SM-D) zone are in addition to and supplement the provisions of Sections 23.48.005 through 23.48.095. In cases of conflicts between Sections 23.48.005 through 23.48.095 and Sections 23.48.320 through (23.48.325) 23.48.345, the provisions in the SM-D zone apply.

Section 61. Section 23.48.320 of the Seattle Municipal Code, enacted by Ordinance 124883, is amended as follows:

23.48.320 Floor area ratio (FAR) in Dravus

((Uses)) Development in the SM-D (40–85) 55/95 zone ((are)) is not subject to an FAR limit.

Section 62. Section 23.48.325 of the Seattle Municipal Code, enacted by Ordinance 124883, is amended as follows:

23.48.325 Structure height in Dravus

((Height limits in the SM-D 40–85 zone))

A. ((Base height limit. Structures in)) In the SM-D (40–85) 55/95 zone ((are subject to a height limit of 40 feet, except as otherwise provided in Chapter 23.58A.)) the height limit for portions of a structure in non-residential use is 55 feet and the height limit for portions of a structure in residential use is 95 feet.

B. ((Additional height for structures with only residential uses above 40 feet. A structure in the SM-D 40–85 zone that has only residential uses above a height of 40 feet is subject to a maximum height limit of 85 feet, if the following conditions are met:))
1. The applicant satisfies the conditions for bonus development under Section 23.48.024.

2. The portion of any structure above 45 feet in height shall be set back at least 50 feet from W. Dravus Street, except that the first 4 feet of the horizontal projection of decks, balconies with open railings, eaves, cornices, and gutters is permitted in the required setback, and the exceptions for pitched roofs and rooftop features of subsection 23.48.025.B are allowed above the 45 foot height limit in the required setback.

C. ) Exceptions for pitched roofs and rooftop features. Additional height above the applicable limit pursuant to ( subsections ) subsection 23.48.325.A ( subsection 23.48.325.B, or subsection 23.48.325.B.2 ) is allowed for pitched roofs and certain rooftop features, as set forth in subsections 23.48.025.B and 23.48.025.C.

Section 63. A new Section 23.48.340 of the Seattle Municipal Code is added to Subchapter III of Chapter 23.48 as follows:

**23.48.340 Upper-level setback from West Dravus Street**

Portions of a structure above 55 feet in height shall be set back at least 50 feet from West Dravus Street, except that the first 4 feet of the horizontal projection of decks, balconies with open railings, eaves, cornices, and gutters is permitted in the required setback, and pitched roofs and rooftop features as allowed by subsections 23.48.025.B and 23.48.025.C are allowed above the 55-foot height limit in the required setback.

Section 64. A new Section 23.48.345 of the Seattle Municipal Code is added to Subchapter III of Chapter 23.48 as follows:
23.48.345 Green building standards

For projects that exceed a height of 55 feet, excluding pitched roofs and rooftop features permitted above the applicable height limit pursuant to subsections 23.48.025.B and 23.48.025.C, the applicant shall make a commitment that the proposed development will meet the green building standard and shall demonstrate compliance with that commitment, all in accordance with Chapter 23.58D.

Section 65. Section 23.48.400 of the Seattle Municipal Code, enacted by Ordinance 124883, is amended as follows:

23.48.400 Applicability in North Rainier

The provisions in Sections 23.48.420 through 23.48.445 of the Seattle Mixed-North Rainier (SM-NR) zone are in addition to and supplement the provisions of Sections 23.48.005 through 23.48.095. In cases of conflicts between these Sections 23.48.005 through 23.48.095 and Sections 23.48.420 through 23.48.445, the provisions in the SM-NR zone apply.

Section 66. Section 23.48.420 of the Seattle Municipal Code, last amended by Ordinance 125272, is amended as follows:

23.48.420 Floor area ratio (FAR) in North Rainier

(Footnotes to Table A for 23.48.420

Floor area that exceeds an FAR of 2.0 must be obtained by providing public benefits through
the incentive zoning program as per Chapter 23.58A.)

((Within zones that have an incentive zoning suffix, the number in the suffix within parentheses
is the base FAR.))

Section 67. Section 23.48.421 of the Seattle Municipal Code, enacted by Ordinance
124883, is amended as follows:

23.48.421 Extra ((Floor area ratio (FAR) in North Rainier)) floor area in the SM-NR 145
zone

(Calculation outside of an adopted Local Infrastructure Project Area)) In the SM-NR 145 zone,
extra floor area above the base FAR and up to the maximum FAR shall be achieved as follows:

A. Means to achieve extra residential floor area. ((If the maximum height for residential
use is greater than 85 feet and the lot is located in the Mount Baker Station Area Overlay
District, the)) The applicant shall:

1. ((achieve 60)) Achieve 65 percent of the extra residential floor area on the lot
by using bonus residential floor area for affordable housing pursuant to Section 23.58A.014; and

2. ((achieve 40)) Achieve 35 percent of the extra residential floor area by using
open space amenities pursuant to Section 23.58A.040.

B. Means to achieve extra non-residential floor area. ((If the maximum height limit for
non-residential use is greater than 85 feet and the lot is located in the Mount Baker Station Area
Overlay District, the)) The applicant shall:
1. **Achieve 65** percent of the extra non-residential floor area on the lot by using bonus non-residential floor area for affordable housing pursuant to Section 23.58A.024; and

2. **Achieve 35** percent of the extra non-residential floor area by using open space amenities pursuant to Section 23.58A.040.

Section 68. Section 23.48.425 of the Seattle Municipal Code, enacted by Ordinance 124883, is repealed:

**((23.48.425 Structure height in North Rainier))**

In zones listed below in this Section 23.48.425, the applicable height limit for portions of a structure that contain non-residential and live-work uses is shown as the first figure after the zone designation and the height limit for portions of a structure in residential use is shown as the first figure following the “/”. Within zones that have an incentive zoning suffix, the number in the suffix shall be the base FAR.

SM-NR-55/75 (2.0))

Section 69. A new Section 23.48.445 of the Seattle Municipal Code is added to Subchapter IV of Chapter 23.48 as follows:

**23.48.445 Green building standards**

For projects exceeding the FAR in Table A for 23.45.445, the applicant shall make a commitment that the proposed development will meet the green building standard and shall demonstrate compliance with that commitment, all in accordance with Chapter 23.58D.

Footnotes to Table (C) B for 23.48.620
<sup>1</sup> Height of structure excludes rooftop features otherwise allowed above the height limit by subsection 23.48.025.C.
<sup>2</sup> An additional increment of up to 1.0 FAR above the maximum FAR is permitted on lots meeting the requirements of subsection 23.48.620.D.
<sup>3</sup> For lots that include both residential and non-residential uses, the amount of non-residential floor area allowed shall not exceed the maximum FAR limit for non-residential uses.

B. Additional increment of chargeable floor area above the base FAR. On lots that include uses or features specified in this subsection 23.48.620.B, an additional increment of chargeable floor area is permitted above the base FAR as follows:

1. For all SM-U zones except SM-U 75, an additional increment of 0.5 FAR is permitted above the base FAR of the zone shown on Table A ((i)) or Table B ((i) or Table C) for 23.48.620 if a lot includes one or more qualifying Landmark structures, subject to the following conditions:
   a. The structure is rehabilitated to the extent necessary so that all features and characteristics controlled or designated by ordinance pursuant to Chapter 25.12 are in good condition and consistent with the applicable ordinances and with any certificates of approval.
issued by the Landmarks Preservation Board, all as determined by the Director of the Department of Neighborhoods; and

b. A notice is recorded in the King County real estate records, in a form satisfactory to the Director, regarding the bonus allowed and the effect thereof under the terms of this Chapter 23.48.

c. For purposes of this subsection 23.48.620.B, a “qualifying Landmark” is a structure that:

1) ([is]) Is subject, in whole or in part, to a designating ordinance pursuant to Chapter 25.12; and

2) ([is]) Is on a lot on which no improvement, object, feature, or characteristic has been altered or removed contrary to any provision of Chapter 25.12 or any designating ordinance.

d. A qualifying Landmark that allows for the additional increment of FAR under this subsection 23.48.620.B.1 is not eligible as a Landmark transferable development rights (TDR) or transferable development potential (TDP) sending site. For so long as any of the chargeable floor area of the increment allowed above the base FAR of the zone under this subsection 23.48.620.B.1 remains on the lot, each Landmark for which the increment was granted shall remain designated as a Landmark under Chapter 25.12 and the owner shall maintain the exterior and interior of each qualifying Landmark in good condition and repair and in a manner that preserves the features and characteristics that are subject to designation or controls by ordinance unless the Landmarks Preservation Board has issued a certificate of approval for the modification or demolition of the Landmark.
e. In the SM-U/R 75-240 zone, the additional increment of chargeable floor area allowed above the base FAR shall be for residential use only.

2. For all SM-U zones except SM-U 75, an additional increment of up to 0.5 FAR is permitted above the base FAR of the zone if a lot includes a human service use, subject to the following conditions:

   a. The amount of the additional increment of FAR permitted above the base FAR under this subsection 23.48.620.B.2 shall not exceed the gross square footage of floor area in the human service use.

   b. The minimum area provided for one or more human service uses shall be 2,500 square feet of interior space;

   c. The location of the human service use shall be accessible to the elderly and disabled, with exterior and interior directional signage clearly visible from the street;

   d. The space shall be occupied by a human service use for the life of the project on the lot. If the property owner is unable to secure a human service use to occupy the space, after a six-month period, if the space remains unoccupied, it may be used for non-profit purposes as a community and/or public area, under the following conditions:

       1) The space shall be made available to community and charitable organizations and is not to be used for profit-making activities;

       2) The space shall be made available for both day and evening use;

       3) The space shall be made available on a first-come, first-served basis to community and charitable organizations;
4) There shall be no charge for use of the space, except for any costs that may be necessary by the interim use; and

5) Availability of the space and the contact person(s) shall be made known to community and charitable groups through means such as newspaper articles, radio announcements, flyers to organizations, and contacts with umbrella organizations such as the University District Conversation on Homelessness.

e. The property owner shall maintain all elements of the human service space, including but not limited to landscaping, seating, and lighting, in a safe, clean, and well-maintained condition, and the following shall apply:

1) Any additional improvements beyond the minimum requirements needed for specific service activities may be provided either by the applicant or the agency. The specifics shall be included in the lease agreement. Depending on the terms of the agreement, the tenant may be required to pay for utilities, insurance, taxes, and maintenance expenses. In addition, the tenant may be required to pay for development costs specifically required to meet the needs of the lessee.

2) Rent shall not be charged for use of the space.

f. No permit after the first building permit, no permit for any construction activity other than excavation and shoring, and no permit for occupancy of existing floor area by any use shall be issued for development that includes a human service use to gain the increase in base FAR until the applicant has demonstrated to the satisfaction of the Director that a lease with a qualified human service agency has been secured to occupy the space for a minimum of five years.
g. In the SM-U/R 75-240 zone, the additional increment of chargeable floor area allowed above the base FAR shall be for residential use only.

3. For the SM-U 75-240 and SM-U 95-320 zones, an additional increment of 0.5 FAR is permitted above the base FAR of the zone as shown on Table ((C)) B for 23.48.620 if a lot includes a preschool, an elementary school, or a secondary school, provided that the school meets the conditions for floor area exempt from FAR in subsection 23.48.620.C.4.

4. For the SM-U 85 zone, an additional increment of chargeable floor area up to 0.5 FAR is permitted above the base FAR of the zone shown on Table A for 23.48.620 for a lot that includes one or more vulnerable masonry structures included on a list of structures that meet specified criteria in a rule promulgated by the Director under Section 23.48.627, provided that the following conditions are met:

   a. The amount of the additional increment of FAR permitted above the base FAR under this subsection 23.48.620.B.4 shall not exceed the gross square footage of floor area in the vulnerable masonry structures retained on the lot, and shall in no case exceed 0.5 FAR; and

   b. The vulnerable masonry structure shall be retained according to the provisions of subsection 23.58A.042.F.3 for a structure that qualifies as a vulnerable masonry structure TDR or TDP sending site, and the structure shall be retained on the lot for the life of the project.

5) 4. The additional chargeable floor area allowed as an increment above the base FAR for individual uses and features specified in this subsection 23.48.620.B may be combined, provided that in no case shall the total amount of additional chargeable floor area
allowed above the base FAR exceed 1 FAR and in no case shall more than one increment of
additional floor area be allowed for the same use or feature on the lot.

((6)) 5. Extra floor area achieved as provided for in Section 23.48.622 shall be
chargeable floor area added above the increment of FAR allowed under the provisions of this
subsection 23.48.620.B.

* * *

Section 71. Section 23.48.621 of the Seattle Municipal Code, enacted by Ordinance
125267, is repealed:

((23.48.621 Mandatory housing affordability (MHA) in SM-U zones
SM-U zones located in the University Community Urban Center are subject to the provisions of
Chapters 23.58B and 23.58C.))

Section 72. Section 23.48.623 of the Seattle Municipal Code, enacted by Ordinance
125267, is amended as follows:

23.48.623 Transfer of development rights (TDR) and potential (TDP) in SM-U zones

* * *

D. Except as provided in subsection 23.47A.009.E.2.b, the maximum amount of TDR and TDP that can be transferred from an eligible sending site shall not exceed an amount of floor area equivalent to the numerical value of the base FAR of the zone in which the sending site is located, as shown on Table A (A) and Table B (B) for 23.48.620, multiplied by the lot area of the sending site and minus the sum of any chargeable floor area on the lot plus any TDR and TDP previously transferred.

* * *

Section 73. Subsection 23.48.627.E of the Seattle Municipal Code, which section was enacted by Ordinance 125267, is amended as follows:

23.48.627 Combined lot development in SM-U zones

* * *

E. In a combined lot development that includes a lot in the SM-U/R zone, the amount of floor area in non-residential uses on any individual lot in the SM-U/R zone cannot exceed the FAR limit for non-residential uses on Table (B) for 23.48.620 as applied to that lot individually.

