## WEDGWOOD NEIGHBORHOOD SAFETY IMPROVEMENTS

In March, SDOT hosted a public meeting and gathered valuable input on extending the 39th Ave NE neighborhood greenway in the Wedgwood neighborhood. From the input we received and the evaluation, we recommend extending the existing greenway north along 38th Ave NE, to and along NE 89th St to 32nd Ave NE. The recommended improvements (shown on the map) include traffic calming and stop signs. Not shown, but also included are wayfinding signs, sharrows, reducing the speed limit from 25 MPH to 20 MPH and pavement and sidewalk repairs.

During the analysis of the greenway extension, we also evaluated how the existing greenway on 39th Ave NE between NE 52nd St and NE 80th St was operating. Because the majority of drivers were exceeding the posted 20 MPH speed and to improve safety and comfort, we recommend installing speed humps and additional improvements, as shown on the map. Additional evaluation will occur this summer.

**Please attend our May open house. We're interested in your feedback.**

Seattle is building a network of neighborhood greenways. Neighborhood greenways are safer, calmer residential streets for you, your family and neighbors. On streets with low car volumes and speeds a greenway can:

- Improve safety
- Help people cross busy streets
- Discourage cut-thru traffic
- Protect the residential character of our neighborhoods
- Keep speeds low
- Get people to where they want to go like parks, schools, shops and restaurants
