Total Adjusted Facility Credit	0%
Rate Tier Multiplier (3)	0.00%
Final Parcel Credit (4)	0%

- Notes:

 1) The facility credit is the scaled weighted average of the percent reductions by performance target.
- 2) The adjusted facility credit is the facility credit multiplied by the percentage of total impervious area managed by the applicable facility.
- 3) The rate tier multiplier is the percentage of the customer's bill attributable to impervious area run-off. Credit is only offered for run-off managed which orginates on
- 4) The Final Parcel Credit is the rate tier multiplier multiplied by the sum of a property's adjusted facility credits (i.e., the "total adjusted facility credit"). The Final Parcel Credit is capped at 50%. The Final Parcel Credit is the credit percentage applied to the customer bill.