* * *

Section 74. Section 23.48.635 of the Seattle Municipal Code, enacted by Ordinance 125267, is amended as follows:
23.48.635 Maximum width (and-depth) limits in SM-U zones

((A. The maximum width and depth limit of a structure is 250 feet, except as otherwise
provided in this Section 23.48.635. The width and depth limits do not apply to below-grade or
partially below-grade stories with street-facing facades that do not extend more than 4 feet
above the sidewalk, measured at any point above the sidewalk elevation to the floor above the
partially below-grade story, excluding access.

B. For the stories of a structure subject to width and depth limits, all portions of the
same story that are horizontally contiguous, including any portions connected by doorways,
ramps, bridges, elevated stairways, and other such devices, shall be included in the
measurement of width and depth. The width and depth limit of stories in separate structures or
structures on the same lot that abut but are not internally connected shall be measured
separately, except that designated Landmark structures and structures that qualify as vulnerable
masonry structures according to Section 23.48.630 that are retained on the lot are excluded
from the width and depth measurement, whether internally connected to a new structure or not.

C. Width and depth limits do not apply to stories of a structure with more than 50
percent of the total gross floor area occupied by any of the following uses:

1. Community clubs or community centers;

2. Religious facilities;

3. Arts facilities;

4. Preschool, elementary, or secondary schools; or

5. Performing arts theaters.)
D. Width and depth limits) In SM-U zones, the provisions of subsection 23.48.040.D do not apply to the portion of a structure that is 55 feet or less in height on a lot that includes a light rail transit station.

Section 75. Section 23.48.640 of the Seattle Municipal Code, enacted by Ordinance 125267, is amended as follows:

23.48.640 Street-level development standards in SM-U zones

A. Required street-level setbacks in SM-U zones

1. In the SM-U (85), SM-U 75-240, and SM-U 95-320 zones, a street-level setback is required at grade from specified street lot lines as shown on Table A for 23.48.640.

2. All setback areas required by subsection 23.48.640.A.1 shall either be part of a usable open space or be landscaped according to standards in subsection 23.48.055.A.3, except that, for setbacks required from lot lines abutting NE 45th Street and NE 50th Street, no landscaping is required if the setback area is paved to match the abutting sidewalk, and the Director, after consulting with the Director of the Seattle Department of Transportation,

<table>
<thead>
<tr>

</tr>
<tr>
<td>NE 50th Street</td>
<td>5 feet minimum</td>
</tr>
</tbody>
</table>
determines that the paved setback area will not conflict with Seattle Department of Transportation standards for the abutting sidewalk.

3. Required street-level setbacks in the SM-U/R 75-240 zone. On all streets in the SM-U/R 75-240 zone, an average street-level setback of 5 feet is required from all street lot lines, subject to the following:

   a. No setback shall be less than 3 feet from the street lot line, and any setback area further than 10 feet from the street lot line shall not be included in the averaging calculation.

   b. The setback area shall either be part of a usable open space or landscaped according to standards in subsection 23.48.055.A.3.

4. Underground structures are permitted in all required setback areas.

5. Bay windows, canopies, horizontal projection of decks, balconies with open railings, eaves, cornices, gutters, and other similar architectural features that are at least 13 feet above the sidewalk elevation are permitted to extend up to 4 feet into the required setback.

6. Setback areas eligible for floor area bonus. Areas provided as required street-level setbacks under this subsection 23.48.640.A that abut a designated Neighborhood Green Street shown on Map A for 23.48.640 are eligible for a floor area bonus as a green street setback, provided that the setback area complies with the development standards and conditions in Section 23.58A.040 for a green street setback.

* * *

Section 76. Section 23.48.645 of the Seattle Municipal Code, enacted by Ordinance 125267, is amended as follows:
23.48.645 Upper-level development standards in SM-U zones

* * *

F. Upper-level setbacks in the SM-U 75 zone. In SM-U 75 zones, an upper-level setback with an average depth of 10 feet from street lot lines abutting University Way NE is required for portions of a structure above a height of 45 feet. The maximum depth of a setback that can be used to calculate the average setback is 20 feet.

Section 77. Section 23.48.646 of the Seattle Municipal Code, enacted by Ordinance 125267, is amended as follows:

23.48.646 Facade modulation in SM-U zones

* * *

C. The maximum length of an unmodulated facade for midrise structures in SM-U 75-240 and SM-U 95-320 zones and for all structures in the SM-U ((85)) 75 zone is prescribed in Table A for 23.48.646, and the maximum length of an unmodulated facade for highrise structures in the SM-U 75-240 and SM-U 95-320 zones is prescribed in Table B for 23.48.646. This maximum length shall be measured parallel to each street lot line, and shall apply to any portion of a facade, including projections such as balconies, that is located within 10 feet of street lot lines.

Section 78. Section 23.48.650 of the Seattle Municipal Code, enacted by Ordinance 125267, is amended as follows:

23.48.650 Required open space for large lot developments in SM-U zones

A. Open space meeting the standards of this Section 23.48.650 is required in all SM-U zones for development on a lot exceeding 30,000 square feet.

B. Open space required by subsection 23.48.650.A shall meet the following standards:

1. The minimum amount of required open space shall be equal to 15 percent of the lot area.
2. Area qualifying as required open space may include both unenclosed usable open space and limited amounts of enclosed areas, as provided for in this subsection 23.48.650.B and as specified in Table A for 23.48.650.

<table>
<thead>
<tr>
<th>Type of open space</th>

<th>Maximum amount allowed</th>
</tr>
</thead>
<tbody>
<tr>
<td>Usable open space open to the sky subject to subsection 23.48.650.B.5</td>
<td>60 percent</td>
<td>No limit</td>
</tr>
<tr>
<td>Open space covered overhead by the structure, such as an arcade or building cantilever, and subject to subsection 23.48.650.B.6</td>
<td>None</td>
<td>20 percent</td>
</tr>
<tr>
<td>Enclosed open space providing amenity features such as a public atrium, a shopping atrium, winter garden, or covered portion of a mid-block pedestrian corridor and subject to subsection 23.48.650.B.7</td>
<td>None</td>
<td>35 percent</td>
</tr>
</tbody>
</table>

3. Minimum area. The required open space shall generally be provided as one connected area that is accessible at street level, with variations in elevation allowed to accommodate changes in topography or to provide for features such as ramps that improve access for persons with disabilities. If the required amount of open space exceeds 4,500 square feet, open space areas may be provided at separate locations on the lot, provided that no separate area is less than 2,000 square feet.

4. The average horizontal dimension for an area qualifying as the required unenclosed usable open space is 20 feet, and the minimum horizontal dimension is 10 feet.

5. Area provided as usable open space shall be open to the sky and directly accessible from an abutting street, with no structures containing floor area separating this portion of the required open space area from the street frontage, in order to allow both visual and physical access to the space for pedestrians from the street.
6. Open space provided as unenclosed space covered overhead by the structure for weather protection shall abut a street lot line and be open and accessible to pedestrians along the sidewalk. The area shall have an average horizontal dimension of 10 feet and a minimum horizontal dimension of 5 feet, and the minimum vertical clearance of the covered space shall be 20 feet.

7. Open space provided as enclosed interior space, such as a public atrium, a shopping atrium, winter garden, or covered portion of a mid-block pedestrian corridor, shall meet all of the following requirements:

   a. The space shall have direct access for pedestrians, including persons with disabilities, from the street, or from an outdoor, usable public open space abutting the street;

   b. The space shall be provided as one continuous area that is a minimum of 2,000 square feet in size, with an average horizontal dimension of 20 feet and a minimum horizontal dimension of 10 feet. Enclosed area that abuts and is accessible to exterior open space is not considered a separate area for the purposes of determining the minimum area requirements of subsection 23.48.650.B.3;

   c. The minimum floor-to-ceiling height of any enclosed area is 15 feet;

   and

   d. Space, such as lobby area and corridors used solely to provide access between the structure’s principal street entrance and elevators, does not qualify as enclosed interior open space for the purposes of this subsection 23.48.650.B.7.

8. All areas provided as open space under this Section 23.48.650 shall be accessible to persons with disabilities.
9. Features provided under this subsection 23.48.650.B are eligible to qualify as amenity area for residential uses required by Section 23.48.045, provided the standards of that Section 23.48.045 are met.

10. Features provided under this subsection 23.48.650.B that satisfy the requirements for open space amenities in Section 23.48.624 and Section 23.58A.040 are eligible for a floor area bonus to gain extra floor area according to the provisions of Section 23.48.622.

11. Usable open space satisfying the requirements of this subsection 23.48.650.B may be provided on a site other than the project site, provided that the following conditions are met:

   a. The alternate open space site is located within an SM-U zone and within 500 feet of the project site;

   b. The minimum area of the usable open space at the alternate site is 4,500 square feet;

   c. The minimum size of the open space on an alternate site and the maximum distance from the project may be increased or decreased for a project if the Director determines, as a Type I decision, that such adjustments are reasonably necessary to provide for open space that will meet the additional need for open space caused by the project, enhance public access to the open space, and/or allow for a significant share of the required open space to also be accommodated on the project site.

   d. The owner of any lot on which off-site open space is provided to meet the requirements of this subsection 23.48.650.B shall execute and record an easement in a form acceptable to the Director assuring compliance with the requirements of this Section 23.48.650.
The Director is authorized to accept such an easement, provided that the terms do not impose any costs or obligations on the City.

12. Usable open space provided on a site other than the project site according to subsection 23.48.650.B.11 that satisfies the requirements for a neighborhood open space in Section 23.58A.040 is eligible for a floor area bonus to gain extra floor area according to the provisions of Section (23.48.621) 23.48.622.

Section 79. Section 23.48.721 of the Seattle Municipal Code, enacted by Ordinance 125432, is repealed:

((23.48.721 Mandatory housing affordability (MHA) in SM-UP zones
The provisions of Chapters 23.58B and 23.58C apply in all SM-UP zones where there is a mandatory housing affordability suffix.))

Section 80. A new Subchapter VIII, which includes new Sections 23.48.900, 23.48.905, 23.48.920, 23.48.940, and 23.48.945, is added to Chapter 23.48 of the Seattle Municipal Code as follows:

Subchapter VIII Rainier Beach Standards

23.48.900 Applicability in Rainier Beach

The provisions in this Subchapter VIII for the Seattle Mixed – Rainier Beach (SM-RB) zone are in addition to and supplement the provisions of Sections 23.48.005 through 23.48.095. In cases of conflicts between Sections 23.48.005 through 23.48.095 and this Subchapter VIII, the provisions of this Subchapter VIII apply.
23.48.905 Uses in SM-RB zones

Residential and live-work uses are prohibited in street-level, street-facing facades facing Class 2 Pedestrian Streets in the Rainier Beach Residential Urban Village shown on Map A for 23.48.940.

23.48.920 Floor area ratio in SM-RB zones

A. Except as described in subsection 23.48.920.B, the floor area ratio (FAR) limit in SM-RB zones is as shown in Table A for 23.48.920.

<table>
<thead>
<tr>
<th>Zone</th>
<th>FAR</th>
</tr>
</thead>
<tbody>
<tr>
<td>SM-RB 55</td>
<td>2.25</td>
</tr>
<tr>
<td>SM-RB 85</td>
<td>3.75</td>
</tr>
<tr>
<td>SM-RB 125</td>
<td>3.75</td>
</tr>
</tbody>
</table>

B. The FAR limit listed in Table A for 23.48.920 shall be increased by an amount of floor area equal to twice the amount of floor area occupied by the following uses, up to a maximum increase in FAR of 1.0 in SM-RB 55 and SM-RB 85 zones and 2.0 in SM-RB 125 zones:

1. Light manufacturing;
2. College;
3. School, vocational, or fine arts;
4. Food processing and craft work;
5. Child care center; or
6. Residential development that receives public funding and/or an allocation of federal low-income housing tax credits, and is subject to a regulatory agreement, covenant, or other legal instrument recorded on the property title and enforceable by The City of Seattle, Washington State Housing Finance Commission, State of Washington, King County, U.S.
Department of Housing and Urban Development, or other similar entity as approved by the
Director of Housing, that restricts at least 40 percent of the units to occupancy by households
earning no greater than 60 percent of median income, and controls the rents that may be charged,
for a minimum period of 40 years.

23.48.940 Street-level development standards in SM-RB zones

A. Pedestrian streets in SM-RB zones are as shown in Map A for 23.48.940.

Map A for 23.48.940

Pedestrian street classification in SM-RB zones
B. On pedestrian streets shown on Map A for 23.48.940, the street-facing facade of a structure may be set back up to 12 feet from the street lot line subject to the following:

1. The setback area shall be landscaped according to the provisions of Section 23.48.055;

2. Setbacks greater than 12 feet are permitted for up to 30 percent of the length of portions of the street facade that are set back from the street lot line, provided that these setbacks are located 20 feet or more from any street corner; and

3. Any required outdoor amenity area provided in accordance with Section 23.48.045 is not considered part of the setback area and may extend beyond the limit on setbacks from the street lot line that would otherwise apply under subsections 23.48.940.B.1 or 23.48.940.B.2.

C. Except on pedestrian streets, loading docks may count toward meeting the transparency standards of subsection 23.48.040.B in the Rainier Beach Residential Urban Village.

23.48.945 Parking and loading in SM-RB zones

The standards of Sections 23.48.055 and 23.48.085 are modified as follows for portions of lots that do not abut a pedestrian street:

A. Surface parking is not required to be separated from the street by other uses.

B. Two two-way curb cuts are allowed, provided no curb cuts are located on pedestrian streets.

C. The amount of lot area allocated to accessory surface parking can be as much as 50 percent of the total lot area.
Section 81. Section 23.50.020 of the Seattle Municipal Code, last amended by Ordinance 125291, is amended as follows:

**23.50.020 Structure height exceptions and additional restrictions**

**B. Additional height restrictions for certain structures in 45 foot height limit area. In zones with a 45-foot height limit, except as provided for IC zones in Section 23.50.028, structures with no story at least 15 feet in height are limited to a maximum height of 40 feet.**

**C.** B. Structures existing prior to October 8, 1987, that exceed the height limit of the zone may add the rooftop features listed as conditioned in subsection 23.50.020.A. The existing roof elevation of the structure is considered the applicable height limit for the purpose of adding rooftop features.

