

LOWMAN BEACH PARK SEAWALL

PLEASE JOIN US AND LEARN MORE ABOUT THIS PROJECT.

Seattle Parks and Recreation invites the community to provide input on the preliminary design for the Lowman Beach Park seawall project. Lowman Beach Park is located just north of Lincoln Park at 7017 Beach Dr. SW, Seattle, WA 98136. The Lowman Beach Park seawall is failing and needs to be removed. As visitors to the park have seen, the existing seawall is slowly falling over/sliding towards the water. It is Seattle Parks and Recreation's goal to remove the remaining seawall and continue the shoreline restoration work that began when the south half of the seawall failed in the mid-1990s.

In May 2017, together with our design consultant, Environmental Science Associates (ESA), we presented design options. We hired ESA as the design consultant in 2018 to continue the design process that began with the feasibility study. The design will take into consideration both the habitat benefits of the seawall removal and the coastal engineering ramifications of that seawall removal. Given the design constraints of the project, the existing tennis court will be removed. A remnant of Pelly Creek that currently flows under the seawall will be daylighted as part of the project.

PUBLIC MEETING THURSDAY, FEBRUARY 28, 2019

Meeting Completed

FOR MORE INFORMATION ABOUT THE PROJECT PLEASE VISIT:
www.seattle.gov/parks/find/parks/lowman-beach-park

FOR QUESTIONS ABOUT THE PROJECT OR IF YOU NEED AN
INTERPRETER OR ACCOMMODATIONS PLEASE CONTACT:
David Graves, Strategic Advisor, Seattle Parks and Recreation
800 Maynard Ave. S, Seattle 98134
David.graves@seattle.gov or 206-684-7048
