NEIGHBORHOOD GREENWAY CONSTRUCTION IS STARTING

Seattle Department of Transportation
SDOT

Family friendly transportation improvements coming to E Columbia St this summer

In 2014 and 2015, we mailed project information, held two public meetings and met with interested community members to identify an east-west neighborhood greenway route. Now we are starting construction.

PROJECT FEATURES

Improve safety by reducing the speed limit to 20 miles per hour and adding about one speed hump per block.

Benefits: People driving at slower speeds see more of their surroundings and have more time avoid crashes.

Make it easier to cross busy streets for people walking and biking.

Benefits: Supports affordable, healthy travel options that get you to local parks, schools, shops and restaurants

Discourage cut-thru traffic protecting the residential character of your neighborhood.

Benefits: More neighbors walking and biking helps create a sense of community.

Neighborhood greenways are not car free zones, do not add bike lanes and have minimal if any on-street parking impacts.

CONSTRUCTION

The first phase of construction will occur between the months of July and September 2016. Here are some things to expect:

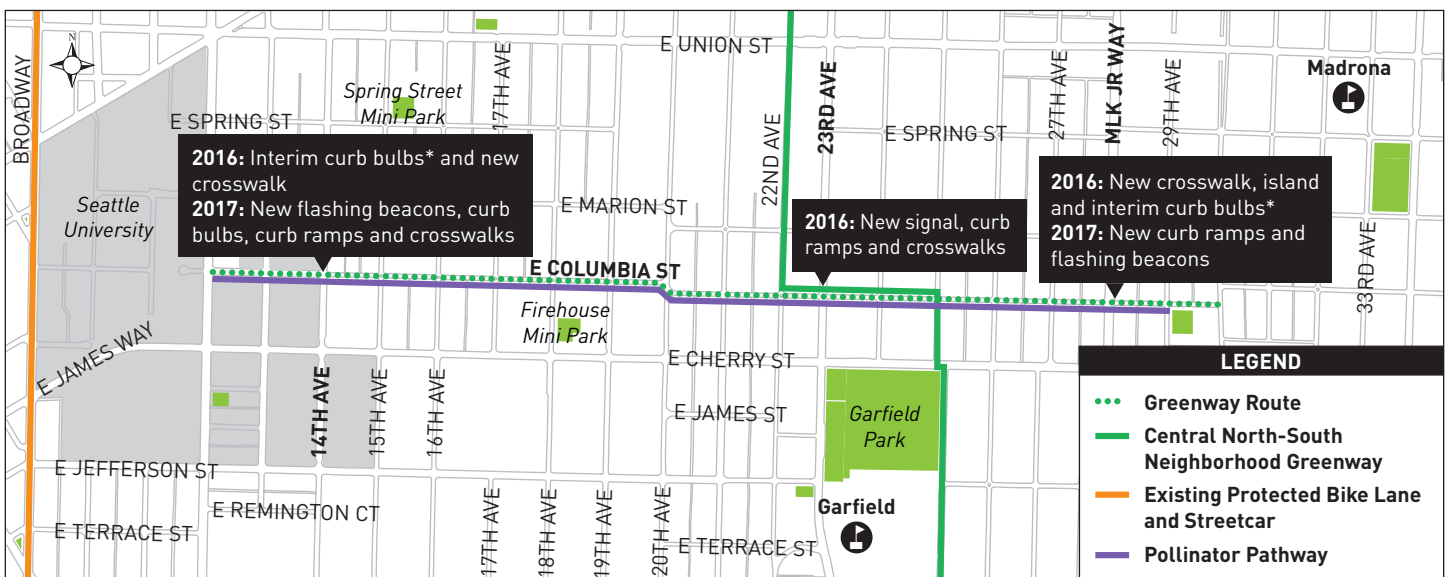

- Short term sidewalk and street closures
- Possible detours
- Tree trimming
- Noise, dust and vibration

FUNDING

This project is funded by the Levy to Move Seattle. Approved by voters in 2015, the 9-year, \$930 million levy provides funding to improve safety for all travelers, maintain our streets and bridges, and invest in reliable, affordable travel options for a growing city. Learn more at www.seattle.gov/LevytoMoveSeattle.

KEEP WALKABLE ZONE OPEN

- Trim bushes and trees
- Keep garbage bins out of the way
- Never park on sidewalks or planting strips

*Interim curb bulbs are constructed with paint and plastic posts.

Not shown on map: one speed hump per block, except on steep hills, new stop signs on streets crossing the greenway route, pavement markings and greenway signs.