Section 82. Section 23.50.026 of the Seattle Municipal Code, last amended by Ordinance 125291, is amended as follows:

**23.50.026 Structure height in IC zones**

A. Except as may be otherwise provided in this Title 23, the maximum structure height in IC zones for all uses is as designated on the Official Land Use Map, Chapter 23.32. Maximum structure height may be increased or reduced as provided in this Section 23.50.026 or Section 23.50.020. An overlay district may increase or reduce the maximum structure height.

B. Water-dependent uses within the Shoreline District are subject to only the height limits of the applicable shoreline environment, Chapter 23.60A.

**C.** Within the area shown in Exhibit A for 23.50.026, areas zoned IC-45 are subject to the following height regulations (See Exhibit A for 23.50.026):
1. Except as provided in subsection 23.50.026.C.2.c, structures with no story at least 15 feet in height are limited to a maximum height of 40 feet.

2. A 65-foot structure height is permitted as a special exception provided that:
   a. Provision is made for view corridor(s) looking from Elliott Avenue toward Puget Sound;
      1) The location of the view corridor(s) shall be determined by the Director upon consideration of such factors as existing view corridors, the location of street rights-of-way, and the configuration of the lot;
      2) The view corridor(s) shall have a width not less than 35 percent of the width of the lot;
      3) The minimum width of each required view corridor shall be 30 feet measured at Elliott Avenue West;
      4) Measurement, modification, or waiver of the view corridor(s) shall be according to Chapter 23.60A, Shoreline District measurement regulations. Where a waiver under these provisions is granted by the Director, the 65-foot structure height shall still be permitted;
      5) Parking for motor vehicles shall not be located in the view corridor unless the area of the lot where the parking would be located is 4 or more feet below the level of Elliott Avenue West;
   b. Development shall be located so as to maximize opportunities for views of Puget Sound for residents and the general public; and
e. The structure contains at least two stories at least 15 feet in height; with the exception that no story in an accessory parking structure is required to be at least 15 feet in height.

D)) C. Within an IC 85-175 zone, the first figure shown in the zone designation is the base height limit, which is the height limit for all uses, except for a structure that complies with the conditions to extra floor area specified in Sections 23.50.028 and 23.50.033 on a lot that includes extra floor area. Extra floor area means non-residential chargeable floor area allowed in addition to the base FAR under Chapter 23.58A. The second figure is the applicable height limit for all uses, on a lot that includes extra floor area, for a structure that complies with the conditions to extra floor area specified in Sections 23.50.028 and 23.50.033.
((Exhibit A for 23.50.026 Height Regulations in Areas Zoned Industrial Commercial))
Section 83. Section 23.50.028 of the Seattle Municipal Code, last amended by Ordinance 125291, is amended as follows:

23.50.028 Floor area ((limits))

((The applicable floor area ratio (FAR), as provided below, determines the permitted chargeable floor area on a lot, except as expressly otherwise provided.))

A. Industrial General 1 (IG1) and Industrial General 2 (IG2), FAR. The maximum FAR in IG1 and IG2 zones is 2.5.

B. Industrial Buffer (IB), FAR. The maximum FAR in IB zones is 2.5.

C. Industrial Commercial (IC), FAR. The base and maximum FARs in IC zones are set forth on Table A for 23.50.028.)

A. Floor Area Ratio (FAR) limits apply in Industrial zones as shown in Table A for 23.50.028. The applicable FAR limit applies to the total chargeable floor area of all structures on the lot.

</table>

1. **Footnote** to Table A for 23.50.028

   **(Additional)** All floor area above the base FAR, up to the maximum FAR, is considered extra floor area (above the base FAR allowed according to) and must be achieved through the provisions of subsection (23.50.028.D) 23.50.028.B and Chapter 23.58A.

   **(B)** B. Extra floor area in IC 85-175

   1. In an IC 85-175 zone, extra non-residential floor area as defined in Section 23.58A.004 may be added above the base FAR up to the maximum FAR allowed by Table A for 23.50.028 for development that satisfies all applicable conditions of Section 23.50.028, Section 23.50.033, and Chapter 23.58A.

   a. Twenty-five percent of any extra non-residential floor area shall be gained through the transfer of TDR pursuant to Section 23.50.053.

   b. Seventy-five percent of any extra non-residential floor area shall be gained as bonus non-residential floor area pursuant to Section 23.58A.024, or through the transfer of housing TDR under Section 23.50.053, or both.
2. In an IC 85-175 zone, in addition to satisfying the conditions of subsection ((23.50.028.D.1)) 23.50.028.B.1, for development to exceed the base FAR on a lot that has an area of 50,000 square feet or more, the Director shall make an individual determination of project impacts on the need for pedestrian facilities and complete a voluntary agreement between the property owner and the City to mitigate identified impacts, if any. The Director may consider the following as impact mitigation:

a. Pedestrian walkways on a lot, including through-block connections on through lots, where appropriate, to facilitate pedestrian circulation by connecting structures to each other and abutting streets;

b. Sidewalk improvements, including sidewalk widening, to accommodate increased pedestrian volumes and streetscape improvements that will enhance pedestrian comfort and safety; and

c. Measures that will contribute to the improvement of pedestrian facilities, such as the following improvements applicable to the vicinity north of South Royal Brougham Way and south of South Charles Street east of 4th Avenue South:

1) Improvements to 6th Avenue South as the primary pedestrian and bicycle corridor connecting new development to the surrounding area and transit facilities;

2) Improvements to facilitate pedestrian wayfinding to and from the Stadium Light Rail Station;

3) Improvements to enhance the pedestrian environment, such as providing overhead weather protection, landscaping, and other streetscape improvements; and

4) Improved pedestrian and bicycle crossing of Airport Way South at 6th Avenue South.
3. In an IC 85-175 zone, in addition to satisfying the conditions of subsections 23.50.028.D.1 and 23.50.028.D.2, if applicable, for development to exceed the base FAR and include 85,000 or more square feet of gross office floor area, the Director shall make an individual determination of project impacts on the need for open space resources. The Director may limit floor area or allow floor area subject to conditions, which may include a voluntary agreement between the property owner and the City to mitigate identified impacts, if any. The Director shall take into account the findings of subsection 23.49.016.A in assessing the demand for open space generated by a typical office project in an area permitting high employment densities.

   a. The Director may consider the following as mitigation for open space impacts:

      1) Open space provided on-site or off-site, consistent with the provisions in subsection 23.49.016.C, or provided through payment-in-lieu, consistent with subsection 23.49.016.D, except that in all cases the open space shall be located on a lot in an IC 85-175 zone that is accessible to the project occupants, and

      2) Additional pedestrian space through on-site improvements or streetscape improvements provided as mitigation for project impacts on pedestrian facilities pursuant to subsection 23.50.028.D.3.

   b. The Director may determine that open space meeting standards differing from those contained or referred to in subsection 23.49.016.C will mitigate project impacts, based on consideration of relevant factors, including the following:
1) The density or other characteristics of the workers anticipated to occupy the project compared to the presumed office employment population providing the basis for the open space standards applicable under Section 23.49.016; and/or

2) Characteristics or features of the project that mitigate the anticipated open space impacts of workers or others using or occupying the project.

((E)) C. Exemptions from FAR calculations

1. The following areas are exempt from FAR calculations in all industrial zones:

a. All gross floor area below grade stories, or portions of stories, that are underground;

b. All gross floor area used for accessory parking, except as provided in subsection ((23.50.028.F)) 23.50.028.D;

c. All gross floor area located on the rooftop of a structure and used for any of the following: mechanical equipment, stair and elevator penthouses, and communication equipment and antennas; and

d. All gross floor area used for covered rooftop recreational space of a building existing as of December 31, 1998, in an IG1 or IG2 zone, if complying with subsection 23.50.012.D.

2. In addition to areas exempt from FAR calculations in subsection ((23.50.028.E.1)) 23.50.028.C.1, within an IC 85-175 zone, the following exemptions from FAR calculations apply:

a. ((Three and one-half)) As an allowance for mechanical equipment, 3.5 percent of the total chargeable gross floor area in a structure, as an allowance for mechanical equipment. Calculation of the allowance is based on the remaining gross floor area after all other
exempt space permitted in subsection 23.50.028.E is deducted)) that is not otherwise exempt under this subsection 23.50.028.C.

(b. For structures built prior to June 2, 2011, the area covered by new or replacement mechanical equipment placed on the roof.

e) b. All gross floor area for solar collectors and wind-driven power generators.

((d)) c. The gross floor area of the following uses located at street level, provided that the conditions of Section 23.50.039 are satisfied:

1) General sales and service uses;
2) Eating and drinking establishments;
3) Entertainment use;
4) Public libraries;
5) Child care facilities;
6) Religious facilities; and
7) Automotive sales and service.

3. In addition to areas exempt from FAR calculations in subsection ((23.50.028.E.1)) 23.50.028.C.1, within IG1 and IG2 zones, the gross floor area of rooftop recreational space accessory to office use meeting the standards of subsection 23.50.012.D is exempt from FAR calculations.

((E)) D. Within IC 85-175 zones, gross floor area used for accessory parking within stories that are completely above finished grade is not exempt, except that in an IC 85-175 zone, if the Director finds, as a Type I decision, that locating all parking below grade is infeasible due to physical site conditions such as a high water table, contaminated soils conditions, or proximity
to a tunnel, and that the applicant has placed or will place the maximum feasible amount of
parking below or partially below grade, the Director may exempt all or a portion of accessory
parking that is above finished grade. If any exemption is allowed under this subsection
((23.50.028.F)) 23.50.028.D, all parking provided above grade shall be subject to the screening
requirements of subsection 23.50.038.B.6.

((G. Mechanical equipment. Area covered by mechanical equipment located on the roof
of a structure, whether enclosed or not, is included as part of the calculation of floor area, unless
expressly exempted by an applicable provision of this Section 23.50.028.))

Section 84. Subsection 23.50.053.A of the Seattle Municipal Code, which section was
last amended by Ordinance 125291, is amended as follows:

23.50.053 Transfer of development rights within an IC 85-175 zone

A. General standards for the transfer of transferable development rights (TDR) to lots
in an IC 85-175 zone

1. To achieve extra non-residential floor area above the base FAR that may be
allowed in an IC 85-175 zone pursuant to ((subsection 23.50.028.D)) Section 23.50.028, an
applicant may use TDR to the extent permitted under this subsection 23.50.053.A.

2. South Downtown Historic TDR, open space TDR from zones within South
Downtown, and housing TDR eligible to be transferred from a lot under Section 23.49.014
may be transferred from a Downtown zone to a lot eligible as a receiving site in an IC 85-175
zone. No other TDR may be used in an IC 85-175 zone under this Section 23.50.053.

3. Except as expressly permitted pursuant to subsection 23.50.053.A,
development rights or potential floor area may not be transferred to a lot in an IC 85-175 zone.
4. No permit after the first building permit, no permit for any construction activity other than excavation and shoring, and no permit for occupancy of existing floor area by any use based upon TDR will be issued for development that includes TDR until the applicant’s possession of TDR is demonstrated to the satisfaction of the Director.

* * *

Section 85. Subsection 23.50.055.A of the Seattle Municipal Code, which section was last amended by Ordinance 125291, is amended as follows:

23.50.055 Street-facing facade requirements and upper-level development standards in an IC 85-175 zone

The following development standards apply to all lots within an IC 85-175 zone:

A. Street-facing facade requirements. For purposes of this Section 23.50.055, balcony railings and other non-structural features or non-structural walls are not considered parts of the facade.

1. Minimum facade height. A minimum facade height of 25 feet is required for facades that face streets shown on Map A for 23.50.016, Industrial Streets Landscaping Plan. The minimum facade height for facades facing other streets is 15 feet. A minimum facade height does not apply if all portions of a structure are lower than the applicable minimum facade height.

2. Facade setback limits. The total area of street-level setbacks between the street lot line and the street-facing facade is limited to the area determined by multiplying the averaging factor by the width of the structure measured parallel to the abutting street.

   a. The averaging factor is five for facades that face streets shown on Map A for 23.50.016.
b. For all other street-facing facades, the averaging factor is ten.

c. The maximum width, measured along the street lot line, of any setback area exceeding a depth of 15 feet from the street lot line is 80 feet, or 30 percent of the lot frontage on that street, whichever is less.

d. For all lots subject to facade setback limits, the following conditions apply:

1) Parking is prohibited between the facade and the street lot line.

2) The maximum setback of the facade from street lot lines within 20 feet of an intersection is 10 feet.

e. If the presence of a utility easement or other condition requires the street-facing facade to set back from the street lot line, the Director may, as a Type I decision, select another line to apply the standards of subsection 23.50.055.A.2. If sidewalk widening into the lot is required as mitigation pursuant to subsection (23.50.028.D) 23.50.028.B, the setback area permitted by the applicable averaging factor shall be measured from the new edge of the sidewalk within the lot rather than the street lot line.

3. Principal pedestrian entrances. A principal pedestrian entrance to a structure is required on facades facing streets shown on Map A for 23.50.016, Industrial Streets Landscaping Plan.

4. Facade transparency requirements. Facade transparency requirements apply to the area of the facade between 2 feet and 8 feet above the sidewalk. Only clear or lightly tinted glass in windows, doors, and display windows is considered to be transparent. Transparent areas shall allow views into the structure or into display windows from the outside.
a. For facades facing a street shown on Map A for 23.50.016, Industrial Streets Landscaping Plan, a minimum of 60 percent of a street-facing facade shall be transparent.

b. For facades facing all other streets, a minimum of 40 percent of the street-facing facade shall be transparent.

