Levy to Move Seattle
Assessment Data Review and Next Steps, Pt 2
Agenda

1. Levy Assessment Schedule Overview
2. Sub-program data review
3. Oversight Committee Work Group Discussion
4. Next steps
Levy Assessment

8 of 31 sub-programs assessed as needing further review or adjustment
Sub-programs under review

• **Modal board focus areas:**
  - New Sidewalks
  - Transit-Plus Multimodal Corridors
  - Bicycle Master Plan
  - Sidewalk Safety Repair
  - Curb Ramps & Crossings

• **Levy Oversight Committee focus areas:**
  - Arterial Major Maintenance
  - Arterial Asphalt & Concrete
  - Bridge Replacement – Planning & Design
## Arterial Major Maintenance (AMM) Sub-Program

<table>
<thead>
<tr>
<th>Levy Commitment</th>
<th>Findings</th>
<th>Key Data</th>
</tr>
</thead>
</table>
| Repave 65 targeted locations every year, totaling about 70 lane-miles of arterial street, with a repair and maintenance program run by city crews. | The cost to complete this levy commitment is greater than originally anticipated. This increase reflects rising construction costs due to local market conditions and added scope for replacing curb ramps. As this work is primarily done on a “spot repair” basis, a majority of this subprogram budget needs to be allocated towards spot repairs. On average, SDOT completes approximately 38-65 spot repairs per year. | • SDOT has $40M to deliver the AMM sub-program.  
• Current estimates show that after spending $11M in the first two years of the levy, SDOT has $29M of remaining funding.  
• To deliver the original levy commitment, SDOT would need an additional $18M - $33M depending on level of concrete paving required.  
• SDOT will work with the Levy Oversight Committee to determine how this deliverable should be adjusted while staying within available funding.  
• Additionally, SDOT will implement strategies to reduce the cost for this sub-program. |
Suggested Option

Repave targeted arterial street locations based on pavement condition, cost, transit, bicycle, pedestrian and freight use, traffic volume, coordination opportunities, complaints and claims, and geographic balance across the city.

As this program has a successful track record of meeting their annual goals, SDOT will set an annual lane-mile paving target within available funding and track progress with the Levy Oversight Committee throughout the year.
## Arterial Asphalt & Concrete (AAC) Sub-Program

<table>
<thead>
<tr>
<th>Levy Commitment</th>
<th>Findings</th>
<th>Key Data</th>
</tr>
</thead>
</table>
| Repave up to 180 lane-miles of arterial streets.     | While not a formal levy commitment, SDOT published a preliminary list of paving projects during the levy outreach period in 2015. SDOT is confident that we can still meet the original levy commitment to repave up to 180 lane-miles of arterial streets within available funding but will need to revise the original project list to better reflect priorities based on pavement conditions and travel volumes. The original budget also assumed a level of leverage which is no longer considered feasible. | • SDOT has $253M - $254M to deliver the AAC sub-program.  
• Current estimates show that after spending $37M in the first two years of the levy, SDOT has $216M - $217M of remaining funding.  
• While the budget is lower than originally anticipated, SDOT can deliver 180 lane-miles of paving projects with available funding including the projects that have already been completed. |
Suggested Option

Modify the published paving project list based on standard prioritization including current pavement condition, travel volumes and unfunded paving needs on transit plus multimodal corridors to meet the commitment to repave 180 lane-miles with funds available.

This project list may need to continue to be updated to reflect the highest priorities throughout the Levy. When updated, SDOT will share with the LOC.
## Bridge Replacement (Planning & Design) Sub-Program

<table>
<thead>
<tr>
<th>Levy Commitment</th>
<th>Findings</th>
<th>Key data</th>
</tr>
</thead>
</table>
| Plan and design high-priority bridge replacements to begin construction after 2024. Of the funds identified in this element, up to $10 million of total funding (local, levy, leverage) may be used for implementing near-term pedestrian and bicycle safety projects on bridges being studied for replacement (in addition to funding provided for pedestrian and bicycle safety projects in other elements). | While not a formal levy commitment, SDOT published a preliminary list of bridge replacement projects during the levy outreach period in 2015. While SDOT does plan to meet the levy commitment, cost estimates for planning and design work are greater than originally anticipated and the original project list needs to be revised to better reflect the city’s top priorities. The original budget assumed leverage opportunities which are not available. | • SDOT has $15M to deliver the Bridge Replacement Planning & Design sub-program.  
• With this funding, SDOT will prioritize available funding to meet the levy commitment by advancing planning and design for bridges that are most vulnerable and in need of replacement |

Bridge Replacement (Planning & Design) Sub-Program

Suggested Option

1. Prioritize available funding to advance planning and design for bridges that are most vulnerable and in need of replacement. This project list may need to continue to be updated to reflect the highest priorities throughout the Levy. When updated, SDOT will share with the LOC.

2. Allocate $5 million in funding to complete near-term bicycle and pedestrian safety projects on bridges, including the Ballard Bridge.
## Sidewalk Safety Repair Sub-Program

<table>
<thead>
<tr>
<th>Levy Commitment</th>
<th>Findings</th>
<th>Key data</th>
</tr>
</thead>
</table>
| Repair up to 225 blocks of damaged sidewalks in our urban centers and villages. | SDOT has been counting “one block” as equal to one full block face of a sidewalk, or multiple small repairs totaling a typical block face (i.e. 1,500 square feet). If it continues to be measured this way, the funding allocated to this subprogram will not be adequate. A majority of the sub-program budget is and needs to be allocated towards spot repairs that make sections of sidewalk safer and are a priority for the city. On average, SDOT completes approximately 1,000 spot repairs per year. | • SDOT has $18M to deliver the Sidewalk Safety Repair sub-program.  
• Current estimates show that after spending $4M in the first two years of the levy, SDOT has $14M of remaining funding.  
• SDOT will work with the Seattle Pedestrian Advisory Board to recommend how this deliverable should be measured within available funding. |
# Curb Ramps & Crossings Sub-Program

<table>
<thead>
<tr>
<th>Levy Commitment</th>
<th>Findings</th>
<th>Key data</th>
</tr>
</thead>
<tbody>
<tr>
<td>Make curb ramp and crossing improvements at up to 750 intersections citywide</td>
<td>The cost to improve intersections is greater than originally anticipated. This increase reflects a rise in the cost for curb ramps, and that most intersections require multiple curb ramps as compared to other lower-cost improvements such as curb bulbs and/or pedestrian push buttons.</td>
<td>• SDOT has $64 – $65M to deliver the Curb Ramps &amp; Crossings sub-program.</td>
</tr>
<tr>
<td>creating accessible routes for those with disabilities and for the elderly.</td>
<td>At the current average rate of four curb ramps per intersection, this subprogram is underfunded.</td>
<td>• Current estimates show that after spending $10M in the first two years of the levy, SDOT has $54M - $55M of remaining funding.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• SDOT recommends implementing strategies to reduce the cost of designing and constructing curb ramps; and measuring crossing improvements funded by the Pedestrian Safety program to deliver this sub-program within available funding.</td>
</tr>
</tbody>
</table>
What We Heard

• **June**: Continue to share data with Levy Oversight Committee (LOC) and modal boards. LOC and modal boards begin to refine recommendations

• **July**: Modal boards finalize recommendations

• **Early August**: LOC finalizes all sub-program recommendations

• **Mid-late August**: SDOT releases draft recommendations to public

• **August 23**: LOC meeting

• **September**: Public outreach/council process

• **October**: SDOT finalizes recommendations
