

**Cheasty Project Advisory Team
Meeting #3: November 20, 2014
Jefferson Community Center
6:00-9:00 p.m.**

--MEETING AGENDA--

Meeting Facilitator: Margaret Norton-Arnold

6:00 Welcome, Overview of Meeting Agenda

--Margaret

6:05 Update on Design, Environmental, and Public Process

--Doug Critchfield and Paula Hoff, Parks and Recreation

6:20 Overview of Preliminary Trail Design

--Maggi Johnson, Johnson/Southerland

7:00 Break

7:10 Discussion and Feedback from the Project Advisory Team

- *What questions do you have about the preliminary trail design?*
- *What are the features you find particularly attractive in the design?*
- *Where do you have concerns about the trail design?*
- *What particular features of the design do you want to make certain are evaluated from an environmental aspect?*

8:15 Public Comment

8:30 Wrap-Up/Next Steps/Adjourn

Meeting Discussion Guide

At this meeting, the Project Advisory Team will be primarily focused on the preliminary schematic trail design as presented by Maggi Johnson of Johnson/Southerland landscape architects. This preliminary design will be used as the basis for an updated and more specific environmental review, which Doug is currently discussing with Environmental Science Associates (ESA), a Seattle-based environmental consulting firm.

Because this environmental review has been a high priority for a number of PAT members, we will postpone our meetings until it has been completed. Therefore, we will not hold our scheduled December 11 meeting, but will likely be meeting in January 2015 once ESA has completed their work.

A geotechnical report has also been completed by Stantech Engineering, and Maggie will be incorporating this information into her presentation.

Thanks to all of the PAT members who responded to the draft design principles/criteria we brainstormed during the October 23 meeting. Margaret has created a high-level summary of those comments, along with the “next steps” associated with the various issue areas that have emerged. That document is attached and will provides a bit of road map to the preliminary schematic design and upcoming environmental analysis.

Remember that we are meeting at the Jefferson Community Center this time: 3801 Beacon Avenue South, Seattle, 98108. We will begin the meeting at 6 p.m. and adjourn right around 8:45 or so. Look forward to seeing you on November 20!