***

Section 86. Subsection 23.53.006.D of the Seattle Municipal Code, which section was last amended by Ordinance 125272, is amended as follows:

23.53.006 Pedestrian access and circulation

***

D. Outside ((Urban Centers)) urban centers and ((Urban Villages)) urban villages, sidewalks are required on an existing street in any of the following circumstances, except as provided in subsection 23.53.006.F.

1. In any zone with a pedestrian designation, sidewalks are required if new lots are created through the platting process including full and short subdivisions or if development is proposed.

2. On streets designated on Map A for 23.50.016, Industrial Streets Landscaping Plan, sidewalks are required if new lots are created through the platting process, including full and short subdivisions or if development is proposed. Sidewalks are required only for the portion of the lot that abuts the designated street.

3. On arterials, except in IG1 and IG2 zones and on lots in IB zones that are not directly across the street from or abutting a lot in a residential or commercial zone, sidewalks are
required if new lots are created through the platting process, including full and short subdivisions or if development is proposed. Sidewalks are required only for the portion of the lot that abuts the arterial.

4. In ((SF and LR1)) single-family zones, sidewalks are required if ten or more lots are created through the platting process, including full and short subdivisions and unit lot subdivisions, or if ten or more dwelling units are developed.

5. Outside of ((SF and LR1)) single-family zones, except in IG1 and IG2 zones and on lots in IB zones that are not directly across the street from or abutting lot in a residential or commercial zone, sidewalks are required if six or more lots are created through the platting process, including full and short subdivisions and unit lot subdivisions, or if six or more dwelling units are developed.

6. In all zones, except IG1 and IG2 zones and on lots in IB zones that are not directly across the street from or abutting a lot in a residential or commercial zone, sidewalks are required if the following ((nonresidential)) non-residential uses are developed:

   a. ((750)) Seven hundred and fifty square feet or more of gross floor area of major and minor vehicle repair uses and ((multipurpose)) multi-purpose retail sales; or

   b. ((4,000)) Four thousand square feet or more of ((nonresidential)) non-residential uses not listed in subsection 23.53.006.D.6.a.

   * * *

Section 87. Subsection 23.53.025.C of the Seattle Municipal Code, which section was last amended by Ordinance 123963, is amended as follows:
23.53.025 Access easement standards

* * *

C. Vehicle ((Access Easements Serving at Least Five but Fewer Than Ten Single-Family Dwelling Units, or at Least Three but Fewer than Ten Multifamily Dwelling Units))

access easements serving at least five but fewer than ten single-family dwelling units, or at least
three but fewer than ten multifamily dwelling units ((-))

1. Easement width, surfaced width, length, turn around, and curbcut width shall
be as required in subsection 23.53.025.B;

2. No single-family structure shall be closer than 5 feet to the easement, except
that structural features allowed to extend into required yards under ((Section 23.44.014.D.6))
subsection 23.44.014.C.6 are also allowed to extend into the ((five-foot)) 5-foot setback from
an easement.

* * *

Section 88. Table B for 23.54.015 of the Seattle Municipal Code, which section was last
amended by Ordinance 125272, is amended as follows:

**Footnotes to Table B for 23.54.015**

1. The minimum amount of parking prescribed by line I of this Table B for 23.54.015 does not apply if a use, structure, or development qualifies for a greater or a lesser amount of parking, including no parking, under any other provision of this Section 23.54.015. If more than one such provision may apply, the provision requiring the least amount of parking applies, except that if an applicable parking requirement in line II of this Table B for 23.54.015 requires more parking than line I, the parking requirement in line I does not apply.

2. For development within single-family zones, the Director may waive some or all of the parking requirements according to Section 23.44.015 as a special or reasonable accommodation. In other zones, if the applicant can demonstrate that less parking is needed to provide a special or reasonable accommodation, the Director may reduce the requirement. The Director shall specify the parking required and link the parking reduction to the features of the program that allow such reduction. The parking reductions are effective only as long as the conditions that justify the waiver are present. When the conditions are no longer present, the development shall provide the amount of parking that otherwise is required.

3. Notice of income restrictions. If these provisions are applied to a development, then prior to the issuance of any permit to establish, construct, or modify the development, or to reduce the amount of parking accessory to the development, the applicant shall record with the King County Recorder a restrictive covenant signed and acknowledged by the owner(s), in a form prescribed by the Director, that provides notice that compliance with the income limits prescribed by this Section 23.54.015 is a condition for maintaining the reduced parking allowed

Section 89. Section 23.54.040 of the Seattle Municipal Code, last amended by Ordinance 125272, is amended as follows:

23.54.040 Solid waste and recyclable materials storage and access

* * *

J. Ramps to accommodate solid waste container access

1. A ramp to the street to accommodate solid waste container access that is not more than 5 feet in width may be approved by the Director of Transportation if:

   a. Access to solid waste containers is not from an alley;

   b. No on-site parking is provided;

   c. The adjacent lot contains solid waste containers that are 1 cubic yard or larger; and

   d. There are no existing ramps to accommodate solid waste container access or other curb cuts, excluding curb ramps at crosswalks, within 150 feet of the street lot line, as measured parallel to the street lot line.

2. The standards of subsections 23.54.040.J.1.a through 23.54.040.J.1.d may be modified by the Director of Transportation where unusual topography or other local conditions present significant challenges for accommodating solid waste container access.
Section 90. Section 23.58A.002 of the Seattle Municipal Code, last amended by Ordinance 124172, is amended as follows:

23.58A.002 Scope of chapter; general rules

A. This Chapter 23.58A contains rules for incentive programs in areas for which the provisions of the zone specifically refer to this Chapter 23.58A, (or in zones having an incentive zoning suffix.) The provisions in this Chapter 23.58A specify conditions under which extra floor area may be allowed, as exceptions to the otherwise applicable floor area or base height limit, or both, subject to the maximum limits stated in the provisions of the zone and to all other applicable requirements and approvals. Nothing in this Chapter 23.58A authorizes allowance of extra floor area, or the construction or use of any structure, contrary to any other provisions of this Title 23 or Title 25. Developments for which extra floor area is sought may be subject to conditions under other chapters and titles of the Seattle Municipal Code, including without limitation conditions imposed pursuant to Chapter 25.05, Environmental Policies and Procedures.

B. The provisions of this ((subchapter)) Subchapter I apply generally to projects using any of the incentive provisions in this Chapter 23.58A, unless otherwise expressly provided in the applicable subchapter of this Chapter 23.58A or in the provisions of the zone.

C. Nothing in this Chapter 23.58A shall be construed to confer on any owner or developer any development rights or property interests. The availability and terms of any allowance of extra floor area depend on the regulations in effect on the relevant date for consideration of a permit application for the project proposing to use such extra floor area, pursuant to Section 23.76.026, notwithstanding any prior approvals, interpretations or
agreements by the Director, Housing Director, or other official regarding the eligibility of any
actual or proposed facility or feature to satisfy conditions for extra floor area.

Section 91. Subsection 23.58A.014.C of the Seattle Municipal Code, which section was
last amended by Ordinance 124919, is amended as follows:

**23.58A.014 Bonus residential floor area for affordable housing**

* * *

C. Payment option. The payment option is available only where the maximum height
for residential use under the provisions of the zone is more than 85 feet and only if the Director
determines that the payment achieves a result equal to or better than providing the affordable
housing on-site and the payment does not exceed the approximate cost of developing the same
number and quality of housing units that would otherwise be developed (for development
of a single purpose commercial structure in zones with an incentive zoning suffix.) The
amount of the in-lieu payment made at the time specified in subsection 23.58A.014.C.2 shall
be based on the payment amount that is in effect when vesting of a Master Use Permit occurs
under Section 23.76.026.

1. Amount of payments ((c))

   a. Except as provided in subsection 23.58A.014.C.1.b, in lieu of all or
   part of the performance option, an applicant may pay to the City $15.15 per square foot of
gross bonus residential floor area.

   b. In the South Lake Union Urban Center, in lieu of all or part of the
   performance option, an applicant may pay to the City $21.68 per square foot of gross bonus
   residential floor area. On July 1, 2014, and on the same day annually thereafter the in-lieu
   payment amount in this subsection 23.58A.014.C.1.b shall automatically adjust in proportion
to the change in the Consumer Price Index, All Urban Consumers, Seattle-Tacoma-Bremerton, WA, All Items (1982-84 = 100), as determined by the U.S. Department of Labor, Bureau of Labor Statistics, or successor index, from the time the in-lieu payment was established or last adjusted.

2. Timing of payments. Cash payments shall be made prior to issuance and as a condition to issuance of any permit after the first building permit for a development and before any permit for any construction activity other than excavation and shoring is issued, unless the applicant elects in writing to defer payment. If the applicant elects to defer payment, then the issuance of any certificate of occupancy for the development shall be conditioned upon payment of the full amount of the cash payment determined under this Section 23.58A.014, plus an interest factor equal to that amount multiplied by the increase, if any, in the Consumer Price Index, All Urban Consumers, West Region, All Items ((1982-84=100), as published monthly, from the last month prior to the date when payment would have been required if deferred payment had not been elected, to the last month for which data are available at the time of payment. If the index specified in this subsection 23.58A.014.C.2 is not available for any reason, the Director shall select a substitute cost of living index. In no case shall the interest factor be less than zero.

3. Deposit and use of payments. Cash payments in lieu of affordable housing shall be deposited in a special account established solely to support the development of housing for income-eligible households as defined in this Chapter 23.58A. Earnings on balances in the special account shall accrue to that account. The Director of Housing shall use cash payments and any earnings thereon to support the development of housing for income-eligible households in any manner now or hereafter permitted by RCW 36.70A.540. Uses of
funds may include the City’s costs to administer housing for income-eligible households, not
to exceed ((40)) ten percent of the payments into the special account. Housing for income-
eligible households funded wholly or in part with cash payments shall be located within the
Seattle city limits.

* * *

Section 92. The name of Subchapter IV of Chapter 23.58A of the Seattle Municipal Code
is amended as follows:

Subchapter IV ((Extra Floor Area in Zones With An Incentive Zoning Suffix))

[RESERVED]

Section 93. Section 23.58A.025 of the Seattle Municipal Code, enacted by Ordinance
123770, is repealed:

((23.58A.025 Scope of subchapter

This subchapter IV includes provisions under which applicants may gain extra floor area for
development in zones with an incentive zoning suffix.))

Section 94. Section 23.58A.026 of the Seattle Municipal Code, last amended by
Ordinance 124172, is repealed:

((23.58A.026 Application of floor area limits in zones with an incentive zoning suffix

In zones with an incentive zoning suffix, extra floor area may be allowed in addition to the
maximum gross floor area allowed by the FAR limit indicated by the incentive zoning suffix. All
extra floor area shall be considered extra residential floor area regardless of the use. Extra floor
area may be gained up to the maximum non-exempt gross floor area allowed by the FAR limit of
the applicable Commercial or Multifamily zone. For single purpose commercial structures in
zones with an incentive zoning suffix, extra floor area may be allowed when the applicant

Template last revised December 1, 2016
qualifies by using the performance option or the payment option in accordance with Section 23.58A.014, or a combination of these options. The provisions of this Chapter 23.58A under which applicants may gain extra residential floor area shall apply.)

Section 95. Section 23.58A.028 of the Seattle Municipal Code, enacted by Ordinance 123770, is repealed:

((23.58A.028 Application of incentive zoning in legislative rezones

A. When the City Council approves a Type V legislative rezone pursuant to Section 23.76.062, the Council may elect to apply the incentive zoning provisions of this chapter to all or part of the area being rezoned. If the Council decides to apply this chapter, then the maximum floor area ratio permitted within the area subject to this chapter is the floor area ratio of the previous zone, as described in subsection 23.58A.028.B below, unless the applicant for project approval gains additional floor area ratio pursuant to this chapter.

B. For the sole purpose of establishing base FAR and/or base residential floor area under this chapter, the following shall be applied as the base FAR and/or base residential floor area when rezoning from one of the following zones:

1. Single-Family zones: .75
2. Lowrise 1 Zones: 1.2
3. Lowrise 2 Zones: 1.3
4. Lowrise 3 Zones:
   a. Outside urban centers, urban villages, and the Station Area Overlay District: 1.6
   b. Inside urban centers, urban villages, and the Station Area Overlay District: 2.0
5. Commercial zones as shown in Table A for 23.58A.028.

6. Within an overlay district, other than the Station Area Overlay District, where overlay district provisions for FAR prevail over the FAR provisions of the underlying zone, the FAR prescribed in the overlay provisions shall be used to establish the Base FAR and/or Base Residential Floor Area.}

Section 96. Section 23.58B.040 of the Seattle Municipal Code, last amended by Ordinance 125371, is amended as follows:

### 23.58B.040 Mitigation of impacts—payment option

A. Amount of cash contributions

1. An applicant complying with this Chapter 23.58B through the payment option shall provide a cash contribution to the City, calculated by multiplying the payment calculation amount per square foot according to Table A or Table B for 23.58B.040 and Map A for 23.58B.050, as applicable, by the total square feet of chargeable floor area in commercial use, or gross floor area in commercial use that is not underground if there is no FAR limit in the underlying zone, as follows:
a. Including chargeable floor area in commercial use in the following:

1) A new structure;

2) An addition to a structure;

3) A change of use from residential use to commercial use; or

4) Any combination of the above; and

b. Excluding chargeable floor area in commercial use as follows:

1) The first 4,000 gross square feet of street-level commercial uses; and

2) Street-level commercial uses along a designated principal pedestrian street in a Pedestrian designated zone.

2. Automatic adjustments to payment amounts. On March 1, 2016, and on the same day each year thereafter, the amounts for payment calculations according to Table A and Table B for 23.58B.040 shall automatically adjust in proportion to the annual change for the previous calendar year (January 1 through December 31) in the Consumer Price Index, All Urban Consumers, Seattle-Tacoma-Bremerton, WA, All Items (1982-84 = 100), as determined by the U.S. Department of Labor, Bureau of Labor Statistics, or successor index.

