Preschool and Kindergarten Programs

Forest (All Seasons)

Camp Long, Discovery Park and many Seattle parks have rich forest habitats to explore. Venture through the trees looking for clues to animal habits, hiding places, and seasonal happenings. Forest programs empower participants to feel comfortable in the outdoors.

Ponds (Spring and Summer)

Experience the freshwater habitats at Camp Long or Discovery Park. Waddling ducks, wriggling tadpoles, and dancing dragonflies are some of the creatures we may see as we explore these special places.

Beaches (Spring and Summer)

Search for the hard and the soft, the quick and the slow, and all the colors of the intertidal community at Discovery Park, Carkeek Park or West Seattle beaches.

Spiders (Fall)

Weaving webs, waiting, stalking, and pouncing: delve into a micro-world as we search for and observe spiders. Discover beautiful and fascinating spiders as we explore fields and forests. Learn web construction and spider anatomy. Spider programs allow participants to explore the natural world in a safe, hands-on manner that inspires stewardship and appreciation.

Grades First – Fifth Programs

Forest (All Seasons)

The Pacific Northwest is famous for its evergreen forests. Explore these forests and the animals that make their homes in them, at Discovery Park, Camp Long or a forested parkland near your school. This field program is an exciting, hands-on way to teach participants about forest stewardship, interdependence, the cycles of nature, and native plants.

Spiders (Fall)

Spiders are a fascinating group of animals with a bad reputation. Investigate spider characteristics and how their adaptations help humans to survive. Search the park for different types of spiders. Observe how spiders catch their food and their important role in the ecosystem. Participants explore nature and the lives of spiders in an experiential manner that inspires respect, stewardship, and curiosity.

Beaches (Spring and Summer)

Explore the saltwater beaches of Puget Sound at Discovery Park, Carkeek Park, or West Seattle beaches during low tide. Learn to find, touch, and handle, gently and safely, the unusual life forms that live between the tides. Discover the challenges of life in the tide zone and the adaptations these animals develop to survive. This field program allows students to experience a unique habitat in a hands-on manner that inspires curiosity, stewardship, and learning. Please note that scheduling for this program is dependent on tide times.

Ponds (Spring and Summer)

Experience the freshwater habitats of Camp Long or Discovery Park. Delve into the world of invertebrates and the magic of metamorphosis. Water quality and habitat essentials are explored along with the experience of seeing pond animals up close.
