PROJECT DESCRIPTION
Starting as soon as 2019, we’ll pave SW Avalon Way and a short segment of 35th Ave SW, following completion of the Fauntleroy Way SW Boulevard Project.

Paving projects create opportunities to improve street safety and move people and goods more efficiently in a growing Seattle.

See map on reverse.

PROJECT BACKGROUND
Arterial streets are primary routes for moving people and goods through the city and connecting neighborhoods and business districts to one another and the regional transportation network.

Each year, we pave arterial streets in poor condition to make them safer, smoother, and to extend their useful life. Keeping our transportation system in a state of good repair helps lower the cost of future maintenance.

We prioritize paving based on pavement condition, traffic volume, geographic equity, cost, and opportunities for grants or coordination with other projects in the area.