* * *

Section 97. Section 23.58B.050 of the Seattle Municipal Code, last amended by Ordinance 125371, is amended as follows:

23.58B.050 Mitigation of impacts—performance option

A. ((Amount of MHA-C housing)) Performance option

1. An applicant complying with this Chapter 23.58B through the performance option shall provide total square feet of housing meeting the standards of subsection 23.58B.050.B, measured as net unit area, calculated by multiplying the percentage calculation amount per square foot according to Table A or Table B for 23.58B.050 and Map A for 23.58B.050, as applicable, by the total square feet of chargeable floor area in commercial use,
or gross floor area in commercial use that is not underground if there is no FAR limit in the underlying zone, as follows:

a. Including chargeable floor area in commercial use in the following:

1) A new structure;

2) An addition to a structure;

3) A change of use from residential use to commercial use; or

4) Any combination of the above; and

b. Excluding chargeable floor area in commercial use as follows:

1) The first 4,000 gross square feet of street-level commercial uses; and

2) Street-level commercial uses along a designated principal pedestrian street in a Pedestrian designated zone.

2. If the calculation according to subsection 23.58B.050.A.1 yields fewer than three units of housing required to meet the standards of subsection 23.58B.050.B, using a conversion factor for unit size as determined by the Director, the applicant shall provide a cash contribution using the payment option according to subsection 23.58B.040.A.

Section 98. Section 23.58C.040 of the Seattle Municipal Code, last amended by
Ordinance 125371, is amended as follows:

23.58C.040 Affordable housing—((Payment)) payment option

A. Payment amount

1. An applicant complying with this Chapter 23.58C through the payment option shall provide a cash contribution to the City, calculated by multiplying the payment calculation amount per square foot according to Table A or Table B for 23.58C.040 and Map A for 23.58C.050, as applicable, by the total gross floor area in the development, excluding the floor area of parking located in stories, or portions of stories, that are underground, as follows:

   a. In the case of construction of a new structure, the gross floor area in residential use and the gross floor area of live-work units;

   b. In the case of construction of an addition to an existing structure that results in an increase in the total number of units within the structure, the gross floor area in residential use and the gross floor area of live-work units in the addition;

   c. In the case of alterations within an existing structure that result in an increase in the total number of units within the structure, the gross floor area calculated by dividing the total gross floor area in residential use and gross floor area of live-work units by the total number of units in the proposed development, and multiplying that quotient by the net increase in units in the structure;

   d. In the case of change of use that results in an increase in the total number of units, the gross floor area that changed to residential use or live-work units; or

   e. Any combination of the above.

2. Automatic adjustments to payment amounts. On March 1, 2017, and on the
same day each year thereafter, the amounts for payment calculations according to Table A and
Table B for 23.58C.040 shall automatically adjust in proportion to the annual change for the
previous calendar year (January 1 through December 31) in the Consumer Price Index, All
Urban Consumers, Seattle-Tacoma-Bremerton, WA, All Items (1982-84 = 100), as determined
by the U.S. Department of Labor, Bureau of Labor Statistics, or successor index.

Section 99. Section 23.58C.050 of the Seattle Municipal Code, last amended by
Ordinance 125432, is amended as follows:
23.58C.050 Affordable housing—performance option

A. Performance amount

1. An applicant complying with this Chapter 23.58C through the performance option shall provide, as part of the units to be developed in each structure, a number of units that meet the requirements according to subsection 23.58C.050.C calculated by multiplying the percentage set aside according to Table A or Table B for 23.58C.050 and Map A for 23.58C.050, as applicable, by the total number of units to be developed in each structure.

2. If the number of units that meet the requirements according to subsection 23.58C.050.C calculated according to subsection 23.58C.050.A.1 equals less than two, the applicant shall:

   a. Round up to two units; or
   
   b. Provide one dwelling unit that meets the requirements according to subsection 23.58C.050.C that is three bedrooms or larger, as determined by the Director of Housing.

3. If the number of units that meet the requirements according to subsection 23.58C.050.C calculated according to subsection 23.58C.050.A.1 equals two or more and includes a fraction of a unit, the applicant shall:

   a. Round up to the nearest whole unit; or
   
   b. Round down to the nearest whole unit and pay a cash contribution for the fraction of a unit not otherwise provided, calculated by multiplying the payment calculation amount per square foot according to Table A or Table B for 23.58C.040 and Map A for 23.58C.050, as applicable, by the total gross floor area to be developed as measured according to subsection 23.58C.040.A.1, multiplying that product by the fraction of a unit not provided,
and dividing the resulting number by the total number of units required to be provided based on the calculation according to subsection 23.58C.050.A.1. Use of cash contributions according to this subsection 23.58C.050.A.3.b shall be governed according to subsection 23.58C.040.B.

4. When the applicant elects to comply with this Chapter 23.58C through the performance option for a development that contains multiple structures and the calculation according to subsection 23.58C.050.A.1 results in fractions of units in more than one structure, the Director may, as a Type I decision in consultation with the Director of Housing, allow such fractions of units to be combined, provided:

a. If the sum of the combined fractions of units calculated according to this subsection 23.58C.050.A.4 equals fewer than two, the applicant shall:
   1) Round up to two units; or
   2) Provide one dwelling unit that meets the requirements according to subsection 23.58C.050.C that is three bedrooms or larger, as determined by the Director of Housing;

b. If the sum of the combined fractions of units calculated according to this subsection 23.58C.050.A.4 equals two or more and includes a fraction of a unit, the applicant shall:
   1) Round up to the nearest whole unit; or
   2) Round down to the nearest whole unit and pay a cash contribution for the fraction of a unit not otherwise provided, calculated according to subsection 23.58C.050.A.3.b; and
c. The construction of the structure(s) containing the units that meet the requirements according to subsection 23.58C.050.C shall be completed at the same time or at an earlier time than completion of construction of other structures in the development containing units.

Template last revised December 1, 2016
Section 100. Section 23.58D.002 of the Seattle Municipal Code, enacted by Ordinance 125163, is amended as follows:

**23.58D.002 Green building standard**

A. When a commitment to meet the green building standard is required (to qualify for additional height or extra floor area) in the applicable zone, the owner shall make a commitment that the proposed development will meet the green building standard, or a substantially equivalent or superior standard, and shall demonstrate compliance with that commitment in accordance with the provisions of Section 23.58D.004.

B. If a site contains existing structures developed according to a version of the Land Use Code in effect before April 19, 2011, the existing structures and any additions to those structures are not required to be upgraded to the current green building standard (to qualify for additional height or extra floor area for those structures). Any entirely new structure proposed to be built on the lot shall meet the current green building standard (to gain the extra FAR for the site or additional height for the structure). If a site contains existing structures developed according to a version of the Land Use Code in effect on or after April 19, 2011, (and was not built using all available extra FAR, then in order for the structure or addition to gain the extra FAR) the existing structures and any additions to those structures shall be updated to the current green building standard.

C. The Director shall adopt and amend rules establishing the green building standard and enabling an owner to demonstrate compliance with a commitment to meet the standard using a substantially equivalent or superior standard.
Section 101. Section 23.58D.006 of the Seattle Municipal Code, enacted by Ordinance 125163, is amended as follows:

**23.58D.006 Penalties**

* * *

C. Failure to comply with the owner’s commitment that the development will meet the green building standard is a violation of the Land Use Code independent of the failure to demonstrate compliance; however, failure to comply with the owner’s commitment shall not affect the right to occupy any (extra) floor area, and if a penalty is paid in the amount determined under subsection 23.58D.006.B, no additional penalty shall be imposed for the failure to comply with the commitment.

D. In addition to the owner, the applicant for the development for which (additional height or extra floor area was obtained in exchange for) a commitment to meet the green building standard was required shall be jointly and severally responsible for compliance and liable for any penalty imposed pursuant to this Section 23.58D.006.

* * *

Section 102. Section 23.71.030 of the Seattle Municipal Code, last amended by Ordinance 123495, is amended as follows:

**23.71.030 Development standards for transition areas within the Northgate Overlay District**

A. To promote compatibility between different types and intensities of development located within and along the boundary of the Northgate Overlay District, a transition shall be provided between zones where different intensities of development may occur.
B. The requirements of this Section 23.71.030 apply to development on lots in the more intensive zones under the following conditions:

1. Where a lot zoned (Lowrise 3 (LR3)), Midrise (MR) (Midrise/85 (MR/85)), or Highrise (HR) abuts or is across (a street or an alley from a lot zoned (Single-Family)) Single-family (SF), Lowrise 1 (LR1), or Lowrise 2 (LR2); and

2. Where a lot zoned Neighborhood Commercial 2 or 3 (NC2, NC3) with a height limit of 40 feet or greater abuts or is across (a street or an alley from a lot zoned (Single-Family)) Single-family (SF), Lowrise 1 (LR1), or Lowrise 2 (LR2).

C. Side setbacks abutting or across an alley.

1. For (multifamily) structures in multifamily zones, an additional side setback of (one (1)) 1 foot for each (two (2)) 2 feet of a structure height above (twenty (20)) 20 feet is required (Exhibit (23.71.032-A) A for 23.71.030).
Exhibit A for 23.71.030
Side setbacks in multifamily zones

2. ((A)) For structures in C or NC zones, a side setback of ((ten (10))) 10 feet is required for all portions of ((a commercial or mixed use)) the structure ((twenty (20))) 20 feet or less in height ((Exhibit 23.71.032 B)).

3. An) and an additional side setback of ((ten (10))) 10 feet is required for all portions of ((a commercial or mixed use)) the structure exceeding ((twenty (20))) 20 feet (Exhibit ((23.71.032 B))) B for 23.71.030).
Exhibit B for 23.71.030
Side setbacks in neighborhood commercial zones

((4)) 3. Side setbacks shall be landscaped within ((five (5))) 5 feet of the abutting property line, unless the setback is used for parking, in which case the parking area shall be screened as otherwise required by this ((code)) Title 23.
D. Rear ((Setbacks Abutting or Across an Alley)) setbacks abutting or across an alley

1. For ((multifamily)) structures in multifamily zones, a rear setback of ((twenty (20)) 20 feet is required or the minimum required by the standards of the underlying zone ((for multifamily structures)), whichever is greater.

2. ((A)) For structures in C or NC zones, a rear setback of ((ten (10)) 10 feet is required for all portions of ((a commercial or mixed use)) the structure ((twenty (20)) 20 feet or less in height ((Exhibit 23.71.032 C)). An)) and an additional rear setback of ((ten (10)) 10 feet is required for all portions of ((a commercial or mixed use)) the structure exceeding ((twenty (20)) 20 feet (Exhibit ((23.71.032 C)) C for 23.71.030)).
Exhibit C for 23.71.030
Rear setbacks in neighborhood commercial zones

((4)) 3. Rear setbacks shall be landscaped unless used for parking, in which case the parking area shall be screened and landscaped as otherwise required by this ((eede)) Title 23.

((E. Side or Rear Setbacks for Multifamily Structures Abutting a Street. A side or rear setback of eight (8) feet, or the minimum required for multifamily structures by the underlying zone, whichever is greater, is required for portions of a multifamily structure thirty (30) feet or less in height along all street rights-of-way less than eighty (80) feet wide across from the less intensive zone. Portions of a multifamily structure in excess of thirty (30) feet in height shall be
set back an additional one (1) foot for each two (2) feet of structure height above thirty (30) feet (Exhibit 23.71.032D).

F. Front Setbacks for Multifamily Structures Abutting a Street. Where the front lot line of the more intensively zoned lot is across a street right-of-way which is less than eighty (80) feet wide from the less intensively zoned lot, the minimum front setback shall be ten (10) feet for all portions of a multifamily structure thirty (30) feet or less in height. For portions of a structure exceeding thirty (30) feet in height, an additional front setback of one (1) foot for every two (2) feet of structure height in excess of thirty (30) feet shall be required (Exhibit 23.71.032E).

G. Setbacks for Commercial or Mixed Use Structures Abutting a Street. No side or rear setback abutting a street is required for the portion of commercial or mixed use structures containing street level retail sales and service uses oriented towards the street. Where blank walls, parking or other nonretail sales and service uses occupy portions of the structure facing the street a five (5) foot setback shall be required and screened and landscaped as required by the underlying zone.)

Section 103. Section 23.71.040 of the Seattle Municipal Code, enacted by Ordinance 116795, is repealed:

((23.71.040 Density limits for residential uses in commercial zones within the Northgate Overlay District.

A. Residential uses in commercial zones with a thirty (30) foot height limit may not exceed a density of one (1) dwelling unit for every eight hundred (800) square feet of lot area.

B. Residential uses in commercial zones with a forty (40) foot height limit may not exceed a density of one (1) dwelling unit for every six hundred (600) square feet of lot area.

C. There is no density limit for residential use in commercial zones with height limits of sixty-five (65) feet or greater.

D. Development meeting the requirements for mixed use as provided in Section 23.71.038 is allowed a twenty (20) percent increase in permitted density over the density permitted by subsections A and B of this section.))

Section 104. Section 23.73.009 of the Seattle Municipal Code, last amended by ordinance 125429, is amended as follows:

23.73.009 Floor area ((ratio))

A. For lots with residential uses only, or lots that include both residential and non-residential uses, the total FAR ((limits in Section 23.47A.013 for the underlying zone apply)) limit shall not exceed 3.75, except as provided in this Section 23.73.009 and in Section 23.73.024 for projects using transfer of development potential, ((and provided the gross floor area of non-residential uses does not exceed 2 FAR, except as permitted in subsection 23.73.009.B.))
B. ((Non-residential)) The gross floor area of non-residential uses ((are)) is limited to a maximum of 2.25 FAR, except ((that for development on a lot that meets one of the following conditions, the FAR limits for non-residential uses in Section 23.47A.013 for the underlying zone applies)) as provided in this Section 23.73.009 and in Section 23.73.024 for projects using transfer of development potential.

