¹Due to the three-month lag applied to the Private Equity and Real Estate asset classes and managers, the year-to-date return reflects data from October 1, 2013 - December 31, 2013.

²Inception-to-date standard deviation is calculated using quarterly data (starting with the first full quarterly return) for the aggregates and managers with inception dates prior to 4/2007 and managers reporting quarterly valuations. Monthly data was used for all other managers.

³Performance inception date for asset classes is the month/year of the earliest historical return available; for managers it is the month/year of the manager's first full month of performance available since funding.

⁴Asset class and manager 1-year returns are shown as published in each respective calendar year's fourth quarter report. These returns do not reflect any retroactive changes following publication.