C. For development on a lot that meets one of the following conditions, the FAR limits in subsections 23.47A.013.A and 23.47A.013.B do not apply and the FAR limits for the underlying zone apply instead:

1. A character structure has not existed on the lot since January 18, 2012; or
2. For lots that include a character structure, all character structures on the lot are retained according to Section 23.73.015 ((unless)) or a departure is approved through the design review process to allow the removal of a character structure based on the provisions of subsection 23.41.012.B. If the lot includes a character structure that has been occupied by residential uses since January 18, 2012, the same amount of floor area in residential uses shall be retained in that structure, unless a departure is approved through the design review process to allow the removal of the character structure based on the provisions of subsection 23.41.012.B.

The owner of the lot shall execute and record in the King County real property records an agreement to provide for the maintenance of the required residential uses for the life of the project.

D. In addition to the floor area exempt under the provisions of the underlying zone, the following floor area is exempt from the calculation of gross floor area subject to an FAR limit:
1. The following street-level uses complying with the standards of Section 23.47A.008 and subsection 23.73.008.B:
   a. General sales and services;
   b. Major durables retail sales;
   c. Eating and drinking establishments;
   d. Museums;
   e. Religious facilities;
   f. Libraries; and
   g. Automotive retail sales and service uses located within an existing structure or within a structure that retains a character structure as provided in Section 23.73.015.

2. Floor area used for theaters or arts facilities, which for the purposes of this Section 23.73.009 only, may be operated either by for-profit or not-for-profit organizations.

3. All floor area in residential use in a development that retains all character structures on the lot as provided in Section 23.73.015, or that uses the transfer of development potential (TDP) on a lot that is a TDP receiving site according to Section 23.73.024, unless a departure is approved through the design review process to allow the removal of a character structure based on the provisions of subsection 23.41.012.B.

4. In areas where the underlying zoning is NC3P-65 or NC3P-75, all floor area in any use if the lot that is to be developed is 8,000 square feet or less in area and has been either vacant or in parking use since February 27, 1995.

5. Floor area in non-residential use within a character structure that meets the minimum requirements for retaining a character structure in subsection 23.73.024.C.4, provided...
that the non-residential use does not displace a residential use existing in the structure since January 18, 2012.

Section 105. Section 23.73.010 of the Seattle Municipal Code, last amended by Ordinance 125429, is amended as follows:

23.73.010 Floor area limits outside the Conservation Core

A. Floor area limit. The following provisions apply to lots located outside the boundaries of the Conservation Core identified on Map A for 23.73.010.

1. The maximum gross floor area of any single story above 35 feet in height is limited to 15,000 square feet, except as provided in subsections 23.73.010.A.2, 23.73.010.A.3, 23.73.010.B, and (23.73.010.C).

2. For a project that is allowed extra height above the height limit by subsection 23.73.014.A, the 35-foot height above which the floor area limit applies is increased to 39 feet, provided that the provisions for allowing additional height under subsection 23.73.014.A are met.

3. For a project that is allowed extra height above the height limit by subsection 23.73.014.B, the 35-foot height above which the floor area limit applies is increased to 39 feet, provided that:

   a. The provisions for allowing additional height under subsection 23.73.014.B are met, and

   b. The minimum floor-to-ceiling height of non-residential uses at street level is at least 13 feet, except that if a character structure is retained according to Section 23.73.015, the floor-to-ceiling height of the portion of the street-level story above the footprint...
of the character structure need not exceed the original floor-to-ceiling height of the character
structure.

4. On a lot with more than one structure or more than one portion of the same structure that exceeds 35 feet in height, the floor area limit applies to the combined portions of each story above 35 feet in height. If 39 feet is the height above which the floor area limit applies as allowed by subsection 23.73.010.A.1 and subsection 23.73.010.A.2, then the floor area limit applies to the combined portions of each story above 39 feet.

5. If new structures on the same or abutting lots have internal connections above or below grade, each of the stories of the connected structures are considered to be a single story for the purpose of calculating the floor area subject to the floor area limit.
Map A for 23.73.010 ((z))
Conservation Core
B. Exceptions to floor area limit

1. A 15 percent increase in the floor area limit is permitted for projects that meet the following conditions:

   a. The project retains all the character structures existing on the lot, unless a departure is approved through the design review process to allow the removal of a character structure based on the provisions of subsection 23.41.012.B; and

   b. The project includes uses that contribute to the area’s recognized character as an arts district, including performing arts space or artist-studio dwellings that typically have design requirements such as nonstandard floor-to-ceiling heights that reduce the total amount of usable floor area in a structure; or

   ((c. A minimum of 50 percent of the total gross floor area of the project is housing that is affordable to and occupied by “income-eligible households,” as defined in Section 23.58A.004, and is subject to recorded covenants approved by the Director that ensure that the housing remains available to these households for a minimum of 50 years; or

   d)) c. Through the design review process a determination is made that including one or more of the following features offsets the increase in the bulk of the project and allows for a design treatment that achieves the intent of the neighborhood design guidelines better than adhering to the floor area limit that would apply without the exception:

   1) A landscaped courtyard that is visible from the sidewalk and located primarily at street level on a street that is not a principal pedestrian street;

   2) A through-block pedestrian corridor that connects parallel streets bounding the project, consistent with the neighborhood design guidelines; or
3) Open space at locations that support the gateway and open space concepts promoted in the neighborhood design guidelines.

2. Retaining character structures on a lot. A 25 percent increase in the floor area limit established in subsection 23.73.010.A is permitted for a project that retains all the character structures on the same lot according to the provisions in Section 23.73.015, unless a departure is approved through the design review process to allow the removal of a character structure based on the provisions of subsection 23.41.012.B. Any increase in floor area permitted according to this subsection 23.73.010.B.2 shall not be combined with any other increase in floor area permitted according to subsection 23.73.010.B.1 or 23.73.010.B.3.

3. A 25 percent increase in the floor area limit is permitted on a lot that qualifies as a receiving site for a project that adds floor area through the use of TDP as permitted by Section 23.73.024, provided that the amount of floor area added through the use of TDP is equivalent to at least 0.25 FAR, as calculated for the receiving site. Any increase in floor area permitted according to this subsection 23.73.010.B.3 shall not be combined with any other increase in floor area permitted according to subsection 23.73.010.B.1 or 23.73.010.B.2.

C. Exempt floor area. The following is not included in calculating floor area subject to the floor area limit:

1. Floor area within an existing character structure either on the lot or an abutting lot within the same development site if the entire character structure is retained according to the provisions of subsection 23.73.024.C.4.

2. For a project that retains an entire character structure on the lot according to the requirements of subsection 23.73.024.C.4, any floor area in a portion of the new structure that extends or cantilevers over the character structure; provided that the new structure does
not alter the envelope or interior of the character structure. Connections between the new structure and the facades of the retained character structure that do not face a public street are allowed.

Section 106. Section 23.73.014 of the Seattle Municipal Code, last amended by Ordinance 125429, is amended as follows:

23.73.014 Height exceptions

A. Height exception for street-level uses. In zones with a mapped height limit of ((65)) 75 feet, an additional 4 feet of height above the height limit of the zone is allowed for structures that include uses listed as required street-level uses in subsection 23.47A.005.D.1 or live-work use if the following conditions are met:

1. The floor-to-ceiling height of the street-level uses or live-work units located at street level is 13 feet or more, except when a character structure is retained according to Section 23.73.015, the floor-to-ceiling height of the portion of the street-level story above the footprint of the character structure need not exceed the original floor-to-ceiling height of the character structure;

2. The additional height will not permit an additional story to be built beyond the number that could be built under a ((65-foot)) 75-foot height limit; and

3. The transparency requirements for street-facing facades in subsection 23.47A.008.B.2 are met for the portion of the street-facing facades between 2 feet and 12 feet above the sidewalk. Only clear or lightly-tinted glass shall be considered transparent. For a character structure that is retained in a new project according to Section 23.73.015, measurement for required transparency of the street-facing facades of the character structure shall be according to the provisions of subsection 23.86.026.B.
B. Height exception for lots that include a character structure. In zones with a ((65-foot)) 75-foot mapped height limit, ((or with a 40-foot mapped height limit with provisions allowing for additional height up to 65 feet according to subsection 23.47.A.012.A,)) 10 feet of additional height is allowed above the ((65-foot)) 75-foot height limit if the following requirements are met:

1. The lot includes a character structure and all character structures on the lot are retained according to the provisions of Section 23.73.015, unless a departure is approved through the design review process to allow removal of a character structure based on the provisions of subsection 23.41.012.B;

2. The additional floor area above the ((65)) 75-foot height limit is occupied solely by residential use, except as otherwise permitted by subsection 23.73.014.B.3; and

3. ((A)) In a project that is permitted the FAR of the underlying zone for non-residential uses under subsection ((23.73.009.B may be allowed to occupy the)) 23.73.009.C, additional floor area permitted above the ((65-foot)) 75-foot height limit under this subsection 23.73.014.B may be occupied by non-residential uses if a departure is approved through the design review process, provided that there is no additional increase in the FAR for non-residential uses beyond what is otherwise allowed by Section 23.73.009. The decision to allow a departure shall be based on a determination that the additional height will result in a better design treatment and accommodate features that promote the development objectives of the Pike/Pine Conservation Overlay District by:

a. Maintaining greater portions of existing character structures on the lot through design treatments that exceed the minimum standards of subsection 23.73.015.A,
number and siting of the structures pose severe limitations on the amount of floor area that can be achieved in the new project within the applicable height limit; or

b. Providing space for features that enhance pedestrian circulation and walkability in the area, such as through-block pedestrian corridors, or open spaces at locations that support the gateway and open space concepts promoted in the neighborhood design guidelines; or

c. Accommodating uses, such as theater space or arts facilities that support the area’s arts and culture function but that may have special spatial needs that require additional design flexibility to incorporate them into the project, provided the uses are maintained for the life of the project as provided for in a recorded covenant approved by the Director.

C. Height exception for character structure TDP receiving sites. A height exception for character structure TDP receiving sites is allowed according to subsection 23.73.024.B.

D. If a project uses more than one of the height exceptions permitted by this Section 23.73.014, the maximum height shall be the height permitted by the exception allowing the greatest height increase.

E. Additional height for rooftop features. For structures using the height exceptions specified in this Section 23.73.014, additional height is permitted above the maximum height allowed by the exception to accommodate rooftop features as permitted under subsection 23.47A.012.C.

Section 107. Section 23.73.024 of the Seattle Municipal Code, last amended by Ordinance 125429, is amended as follows:
23.73.024 Transfer of development potential

A. General standards for the transfer of development potential (TDP) within the Pike/Pine Conservation Overlay District (\((\text{\textsuperscript{\(\text{\textcopyright}\)}})\))

1. For a lot located in an ((\text{\textcopyright}\text{\textsuperscript{\(\text{\textcopyright}\)}}) NC3P-65) NC3P-75 zone within the Pike/Pine Conservation Overlay District shown on Map A for 23.73.004, an applicant may use TDP to obtain any of the following:

   a. A floor area exemption for residential and live-work unit floor area, as permitted under subsection ((23.73.009.C.3)) 23.73.009.D.3;

   b. A height exception to allow an additional 10 feet above the ((65)) 75-foot height limit; and

   c. A 25 percent increase in the floor area limit as provided in subsection 23.73.010.B.3.

2. Within the Conservation Core shown on Map A for 23.73.010, a lot that is an eligible sending site meeting the provisions of subsection 23.73.024.C may transfer development potential to any lot that is an eligible receiving site meeting the provisions of subsection 23.73.024.B. Eligible receiving sites may only gain development potential from eligible sending sites that are also located within the Conservation Core.

3. Development potential may not be transferred from one lot to another except as allowed by this Chapter 23.73.

4. Development potential may be transferred from eligible sending sites meeting the provisions of subsection 23.73.024.C to locations outside the Pike/Pine Conservation Overlay District if TDP transfer to specifically identified areas or lots is authorized by City ordinance.
B. Standards for character structure TDP receiving sites. A lot must meet the following conditions in order to be eligible to achieve extra residential floor area through TDP:

1. TDP receiving sites shall be located in an NC3P-65 zone within the Pike/Pine Conservation Overlay District, provided that:

   a. Development of the receiving site shall not result in the demolition of a structure designated as a Landmark according to Chapter 25.12 or its alteration in a manner that is inconsistent with Chapter 25.12 or an ordinance imposing controls on the Landmark structure.

   b. Development on the lot that is the receiving site shall not result in the demolition or significant alteration of a character structure that is not a designated Landmark and that has existed on the site since January 18, 2012, unless a departure is approved through the design review process to allow the removal of a character structure based on the provisions of subsection 23.41.012.B. For the purposes of this subsection 23.73.024.B.1.b, significant alterations to a character structure would result in conditions that would preclude compliance with the minimum requirements of subsection 23.73.024.C.4.

2. An additional 10 feet in height above the height limit of the zone is permitted on a lot that is an eligible TDP receiving site.

3. Any residential and live-work floor area that is exempt from the FAR limit as allowed by subsection 23.73.009.D.3, or any floor area that exceeds the maximum floor area limit as allowed under subsection 23.73.010.B.3, or that is located above 75 feet in height shall be achieved through the use of TDP.

4. Floor area gained through the use of TDP shall be for residential and live-work unit use only.
5. For a structure that achieves an increase in height through the use of TDP, the minimum street-level floor-to-ceiling height is 13 feet.

6. TDP required before construction. No permit after the first building permit, and in any event no permit for construction activity other than excavating or shoring, and no permit for occupying existing floor area by any use based on TDP; will be issued for development that includes TDP until the applicant has demonstrated possession of TDP to the Director’s satisfaction.

* * *

Section 108. Section 23.74.010 of the Seattle Municipal Code, last amended by Ordinance 123589, is amended as follows:

23.74.010 Development standards

A. Within the Stadium Transition Area Overlay District, the following development standards apply to all uses and structures except for spectator sports facilities:

1. Accessory parking and outdoor storage

   a. Accessory parking or outdoor storage on any lot to the side of a structure on that lot shall not exceed sixty (60) feet of street frontage along 1st Avenue South or along Occidental Avenue South, and may not be located within the first forty (40) feet from any intersection described in subsection 23.74.010.C.

   Parking shall be screened in accordance with screening standards for Class II Pedestrian Streets in downtown zones.

   b. The maximum parking ratio is one (1) space per six hundred fifty (650) square feet of gross floor area of all uses for which required parking is expressed in terms of square footage, except for institutions for which minimum parking requirements apply,
and except for parking accessory to a spectator sports facility or exhibition hall. Nonrequired parking accessory to a spectator sports facility or exhibition hall is not permitted in the overlay district.

2. Curb cuts. Curb cuts are limited to three ((3)) per block front along north-south streets and Railroad Way South within the area described in subsection ((C of this section)) 23.74.010.C. No curb cuts are allowed within the first ((forty (40))) 40 feet from any intersection described in subsection ((C of this section)) 23.74.010.C. On east-west streets outside the area described in subsection ((C of this section)) 23.74.010.C, curb cuts are limited to two ((2)) per block front. On east-west streets, additional curb cuts may be allowed if no other access is possible, including in the ((forty (40))) 40 feet from intersections described in subsection ((C of this section)) 23.74.010.C.

B. For the areas marked on Map A for 23.74.010, the following development standards and provisions apply to all uses and structures except for spectator sports facilities:

1. Floor area ratio (FAR) and floor area limits ((\(FAR\))):
   a. The maximum FAR for all uses is ((3.0)) 3.25. FAR limits of the underlying zone do not apply, ((but))
   b. The gross floor area limits for certain uses in subsection 23.50.027.A.1, ((on gross floor area of certain uses,)) including limits based on lot area, do apply.

2. Exemptions. ((The)) In addition to the FAR exemptions in subsection 23.50.028.E, the first 75,000 square feet of street-level general sales and service, medical services, animal shelters or kennels, automotive sales and services, marine sales and services, eating and drinking establishments, or lodging uses on any lot are exempt from the maximum FAR limit. ((Exemptions in subsection 23.50.028.E also apply,))

Template last revised December 1, 2016
C. Pedestrian environment. The following development standards apply to each use and structure, except spectator sports facilities, to the extent that the use or structure either is on a lot fronting on Railroad Way South, First Avenue South, South Holgate between First Avenue South and Occidental Avenue South, or is within a 40-foot radius measured from any of the block corners of First Avenue South or Occidental Avenue South intersecting with the following streets: Railroad Way South, South Royal Brougham, South Atlantic, South Massachusetts, South Holgate, and any other streets intersecting with First Avenue or Occidental Avenue South that may be established between South Holgate Street and Railroad Way South, as depicted in Map A for 23.74.010. Railroad Way South, First Avenue South, South Holgate Street, and Occidental Avenue South within the Stadium Transition Area Overlay District, and all street areas within a 40-foot radius of any of those block corners described above, are referred to in this Section 23.74.010 as the “pedestrian environment,” except that in applying this Section 23.74.010 to a through lot abutting on Occidental Avenue South and on First Avenue South, Occidental Avenue South is not considered part of the pedestrian environment.

1. Street-Facing Facade Requirements. The following requirements apply to street-facing facades or portions thereof facing streets or portions of streets in the pedestrian environment:

   a. Minimum facade height. Minimum facade height is 25 feet, but minimum facade heights do not apply if all portions of the structure are lower than the elevation of the required minimum facade height.
b. Facade (Setback Limits) setback limits

1) Within the first 25 feet of height measured from sidewalk grade, all building facades must be built to within 2 feet of the street property line for the entire facade length. For purposes of this subsection 23.74.010.C.1.b, balcony railings and other nonstructural features or nonstructural walls are not considered parts of the facade of the structure.

2) Above 25 feet measured from sidewalk grade, the maximum setback is 10 feet, and no single setback area that is deeper than 2 feet shall be wider than 20 feet, measured parallel to the street property line.

3) The facade shall return to within 2 feet of the street property line for a minimum of 10 feet, measured parallel to the street property line, between any two setback areas that are deeper than 2 feet.

2. Outdoor (Service Areas) service areas. Gas station pumps, service islands, queuing lanes, and other service areas related to fueling are not allowed between any structure and the pedestrian environment area described in this Section 23.74.010. Gas station pumps, service islands, queuing lanes, and other service areas related to fueling must be located behind or to the side of a gas station, as viewed from any street in such pedestrian environment and are not allowed between any structure on the same lot and the pedestrian environment area described in this Section 23.74.010.

3. Screening and (Landscaping) landscaping. The requirements of Sections 23.50.016, 23.50.034, and 23.50.038, including requirements contingent on location near a commercial zone, apply to all new uses and structures. Requirements in Section 23.50.038 contingent on location near a residential lot do not apply. In addition, the screening and landscaping requirements for outdoor storage in subsection 23.47A.016.D.2 apply, with respect
to street lot lines abutting the pedestrian environment, to the following uses, where a principal or accessory use is located outdoors: outdoor storage (except for outdoor storage associated with florists and horticultural uses), sales and rental of motorized vehicles, towing services, sales and rental of large boats, dry boat storage, heavy commercial sales (except for fuel sales), heavy commercial services, outdoor sports and recreation, wholesale showrooms, mini-warehouse, warehouse, transportation facilities (except for rail transit facilities), utilities (except for utility service uses), and light and general manufacturing.

4. Blank facades, transparency requirements, street trees, and screening. In addition to the blank facade requirements of subsection 23.50.038.B, the blank facade limits and transparency and street tree requirements of subsections 23.49.056.C, 23.49.056.D, and 23.49.056.E, and the screening of parking requirements of subsection 23.49.019.B apply to facades or portions thereof facing streets in the pedestrian environment, except that requirements for Class I Pedestrian Streets and designated green streets do not apply.

5. Principal pedestrian entrances. A principal pedestrian entrance to a structure having a facade along Railroad Way South, First Avenue South, or Occidental Avenue South shall be located on Railroad Way South, First Avenue South, or Occidental Avenue South, respectively. If the structure has facades along both First Avenue South and Occidental Avenue South, a principal pedestrian entrance is required only on First Avenue South.
Map A for 23.74.010
Stadium Transition Area Overlay District development standards
Section 109. Subsection 23.76.060.C of the Seattle Municipal Code, which section was last amended by Ordinance 125272, is amended as follows:

23.76.060 Expiration and extension of Council land use decisions

* * *

C. Contract rezones

1. The provisions of subsection 23.76.060.C.1 apply except as otherwise provided in the Council decision on a contract rezone. A zoning designation established by a contract rezone shall expire three years after the date of the Council action approving the rezone, except as follows:

   (1) If, prior to the end of the three-year period, a complete application is filed for a Master Use Permit to establish a use on the rezoned property, the zoning designation shall not expire pursuant to this Section 23.76.060 as to the lot or lots for which the application is made so long as that application remains pending. The zoning designation shall expire immediately upon any cancellation of the application that occurs after the end of the three-year period, unless another such application filed before the end of that period is pending at the time of such cancellation;

   (2) If a Master Use Permit is issued based on an application that is sufficient to extend the three-year period under subsection (23.76.060.C.1.a.1)), then the zoning designation shall not expire pursuant to this Section 23.76.060 as to the lot or lots for which the permit is issued unless and until the Master Use Permit expires without a certificate of occupancy having been issued for any structure constructed or altered for a use authorized by any such Master Use Permit, and then shall immediately expire.
If such a certificate of occupancy is issued, then the zoning designation shall not expire pursuant to this Section 23.76.060 for that lot or lots;

((3)) c. If only a portion of the rezoned property is the subject of a particular application or Master Use Permit, then the zoning designation shall expire as to the other portions of the rezoned property at the same time as if that application had not been made or that permit not issued, as the case may be.

2. When a contract rezone expires, the Official Land Use Map is automatically amended so the zoning designation in effect immediately prior to the contract rezone applies to the subject property, except to the extent otherwise expressly provided by ordinance. The Director shall file a notice of expiration with the City Clerk and with the King County Recorder and shall cause the reversion to the former designation to be shown on published land use maps, but the expiration shall be effective notwithstanding any failure to make such filing or to reflect such expiration in any published information. Unless expressly stated otherwise in any property use and development agreement (PUDA) recorded in connection with a rezone, if the zoning designation expires as to all property subject to the PUDA, then all restrictions and requirements in the PUDA shall terminate.

3. Regardless of whether the time period for expiration has elapsed or a certificate of occupancy has been issued as described in subsection ((23.76.060.C.1.a.2))) 23.76.060.C.1.b, the zoning designation established by a contract rezone shall no longer be in effect upon the effective date of a subsequent rezoning by the Council of the subject property, either through a site-specific rezone or as part of an area-wide rezone.

a. Effective on or after the effective date of such subsequent rezoning of all property subject to a PUDA recorded in connection with the prior rezone, some or all of
that property may be released from some or all of the conditions of the PUDA if the release is authorized by ordinance. Such release may be authorized without following the PUDA amendment procedures in Section 23.76.058, except that notice and a comment period shall be provided pursuant to subsection 23.76.058.C.3. In making the decision whether to release all or part of the PUDA, the Council shall consider factors such as:

((a. whether)) 1) Whether any of the property subject to the PUDA has been or may still be developed in a manner that was permitted under the designation established by the contract rezone and would not be permitted under the subsequent rezone; and

((b. the)) 2) The extent to which any terms of the PUDA as applied to the subsequently rezoned property are relevant to the impacts of any development of that property occurring subsequent to the PUDA.

b. Effective on or after the effective date of such subsequent rezone of all property subject to a PUDA recorded in connection with the prior rezone, if the subsequent rezone is to a zone with a mandatory housing affordability suffix, the property shall be released, without authorization by ordinance, from all of the conditions of a PUDA that was accepted prior to January 1, 2016, if the Director finds as a Type I decision as part of a Master Use Permit or building permit for a development proposal that the conditions of the PUDA are limited to one or more of the provisions listed in subsections 23.76.060.C.3.b.1 through 23.76.060.C.3.b.4.

1) Provisions requiring development of the property to comply with the permit for an associated development proposal, once issued.
2) Provisions establishing limitations on maximum floor area or height.

3) Provisions regarding the termination, amendment, or repeal of the conditions in the PUDA.

4) Standard PUDA provisions, such as those dealing with recording, remedies, or legal effect, that do not establish substantive limitations or conditions on development.

* * *

Section 110. Section 23.84A.002 of the Seattle Municipal Code, which section was last amended by Ordinance 124843, is amended as follows:

23.84A.002 “A”

* * *

“Arts facility” means space occupied by one or more (not for profit) organizations dedicated to the creation, display, performance, or screening of art by or for members of the general public.

* * *

Section 111. Section 23.84A.048 of the Seattle Municipal Code, last amended by Ordinance 125267, is amended as follows:

23.84A.048 “Z”

* * *

“Zone, (single-family) single-family” (or “SF zone”) means a zone with a classification that includes any of the following: SF_5000, SF_7200, (and) SF_9600, and RSL. (Solely for the purposes of the provisions of this title that impose standards or regulations based
upon adjacency or any other juxtaposition or relationship to a single-family zone, “zone, single family” also shall include any zone with a classification that includes RSL, which classification also may include one or more suffixes.

Section 112. Section 23.86.002 of the Seattle Municipal Code, last amended by Ordinance 124803, is amended as follows:

23.86.002 General provisions

A. For all calculations, the applicant shall be responsible for supplying drawings illustrating the measurements. These drawings shall be drawn to scale, and shall be of sufficient detail to allow verification upon inspection or examination by the Director.

B. Fractions (\(\cdot\))

1. When any measurement technique for determining the number of items required or allowed, including but not limited to parking or bicycle spaces, or required trees or shrubs, results in fractional requirements, any fraction up to and including 0.5 of the applicable unit of measurement shall be disregarded and fractions over 0.5 shall require the next higher full unit of measurement.

2. When any measurement technique for determining required minimum or allowed maximum dimensions, including but not limited to height, yards, setbacks, lot coverage, open space, building depth, parking space size, or curb cut width, results in fractional requirements, the dimension shall be measured to the nearest inch. Any fraction up to and including 0.5 of an inch shall be disregarded and fractions over 0.5 of an inch shall require the next higher unit.

3. Except within Lowrise \((\text{multi-family})\) and RSL zones, if density calculations result in a fraction of a unit, any fraction up to and including 0.5 constitutes zero additional
units, and any fraction over 0.5 constitutes one additional unit. Within Lowrise (multi-family) zones, the effect of a density calculation that results in a fraction of a unit is as described in ((Table A for)) Section 23.45.512. Within RSL zones, the effect of a density calculation that results in a fraction of a unit is as described in Section 23.44.017. This provision may not be applied to density calculations that result in a quotient less than one.

Section 113. Section 23.86.007 of the Seattle Municipal Code, last amended by Ordinance 125272, is amended as follows:

23.86.007 (Gross floor) Floor area and floor area ratio (FAR) measurement

A. (Certain items may be exempted from calculation of gross floor area of a structure.) Gross floor area. Except where otherwise expressly provided in this Title 23, gross floor area shall be as defined in Chapter 23.84A and as measured in this Section 23.86.007.

The following are included in the measurement of gross floor area in all zones:

1. Floor area contained in stories above and below grade;

2. The area of stair penthouses, elevator penthouses, and other enclosed rooftop features; and

3. The area of parking that is enclosed or covered by a structure or portion of a structure.

B. Net unit area. Where development standards refer to net unit area, net unit area shall include all floor area bounded by the inside surface of the perimeter walls of the unit, as measured at the floor line. Net unit area excludes spaces shared by multiple units and accessible to all building occupants such as common hallways or lobbies. Net unit area includes any walls internal to the unit.
C. Underground floor area. Except as otherwise expressly provided in this Title 23, if gross floor area ((of underground)) in stories, or portions of stories, that are underground is exempted from a calculation, the amount of ((below-grade)) underground gross floor area exempted is measured as follows:

1. ((An underground story is that)) A story or portion of a story ((for which)) is considered underground if the ceiling above, or the roof surface if there is no next floor above, is at or below the abutting existing or finished grade, whichever is lower (See Exhibit A for 23.86.007).

2. To determine the amount of gross floor area that is ((below-grade)) underground:

   a. ((determine)) Determine the elevation of the ceiling of the underground story, or the roof surface if there is no next floor above the underground story;

   b. ((determine)) Determine the points along the exterior wall of the story where the ceiling elevation or roof surface elevation above intersects the abutting corresponding existing or finished grade elevation, whichever is lower;

   c. ((draw)) Draw a straight line across the story connecting the two points on the exterior walls;

   d. ((the)) The gross floor area ((of an underground story or portion of an underground story)) in stories, or portions of stories, that are underground is the area that is at or below the straight line drawn in subsection ((23.86.007.A.2.c above)) 23.86.007.C.2.c.

Underground floor area

Existing or finished grade, whichever is lower

Exempt floor area of portions of stories entirely below exterior or finished grade, whichever is lower

Existing floor area, whichever is lower

Underground floor area
D. Pursuant to subsections 23.44.011.C, (23.45.510.E)) 23.45.510.D, (23.47A.013.B, and 23.48.009.D, for certain structures in RSL, multifamily, commercial, and Seattle Mixed zones, portions of a story that extend no more than 4 feet above existing or finished grade, whichever is lower, are exempt from calculation of gross floor area. The exempt gross floor area of such partially below-grade stories is measured as follows:

1. 

2. 

3. 

4. The gross floor area of the partially below-grade story or portion of a partially below-grade story is the area of the story that is at or below the straight line drawn in subsection (23.86.007.B.3)) 23.86.007.D.3 above, excluding openings required by the Building Code for egress. (See Exhibit B for 23.86.007).
Exhibit B for 23.86.007
Floor area for partially below grade stories for certain structures in RSL, multifamily, commercial, and Seattle Mixed zones
((C)) E. Public rights-of-way are not considered part of a lot when calculating FAR or gross floor area allowed for residential development not subject to FAR in a downtown or SM-SLU zone except that, if dedication of right-of-way is required as a condition of a proposed development, the area of dedicated right-of-way is included.

((B)) F. If a lot is in more than one zone, the FAR limit for each zone applies to the portion of the lot located in that zone, except that, if both zones are LR zones or both zones are either C or NC zones, then the allowed total floor area may be located anywhere on the lot.

((E)) In LR zones, if more than one category of residential use is located on a lot, the FAR limit for each category of residential use is based on each category’s percentage of total structure footprint area, as follows:

1. Calculate the footprint, in square feet, for each category of residential use.

For purposes of this calculation, “footprint” is defined as the horizontal area enclosed by the exterior walls of the structure.

2. Calculate the total square feet of footprint of all categories of residential uses on the lot.

3. Divide the square footage of the footprint for each category of residential structure in subsection 23.86.007.E.1 above by the total square feet of footprints of all residential uses in subsection 23.86.007.E.2 above.

4. Multiply the percentage calculated in subsection 23.86.007.E.3 for each housing category by the area of the lot. The result is the area of the lot devoted to each housing category.

5. The FAR limit for each category of residential use is the applicable one for that use multiplied by the percentage calculated in subsection 23.86.007.E.4.
6. If the FAR limit for all categories of residential use on the lot is the same, then the FAR limit is calculated as if there was only one category of residential use on the lot.

7. FAR contained in structures built prior to January 1, 1982 as single-family dwelling units meeting the requirements of subsection 23.45.510.E.3 is not included in the calculation of the FAR limit.

F)) G. In ((the)) SM-SLU zones, the lot area used to calculate the gross floor area (GFA) allowed for structures or portions of structures subject to an FAR limit on sites that include a residential tower shall be based on the area of the lot excluding the lot area required for tower development (see Exhibit C for 23.86.007) as follows:

(Lot area - Area required for tower development) X FAR = Allowed GFA
Exhibit C for 23.86.007
Lot Area Used to Calculate Gross Floor Area
Section 114. Section 23.86.012 of the Seattle Municipal Code, last amended by Ordinance 125081, is amended as follows:

23.86.012 Multifamily and commercial zone setback measurement

* * *

C. Upper-level setback

a. Upper-level setbacks apply only to portions of structures that occur above the height at which the setback begins.

b. For upper-level setbacks required from a street lot line, the height at which the setback begins is measured at all points along the street lot line from sidewalk grade or, if there is no sidewalk, from finished grade at the street lot line.

c. For upper-level setbacks required from other lot lines, the height at which the setback begins is measured at all points along the lot line from the finished grade where the wall meets the grade or, if the structure is cantilevered or posted, where the downward projection of the portion of the structure that is cantilevered or posted meets the grade.

Section 115. Subsection 23.86.014.C of the Seattle Municipal Code, which section was last amended by Ordinance 123495, is amended as follows:

23.86.014 Structure width measurement

* * *

C. Portions of a structure that are not considered part of the principal structure for the purpose of measuring structure width are as follows:

1. The first 4 feet of eaves, cornices, and gutters that project from an exterior wall;

2. The first 18 inches of chimneys that project from an exterior wall;
3. Attached solar greenhouses meeting minimum energy standards administered by the Director;

4. The first 4 feet of unenclosed decks, balconies, and porches, unless located on the roof of an attached garage or carport included in structure width in subsection 23.86.014.B.1;

5. Arbors, trellises, and similar features; and

6. In ((Lowrise)) LR zones, portions of a structure that are exempt from FAR limits pursuant to subsection ((23.45.510.E.5)) 23.45.510.D.5.

Section 116. Subsection 23.86.015.C of the Seattle Municipal Code, which section was enacted by Ordinance 123495, is amended as follows:

23.86.015 Maximum facade length measurement

* * *

C. Portions of a structure that are not included in facade length measurement include:

1. Eaves, cornices, and gutters;

2. The first 18 inches of chimneys that project from an exterior wall;

3. Attached solar greenhouses meeting minimum energy standards administered by the Director;

4. The first 4 feet of unenclosed decks, balconies, and porches, unless located on the roof of an attached garage or carport included in structure width in subsection 23.86.014.B.1;

5. Arbors, trellises, and similar features; and

6. In ((Lowrise)) LR zones, portions of a structure that are exempt from FAR limits pursuant to subsection 23.45.510.((23.45.510.E.5))D.5.
Section 117. Subsections 23.86.016.B and 23.86.016.C of the Seattle Municipal Code, which section was last amended by Ordinance 124843, are amended as follows:

23.86.016 Structure and lot depth measurement

* * *

B. Portions of a structure considered part of the principal structure for the purpose of measuring structure depth are as follows:

1. Carports and garages attached to the principal structure, unless they are attached by a structural feature not counted in structure depth under subsection 23.86.016.C;

2. Accessory structures, other than carports and garages, that are not listed in subsection 23.86.016.C, if they are less than 3 feet from the principal structure at any point;

3. Exterior corridors, hallways, and open, above-grade walkways;

4. Enclosed porches, decks, balconies, and other enclosed projections (except as provided in subsection 23.43.008.C) and

5. Projecting segments of a facade unless they are not counted in structure depth in subsection 23.86.016.C.

C. Portions of a structure that are not considered part of the principal structure for the purpose of measuring structure depth are as follows:

1. The first 4 feet of eaves, cornices, and gutters that project from an exterior wall;

2. The first 18 inches of chimneys that project from an exterior wall;

3. Attached solar greenhouses meeting minimum energy standards administered by the Director;
4. The first 4 feet of unenclosed decks, balconies, and porches, unless located on the roof of an attached garage or carport included in structure depth in subsection ((23.86.014.B)) 23.86.014.B.1;

5. Arbors, trellises, and similar features; and

6. In ((Lowrise)) LR3 zones in the Northgate Overlay District, portions of a structure that are exempt from FAR limits pursuant to subsection ((23.45.510.E.5)) 23.45.510.D.5.

* * *

Section 118. Section 23.86.019 of the Seattle Municipal Code, last amended by Ordinance 123495, is amended as follows:

23.86.019 Green Factor measurement

A. Development standards for certain areas require landscaping that meets a minimum Green Factor score. All required landscaping shall meet standards promulgated by the Director to provide for the long-term health, viability, and coverage of plantings. These standards may include, but are not limited to, the type and size of plants, spacing of plants, depth, and quality of soil, use of drought-tolerant plants, and access to light and air for plants. The Green Factor score shall be calculated as follows:

1. Identify all proposed landscape elements, sorted into the categories presented in Table A for ((Section)) 23.86.019.

2. Multiply the square feet, or equivalent square footage where applicable, of each landscape element by the multiplier provided for that element in Table A for ((Section)) 23.86.019, according to the following provisions:
a. If multiple elements listed on Table A for ((Section)) 23.86.019 occupy the same area (for example, groundcover under a tree), count the full square footage or equivalent square footage of each element.

b. Landscaping elements in the right-of-way between the lot line and the roadway may be counted, provided that they are approved by the Director of the Department of Transportation.

c. Elements listed in Table A for ((Section)) 23.86.019 that are provided to satisfy any other requirements of this ((Code)) Title 23 may be counted.

d. For trees, large shrubs, and large perennials, use the equivalent square footage of each tree or shrub according to Table B for ((Section)) 23.86.019.

e. For vegetated walls, use the square footage of the portion of the wall covered by vegetation. All vegetated wall structures, including fences counted as vegetated walls, shall be constructed of durable materials, provide adequate planting area for plant health, and provide appropriate surfaces or structures that enable plant coverage.

f. For all elements other than trees, large shrubs, large perennials, and vegetated walls, square footage is determined by the area of the portion of a horizontal plane that lies over or under the element.

g. All permeable paving and structural soil credits together may not count for more than one third of the lot’s Green Factor score.

3. Add together all the products calculated under subsection 23.86.019.A.2 to determine the Green Factor numerator.

4. Divide the Green Factor numerator by the lot area to determine the Green Factor score.

Section 119. Section 23.91.002 of the Seattle Municipal Code, last amended by Ordinance 125399, is amended as follows:

23.91.002 Scope of this Chapter 23.91

A. Violations of the following provisions of this Title 23 shall be enforced under the citation or criminal provisions set forth in this Chapter 23.91:

1. Junk storage in residential zones ((Chapter 23.43)) (Chapter 23.44, Chapter 23.45, Chapter 23.46, Chapter 23.49 Subchapter IV, and Chapter 23.49 Subchapter VII), unless the lot contains a vacant structure subject to the vacant building maintenance standards contained in subsection 22.206.200.A and a notice of violation has been issued requiring compliance with subsection 22.206.200.F;
2. Construction or maintenance of structures in required yards or setbacks in residential zones (Chapter 23.43, Chapter 23.44, Chapter 23.45, Chapter 23.46, Chapter 23.49 Subchapter IV, and Chapter 23.49 Subchapter VII);

3. Parking of vehicles in a single-family zone (Section 23.44.016), unless the lot contains a vacant structure subject to the vacant building maintenance standards contained in subsection 22.206.200.A;

4. Keeping of animals (Section 23.42.052); and

[5. Reserved.]

6. The following violations of the Shoreline District, Chapter 23.60A:
   a. Discharging, leaking, or releasing solid or liquid waste and untreated effluent, oil, chemicals, or hazardous materials into the water (subsection 23.60A.152.R);
   
   b. Releasing debris and other waste materials from construction, maintenance, repair, or in operation or management of a property, into any water body (subsections 23.60A.152.H, 23.60A.152.I, 23.60A.152.T, and 23.60A.152.U);

   c. Conducting activity in or over water outside the allowed work windows (subsection 23.60A.152.J); and

   d. Closing required public access (Section 23.60A.164).

B. Any enforcement action or proceeding pursuant to this Chapter 23.91 shall not affect, limit, or preclude any previous, pending, or subsequent enforcement action or proceeding taken pursuant to Chapter 23.90.
Section 120. Section 25.11.060 of the Seattle Municipal Code, enacted by Ordinance 120410, is amended as follows:

25.11.060 Tree protection on sites undergoing development in (Single-family and Residential Small-Lot) single-family zones (1.2)

A. Exceptional (Trees) trees

1. The Director may permit a tree to be removed only if:

a. (the) The maximum lot coverage permitted on the site according to Title 23 (the Land Use Code) cannot be achieved without extending into the tree protection area or into a required front and/or rear yard to an extent greater than provided for in subsection (A.2 of this section) 25.11.060A.2; or

b. (avoiding) Avoiding development in the tree protection area would result in a portion of the house being less than (fifteen (15)) 15 feet in width.

2. Permitted extension into front or rear yards shall be limited to an area equal to the amount of the tree protection area not located within required yards. The maximum projection into the required front or rear yard shall be (fifty (50)) 50 percent of the yard requirement.

3. If the maximum lot coverage permitted on the site can be achieved without extending into either the tree protection area or required front and/or rear yards, then no such extension into required yards shall be permitted.

(B. Trees Over Two (2) Feet in Diameter Measured Four and One-half (4½) Feet Above the Ground.

1. ) B. Trees over ((two (2)) 2 feet in diameter measured 4.5 feet above the ground shall be identified on site plans. (2.) In order to protect such trees ((over two (2) feet in diameter))
an applicant may modify their development proposal to extend into front and/or rear yards in the
same manner as provided for exceptional trees in subsection 25.11.060.A ((of this section,
above)).

((C. The development shall meet the tree requirements of Section 23.44.008.I)))
Section 121. This ordinance shall take effect and be in force 30 days after its approval by
the Mayor, but if not approved and returned by the Mayor within ten days after presentation, it
shall take effect as provided by Seattle Municipal Code Section 1.04.020.
